## Introduction

**Resources in Education (RIE)** —A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

**Sponsor:** Educational Resources Information Center (ERIC)  
National Institute of Education (NIE)  
U.S. Department of Education  
Washington, D.C. 20208

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

**Organization of Journal:** *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with the prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

**Availability of Documents:** The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections, is to be found in the section entitled "How to Order ERIC Documents," in the most recent issue of RIE.

**How to Submit Documents to ERIC:** If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Bethesda, MD 20014. A reproduction release, giving ERIC permission to reproduce in Paper Copy and Microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility.

**How To Order RIE:** The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. The basic domestic annual subscription price is \$42.70 a year. Detailed subscription information appears on the inside front cover and on the page in the back of *RIE* entitled "How to Subscribe to *Resources in Education*."

**Descriptors**—\*Career Opportunities, Career Planning, Careers, \*Demand Occupations, \*Employment Opportunities, Females, Labor Force, Labor Market, \*Manpower Needs, Occupational Aspiration, Occupational Guidance, Occupations, Vocational Counseling, \*Working Women

**Identifiers**—Consortium of States, \*National Occupational Competency Testing Institute, Illinois

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)

**Abstractor's Initials.**

## Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

	Page		Page
AA—ERIC Processing and Reference Facility.....	1	JC—Junior Colleges.....	124
CE—Adult, Career, and Vocational Education.....	1	PS—Elementary and Early Childhood Education.....	131
CG—Counseling and Personnel Services.....	34	RC—Rural Education and Small Schools.....	140

Descriptors—\*Abstracts, Education, \*Indexes  
Identifiers—\*Resources in Education  
Resources in Education (RIE) is a monthly abstract journal which announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,500 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape data base prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for MAY 1979. (LRS/WTB)

Pub Date—Sep 78

Contract—P00-77-0435

Note—32p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, Cooperative Programs, Coordination, \*Educational Policy, Federal Aid, \*Federal Programs, \*Federal State Relationship, \*Lifelong Learning, Needs Assessment, Policy, \*Policy Formation, Program Development, State Aid, \*State Programs, Statewide Planning

This paper reports a study to determine national policy needs with respect to lifelong learning by focusing on state-level policy development, including the implications of federal policy; the arrangements for planning, coordination, and financing at the state level; the patterns created and the issues raised by these arrangements; and the alternatives for federal policy as it bears upon state activities. Section III (sections I and II are summary and introduction) reviews the federal programs in relation to their impact on states' programs. In reviewing state practices, section IV briefly notes patterns of learning opportunities supported by state appropriations. Section V describes effects on organizational patterns of existing arrangements at the state and federal levels for the support of adult learning opportunities. Coordination, an important consequence, is discussed in section VI, and section VII provides a brief review of possible planning functions. Section VIII attempts to delineate the state issues that arise from the activities, policies, and arrangements discussed in previous sections. Section IV describes alternatives for future federal action in the promoting of lifelong learning. Concluding remarks emphasize the need for investigation, reflection, and participation to bring about effective decision making in developing federal lifelong learning policies. (Author/YLB)

Identifiers—\*Missouri, Parolees

This final report of a research project to design and develop a master plan for vocational education in Missouri's correctional institutions is divided into five sections. Section 1 contains a rationale for the project and a summary of the literature regarding the role of vocational education in American penal institutions. A number of problem areas are identified. Section 2 provides a look at the Missouri prison system—its organization, the nature of its inmate population, and an overview of its vocational education program. The section also details the operations of the project. Section 3 discusses in depth the needs for vocational education in the correctional systems. A combination of interviews with prison officials, surveys conducted among prisoners, and citations in the literature are used to outline considerations which must be given to the needs of inmates, the institutions, and society in designing a vocational education system. Section 4 examines the current functioning of the Missouri prison system with regard to vocational education. In section 5 a series of fifty-one recommendations are made covering all aspects of vocational education in Missouri's correctional institutions, most of which could be adapted for use in other states' correctional systems. ment, Program Administration, Program Budgeting, Program Development, \*Supervision, Tests, Transparencies, \*Vocational Education. These six instructional units are intended to provide instructors of vocational education administration with a systematic package of materials for their programs of preservice and/or inservice instruction and to provide materials which could be reproduced for learner use. These units cover the following subject matter: (1) federal legislation affecting vocational education; (2) funding and fiscal management of vocational education; (3) advisory councils to vocational education; (4) organizational and administrative structure of vocational education; (5) administration and supervision of vocational education programs; and (6) planning vocational education programs. Since no specific sequencing is required, each unit can be used independently. The unit format includes description, goal, and objectives; resource readings; learner activities; and self-assessment and answer key. Transparency masters that were developed to facilitate the presentation of the subject matter are appended. (BM)

Identifiers—Interagency Panel Research Development Adulthood

This report contains the proceedings of four sessions of the Interagency Panel for Research and Development on Adulthood (October 1978 - April 1979): (1) Postsecondary Education Reauthorization and the Adult/Nontraditional Learner, (2) Changing Socio-Demographics in the United States and Their Impact on Social Institutions, (3) Stress and Social Support throughout the Life Course, and (4) Cross-Agency Perspectives of Research and Development on Adulthood. The panel documents (and the meeting) provided forums for exchange and coordination among federal agencies having a research and development mandate in the area of cognitive and physical adult development. The complete text is provided for three presentations: "Overview by Activities in the Reauthorization of the Higher Education," "Old Age and Family Functioning," and "Research in Mental Health and Aging." The appendix, History of the Adulthood Panel: May 1977 - June 1978, contains notes from seven meetings of the panel. Topics include Lifetime Distribution of Education, Work and Leisure; Status of Research on Adult Development and the Limits of Human Educability; Population in Retirement and Approaching Retirement: Research Issues; Identification of Learning Needs of Adults; Occupational Mobility: Implications for Adult Development; Current Activities and Future Needs; and Human Competence from a Health Perspective. This handbook for state and local education agencies is intended as a reference to assist in initiating and/or improving follow-up systems or studies of former vocational students. A companion volume focuses on follow-up studies of special populations (see Note). Section 1, which contains information on use of the handbook, also introduces the follow-up study profile around which the handbook is organized. A rationale for doing follow-up studies is presented in section 2, which discusses such related topics as definitions, issues, legislation, and decision making. Sections 3-6 comprise the steps required in designing, planning, implementing, and evaluating a vocational follow-up study or system. Specific titles are Designing and Planning Follow-Up Studies, Procedures and Mechanics for Conducting Follow-Up Studies, Data Analysis and Reporting Procedures, and Using Follow-Up Data and Studies. These self-contained sections are arranged in chronological order, although interrelated steps/activities may occur simultaneously. Other sections provide a glossary, bibliography, index, and appendixes including follow-up questionnaires and forms and sample materials. (YLB)

Identifiers—Limited English Speaking Ability

This handbook for state and local education agencies is intended as a reference to assist in initiating and/or improving follow-up systems or studies of former vocational students classified as special populations. The handbook is a complement to Evaluation Handbook: Guidelines and Practices for Follow-Up Studies of Former Vocational Students, Volume 1 (see Note). Sections 1, 2, and 3 provide a background on evaluation and followup and an overview of special populations which highlights definitional issues and defines the importance of evaluation and followup. Specific titles are Introduction: Evaluation and Follow-Up: Context, Definitions, Models, and Relationships; and Overview of Special Populations. Sections 4, 5, and 6 focus on the procedural steps required in designing, planning, implementing, and using follow-up studies (Issues and Strategies for Follow-Up of Special Populations, Procedures and Practices for Follow-Up Studies, and Using Follow-Up Data and Studies). Where appropriate, citations are made to Volume 1 and information or textual material is taken from that document to support this volume. Other sections include a glossary, annotated bibliography,

and appendixes including sample materials and follow-up questionnaires, forms, and interview guides. (YLB)

This monograph presents a compilation of research in industrial arts education from 1968 through 1979. The first section reviews studies which deal with the philosophical bases of industrial arts and which examine its historical development. The second section identifies studies that emphasized industrial arts' role as an integral component of a comprehensive human resources delivery system. The next section cites projects pertaining to the programmatic aspects of industrial arts. The development of industrial arts curriculum is investigated in the fourth section. Studies in the fifth section examine variables affecting the learning process. The next section discusses studies devoted to instructional media, methods, and materials. Studies investigating the guidance characteristics of industrial arts are found in the seventh section. The studies reviewed in the eighth section examined facility-program interaction in terms of facilities, equipment, and safety. Next, studies on evaluation are divided into four major categories: development of tests/instruments, interaction analysis, program evaluation techniques, and the effects of evaluation. The final three sections review, respectively, studies in teacher education, administration and supervision, and professional concerns. A summary chapter and bibliography conclude the document. (CT)

Descriptors—Adult Basic Education, Adult Vocational Education, Asian Americans, \*Bilingual Education, Career Counseling, Delivery Systems, \*Employment Services, \*English (Second Language), General Education, Hispanic Americans, \*Job Development, Job Placement, Job Skills, \*Job Training, Program Development, Recruitment, \*Second Language Instruction, Selection, Spanish Speaking, Unemployment, Unskilled Workers

Identifiers—Comprehensive Employment and Training Act, Limited English Speaking Ability, Program Persons Limited English Speaking Ability

This report summarizes the Program for Persons of Limited English-Speaking Ability (PLESA) which involved 47 prime sponsors providing training and employment assistance to over 6,000 persons, most of whom were Hispanic or Asian. Focus

is on lessons learned that will be useful for developing such programs. Chapters 1 and 2 discuss the background of the PLESA program and highlight the similarities and differences among the projects which improved their clients' English-speaking ability by providing English as a Second Language (ESL) training and in some cases offering occupational skills training and general education courses. Chapters 3-7 describe project planning and organization; client recruitment, selection, counseling, and training (English language and vocational); and job development and placement. Each chapter follows a standard format including a summary introduction pointing out key lessons learned from the PLESA experience and sections dealing with program components. Each section has three parts: a description of approaches used, discussion of issues raised, and list of recommendations. Chapter 8 presents an assessment of the program and a discussion of implications for future programs and policies. Findings reported show that participant job placement was only 39% and job retention was not high; however, it was demonstrated that there is a need; special services are required; and prime sponsors can mount effective programs. The appendices contain annotated bibliographies of instructional ESL materials and resources. (A report containing ten project case studies is available separately. See Note.) (YLB)

Descriptors—Cross Cultural Studies, Day Care Centers, Equal Education, Equal Opportunities (Jobs), \*Females, \*Flexible Working Hours, Foreign Countries, \*Global Approach, \*Labor Market, \*Salary Wage Differentials, Womens Education

Identifiers—\*Social Security

A study of the opportunities for women in member countries of the Organisation for Economic Cooperation and Development (OECD) is reported along with suggested policy directions for government programs. Focus is on identifying the gaps that have appeared or grown wider in recent decades between, on one hand, existing laws, policies, and

institutions, and, on the other, the aspirations of women and the reality of their working lives. A chapter is devoted to each of the following topics: (1) consequences of growing participation and changing roles of women in the labor market, (2) the problems of achieving equality of pay and employment, (3) the influences of education and training, (4) flexibility of working time and child care arrangements for working parents, and (5) the evolution of social security legislation to deal in a consistent way with men and women. In the last chapter, the main trends of member countries are identified, and measures, programs, or policies which might help member countries towards the solutions of problems facing them are outlined. Identifiers—Education for All Handicapped Children Act, Individualized Education Programs

The history of educational programming for the handicapped has unfortunately been one of quiet discrimination. This pattern has come from the evolution of an isolation-based society. Society is moving increasingly toward the human and equity-based treatment of disabled people. Reflecting some court decisions, the Education of the Handicapped Act (PL 94-142) requires school districts to redistribute their resources to provide appropriate public education to handicapped children. Although the federal government may help by putting in sufficient new dollar resources, it is primarily the problem of local and state governments. To participate in the federal program, PL 94-142 requires states to provide equal and individual education programs for handicapped students. This legislation will impact on other programming, such as vocational education for handicapped junior and senior high school students. The impact of the resistance to encouraging the participation of handicapped children in vocational education is that handicapped young people comprised only 1.74 percent of the total vocational education population as of 1975. Research in vocational education should focus on the characteristics of people who may be successfully integrated into evaluating program outcomes, job design, and modifying existing programs. Program models for handicapped vocational education students should be validated and then disseminated. (The authors' answers to questions from the audience of research and development staff are attached.) (EM)

Education, Purchasing, Real Estate, Retirement, Taxes, Textbooks, Two Year Colleges

This text for a junior college or college level course in personal finance contains five units organized around these clearly defined strategies: (1) setting one's financial goals, planning a career, preparing personal financial statements, and setting up a budget; (2) protecting one's income and assets through effective use of insurance; (3) stretching one's income by means of planning, wise use of credit, and careful purchases of automobiles, consumer durables, and housing; (4) investing income and assets; and (5) planning for the future by implementing the last three strategies (retirement and estate transfer). Emphasizing the how-to approach (a goals-strategies-implementation approach), the text includes step-by-step procedures to determine needs and to make difficult financial decisions. The format for the twenty-two chapters includes the following: informative materials, vocabulary list, questions, case problems, and recommended reading list. A Chuck and Nancy Anderson case problem series continues throughout the text and shows the interrelationships of all financial decisions. Appended materials include a consumer agency guide, social security addendum, compound interest tables, and glossary of over 600 financial terms. A teacher's guide (CE 023 969) and study guide (CE 023 968) accompany this text. (YLB)

This instructor's guide is designed to accompany the text *"Personal Money Management"* and companion study guide (CE 023 968). It is intended to assist instructors in developing their own course outlines and teaching styles to suit the particular needs of their students. An introduction offers (1) an outline of the rationale behind the somewhat unconventional approach to money management taken in the text (the how-to approach), (2) a de-

scription of the major features of the text, (3) recommended and optional course schedules, and (4) a brief summary of the elements of this guide. A combination of lectures and student involvement in class discussion is suggested as the teaching approach. Each chapter (which corresponds to a like-numbered chapter in the text) contains all or some of the following ten sections: objectives, suggested approach, sample cases, additional topics for discussion, guest lecture ideas, additional materials and activities, answers to chapter questions, answers and discussion guide for case problems, sample test questions and answers, and transparency masters. Appendix materials in several chapters consist of longer versions of some procedures in the text. (YLB)

Descriptors—Achievement, Achievement Gains, \*Adult Basic Education, Dropout Rate, Functional Literacy, Goal Orientation, \*Illiteracy, Independent Study, Individual Needs, Learning, \*Methods Research, Needs Assessment, \*Open Education, \*Program Design, Public School Adult Education, School Holding Power, Self Actualization, \*Self Evaluation (Individuals), Skill Development, Student Attitudes, Student Financial Aid, Teaching Methods, Training Objectives

Identifiers—New York  
Findings of an investigation of ten public school adult basic education (ABE) programs in New York State indicate important implications for ABE programs which foster self-directed learning. Because of the significant relationship between the fostering and student preference for self-directed learning, adult educators should plan ABE programs to encourage the fostering of self-directed learning. Perhaps due to the small number of programs studied, a lack of significance was found between fostering self-directed learning and either (1) drop-out rate or (2) length of stay. If a relationship does exist in either or both of these cases, educators have reason to design programs fostering self-directed learning. Since neither student stipends nor achievement level influences preference for self-directed learning, ABE students may need to be given more responsibility for their own learning. Use of the Self-Directed Learning Situation Reaction Instrument (SDLSRI) to assess an adult learner's preference for self-directed learning may assist ABE teachers in program design. (The SDLSRI and rating form for self-directed learning programs are appended.) (YLB)

Descriptors—\*Ability, \*Adults, \*Developmental Disabilities, \*Epilepsy, Learning Disabilities, Program Descriptions, \*Rehabilitation, Seizures, Vocational Rehabilitation

Identifiers—Rehabilitation Act 1973, West Virginia  
This three-year pilot program provided an opportunity to work intensively with a small group of severe epileptic clients in a comprehensive rehabilitation center setting. The goals of the program were not only to evaluate intensively and attempt to maximize the individual client's potential for working and living in society through the provision of multi-disciplinary services, but also to examine closely the system for providing vocational rehabilitation services in order to determine if the needs of these people might be better served. Through intensive multi-disciplinary evaluation, it was determined that most clients were less handicapped by the oc-

currence of seizure activity than they were by deficits in the areas of learning, communication, perception, dexterity, interpersonal skills, and, most of all, behavior. Major accomplishments were the documentation of the multiple problems which handicap these people, the development of a method of evaluating these problems through intensive inter-disciplinary programming, the demonstration of the merit of various intervention methods upon behavioral problems, and the formulation of a model in which a comprehensive vocational rehabilitation facility can expand its services. Identifiers—University of Oklahoma

A study explored reasons chosen by adults for returning to college and their perceptions of their attainment by reviewing the literature and surveying graduates of an off-campus degree program. Review of prior studies led to the expectation that there would be two main groups of reasons: job-related and personal enrichment. Baccalaureate degree in liberal education (BLS) graduates of the College of Liberal Studies, a unit of the University of Oklahoma, were surveyed using a specially developed BLS Program Review Questionnaire-BLS Graduates. The instrument surveyed demographic and motivational data of adult students, with two scaled questions selected for factor analysis: (1) importance of certain goals at time subject decided to obtain degree and (2) goals reached by obtaining the degree. Subparts of these questions were identified as components of one of three factors—personal enrichment reasons, expectations of new career or degree changes, and expectations of present job changes. Results of regression analysis confirmed that those who sought one of these three specific changes reported that change as a result of participation in the degree program. A preferred explanation for this finding was that the degree program, flexible and individualistic, could respond successfully to any number of individual goals. (YLB)

Identifiers—United States, Vocational Education Act 1963

Vocational education is a major component of our educational systems at the secondary and post-secondary school level. The passage of the Vocational Education Act of 1963 broadened the definition of vocational education from training people for specific occupations to developing human potential and long-term employability. How-

ever, due to the impact of industry and labor on vocational education legislation, most vocational programs tend to be related to specific jobs and job titles. It is important to identify the components of a specific job and each component's importance as well as evaluate the relevance of current vocational programs. Job analysis serves this dual function. The crucial step in job analysis is task analysis (a list of tasks that constitute the steps to performing a job). Since 1973, the United States Department of Defense has used the Comprehensive Occupational Data Analysis Program (CODAP) computerized system to organize, analyze, and report occupational information. Many of the methods and procedures used in the CODAP have been adapted in the development of the Vocational and Technical Education Consortium of the States (VTECS). Job and task analysis, particularly the capabilities of computerized systems, have implications for vocational program planning and evaluation. For example, task analysis may serve as a basis for curriculum planning and criterion-referenced student performance measures. Also, the task analysis approach for vocational education evaluation provides outcome measures to examine program cost-benefits. (EM)

Identifiers—Pennsylvania

This report on vocational training agreements and plans in Pennsylvania presents a uniform and systematic approach to formalize the relationships between vocational educators and employers in providing students with on-the-job training. First, the report briefly covers the purpose of formalizing on-the-job learning experiences, training agreement, training plan, and training activities, including some examples. The remaining two-thirds of the content is devoted to a listing of training activities offered in Pennsylvania schools for occupations under the following U.S.O.E. occupational titles: trade and industrial, technical, health, agriculture, gainful home economics, business education, and distributive education. Samples of a training agreement and training plan are appended. (EM)

Identifiers—Education Amendments 1974, University of Denver CO  
During the first year of a career education project, the University of Denver integrated career concepts into the programs offered by 10 of the 23 liberal arts

departments. The departments were Mathematics, English, Political Science, History, Sociology, Philosophy, Mass Communications, Theatre, Physics, and Anthropology. Program goals were to provide students with counseling assistance and information on job opportunities related to their academic major. The programs designed by each of the 10 departments reflect the nature of the discipline, student needs, and the level of faculty awareness. The varied departmental approaches to implementing career education into the curriculum included student career handbooks, seminar courses, alumni surveys, internships, and class projects. Three of the departments proposed specific curriculum revisions as part of their plan to integrate career education with the traditional academic program. In addition to philosophical problems, there were operational problems in introducing career education concepts within the liberal arts setting, such as heavy faculty workloads. The University instituted a major organizational change to support the project while the departmental programs drew upon community resources to reinforce the University/community linkage. (The appendix comprising approximately three-fourths of this report includes the following: Havelock's Dissemination Model, Mathematics/Computer Science alumni questionnaire with survey results, Mathematics Career Handbook, History Career Handbook, English career advising survey instrument with results, and two papers presented by Kenneth Hoyt: Paradoxes and Potential for Career Education in Higher Education, and Some Thoughts on Career Education and the Liberal Arts.) Lifelong learning should be viewed only as a master concept for education—the principle on which overall organization of the system is founded—to improve the individual's quality of life. A literature search found confusing definitions of lifelong learning, global implications of the concept, and little information about what the public needs and wants to support this view. The lifelong learning provisions of the Higher Education Amendments of 1976 concentrated on the adult population, yet the states vary tremendously in their commitment to adult learners. Special attention should be given to the 52 million adults who have not completed high school; educational alternatives for this group should be explored, especially those that might be offered by postsecondary institutions. The lifelong learning cycle should start with the 16 million three- to sixteen-year-olds, then the 20 million adults who have less than an eighth grade education, then the others who are at poverty level, then the remainder who have less than a high school education, and finally those who are registered in schools and higher education institutions. All adult education programs should be coordinated, from adult basic through higher education, under one umbrella—Adult Basic and Continuing Education at the federal level. (MEK)

Descriptors—\*Career Development, Career Education, \*Career Planning, \*Parent Child Relationship, \*Parent Influence, Parent School

Relationship, Parent Teacher Conferences, \*Parent Workshops

The purpose of this study was to design and implement a school-based career development workshop for parents. Analysis of the impact of that treatment on the career maturity of their children who were seniors in high school was the central concern. In order to improve parents' abilities to communicate effectively with their children concerning career planning, it was hypothesized that the seniors whose parents participated in a career development workshop were likely to display more growth in career maturity than those whose parents did not participate. The subsidiary thesis was that parents would manifest interest in and benefit from a career development workshop. The results of the study did not support the first hypothesis. The parents did, however, demonstrate an interest in and a desire for more career development information. (LRA)

Identifiers—Energy Education

To provide postsecondary vocational educators with a comprehensive understanding of environmental quality and energy conservation and their relevance to all occupational fields, a project designed a generic curriculum model for postsecondary adult and vocational education and developed documents describing the model. In developing the model, a conceptual framework was used that focused not only on energy resources and technologies, but also on understanding relationships between energy conservation and environmental quality and human need satisfaction. Seventeen content areas were specified and organized into four documents—orientation guide, curriculum content model, resource book, and application guide. (They are also available separately as ED 178 323.) Other activities included development of a knowledge base regarding specific programs into which the model could be integrated, and information dissemination. Evaluation involved an advisory panel review of the appropriateness of the project's approach, educators' review of the documents, and workshop review by classroom instructors. It was concluded that the model provided an effective starting point for staff development activities (inservice or preservice training) and for educator development or use of energy conservation-related materials. (Appendixes, amounting to approximately one-half of the report, include a Teacher's Energy Guide developed by a community college instructor.) (YLB)

Descriptors—\*Academic Achievement, Adult Basic Education, \*Adult Reading Programs, Enrollment, Functional Reading, Illiteracy, Literacy Education, Program Descriptions, Program Evaluation, \*Reading Instruction, Reading Skills, School Holding Power, \*Student Recruitment

Identifiers—Kentucky (Jefferson County), Wood-

cock Reading Mastery Test

Through the Jefferson County Adult Reading Project, 293 students functioning at a 3.9 reading level and below attended reading classes. Test results demonstrated the growth in educational advancement while retention rates and growing enrollment showed other measures of success in the project components. The Word Identification, Word Attack, and Passage Comprehension sections of the Woodcock Reading Mastery Test, Forms A and B, were used as pre- and post-tests to collect statistical data. Gains were reported per thirty hours of instruction. Recruitment techniques used were intended not only to recruit students but also to create community awareness of the problems of adult illiteracy. The basic reading program chosen for use by the teacher (three were used in the project) was not shown to have a statistically significant effect on academic gains. Analysis of test scores indicated that (1) students completing more grades in school and those with the least amount of time lapsed between termination of formal schooling and enrollment in the program showed greater gains; (2) there was no significant difference between scores by males and females; (3) class time and day had no effect on student gains; and (4) as the number of instructional hours increased (hours attended), the gain increased. (Project information, including recruitment materials and data and enrollment and attendance data, are appended.) (YLB)

Identifiers—University of Hawaii Community College System

To develop a competency-based curriculum guide for merchandising/marketing for the University of Hawaii Community College System, a project (1) reviewed and developed a list of all occupations in the general merchandising/marketing program area, (2) developed task inventories for selected occupations, (3) drew a worker mobility chart to show the basic hierarchy of occupations in the program area, and (4) developed competency-based instructional materials. (The curriculum guide is available separately as CE 024 405.) The program advisory committee reviewed the occupations and selected three major clusters for which task inventories were developed: stock/receiving/shipping, display/buying/sales, and supervisory/management. Employers and employees surveyed by means of a background information sheet and the task inventories indicated tasks performed and time spent on each task. Findings indicated that the task list identified tasks performed by experienced workers, while the occupations selected in the general merchandising/marketing program area were primarily entry-level positions. The percentage of associate degree holders in each of the occupational clusters was small, indicating a need to determine why community college graduates are not employed in their vocational areas. (Appendixes, amounting to approximately one-half of the report, include the survey instruments.) (YLB)

 Identifiers—University of Hawaii Community College System

Designed for the curriculum coordinator, this guide provides guidelines for planning postsecondary merchandising/marketing programs. The first section contains competencies identified as essential for occupations in the merchandising/marketing field which are listed by these subject areas: selling, merchandise analysis, wholesaling, marketing, advertising/display, and retailing. Contents of the second section are course abstracts for business courses in selling, advertising/display (three modules), marketing, and retailing. Each course abstract contains the following information for each of the listed competencies: topics, content, instructional areas; activity experience; and evaluation correlated with the competency. The guide also provides job descriptions for certain identified career opportunities and a worker mobility chart. (A final report of the project which developed these materials is available separately as CE 024 404.) (YLB)

This junior high/middle school career exploration implementation manual is designed to assist in implementing a comprehensive career exploration program using four career exploration components developed in the Improving Career Exploration project. The first of six sections addresses career exploration and career/vocational development. Basic implementation information is provided in section 2 including discussions of planning, inservice, community resources, and evaluation. Section 3 presents the four career exploration components: (1) using the Iowa Career Education Project, (2) using the career information system of Iowa, (3) using Project Discovery, and (4) using the community school program. Involving handicapped students is addressed in section 4. The fifth section discusses two modes of exploration and the roles of guidance and counseling. A final section lists additional resources.  Identifiers—College for Living, Metropolitan State College CO

This packet contains information and materials for conducting a training workshop for working with adults who are developmentally disabled. The materials are specifically designed to train volunteer teachers in the College for Living (CFL) program, which supplements residential programs in and around Denver and aids institutions in orienting institutionalized persons to eventual integration into the community. Following a workshop agenda (section 1), section 2 provides job descriptions of CFL staff. Section 3, Requirements for Teaching in the CFL, contains a list of requirements, sample instructor materials, and management and first aid suggestions. The fourth section briefly discusses the history, present, and future of developmental disabilities. A list of definitions and a series of articles comprise section 5, on definitions and philosophies. The largest section, section 6, deals with teaching materials and techniques. It contains model lesson plan formats and articles on curriculum development, learning theory, instructional material selection and adaptation, instructional and performance objectives, role play, teaching reading to adults, classroom management, and teaching strategies and methods of instruction. Section 7, Taking Care of You, The Volunteer, includes materials dealing with assertive behavior and management skills. (A curriculum guide for fourteen courses and individual course guides are available separately. See note.) (YLB)

 Identifiers—College for Living, Metropolitan State College CO

This curriculum consists of fourteen courses based upon basic life problems which are designed to provide volunteers in the College for Living (CFL) program with materials to teach survival skills to developmentally disabled adults. CFL is intended to supplement residential programs in and around Denver and aid institutions in orienting institutionalized persons to eventual integration into the community. Each course consists of objectives, concepts, and appropriate activities for the volunteers to use. Management procedures for individualizing the curriculum include (1) pre-testing the students to determine the level at which they will enter the program, (2) selecting relevant materials for them at their individual levels to meet their needs, (3) post-testing, and (4) determining the level at which they will enter the next course. Topics for the courses include Keeping Healthy, Living Safely, Homemaking and Family Living, Understanding Oneself and Getting Along with Others, Understanding the Physical Environment, Appreciating and Creating Beauty, Being a Responsible Citizen, Leisure Time, Earning a Living, Traveling, Money Management, Human Sexuality, Communicating Ideas, and Field Trips and Extended Experiences. (A volunteer training workshop packet and individual course guides are available separately. See note.) (YLB)

Identifiers—College for Living, Metropolitan State College CO

One of twenty course guides in the Community Living Skills Guide for the College for Living series, this document provides guidelines and workbook activities for the course, Art. The series of courses for developmentally disabled adults is intended to supplement residential programs and to aid in orienting institutionalized persons to eventual integration into the community. An introductory section, Notes to Teachers, give suggestions for using the ideas in the guide. A "talent" test is provided to assess students' ability, desire to experience and learn, and previous exposure. Goals for the course include providing the student with the opportunity to get in touch with his inner being or self and to make choice individually. Objectives and suggested activities are provided for these sections: General Introduction, Making Order Out of Life (Patterns), and Simple Projects. Ideas are also given for projects and activities in constructing, carving and modeling, crafts, and drawing and painting. Materials needed, techniques, and concepts are outlined. Other guides in the series and related documents (a volunteer training workshop packet and curriculum guide for fourteen courses) are available separately. (See note.)

Identifiers—College for Living, Metropolitan State College CO

This is one of twenty course guides in the Community Living Skills Guide for the College for Living series which provides guidelines and workbook activities for the course, Beginning Woodworking, Use of Basic Hand Tools and Shop Safety. The series of courses for developmentally disabled adults is intended to supplement residential programs and to aid in orienting institutionalized persons to eventual integration into the community. This course of study focuses on safe and proper use of hand tools and shop safety, with an introduction to mass production techniques. It is intended to help the students develop safe working practices, skills necessary to use hand tools, an interest and appreciation for woodworking, a knowledge of leisure time activities in woodworking, and an awareness of job opportunities in woodworking. The course is based on this four step outline: (1) orientation and pre-test (making a breadboard), (2) making a mirrored wall shelf and book/record rack, (3) introduction to mass production techniques in industry, and (4) a personal project. These materials are provided for each step: terminal and performance objectives, homework assignments, plans of procedures for the projects, and suggested activities. A sample twelve-week syllabus and course outline are provided. Other guides in the series and related documents (a volunteer training workshop packet and curriculum guide for fourteen courses) are available separately. (See note.) (YLB)

One of twenty course guides in the Community Living Skills Guide for the College for Living series, this document provides guidelines and workbook activities for the course, Nutrition I. The series of courses for developmentally disabled adults is intended to supplement residential programs and to aid in orienting institutionalized persons to eventual integration into the community. The goal for the course is for the student to gain a working knowledge of nutrition and how it affects people. More specific student objectives include (1) to identify four basic food groups by placing food modules in appropriate groups, (2) to discriminate between junk foods and nutritious foods by multiple choice, and (3) to plan a balanced meal. Following a pre-post test are class activities, teacher notes, and homework assignments for nine "steps" which follow this outline of topics: nutrition, vitamins and minerals, protein, dairy group, bread and cereal, fruits and vegetables, snacks, reviewing nutrition, and broadening one's tastes. Other materials include a vocabulary list, nutrition chart, and extra class activities. Some additional activities for this and related courses are available as CE 024 478. One of twenty course guides in the Community Living Skills Guide for the College for Living series, this guide provides guidelines and workbook activities for the course Reading II. The series of courses for developmentally disabled adults is intended to supplement residential programs and to aid in orienting institutionalized persons to eventual integration into the community. Goals for the course include for the student to read more effectively and fluently, to understand and enjoy reading, and to demonstrate abilities in practical, survival reading. Following an assessment instrument (The Graded Word List: Quick Gauge of Reading Ability), objectives and activities are given for twelve "steps" which follow this outline: literal meaning of words, sentences, short articles, finding the main ideas; details; following instructions; relationships-comparisons; predicting outcomes/references; use of figurative language; conclusions; cause-effect; classification; appreciation skills; and listening skills. Additional activities for this course and Reading I (CE 024 485) are suggested. Other guides in the series and related documents (a volunteer training workshop packet and curriculum guide for fourteen courses) are available separately. (See note.) (YLB)

One of twenty course guides in the Community Living Skills Guide for the College for Living series, this document provides guidelines and workbook activities for the course, Traveling II. The series of courses for developmentally disabled adults is intended to supplement residential programs and to aid in orienting institutionalized persons to eventual integration into the community. Goals for the course are for the student to gain confidence in using public transportation and to develop confidence in self as a resource. More specific objectives include the student's (1) riding a bus to a given point independently, (2) following a map to a given point, and (3) showing steps needed to take a bus by demonstration. Contents include an evaluation tool and outlines with suggested activities, discussions, and field experiences and trips for the twelve steps in this course: skills needed to ride a bus, methods of transportation, on a bus, review, how to find your way, reading maps, common sense rules, expand and explore, walking, walking and using a map with teacher, going for a walk with friends, and going by bus alone. Other guides in the series and related

documents (a volunteer training workshop packet and curriculum guide for fourteen courses) are available separately. (See Note.) (YLB)

This manual on air conditioning is one of a series of power mechanics texts and visual aids covering theory of operation, diagnosis, and repair. Information is presented for use by vocational students and teachers as well as shop servicemen and laymen. Focus is on air conditioning systems for mobile machines, but most of the information also applies to automotive systems. Eight chapters included in the manual are designed to train readers so that they can understand and service air conditioning systems with speed and skill. Chapter titles include (1) Basics of Air Conditioning; (2) Refrigerants and Oil; (3) Basic System: How It Works; (4) Service Equipment; (5) Inspecting the System; (6) Diagnosing the System; (7) Testing and Adjusting the System; and (8) Preparing System for Service. Many illustrations are included and each chapter concludes with test-yourself questions. A glossary and the answers to the test questions are appended. (A supplementary 35mm color slide set is also available—see availability note.) (LRA)

This general curriculum model for adult and continuing education courses offers theoretical and practical models that provide a framework within which adult educators can make informed decisions about curriculum planning. Chapter 1 introduces the general curriculum model and its various elements. The following five chapters describe and explain the five major elements in the model: rationale (sociocultural factors, psycho-philosophical factors), outside political forces (governmental and private agencies and interest groups), goals, instruction and content organization, and evaluation. Designed to assist those faced with building a curriculum in

making the transition from a theoretical model to actual curriculum work, the concluding chapter of the book offers some ideas on the application of the general model and various elements for use by the practicing adult education curriculum worker. (Author/YLB)

The Community, The County Prison and You... A Study of the Involvement of Community Agencies in County Correctional Programs. A 309 Adult Education Special Project.

Lancaster-Lebanon Intermediate Unit 13, Lancaster, Pa.

Pub Date—16 Jun 76

Note—38p.; Photographs will not reproduce well. Available from—Lancaster-Lebanon Intermediate Unit, 1110 Enterprise Rd., East Petersburg, PA 17520 (\$1.50).

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Adult Education, \*Community Involvement, Community Organizations, \*Correctional Education, \*Correctional Institutions, County Programs, Institutional Environment, Local Government, Prisoners, Public Relations

Through description and discussion of the county prison's setting and potential for adult education, this booklet presents guidelines for successful correctional services. (It was designed as a supplement to a community-centered county correctional workshop.) An introductory section describes the prison setting including regulation of Pennsylvania county prisons, classification of prison populations, and description of the typical county jail (problems, policies, philosophy, etc.). Adult education in county prisons is discussed from the standpoint of the problems of inmates, educational procedures peculiar to prison environments, and suggested curriculum possibilities. Notes on counseling services list types of client crises and types of counseling needed. Under "Vocational Programs" the unemployment syndrome, vocational screening systems, and various types of occupational training opportunities are described. The need for promoting public awareness is emphasized in the section on community involvement followed by an outline of contacts which potentially have something to offer any county prison in terms of services. Topic headings are education programs, business and industry, local government officials, federal and state agencies, and local and municipal services agencies. A final section on challenges discusses federal, state, and local funding sources with notes on making programs work. (JT)

Design, Development, and Evaluation of Career Education Materials for Adult Farmworkers with Limited English-Speaking Ability Who Return to Formal Education. Final Report, Volume I.

California Univ., Santa Barbara.

Spons Agency—Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C.

Report No.—498AH70019

Pub Date—May 79

Grant—G007701372

Note—197p.; For related documents see CE 024 589-590.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC08 Plus Postage.

Descriptors—Adult Education, \*Adults, \*Agricultural Laborers, \*Bilingual Education, \*Career Education, \*Curriculum Development, Occupational Aspiration, Occupational Information, Participant Satisfaction, Program Effectiveness, Program Evaluation, Self Concept, \*Spanish Speaking, Vocational Maturity

A project was conducted to design, develop, and evaluate the effectiveness of bilingual (Spanish and English) career education materials for adult farmworkers with limited English-speaking ability. A career education manual, a series of audio- and video-taped interviews with former farmworkers employed in various job cluster areas, and a curriculum guide incorporating the manual and taped interviews were developed and field-tested. Volunteer adult farmworkers attending one of two existing education programs were assigned to either a career education class (utilizing the above curriculum materials) or a waiting list control group. A pretest control group experimental design was used

to evaluate the impact of the course on each student's knowledge of career information, realistic career alternatives, educational and vocational aspirations/expectations, career maturity, and self-esteem. Results of field-testing at both sites indicated that the amount of career information obtained by the students in the career education course was significantly greater than the control group students. The career education course did not appear to have a similar positive effect on the other major dependent variables. The students, however, did indicate that they were very satisfied with the utility, helpfulness, clarity, and realism of the course. (Author/BM)

This document contains the curriculum guide and the first seven monographs of the career education manual which was developed to assist the instructor in presenting a career-awareness course to adult, limited-English-speaking farmworkers. (The last nine monographs of the career education manual are found in CE 024 590.) The curriculum guide is divided into three sections. The first section is composed of four introductory units designed to enhance student self-awareness; the second section is composed of fifteen career cluster units intended to acquaint the student with information about career areas. Unit objectives, content information, and motivational exercises are included with each unit. The third section includes instructor notes keyed to each unit. The career education manual contains career monographs written at the 5th-grade reading level in both English and Spanish to facilitate comprehension for persons with limited reading ability. The seven monographs included in this document provide information on occupations in the areas of agriculture, manufacturing, marketing/distribution, consumer/homemaking, public service, and personal service. The guide and the career education manual have been used successfully with persons aged seventeen and upward during 1978-79 at two cooperating sites in California. (See CE 024 588 for final project report.) (BM)

Descriptors—\*Business Education, Business Education Teachers, Core Curriculum, Graduate Study, Higher Education, Inservice Education, \*Inservice Teacher Education, \*Models, Postsecondary Education, \*Preservice Teacher Education, Teacher Certification, Work Experience, \*Work Experience Programs

A comprehensive work experience model based on demonstrated competence in a business or office occupational area was developed for training or retraining vocational education teachers in Ohio. Developed to meet occupational certification requirements within pre-service and inservice professional courses, the model addresses the needs of individuals with little or no occupational work experiences as well as those who, though certified, need to keep updated in their specialty area. Utilizing a core curriculum format, the model provides for three alternative program strands, each available on the undergraduate, graduate, and inservice levels. The three strands are categorized by no occupational experience, minimal occupational experience, and occupational experience of one year or more. The model may be incorporated into existing independent study courses or by use of a three-course format: Introduction to Work Education (three credit hours), Business Seminar-Work Observations (three credit hours), and Business Internship-On-the-Job Training (one to six credit hours). (A step-by-step procedure for each program strand and a definition of terms section are included in the model.) (MEK)

Identifiers—New York (New York)

A study surveyed New York City adults to collect information covering six major areas: background information, past participation in continuing education activities, expressed learning interests, obstacles to and preferred conditions for participation, and potential for utilization of counseling and advising services for adults. The survey interview instrument was developed by staff of the Institute for Research and Development in Occupational and Continuing Education at Cornell University. Adults studied were categorized by activity in educational activity: little, some (potential), some (present), and high. Findings indicated that (1) the majority felt they have spare time; (2) participation in educational activities was ranked tenth among twelve options for leisure time; (3) adults ranked educational activities as fourth among activities they would pursue if they had more time; (4) those who would spend additional time on education are generally more interested in vocational and academic subjects than are other adults; (5) six out of ten adults are not involved in educational activities in a typical week,

over one-half of them have never done so, and they are more likely to be male, older, and have less formal education; (6) adults who indicated the high level of regular involvement have the most formal education; and (7) barriers to learning indicated by adults with little time include child care and home and family responsibilities. Descriptors—\*Cooperative Education, \*Demonstration Programs, \*Disadvantaged, Economically Disadvantaged, Educationally Disadvantaged, National Surveys, Postsecondary Education, Questionnaires, Secondary Education, Staff Utilization, Student Evaluation, \*Student Placement, \*Vocational Education

Identifiers—\*Mainstreaming the Disadvantaged

The study identified characteristics and innovative approaches employed by exemplary vocational education programs in serving the disadvantaged in co-op, self-contained, and mainstreamed settings (secondary, postsecondary, and adult levels). Forty-one states, three territories and the District of Columbia responded to the request for three program nominations; sixty-seven responses were received from questionnaires mailed to directors of programs so nominated. Findings related to identification and assessment are (1) achievement tests are used as a primary source of client identification; (2) all programs (except mainstreaming) use attendance records as another identification means; (3) academically disadvantaged students (defined as one year or more below reading or math level) are more easily identified than the economically disadvantaged due to confusing definitions, and therefore more frequently selected; (4) there seems to be no widely used means of measuring student achievement for initial assessment but teacher-made assessments seem to be widely used for ongoing evaluation; and (5) principal uses of identification information are in determining support services, modifying or adjusting curriculum, and planning specific instructional services. With respect to programming, two conclusions are made: (1) secondary enrollments have held steady over 1975-78, but adult and postsecondary are rapidly increasing, and (2) a large percentage of the programs attempt to mainstream their disadvantaged learners into regular vocational classrooms. The major staffing conclusion was that exemplary programs seem to be well organized and conduct followup activities yearly. (Profile sheets on all sixty-seven programs, organized by type of program, comprise over 160 pages of the report.) (MEK)

Descriptors—\*Adult Basic Education, \*Adult Educators, Comparative Analysis, \*Personality Traits, \*Student Teacher Relationship, \*Teacher Attitudes, Teacher Characteristics, \*Teacher Orientation

Identifiers—Professional Activity Inventory, \*West Virginia

A study was conducted to (1) establish the subject or student orientation of adult basic education (ABE) teachers and non-ABE teachers in West Virginia and (2) identify the degree to which certain biographical and educational characteristics may be related to their orientation. Data for the study were based on responses of forty-one ABE instructors and ninety-eight non-ABE instructors who were given the Professional Activity Inventory for College Teachers. Findings of the study indicated that the group of ABE teachers are no more student-oriented than the group of non-ABE teachers. Sin-

gle non-ABE teachers were found to be significantly more student-oriented than single ABE teachers. (Summary data tables are appended.) (LRA)

Descriptors—Cognitive Development, \*Experiential Learning, Humanistic Education, \*Individual Development, \*Individual Needs, \*Industrial Arts, Industrial Education, \*Multisensory Learning, Psychomotor Skills, Secondary Education

The holistic nature of the human experience and the reality of human functioning need to be considered by the industrial arts profession; an overemphasis on psychomotor functioning to the exclusion of affect and cognition, will ultimately win the profession neither acceptance nor effectiveness. The nature of learning involves a range of inter-related factors which tie in well with industrial arts activities, which by nature are also multi-sensory. Moreover, we know that personal outcomes are greatly enhanced when these experiences are first hand and actively experienced by the learner. Therefore, the industrial arts laboratory should be utilized not as a shop in which one makes things, but rather as a laboratory of diverse facilities associated with life, industry, and technology, functioning to serve as a living-learning environment for the development of the total person. The effective teacher attempts to establish connections or linkages between class or laboratory activities and individual student frames of reference. (Five recommendations are made as to how the profession can enhance the development of the whole person.) (MEK)

Identifiers—Project Drive

This Project Drive Teacher's Manual complements eight booklets designed for intermediate-level English-as-a-second-language students and low-level adult basic education/basic reading students. The goal of the booklets is to aid the student in developing the oral and sight vocabulary necessary for a basic driver training program. The guide begins with an example of suggested structure drills to be used with the booklets. The bulk of the guide is comprised of answer sheets for each exercise, pretest, and posttest included in the booklets. The guide concludes with a listing of supplementary materials that might be useful to include in a basic driver training program. (LRA)

Identifiers—\*Women's Educational Equity Act

This report contains the following information in regard to the Women's Educational Equity Act: a brief description of the original and reauthorizing legislation, analysis of grant applications received and funded in the 1979 fiscal year, summaries of grant and contract awards for the fiscal year, and identification of products developed under project funding to be disseminated. Data presented in the statistical summaries of program efforts for fiscal 1979 include an analysis of applications received and grants awarded in terms of distribution by HEW region, levels of education, type of applicant, major target groups, special population groups, type of grant activity, and special academic areas. The summary of grant and contract awards for the fiscal year reflects the Act's support of a broad range of activities that target areas of education which perpetuate sex bias toward the purpose of providing educational equity for women. Information provided in the descriptions of grants and contracts awarded includes title, institution, grant amount, duration, director, and brief description with objectives. A list of publications developed under the Act's contracts is also included. (YLB)

Identifiers—Word Processing

A project investigated the use of self-paced modules to increase the sophistication of financial management, health economics, and quantitative methods as taught in graduate programs in health services administration. The first major activity of the project was a national workshop devoted to (1) developing and sharing modules; (2) using modern word processing technology to develop, maintain, and share modules; and (3) using the modules in the self-paced mode of instruction. Additional activities of the project included counseling sessions at some of the participating universities and working with modern word processing equipment. The major conclusions drawn in the project were that these teachers agreed with the potential usefulness of a large number of such modules and agreed that through collaboration they could develop, exchange, and produce the modules, but that there was not an existing, natural mechanism to cause them to collaborate. A major recommendation of the project was that a national center be established to stimulate and coordinate the development, maintenance, distribution, and use of the modules.

Focusing on five possible transition points in a woman's career, these five symposium papers explore some major problems that women encounter in career and job transitions and present existing and potential solutions and the extent to which women develop skills and abilities in one setting that are transferable to another situation. Priscilla Elfrey, Transition Point I presenter (initial entry), discusses the importance of power, including competence, confidence, and connections, in helping women obtain, progress, and change their jobs and careers. Carol Eliason, Transition Point II presenter (re-entry), stresses the need for women re-entering the work world to validate life skills. Joan Humphries (Transition Point III) suggests counseling/career services, training programs, educational and employment practices, and applied research activities to help women assess their career progression during this period of career advancement. To help women achieve upward mobility, Corrine Rieder, Transition Point IV presenter (job mobility), recommends two perspectives: an academic approach and a more personal experiential approach. Phillip Randall, Transition Point V presenter (pre- or post-employment), discusses the factors and events leading to post-retirement jobs and careers. He proposes work-, education-, and community-related approaches to helping older women returning to or changing in the paid labor force. (YLB)

Descriptors—Career Education, \*Career Planning, \*Educational Opportunities, Employment Opportunities, Employment Patterns, Employment Projections, Employment Qualifications, \*Information Sources, \*Job Search Methods, Labor Economics, Labor Force, \*Labor Market, Labor Needs, Labor Supply, \*Occupational Information, Publications, Resource Materials

Identifiers—New York

This guide provides a handy reference to major sources of information dealing with career planning, educational opportunities, occupational supply and demand, job characteristics, and the job search. Prepared for the New York State Occupational Information Coordinating Committee, this directory contains, whenever possible, sources relating to New York rather than more generalized information. These 240 publications that are available to the public from federal and New York agencies, publishers, associations, and private organizations are described and listed in alphabetical order. Following the title of each item is the source or abbreviated identifier for a government source (a key is provided). Each item is also designated as being most useful to one or more of three segments of the career information audience: direct participants in the labor market (job or career seekers), labor market

intermediaries (counselors, job placement personnel, teachers), or planners and administrators. A subject guide by topics precedes the list of publications and groups them into these eight areas: occupational demand, occupational supply, occupational characteristics, education and training, labor force demographics and economic trends, job search, career and vocational planning, and other information (special groups and miscellaneous). Descriptors—Competence, Examiners, Minimum Competency Testing, \*Occupational Tests, Program Improvement, Standardized Tests, State Standards, \*Teacher Certification, \*Teacher Evaluation, Test Construction, Testing, \*Testing Programs, Test Norms, Test Validity, Vocational Education, \*Vocational Education Teachers

Identifiers—National Occupational Competency Testing Institute, \*Occupational Competency Testing, Pennsylvania

A project continued activity to improve the occupational competency assessment program for evaluating and certifying vocational education teachers. Development of new testing was continued by Temple University, The Pennsylvania State University, and University of Pittsburgh. Workshops for test developers were conducted to ensure standardization of the end product. Review of completed products and use of validation studies permitted improvement in individual tests. Statistical studies, using candidate testing results from the three universities, provided normative data that can be applied with greater reliability in establishing scoring parameters. Quality testing instruments were made available through centralized printing and distribution by National Occupational Competency Testing Institute (NOCTI). The entire Pennsylvania test bank was transferred to NOCTI who would provide management, including printing and dissemination, storing, norm accumulation, revision, and update. Continuation of training of individual examiners through a centralized workshop activity ensured that standardization processes and practices were known to all examiners. Effort was placed on publicizing the program throughout the state. A national seminar of NOCTI member states (with twenty-two states represented) was hosted to facilitate sharing test review and development with other states. (Tables and project materials, amounting to over one-half of the report, are appended.) (YLB)

Proceedings of the Displaced Homemakers Conference.

Illinois State Office of Education, Springfield. Div. of Adult Vocational and Technical Education.

Pub Date—19 Jun 79

Note—39p.; Photographs will not reproduce well.

Pub Type—Opinion Papers (120) — Reports - Descriptive (141) — Collected Works - Proceedings (021)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Agency Cooperation, \*Cooperative Planning, \*Coordination, \*Displaced Homemakers, Human Services, Job Applicants, Program Development, Public Agencies, Reentry Workers, \*Services, \*State Agencies

Identifiers—Illinois, \*Women's Centers

The 1979 Displaced Homemakers Conference focused on developing awareness of services available from various Illinois agencies to displaced homemakers, generating the spirit and means for cooperative relationships among agencies serving them, and offering prototypes of how women's centers are attempting to coordinate the various services of state and community agencies. Proceedings include texts of three general session speeches:

"Strategies for Generating Interagency Cooperation," by Jan McReynolds, "Displaced Homemaker Programs: A National Perspective," by Eliza Carney, and "Future Directions of Displaced Homemaker Programs," by Margaret Cowden. Speeches given in group sessions are by the (1) Chief, Bureau of Title XX Administration, Illinois Department of Public Aid; (2) Supervisor, Field Services, Children and Family Services; (3) Program Coordinator, Consumer and Homemaker Education Program; (4) Chief, Division of Planning and Methods, State Health Planning and Development Agency; (5) Manager, Adult Education Programs, Department of Adult, Vocational and Technical Education, Illinois Office of Education; (6) Comprehensive Employment and Training Act (CETA) Intercity Coordinator, Bureau of Social Services; (7) Manager, Job Service Programs, Department of Labor, Job Service. A panel on displaced homemaker center activities is also provided. Appended is a report of the National Advisory Council on Women's Educational Programs, "Profile of the Displaced Homemaker and Her Education Needs." (YLB)

Descriptors—\*Curriculum, \*Equipment Maintenance, Independent Study, Learning Activities, Light, \*Military Training, Navigation, \*Optics, \*Repair, Spectroscopy

Identifiers—\*Navy, Opticalmen

This document contains a U.S. Navy Rate Training Manual and Nonresident Career Course which form a self-study package to teach the theoretical knowledge and mental skills needed by the Opticalman Third Class and Opticalman Second Class. (Opticalmen maintain, repair, and overhaul telescopic alidades, azimuth and bearing circles, binoculars, compasses, gunights, sextants, handheld rangefinders, night vision equipment, submarine periscopes and other precision instruments.) Information in the Rate Training Manual (RTM) is divided into the following twelve chapters: (1) Advancement; (2) The Nature of Light; (3) Mirrors and Prisms; (4) Lenses; (5) Basic Optical Systems; (6) Design and Construction; (7) Maintenance Procedures—Part I; (8) Maintenance Procedures—Part II; (9) Machine Tool Operations; (10) Optical and Navigation Equipment; (11) Night Visual Signs and Gunights; and (12) Submarine Periscopes. A U.S. Customary and Metric System Units of Measurement table is appended. The Nonresident Career Course (NRCC) follows the RTM index of key terms. The NRCC contains a set of assignments keyed to reading assignments in the Rate Training Manual. It is recommended that this training package be combined with on-the-job training for greater effectiveness. (BM)

The three main articles describing "sub-projects" of the European Home Study Council (EHSC) research project, "Two-Way Communication in Correspondence Education," are short versions of papers presented by researchers at the University of Lund, Sweden, at the EHSC spring 1979 workshop.

"Postal Two-Way Communication in Correspondence Education" concentrates on three problems of the traditional mode: submission density, self-check tests to replace assignments for submission, and computer-assisted correspondence tutoring. These results are reported: no significant differences between the variables in the first two problems and higher starting and completion rates for computer-assisted courses. "Correspondence Education Combined with Systematic Telephone Tutoring" compares a group receiving telephone tutoring with a control group with these results: telephone tutoring is suited for foreign language study, study time is not affected, a students receiving tutoring showed increased interest and knowledge of the subject. "Correspondence Education Combined with Face-to-Face Meetings" presents results of studies of outcomes, two types of face-to-face tuition, and background variables in student choice of method. These preliminary results are cited: course completion and study time are positively affected, students feel teacher contact is an advantage, and little difference is seen between teacher-controlled teaching and the student-centered approach. Identifiers—Alverno College WI, Off Campus Experiential Learning Program

Developed during an evaluation of the Alverno College (Milwaukee, Wisconsin) Off Campus Ex-

periential Learning (OCEL) program, this manual provides suggestions for (1) designing experiential learning programs integrating academic and off-campus work experiences for postsecondary women students and evaluating existing experiential learning activities. Part 1, Introduction to Experiential Learning, contains three chapters: The Growth of Experiential Learning Programs; Program Elements, which includes philosophy, prototypes, program development, and implementation considerations; and Alverno's Program, which overviews OCEL. Part 2, The Study, details the OCEL evaluation which intended to describe the effects of program implementation on students and faculty, describe faculty and student goals and relate goal satisfaction to program variables, and assess impact on career orientation, commitment, and patterns of graduates. (Data are based on interviews with participating and control students and involved faculty.) The four chapters of part 2 are Program Implementation, Goals and Outcomes, Impact, and Findings and Recommendations. These findings include the following: certain departments use the program more; there is general discontent with placement and work activity validity; and the program is more successful in meeting students' goals (job exploration and skill testing) than the faculty's (practical application of theory and skill testing). Appendixes, amounting to one-half of the manual, include study methodology, interviews, and evaluation data. (YLB)

This guide provides administration and teaching materials for use in organizing and conducting workshops intended to provide job-finding techniques and emotional support for women entering and re-entering the work force. Suggestions are made for assessing the employment situation in the community, the workshop, and finding potential students. Major activities included focus on identifying job skills and assessing job readiness, writing a resume, applying for a job, interviewing, and coping with both work and home life. Each of ten chapters deal with a specific workshop topic; each chapter contains an overview of the subject matter for the instructor, activities to enhance preworkshop preparation, and suggested workshop activities, including time and materials needed and suggested approaches to each topic. A Spanish translation of each activity is also included. Appended are model lesson plans, information on financial aid, and a Spanish/English glossary. (MEK)

## 16 Document Resumes

Designed for college and university administrators, guidance personnel, community organizations, women's centers, and women's studies programs, this administrator's handbook presents guidelines for establishing and structuring services to aid women in achieving personal, educational, and career goals. Specific sections of the handbook focus on overall administration, initiating and maintaining an effective counseling service, developing credit and noncredit programs to meet the special needs of women, and evaluating students and programs. The final section on community services explores ways of reaching the community with information and services to meet the needs of special groups. A bibliography, developmental organizational charts, and sample forms are included in an appendix. (LRA)

Identifiers—Project CHOICE

Intended as a resource in developing and conducting programs to encourage talented female students in broadening their career options and to increase positive self-awareness, this manual provides step-by-step procedures for replicating a fourteen-session diagnostic/prescriptive career development program for grade 11. Section 1, Program Overview, describes the six-phase Project CHOICE (Creating Her Options in Career Education) process: screening, selection, diagnosis, prescription, career development program, and assessment. Diagnostic instruments are provided. Section 2, Introduction to Special Groups, discusses four areas of diagnosed needs: Defining and Valuing One's Self, Achieving Success, Asserting One's Self, and Coping with Success. Section 3 discusses program use. Section 4 is the Core Project CHOICE Career Development Program with four different variations for the individualized needs of participants diagnosed in the four areas (section 2). Goals, duration, related activities (handouts), materials needed, a suggested group leader script, and special group changes are included in the detailed directions for conducting each of these sessions: Off to a Good Start, Women's Many Options, Learning about My Interests, Learning about My Abilities and Values, Career Information Workshops I-III, Gathering Career Information, Beginning to Plan, Testing Reality, Selecting a School and Paying for It, Making Decisions, Getting That Job!, and Wrapping It Up. An extensive bibliography is provided. (YLB)

sional Occupations, Program Evaluation, Work Experience

Identifiers—Missouri (Kansas City), Speakers Bureau, Womens Educational Equity Act

A project funded by a Women's Educational Equity Act grant provided women greater access to and awareness of nontraditional career opportunities and gave successful Kansas City, Missouri, professional women greater visibility in the community. The three components were (1) an internship program during which a woman intern was placed under supervision of an established woman professional working in a nontraditional career area, (2) a Reference Bank composed of women professionals in nontraditional career areas for use by women seeking specific career information, and (3) a Speakers Bureau with talented women from various career areas available to speak about women's career possibilities and provide encouragement for women considering nontraditional careers. Evaluation of the internship component included evaluative questionnaires completed by interns and supervisors, verbal critique in informal conversation, and informal follow-up of the interns. The internship program proved valuable for women interested in testing a decision concerning specific career areas and committed to gaining additional training necessary to qualify for a particular occupation. Development of a Speakers Bureau and Reference Bank were natural outgrowths of the internship program because of the professional contacts made while identifying supervisors. (Appendix, amounting to two-thirds of the report, include project materials and evaluation forms and results.) (YLB)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Classification, Definitions, \*Experiential Learning, Interviews, Program Descriptions, \*Program Design, \*Work Experience Programs

The purpose of the first year's work of a two-year project was to identify education and work program characteristics that are indicators of the normative (work-centered) and personalistic (person-centered) dimensions of eighteen experiential education programs and to determine common characteristics and whether programs can be classified based on resulting data. Procedures included interviews with program participants, coordinators, and on-site workplace personnel. Twelve major indicators of program type, indicating normative and personalistic dimensions, were isolated: (1) program goals, (2) nature of career growth; (3) self-concept development; (4) role of program staff; (5) interpretation and internalization; (6) focus of learning activities in work settings; (7) diversity of work setting experiences; (8) duration of program experiences; (9) relationship of learners to ongoing work and workers; (10) method of supervision employed by resource person; (11) pay; and (12) academic credit. By calculating the proportional relationships of these dimensions, five program types were identified for the typology: normative; personalistic; and transactional: adaptive, reciprocal, and transactional. (Recommendations for the second year of the study and for further research are also given.) (MEK)

Descriptors—\*Academic Achievement, \*Career Education, \*Conventional Instruction, \*Experiential Learning, High Schools, High School Students, Longitudinal Studies, \*Mathematics, \*Reading Achievement, \*Retention (Psychology), Work Experience Programs

A study investigated the retention of mathematical and reading concepts of students enrolled in a learning-in-work environment (Experience-Based Career Education) and a traditional classroom learning environment on a measure of academic achievement using a twelve-month longitudinal design. The performance of twenty-seven students in each environment was evaluated using the Comprehensive Tests of Basic Skills, administered at the beginning and end of the junior year and at the beginning of the senior year. The learning interval was designated as the time between pre- and post-testing, and the retention interval as the time between post- and follow-up testing. The results indicated differences in both reading vs. math skills and in traditional vs. learning-in-work environments, with the greatest amount of fluctuation being in the math scores of the two groups. While the groups were equivalent at the beginning of the year, the students in the traditional environment increased their math performance by the end of the year, while the learning-in-work students' math scores decreased during the same time period. The groups subsequently reversed this direction of change over the summer, with the traditional students' math scores showing a decrease, while the learning-in-work students showed an increase in math scores. An interference/assimilation model is proposed to interpret the findings. (Author/MEK)

Descriptors—Case Studies, Community Characteristics, \*Cultural Context, Economic Factors, \*Education Work Relationship, \*Experiential Learning, High Schools, Leadership, Sociocultural Patterns, Student Characteristics, \*Wages, \*Work Experience Programs

A comparative case study of education and work programs was conducted from an anthropological frame of reference to determine how each sets up a program culture for learners to achieve program goals. Three variables structured into the original research design of the project were (1) the length of the program; (2) the type of community served, and (3) the socio-academic characteristics of the students served. Results of the study indicate that lead-

ership and faculty tenure seem to have a stabilizing effect on the length of the program; availability of public transportation and time commitment required by the program coordinator to adequately supervise students in a large geographical area vary by community type; and that the traditional role of education as a conduit to vertical class mobility should be considered in the placing and processing of experiences with respect to socio-academic student characteristics. Results indicate that while the four education and work programs represented diverse responses to local needs and local resources, they all shared three characteristics: an orientation toward the economic institutions of the community; the inclusion of a learning component; and the awarding of academic credit or pay. Two other areas of concern identified were the additional responsibility students with psycho-social problems placed on the program and the unique socio-cultural problems of the role of the work sponsor. Descriptors—Administrator Attitudes, Cooperative Programs, Coordination, \*Employer Attitudes, \*Expectation, \*Experiential Learning, High Schools, Interviews, \*Motivation, Parent Attitudes, Student Attitudes, \*Work Experience Programs

To identify motivations and expectations regarding experiential education programs, a study interviewed 143 individuals from five participant groups. High school students, program coordinators, secondary principals, employers/sponsors, and parents involved in eighteen experiential programs in four states (Ohio, California, Florida, and Massachusetts) were interviewed. Programs ranged from alternative schools which offered optional community activities to service learning programs, to Comprehensive Employment and Training Act (CETA) youth programs. Although some students were paid and some received academic credit, all programs offered young people the opportunity for a structured learning experience in a workplace setting. Results of the interview data revealed seven areas of conflicting expectations: pay, recruitment, support for programs, quality of learning, graduation credit for experiences, creation of placements, and appropriate scheduling. Although respondents generally expressed positive attitudes, each constituency brings to program participation a unique set of problems and needs. Learners and their parents are convinced of the value of experiential education; employers/sponsors are also, as long as organizational efficiency and productivity are not compromised; and school administrators are interested in experiential education as a means of addressing building problems and community expectations. (Author/MEK)

Identifiers—State Local Relationship, \*Work Incentive Program

Factors that influence the effectiveness of state and local units of the federal Work Incentive (WIN) program were examined to suggest ways to improve the program, which is designed to move recipients of Aid to Families with Dependent Children (AFDC) into productive jobs. Factors studied were organizational, managerial, and service delivery characteristics and also environmental factors, such as demographic and labor market conditions. Data collected over a two-year period from field research in forty-three local sites and ten states were analyzed to compare high and low performing programs. The main performance measures identified were number of job entries per staff, average job entry wage, retention rate, and average monthly welfare grant reduction. Socioeconomic environment was found to significantly influence performance levels while political-bureaucratic environment was not shown to be associated with variations in performance. High performing state programs were managed differently than low performers, and high performing local units differ systematically from low performing units in the way they were managed and delivered services to clients. Organizational structure of state programs appeared less important than other factors, but local characteristics were extensively shaped by those at the state level on such issues as program priorities, management behavior, and attitudes toward CETA. Recommendations are presented under the following topics: differentiating high from low performing programs, managerial recommendations, changes in service delivery methods or emphases, and elements of a structured performance improvement program. Descriptors—Academic Aspiration, \*Anxiety, Career Choice, Females, \*High School Students, Learning Motivation, Rewards, Self Concept, Social Status, \*Vocational Interests

Identifiers—Holland Vocational Preference Inventory

The relationship between anxiety, educational self-theory, and vocational preference was investigated using two separate samples (149 and 262) of high school students. Anxiety was measured using the anxiety component of Zuckerman's Affect Adjective Checklist (AACL). A measure of self-theory was obtained via the Profile of Real/Ideal Scholastic Motivation (PRISM), and vocational interest was measured by Holland's Vocational Preference Inventory (VPI). The research data lent support to all three hypotheses: (1) that high-anxious subjects would have a lower degree of differentiation on the VPI than low-anxious subjects; (2) that there would be a positive correlation between anxiety and the Diversity of Ideas scores on PRISM; and (3) that high-anxious subjects would select occupations of higher prestige than low-anxious subjects. The results indicate that anxiety is clearly related both to diversity of ideas and to social factors such as extrinsic motivation and status. It is suggested that by stressing external rewards and direction, schools may be raising anxiety levels and limiting vocational choice, particularly for females. (Author/MEK)

Descriptors—Adult Education, Adult Vocational Education, Church Role, College Role, \*Community Education, Definitions, Educational Policy, Illiteracy, Independent Study, \*Lifelong Learning, Low Income Groups, Professional Continuing Education, Volunteers

New efforts need to be made, the author contends, by nonschool organizations as well as schools and colleges, in order to meet the challenges of community and adult education. These efforts range from serving the needs of the professional for continuing education to the basic education needs of low income and/or illiterate adults. Viewing lifelong learning as an organizational principle, a two-part typology of sources of education and learning (labeled deliberate education and learning and unintentional learning) is set forth. A subcategory of deliberate education, individually used sources, is hypothesized to account for nearly all of the 80% of adult learners engaged in "do it yourself" or independent learning identified in surveys conducted by Tough (1971) and Penland (1977). Among ten challenges proposed for the 1980's are the establishment of educational brokering agencies, the facilitation of independent learning and unintentional learning, the use of volunteers (especially the elderly) in all phases of the educational process, and seeking expanded roles for churches. Colleges are challenged to assume the leadership role in forming Community Lifelong Learning Councils, which would plan and coordinate activities designed to meet diverse learning needs in communities. Descriptors—\*Advisory Committees, \*Evaluation, \*Participant Satisfaction, \*Secondary Education, \*Teacher Attitudes, \*Vocational Education

Identifiers—Iowa  
A study was conducted to determine the status of local secondary vocational education advisory councils in Iowa. Phase 1 of the study surveyed 709 secondary vocational education programs to identify programs utilizing local advisory councils, composition of these councils, and names of leading council members. Phase 2 collected data from 218 teachers and 160 council members relating to council operation procedures, council effectiveness, and satisfaction with the council. Of the 709 teachers

responding to the survey, 431 indicated their program utilized a local advisory council. The distribution of the respondents by areas was 231 from agriculture, 47 from distributive education, 3 from health, 271 from home economics, 51 from office, 97 from trades and industry, and 9 from multioccupational programs. A representative council met once or twice during the year and contained eight members. The typical council included one professional educator, four employers, and various other types of members based on program area. The second phase of the study revealed a need for local advisory councils to strengthen their operational activities. On a statewide basis there seems to be a need for more programs to provide a formalized orientation for new council members. (LRA)

This parts failures identification manual is one of a series of power mechanics texts and visual aids covering theory of operation, diagnosis of trouble problems, and repair of automotive and off-the-road construction and agricultural equipment. Materials provide basic information with many illustrations for use by vocational students and teachers as well as shop servicemen and laymen. Each of the eleven chapters shows pictures of failed parts followed by a brief explanation and reasons why the part might have failed. Chapters are (1) Pistons, Rings, and Cylinder Liners; (2) Journal Bearings; (3) Valve Gear Trains; (4) Turbochargers; (5) Gears; (6) Shafts, Axles, Spindles, and Universal Joints; (7) Hydrostatic Transmissions; (8) Anti-Friction Bearings; (9) Belts and Chains; (10) Tracks and Tires; and (11) Miscellaneous Failures. A glossary is appended. (A supplementary 35mm color slide set is also available—see availability note.) (LRA)

Identifiers—Coolants  
This manual on fuels, lubricants, and coolants is one of a series of power mechanics texts and visual aids on automotive and off-the-road agricultural and construction equipment. Materials present basic information with illustrations for use by vocational students and teachers as well as shop servicemen and laymen. Focusing on fuels, the first of three parts discusses areas such as compression and fuels, octane ratings, selecting fuels for liquid propane gas engines, diesel fuel characteristics, and storing fuels. Part 2, Lubricants, describes engine oils, engine oil ratings, contamination of oil, mistaken ideas about engine oils, storing and handling engine oils, and

hydraulic and transmission fluids. Part 3 focuses on coolants and discusses topics such as parts of the liquid cooling system, water as a coolant, warm weather conditioning of the system, preventing corrosion and deposits, and water pump and fan lubrication. Each part concludes with test questions. Answers to the test questions are appended. (A supplementary 35mm color slide set is also available—see availability note.) (LRA)

Identifiers—American Vocational Association, United States

Programs of vocational education focus on raising the productive capacity of individuals. Because of this commitment to human development, vocational education is a resource that can help solve many of the pressing economic problems facing our nation at this time. A federal investment in vocational education is in fact a very viable means of boosting our country's economy. There are eight reasons why our economy needs more federal support of vocational education: (1) to increase productivity, making it possible for employers to pay higher wages, (2) to provide skilled workers to meet the demands of employers, (3) to increase the earning power of individuals, (4) to improve opportunities for the poor and underachievers, (5) to reduce youth unemployment through in-school and out-of-school programs that provide educational skills and work experiences for disadvantaged youth, (6) to stimulate economic growth, (7) to enhance the federal/state/local partnership, and (8) to increase the federal government's credibility with the nation's taxpayers. Identifiers—Virginia

Six competency catalogs of tasks for industrial arts programs are presented. These include catalogs in Architectural Drawing, Basic Technical Drawing, Electricity and Electronics, Energy and Power, Engineering Drawing, and Graphic Communications. The purpose of each catalog is to establish a basis for program content selection and criterion levels from which one may measure to see if individual learners have achieved minimal competence. Each catalog begins with an introduction, format description, course description, course goals, and suggested topical outline. The remainder of the catalog is comprised of task statements. Each task follows a typical format that includes the following sections: (1) Area of Competency, which identifies the industrial arts course for which the task was prepared; (2) Content/Concept, which identifies the sub-area with which the particular task is associated; (3) Task, which identifies the knowledge, skills, or attitudes that the learner should possess after instruction; (4) Criterion Referenced Measure,

which provides the means of determining whether the learner can successfully perform the task; and (5) Performance Goals, which identifies sub-tasks that lead to the development of the knowledge, skills, and attitudes identified in the task. (LRA)

This guidebook presents facility guidelines to aid the school planner in determining appropriate facilities for a model curriculum. The first of four major sections, The Intent of Industrial Arts, discusses the mission and goals, instructional objectives, function of industrial arts, and the model curriculum. Section 2 focuses on facilities for elementary, junior high, and senior high programs. Section 3 addresses architectural considerations such as location and housing, flexibility and expansion, space needs, open laboratory/instructional area, auxiliary rooms, visual comfort and efficiency, ventilation and heating, and floors and surfaces. The final section presents a planning summary of the industrial arts curriculum, suggested industrial laboratories, industrial arts laboratory space needs, industrial arts courses accommodated by respective laboratories, and equipment guidelines. This guide presents a systematic approach to developing competencies that will enable teacher-coordinators to meet effectively the occupational needs of students and to provide a source of well-trained individuals for business and office occupations. The guide consists of ten competency-based instructional modules which outline procedures for initiating, developing, operating, improving, and evaluating cooperative office education (COE). Module titles are (1) What COE Is and Is Not, (2) Determine the Need for a COE Program, (3) Student Recruitment, (4) Student Selection, (5) Organization of Instruction, (6) Finding Training Stations, (7) Completing Training Plans, (8) COE Student Job Placement, (9) Conducting Coordination Activities, and (10) Sponsor Development. Each module consists of a rationale, objectives, learning activities, criterion test, and model answers. (LRA)

Intended to give assistance to the vocational home economics teacher in providing a program of continuing education for out-of-school youths and adults, the programs contained in this handbook are designed to assist participants in their life role as

homemaker, wage earner, consumer, and parent. The handbook provides an overview of adult education programs in Occupational Home Economics and the Consumer and Homemaking; makes suggestions relative to program planning, implementation, and evaluation; and the uses of advisory committees. Included are outlines of possible course content and a selected bibliography of resources. Suggested competencies for adult occupational home economics programs in child care, general housework, clothing and textiles, and food services, and consumer and homemaking competencies in consumer education and home management, housing, home furnishings, and decoration, energy management and conservation, gerontology, and parenthood, comprise thirty-five pages of the document. Information is also included on the Young Homemakers of Virginia and on the Virginia Certified Homemakers' Assistants Program. (MEK)

Identifiers—Adult Performance Level, General Educational Development Tests

Intended to help ABE (Adult Basic Education) teachers learn to design effective learning activities, this handbook provides activity suggestions, informative materials, and sample forms and materials. Section 1, *Adults as Learners*, discusses the adult learner's unique characteristics and includes an article on teaching strategies and learning styles. Deciding What to Teach (section 2) emphasizes three critical concerns—need, want, ought to have. The third section, *Setting the Climate*, gives thirty-five get-acquainted ideas and three articles on nonverbal communication. Section 4, *Organizing for Instruction*, presents an instructional model based on these five steps: (1) Where Am I? (diagnosis/assessment), (2) Where Am I Going? (state and select objectives), (3) How Will I Get There? (select and implement strategies), (4) How Will I Know When I Have Gotten There? (measure accomplishment of objectives/re-diagnosis), and (5) How Well Did I Do? (evaluate). Charts, articles, sample materials and instruments, descriptions of teaching methods, and a teacher self-evaluation are included. Section 5, *Individualized Instruction*, provides an opinionnaire and forms for developing diagnostic approaches and selecting activities. The final section, the GED (General Educational Development) Test, presents basic data about test content and test-taking skills. Appendixes include APL (Adult Performance Level) objectives, additional activities, and an evaluation packet. (YLB)

Descriptors—\*Educational Needs, \*Educational Practices, Education Work Relationship, Mastery Learning, Secondary Education, Skill Development, Skills, \*Transfer of Training

Both the process and the antecedents of transfer (transfer of skill or knowledge from prior experiences to new ones) are considered by the authors, who suggest ways that teaching for transfer can be implemented. Three questions relating to transfer are considered: Is the capacity or ability to transfer attended to and developed in education and training programs? Can an individual's ability to transfer be developed and/or strengthened through planned learning experiences? and How do you teach for transfer? In an informal survey of forty teachers, the authors discovered that with the exception of adult education, teachers do not teach for transfer, but rather teach knowledge and skills which they assume the student will be able to transfer. The authors argue that while the aforementioned is important, an essential purpose of education should be to teach for the maximum positive transfer of

knowledge and skill information. They indicate that the ability to transfer such learning can be taught, but many educators seem to take the learning process for granted, assuming that the ability to apply previous learnings follows from in-class mastery. Providing practice beyond classroom mastery to application in varying contexts under differing conditions is stressed. (Sixteen practical suggestions for teaching for transfer, presented under awareness, sequencing, practice, and reinforcement are included.) (MEK)

Descriptors—Career Change, \*Career Development, Career Education, Classification, \*Employee Attitudes, Employment Experience, Family Characteristics, \*Individual Characteristics, Job Satisfaction, Labor Economics, Labor Market, \*Occupational Information, \*Occupational Mobility, Occupational Surveys, Occupations, Psychological Characteristics, Research Reports, Social Mobility, Social Status, Transfer of Training, Vocational Adjustment, \*Work Attitudes

Intended for researchers and policy developers in education and labor market economics, this study reviews, evaluates, and summarizes available information concerning the characteristics of occupationally mobile workers and their jobs. Chapter 1 presents basic concepts and definitions, a review of problems in empirical measurement of mobility, and a brief discussion of problems of occupational classification. Chapter 2 provides brief overviews of several labor market theories, suggests their implications for occupational mobility, and presents a review of empirical mobility studies related to labor market theories. Using the same format, chapter 3 deals with sociological theories and evidence, while chapter 4 deals with theories from vocational psychology and related evidence. Chapter 5 overviews and summarizes the empirical literature and suggests directions for future research. Appendix 1 provides an annotated bibliography of the empirical studies reviewed, including this information for each study: thesis, data, methods, results, and limitations. Appendix 2 provides technical information on the major data sources used in the empirical studies with this information provided: primary source, description, and limitations. (Appendixes comprise over one-half of the document. The table of contents may be used as a cross-reference to surveys cited.) (Author/YLB)

**Youth Programs**

A partnership between the federal government and state and local education agencies is required to solve existing problems in vocational education. The federal government's strategy involves directing money to underserved populations; encouraging planning at all levels to produce more employable graduates; promoting research and demonstration of effective educational models; and establishing programs to employ and stimulate employment of youths and adults. The federal government discharges its responsibilities by supervising the state planning system, implementing the National Occupational Information Coordinating Committee, establishing state Research Coordinating Units, sponsoring research and demonstration activities through a contract with the National Center for Research in Vocational Education, and administering the Youth Employment and Demonstration Projects Act. States must plan, develop, and disseminate occupational and career information, encourage innovative practices, and provide a general system of fiscal and program accountability. Local school districts must develop planning and working linkages with the community, provide feedback, and operate programs and delivery services. Three areas for improvement are cooperation among education providers, flexibility in programming, and involvement in occupational development. The scholar should evaluate, conduct research, assess the federal strategy, and redefine vocational education within the broad structure of education, training, and work. (YLB)

Descriptors—Attitude Change, Community Involvement, Community Programs, \*Correctional Education, \*Correctional Institutions, Delivery Systems, Literature Reviews, \*Models, Needs Assessment, Prisoners, \*Program Descriptions, Program Design, Program Development, Program Evaluation, Surveys, \*Vocational Education, \*Vocational Rehabilitation

This review and synthesis of the literature on correctional vocational education includes historical documents, recent surveys and reports, journal articles, dissertations, and speeches and presentations which were located by computer-assisted and manual searches of these data bases: Abstracts of Instructional and Research Materials in Vocational and Technical Education, Educational Resources Information Center, National Technical Information Services, Comprehensive Dissertation Abstracts, and National Criminal Justice Reference Service. To describe the state-of-the-art of vocational education in corrections, the review discusses surveys, reports, programs, and models which address these three "charges" made by researchers and program planners to the educational community and the community at large: to defuse the psychology of retribution, to establish job market-relevant, community-based vocational education programs, and to establish effective in-prison programs with high quality program design and delivery, needs assessment, and evaluation. Listings give the references that were reviewed and additional references that provide relevant discussion. (This and two other technical reports are included in the final report, ED 151 569.) (YLB)

Descriptors—Business, Community Relations, \*Correctional Education, \*Correctional Institutions, Facility Planning, Financial Policy, \*Guidelines, Job Placement, Objectives, Program Administration, Program Descriptions, Program Evaluation, \*Standards, Student Evaluation, Student Placement, Teacher Evaluation, Teachers, Teacher Selection, \*Vocational Education, Vocational Rehabilitation

This set of thirty-four national standards for vocational education programs in corrections describes a set of ideal conditions in five areas of vocational education program operations within a correctional institution or system. By providing ideals to which existing conditions and objectives can be compared for evaluation purposes, the standards should help corrections personnel establish goals and develop guidelines for programs of occupational training. The standards are grouped into these five areas of program operations: curriculum and instruction (5), students (9), staff (5), organization and administration (11), and physical plant, equipment, and supplies (4). Standards for curriculum and instruction deal with program descriptions, objectives, and methods and procedures. Orientation, placement, evaluation, and follow-up are included under standards related to students. Standards involving staff have to do with selection and preparation, salary, professional growth, business and industry involvement, and evaluation. Organization and administration standards deal with the staffs of advisory boards, committees, and administrator; financial policies; community relations; planning, research, and development; evaluation; and discrimination. Standards dealing with physical plant, equipment, and supplies relate to planning and safety and health conditions. Discussion follows each standard. (This and two other technical reports are included in the final report, ED 151 569.) (YLB)

This report presents the data from a national survey which was designed to answer the question, "What is the status of vocational education in correctional institutions?" The data were collected

from 459 institutions (state, federal, military, and jail) which offered vocational education at the time of the survey; the purpose of the survey was to develop a data base for future planning and evaluation. Data are reported in these fourteen sections: facility and inmate characteristics; goals for vocational education programs; enrollments in vocational education programs; age and race of students; shops, equipment, and lesson plans; special needs groups; organization, delivery, and accreditation; expenditures; scheduling; entry requirements, procedures, and incentives; instructional staff characteristics; guidance, counseling, and job placement services; student status after completion of vocational education programs; and program additions, changes, and curtailments. Each section includes a brief narrative highlighting the data presented. Data are tabulated separately for youth and adult facilities in terms of frequencies, percents, and means. Appendixes include identification of the survey population, development of survey forms, and data collection and analysis methodologies. (This and two other technical reports are included in the final report, ED 151 569.) (YLB)

Identifiers—American Vocational Association, Comprehensive Employment and Training Act, Youth Act 1980

While strongly supporting the passage of the Youth Act of 1980 (S-2385), the American Vocational Association (AVA) contends that improvements are needed in the bill in order to effect optimal linkages between employment and education agencies toward solving the youth unemployment problem. Specific changes would (1) further the potential of vocational education toward moving disadvantaged youth into stable jobs; (2) assure that quality jobs will be developed; and (3) guarantee Comprehensive Employment and Training Act/Vocational Education linkages as well as S-2385/vocational education linkages. Specifically, six concepts contained in S-2385 and the President's Youth Initiative are supported: (1) basic skills grants; (2) planning efforts linking school programs to the community; (3) using existing resources to link new programs to existing educational programs; (4) allocating a minimum of 25% of the funds to vocational education skills development; (5) flexibility of decision making, allowing creativity at state and local levels; and (6) support for a higher quality education an opportunity for youths to become more stable in jobs. (Five suggested changes to the overall bill, six to title I, and eleven to title II are outlined.) (MEK)

tion, \*Public Libraries, Resource Materials, Staff Development, Summative Evaluation, Vocational Education

Identifiers—Indiana (Monroe County)

A project was conducted to accomplish the following objectives: (1) to provide a pilot program in the Monroe County (Indiana) Public Library where low-income or unemployed adults can find non-biased, non-stereotyped vocational information, guidance, and referral in the areas of job training, job opportunities, required skills, job descriptions, employment outlooks, and related concerns; (2) to encourage these adults, particularly minorities and the disadvantaged, to utilize the service; and (3) to provide librarians with the vocational materials and interpersonal and professional skills necessary to serve these adults. First, a survey was conducted to develop a profile of the Monroe County adult vocational information seeker as to age, sex, education, and other individual characteristics. Next, commercial and non-commercial bibliographic materials were identified along with community educational, industrial, and government personnel who could serve as human resources. An implementation guide was developed (see CE 024 846) and an in-service workshop was provided for participating librarians and community personnel. A summative evaluation of the project products were well done and appropriate for their intended audience. User satisfaction, based on a limited sample (N=26), was reported high. (Author/BM)

This implementation guide is based on the development and implementation of the Job Search Pilot Project (see CE 024 845), which was designed to provide a program utilizing a public library as a community-based information center. The center is intended to assist low-income or unemployed adults and out-of-school youths to find vocational information and referral in the areas of job training, job descriptions, required skills, employment outlooks, and other related aspects of employability. This implementation guide presents guidelines for the following activities: (1) initiating a Job Search program; (2) community assessment; (3) defining parameters; (4) obtaining information; (5) multimedia materials; (6) physical arrangements; and (7) opening the program to the public. Several examples and supporting materials are appended. (BM)

Descriptors—Career Awareness, \*Career Counseling, \*Correctional Rehabilitation, \*Criminals, Females, Job Placement, Nontraditional Occupations, \*Program Development, Program Evaluation, Rehabilitation Programs, Vocational Rehabilitation, \*Women's Education

This manual describes how to set up and operate a pretrial intervention program for female first-of-

fenders which offers an intensive career counseling service and puts emphasis on placing participants in nontraditional jobs. Divided into three sections entitled—The Way It Is; What You Can Do; and How You Assess It—the guide gives an overview of the double disadvantage and problems of being both a woman and an offender; guidelines on setting goals and developing and implementing the program; and notes on how to evaluate services and develop client profiles. Developers state that women successfully completing this goal oriented probationary program do not go to trial and are given an opportunity to have their charges dismissed. Without the offender stigma, employment options appear to increase, the re-arrest rate is often reduced, and these women appear to have a better chance of becoming self-confident, self-supporting members of society. Appended are a bibliography on women offenders, a list of funding sources, and model inventories and questionnaires for use in a program. Also included is the script and an order form for a filmstrip describing the experience of one woman who participated in the Pennsylvania program upon which the manual is based. (MEK)

Descriptors—Achievement Need, Attitude Measures, \*Career Choice, Career Education, Career Planning, Careers, Employed Parents, Family Characteristics, Fear of Success, \*Females, Grade 7, Grade 11, Grade 12, \*Influences, Mother Attitudes, Mothers, \*Nontraditional Occupations, Parent Background, Parent Child Relationship, Personality, Personality Measures, \*Secondary Education, Sex Role, Socioeconomic Status, \*Student Attitudes, Student Evaluation, Test Anxiety

This manual for junior and senior high school counselors and teachers reports factors relating to career choice as determined by assessing young women in grades 7, 11, and 12 using a study-developed questionnaire, the Test Anxiety Questionnaire, the Thematic Apperception Test, Fear of Success, and a sex-role scale. Chapter 1 is an introduction. Chapter 2 summarizes responses for three sections on the questionnaire: family background, personality and attitude measures, and career aspirations. Chapters 3, 4, and 5 are concerned with the relationship of the various measures to traditional versus nontraditional career choice and status of career choice. Chapter 3 focuses on three family background variables: parent-child relationship, family socioeconomic status, and maternal employment. Chapter 4 examines the various achievement-related personality measures and sex-role attitudes. Chapter 5 reports the relationships to career aspirations of reasons for wanting to work and sources of influence in career decision-making. Chapter 6 summarizes findings and implications for career counseling, including the strong relationship of family socioeconomic background to the aspiration for nontraditional, high status careers; the effect on a daughter's aspirations of the reason the mothers worked; and the deleterious effects of fear of success and traditional sex-role attitudes on senior, but not junior, high school women. Descriptors—Adult Education, Attitude Change, Career Choice, Career Counseling, \*Career Education, \*Career Exploration, \*Career Planning, Decision Making, Females, Instructional Materials, Interests, Job Skills, Learning Activities, Life Style, \*Nontraditional Occupations, Secondary Education, Self Evaluation (Individuals), Sex Bias, \*Sex Fairness, Teaching Guides, Values Clarification, Vocational Interests, \*Womens Education

This resource book provides curriculum materials for increasing awareness of sex bias and promoting more positive attitudes and participation in sex-fair career education and counseling. The book provides information in four parts for facilitators (teachers, counselors, administrators, or parents) and learners (students, parents, school staff members, or school board members). In the first part, a facilitator's guide includes a nontraditional career/life planning quiz to assist in understanding the guide's intent and discusses the philosophy, methodology, and implementation of nontraditional career education. In the second part, student activities are organized around three major areas related to career exploration. Self-Exploration provides activities to help students explore personal values, interests, and talents influencing career choices. Decision Making activities provide opportunities for making simulated and actual decisions as participants examine various decision-making methods and their resulting outcomes. Life Planning activities encourage learners to match personal qualities with occupational skills, identify educational alternatives, and examine potential life styles relevant to career interests. Each activity is discussed in terms of goal, activity focus, directions for facilitators, and suggestions for learner discussion. The third section, Learner Materials, includes supplemental activities suggested for use with specific activities. Included in the fourth part, Resources, are an Attitudes Toward Nontraditional Careers scale, bibliography, and index. (YLB)

Identifiers—California (San Francisco), Comprehensive Employment and Training Act, \*Youth Chance, Youth Community Conservation Improvement Program

The San Francisco-based YMCA Youth Chance began in 1978 as a Youth Community Conservation and Improvement "sweat program"—a means of providing unemployed high school dropouts with CETA (Comprehensive Employment and Training Act)-funded jobs. Youth Chance continues to train males and females, 16-19 years of age, who meet CETA requirements. However, it also offers a comprehensive program in both worksite training and classroom education for which it maintains its own private high school. The educational component, now funded entirely by grants from Zellerbach Family Fund and San Francisco Foundation, is considered largely responsible for the program's success. It influences students' employability, academic goals, self image, and skills levels. While involved in the program, youth (1) work four hours per day, four days per week, at a site in their area of training; (2) attend classes four days a week for two hours; and (3) meet with counselors and participate in a job search. Crucial factors in program success, as indicated by high overall placement of youth who have failed consistently elsewhere, include comprehensiveness of program design, staff cooperation, individual attention for each participant, and a high caliber teacher staff. Reviews of four other San Francisco youth programs are appended to provide a range of approaches to youth employment which may be compared to methods and objectives of Youth Chance. (YLB)

Descriptors—Adults, Career Counseling, \*Career Development, Career Education, College Programs, \*Displaced Homemakers, Divorce, Educational Objectives, Employment Opportunities, Employment Potential, Employment Programs, Learning Activities, Program Development, Program Effectiveness, \*Psychological Needs, Reentry Workers, Student Recruitment, Vocational Interests, Widowed, \*Womens Education

This teaching manual for a nine-week vocational orientation course for displaced homemakers covers emotional support, self-confidence building, and short- and long-term career and life planning. Designed to be used with a group of fifteen or less in an informal environment, the program manual is divided into two types of lessons: emotional support and vocational orientation. Each of the eighteen two-hour sessions presented include objectives, instructional activities, and a narrative section which gives the instructor background information and suggestions for the lesson. Selected lesson titles listed under emotional support are Counting Lemons: Airing My Grips; Getting It Together: Becoming Independent; What's Holding Me Back: Fears and Beliefs; and Single Again: Sexuality and Relationships. Selected vocational orientation titles are Personalities and Jobs; What Do I Have to Offer; Assessing My Skills; Examining the Job Market: Testing Reality; and Focusing on Vocational Options. Forms, suggested reading lists, and short

readings referenced in the guide are included in the thirteen appendices. The final report (appendix) documents the development and publicizing of the course, and gives statistical data on personal characteristics and subsequent job training or employment of the sixty-five women who participated in the course over three academic quarters. Descriptors—\*Clerical Occupations, Competence, Employer Attitudes, \*Employer Employee Relationship, Graduate Surveys, High School Graduates, High Schools, \*Job Satisfaction, \*Office Occupations Education, Work Environment

Identifiers—Virginia

This study examined the concept that extent of agreement between clerical employees and their respective supervisors on competency importance would relate to satisfactoriness and job satisfaction. Data for competency agreement, satisfactoriness, and job satisfaction were analyzed and interpreted for fifty-five clerical employees who responded to a job satisfaction survey instrument. The subjects were 1972 high school graduates who had completed a stenographic program while in high school, had not continued their education beyond high school, and were employed in clerical occupations one year after graduation. Satisfactoriness scores were obtained from supervisor ratings of the subjects' performance on thirty-one job competencies and on supervisor ratings of the subjects' office behavior. Among the findings were that (1) a relationship existed between satisfactoriness and extent of agreement on competency importance and (2) no relationship existed between job satisfaction and extent of agreement on competency importance. **EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Adult Education, \*Aging (Individuals), \*Educational Research, Educational Researchers, \*Organizational Climate, \*Private Agencies, Research Methodology, Research Problems

Identifiers—American Institutes for Research

As part of a symposium on challenges and problems of adult education researchers in different settings, recent research activities at one private independent research organization were examined. Three projects of the American Institutes for Research (AIR) were reviewed, all relating to adult development and aging. The first examined career guidance for adults with an emphasis on women and minorities. It resulted in a catalog describing successful programs throughout the country and in a planning manual for such programs. The second, involving a series of studies to define and assess Quality of Life, indicated that learning and intellectual development is an important dimension of Quality of Life and that adult education can play an important role in the lives of older adults. The third, on adult basic education needs, participation and persistence, was conducted as part of the Statistical Analysis Group in Education (SAGE) created by the National Center for Education Statistics. It was concluded that private research organizations provide the researcher with a great deal of flexibility for setting objectives and that research designs used in applied situations may be less rigorous than those used in basic research, with a trade off occurring between internal and external validity. Major limitations are lack of training for work in a private

institution and the lack of security in research support. A major advantage is that multidisciplinary efforts and colleague interaction and collaboration are the norm. (JT)

Identifiers—Employability Skills Series, Limited English Speaking Ability

The previously validated Employability Skills Series was systematically translated into Spanish, and field tests were conducted, using criterion referenced measures, to establish if the materials were effective with Hispanic students. Data were collected on the achievement of 484 students on thirty-nine knowledge and twenty-five performance objectives of these competency-based materials written at approximately a fifth-grade reading level and designed for use in a variety of instructional settings. Eighty percent of the students were at or above the criteria in sixty objectives. They showed significant improvement in their pretest-posttest gains in five of the six units. Further analysis of five factors (school level, English language ability, age, ethnic group, and reading level in Spanish) showed that (1) junior high students did not do as well as students in high schools, vocational-technical centers, community colleges, or adult centers; (2) bilingual students did better than limited English ability students; (3) adults did better than non-adults; (4) there was no consistent pattern across units on the differences between Cuban-Americans, Mexican-Americans, Puerto Rican-Americans, or other Hispanics; and (5) students scoring higher on the Spanish reading level examination did better than those with lower reading scores. It was concluded that the Spanish version is an effective instructional tool. (YLB)

Descriptors—\*Disadvantaged Youth, \*Educational Benefits, Education Work Relationship, Job Training, Outcomes of Education, Position Papers, Unemployment, \*Vocational Education, Work Experience, Youth, \*Youth Employment, Youth Opportunities, Youth Programs

Identifiers—American Vocational Association

Vocational education's primary goal—to prepare people for work—underscores the vital role the discipline can play in upgrading the employability of disadvantaged youth. Those who have received vocational training are more likely to stay in school and receive higher salaries than other workers with comparable education at every level from high school through two years of college. Moreover, students are better able to plan and make mature career choices because their intrinsic needs of competence, integrity, and pride are provided for as integral parts of vocational programs. This type of education is particularly appropriate for the disadvantaged since it is goal oriented, provides self-identity, is action oriented, builds confidence, provides adult role modeling opportunities, and provides tangible forms of success. Vocational programs are oriented toward four goals which benefit alienated disadvantaged

youths since they (1) connect school and work over time; (2) provide skill training in occupational areas for which the demand exists; (3) meet individual needs through specifically tailored programs; and (4) develop, conduct, and administer programs in cooperation with other education and community agencies. Currently there is a problem of accessibility to vocational programs for disadvantaged youth since facilities and other resources are scarce when compared to the number of potential users. The intent of the new Youth Initiative is to pull all services together for disadvantaged youth; vocational education can play a central role in this effort. (MEK)

Descriptors—City Government, College Programs, Community Services, \*Continuing Education, \*Government Employees, Local Government, Management Development, Postsecondary Education, Professional Continuing Education, Program Descriptions, \*Public Administration Education, State Government, Technical Assistance

The twelve continuing education programs for government officials are described to exemplify the broad range of activities that can be afforded by institutions of higher education. (All but one were funded by Title I, Higher Education Act of 1965.) Four of the programs have full descriptions including focus, audience, activities, cost/staffing, evaluation, and available information/services. They are (1) a project providing information, training, and technical assistance in the use of low-cost computer technology to small local governments; (2) one designed to promote efficiency and effectiveness in delivery of city services by sharpening decision-making skills in municipal managers; (3) a region-wide network organized to develop and disseminate resource materials at reduced cost to institutions training local government officials and employees, and (4) a project training state legislators and staffers in approaches to and methods of program evaluation for use in program and policy review. Brief descriptions (and addresses for contacts) are given for eight other projects including personnel management skills for school boards and zoning and planning commissions; counseling/skills training for state clerical employees, orientation of county officials to county home rule, public sector management for upper- and middle-level state administrators, and information and advisory resources for mayors and county commissioners. This document contains recommended standards for quality vocational programs in agricultural/agribusiness education which are divided into (1) standards common to all programs, (2) standards specific to adult education in agriculture/agribusiness, and (3) standards specific to production agriculture, secondary. The sixty common standards are grouped by these areas: instructional program (15); supervised occupational experience (10); leadership development (6); student recruitment, enrollment, and counseling (4); public relations (2); facilities and equipment (8); staffing (10); finance (1); placement (1); and evaluation (3). Twenty-one standards specific to adult education in agricul-

ture/agribusiness are grouped as planning and conducting the instructional program (6), staffing (5), Young Farmer Educational Association (3), development (3), administration (2), and evaluation (2). Eleven standards specific to production agriculture, secondary, pertain to instructional program (5), supervised occupational experience (3), staffing (1), and administration and supervision (2). Identifiers—Kansas

To determine the importance of job tasks and/or activities for the nurse aide, the licensed practical nurse (LPN), and the associate degree nurse (ADN), nursing instructors, LPNs and employers were surveyed in Kansas in 1978 using a minimum work behavior expectation instrument. Respondents were asked to rate approximately 200 discrete job tasks and/or activities. Instructors saw a rather clear separation of activities depending upon the level or type of instructional program. Recently graduated LPNs who were also surveyed with regard to attitudes toward selected work activities indicated having learned all but one of ninety-eight activities (administering alcohol baths) through their nursing education program. A strong correlation was found between those job activities considered to be of greatest importance and how well LPNs felt they were performing a given task. Devoting additional student learner practice time to job activities in which LPNs showed least self-confidence seemed to be indicated. (Appendices, amounting to over one-half of the report, include tables with nursing instructors' and LPN graduates' percentage rating concerning work expectations, the questionnaire, and task lists for nurse aide, LPN, and ADN.) Projects funded by the Office of Research and Development (ORD) of the Employment and Training Administration are summarized in this document. It includes all projects active on September 30, 1979, and all those completed between July 1, 1976, and September 30, 1979. In addition, it lists reports and other significant publications funded by ORD which were received during the previous two fiscal years. The projects and publications presented in chapters 1 through 4 are grouped by subject matter. The four subject areas and subareas are Program Planning and Training Act Agency Planning, Labor Market and Other Information Systems, Agency Capabilities, and Research and Development; Programs and Techniques (Education, Public Employment Programs, Supported Employment, Training and Apprenticeship, Upgrading and Job Restructuring, Welfare Programs, Worker Assessment and Orientation, Other Supportive Services for Work-

ers, and Program for Other Unemployed); Labor Market (Labor Force, Labor Market, Labor Demand-General; Labor Force, Labor Market-Specific Sectors and Cohorts; Employer Practices; and Work Attitudes); Economic and Social Policies. Institutional, doctoral dissertation, and small research project grants are listed separately in chapter 5. Projects supervised by the Department of Labor's Bureau of International Labor Affairs are presented in chapter 6. (LRA)

State of Arizona Career Exploration Model.  
Arizona State Dept. of Education, Phoenix.  
Pub Date—[79]

Note—34p.

Pub Type—Guides - Classroom - Teacher (052)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Behavioral Objectives, Career Awareness, \*Career Education, \*Career Exploration, Curriculum Guides, Fused Curriculum, Grade 7, Grade 8, Junior High Schools, Models, Observation, \*Program Development, \*Program Implementation, Self Concept, \*Statewide Planning

Identifiers—\*Arizona

This career exploration model gives a framework for use by schools in planning, developing, and implementing a career exploration program for grades 7 and 8 within a complete career education program. The recommended plan for use of the two-phase model is to use phase 1 at the seventh-grade level and phase 2 at the eighth-grade level. The major emphasis of each of the three sequential program components—self awareness, career awareness, and observational experience—for each phase is described. A suggested curriculum guide format to use in implementing the program calls for dividing each program component into sessions, each session consisting of the following parts: overview, importance, career exploration skills emphasized, activities, evaluation, materials and equipment, and resources. Two sample curriculum guides are provided. Another section suggests the following strategies for infusing career exploration into the existing curriculum: career exploration club, interdisciplinary approach, career course, and instructional module. The model concludes with listings of learning outcomes for each of the three program components in phase 1 and phase 2. (YLB)

Descriptors—Administrator Guides, Agency Cooperation, Check Lists, Cost Effectiveness, \*Disabilities, \*Disadvantaged, Flow Charts, Formative Evaluation, Guidelines, \*Mainstreaming, Needs Assessment, \*Program Development, Program Evaluation, Program Implementation, Resource Materials, School Community Relationship, Special Education, Special Programs, Summative Evaluation, \*Systems Approach, \*Vocational Education

This guidebook presents a systems approach to planning, implementing, and evaluating mainstream programs for special needs learners in vocational education. (The guidebook itself models this system.) It is divided into four sections and numerous subsections (components) in this order: (1) Introduction (to mainstreaming, and the approach), (2) Program Planning (six components), (3) Program Implementation (twelve components), and (4) Program Evaluation (one component). Sections 2-4 comprise the steps required in beginning a new program or improving an existing one. Although they are presented in chronological order, many of the activities from different sections are interrelated and may occur simultaneously in actual practice. Each self-contained section presents a short introduction, recommended activities, and/or guidelines related to the topic. Selected resource materials, including samples, checklists, and flowcharts, are provided to illustrate and expand the concepts, ap-

proaches, and guidelines presented. These resource materials are suitable for reproduction. Each section was written to provide users with information on concepts, alternative approaches, and specific content. Flowcharts and/or checklists are included and can be used as administrative check-off sheets for critical steps in the various processes. (YLB)

Descriptors—\*Coordination, Demonstration Programs, \*Employment Programs, Federal Legislation, Federal Programs, Information Dissemination, \*Methods, Program Descriptions, \*Program Effectiveness, Program Evaluation, Program Improvement, School Business Relationship, Success, \*Vocational Education, Youth Employment, Youth Programs

A study was conducted to analyze effective mechanisms for facilitating coordination of vocational education programs with programs conducted by prime sponsors under the Youth Employment and Demonstration Projects Act of 1977. The project goal was to identify, describe and analyze such mechanisms and to disseminate the results to a nationwide audience. Over 140 programs with exemplary coordination mechanisms were nominated for the study. Analysis of these programs showed the following: vocational education involvement ranged from a limited contractual agreement to deliver services to a full partnership of vocational education and the prime sponsor in planning and service delivery; vocational skills training was made available to Comprehensive Employment and Training Act (CETA) youth on an extended day basis, in regular programs, and in alternative settings; and cooperative vocational education work experience models helped to facilitate the awarding of academic credit. Two regional workshops were held to convey results and provide participants with opportunities to discuss the problems and strategies for coordination. Workshop evaluation results supported the recommendation that state Vocational Education Agencies and state Employment and Training Councils use coordination funds to support similar small workshops in state and local areas. It was recommended that Congress consider passage of a comprehensive youth education and employment act which rationally allocates responsibilities between education and prime sponsors. (Author/BM)

This document contains the first volume in a three-volume state-of-the-art report based on a study conducted to identify and analyze the effective mechanisms for facilitating coordination of vocational education programs with Comprehensive Employment and Training Act (CETA) Title IV

youth programs. Included in this volume are 111 case studies of programs demonstrating exemplary coordination mechanisms. These case studies are divided into three sections: (1) Coordinated Vocational Education-Title IV Programs; (2) Coordinated Vocational Education-CETA Programs; and (3) Coordinated Programs between Vocational Education and other employment and training service providers. Each program description includes title, location, educational agency, prime sponsor, funding, in-kind contribution, target groups, and contact person. The text of the case studies include program overview, role of vocational education, prime sponsor involvement, and program activities organized by six activity/service areas. The programs are indexed by major funding source(s), by major target groups served, urban/rural designation of program locations, prime sponsor types, federal region, educational agency, and educational facility type. Identifiers—\*Comprehensive Employment and Training Act Title IV, \*Prime Sponsors

This document is the second volume of a three-volume state-of-the-art report based on a study conducted to identify and analyze the effective mechanisms for facilitating coordination of vocational education programs with Comprehensive Employment and Training Act (CETA) Title IV youth programs. Included in this volume is a distillation of information from the first volume (CE 024 968), which contains descriptions of 111 coordinated programs, funded primarily under Title IV. The introduction found in chapter 1 presents the background information on the study. The second chapter synthesizes the major approaches to vocational education-prime sponsor coordination into three models: service delivery model, administrative model, and full program coordination model. Chapter 3 discusses the mechanisms that appear to be representative of the kinds of generic types that are happening in the field. These mechanisms are classified by the following six activity/service areas which guided the nominations of the programs: administrative affairs and outreach, assessment, counseling, and supportive services. The fourth and final chapter presents conclusions about the nature of vocational education-CETA coordination activities under Title IV and activities necessary to improve and sustain vocational education-CETA coordination. This document is the third volume of a three-volume state-of-the-art report based on a study conducted to identify and analyze the effective mechanisms for facilitating coordination of vocational education programs with Comprehensive Employment and Training Act (CETA) Title IV youth programs. Included in this volume is an analysis of the contextual factors and forces that impinge upon the genesis and evolution of cooperative mechanisms. The objective of this report is to identify major contextual forces, to trace their impact on coordination, and to offer recommendations for the strengthening of those with positive impact and for the neutralization of those with negative influence. The introduction found in chapter 1 presents background information on the study. The second chapter discusses major historical factors influencing the development of coordinative mechanisms. In chapter 3, structures and processes impacting on vocational education are examined in terms of their impact upon coordination. The analysis presented in chapter 4 examines the structures and processes impacting on CETA prime sponsors in terms of their effect upon coordination. Finally, chapter 5 presents recommendations that will increase the likelihood of coordination effort between vocational education and CETA. (BM)

Identifiers—\*Comprehensive Employment and Training Act Title IV, \*Prime Sponsors

The purpose of this guide is to suggest ways and means for initiating and sustaining a lasting and mutually rewarding partnership between vocational education and Comprehensive Employment and Training Act (CETA) youth programs. These suggestions were based on observations of over 100 programs throughout the United States judged to contain examples of exemplary linkages between vocational education and CETA prime sponsors. Chapter 1 presents an overview of the study and purpose of the guide. Chapter 2 presents suggested means of initiating cooperation. The third chapter provides a description of observed practices and procedures that have worked elsewhere in supporting and sustaining cooperative efforts. These procedures are classified according to major activities shared by vocational education and CETA. Speculation of what the future will bring and how this may impact on vocational education and CETA coordination is discussed in chapter 4. (BM)

Contract—300-78-0411

Note—46p.; Photographs will not reproduce well. For related documents see CE 024 978-980.

Available from—The National Art Education Association, 1916 Association Drive, Reston, VA 22091 (\$4.50).

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Administration, \*Art Education, \*Career Education, Elementary Secondary Education, Higher Education, \*Program Development

Identifiers—National Art Education Association

The purpose of this monograph is to present the thinking of art educators from all levels of the profession regarding the means to identify and encourage qualitative art career education. Each of the four sections is comprised of small group session reports of contributions, concepts, needs, and concerns that emerged from four National Art Education Association conferences that focused on career education in art education. The report of the elementary division sessions is a synthesis of what has been done and what could be done in the future to increase students' awareness and understanding of themselves, their abilities, and the world of careers. The secondary session report focuses on present efforts in career education, suggestions for future actions, cautions/problems/hindering forces, and recommendations for association actions. The report of the higher education division addresses continuing education, college art education for majors and non-majors, and the responsibilities of higher education toward the K-12 curriculum. Finally, the report of the supervision and administration division discusses the need for support at the highest levels of decision making. (LRA)

Descriptors—\*Art Education, Arts Centers, \*Career Education, Elementary Secondary Education, Higher Education, Instructional Materials, Museums, Postsecondary Education, Program Descriptions, \*Visual Arts

Identifiers—National Art Education Association

This monograph presents descriptions of programs and projects concerned with career education in the visual arts that were identified in a national survey of state art directors, regional and city art supervisors, and others who had knowledge of ongoing art programs. The first of eight sections contains programs which have been planned and developed

for entire school districts. In the second section are programs sponsored by school districts but which exist in single, somewhat specialized, school settings. In the third section are single courses of study for secondary students. The fourth section contains career education efforts involving art museums. In the fifth section are secondary career education programs and courses of study involving special institutes and college outreach efforts. Postsecondary career education programs are described in the sixth section, followed by descriptions of efforts that focus primarily upon the development and use of instructional materials and media presentations. The final section is devoted to a listing of programs and efforts for which the descriptions were not received prior to the project deadline. Each of the eight sections provides information about the names of the project directors, the funding sources, the availability of materials, and the name and address of a contact person. (LRA)

Descriptors—\*Art Education, Artists, \*Career Awareness, \*Career Education, Careers, Employment, Employment Opportunities, \*Occupational Information, Occupations, \*Visual Arts

Identifiers—National Art Education Association

The purpose of this monograph is to provide students, teachers, counselors, and parents with a broad overview of career opportunities available in the visual arts. The monograph is organized into four broad occupational areas: designers, studio artists, educators, and technical artists. Included under each heading is information regarding the character of employment, places of employment, training requirements, and occupational outlook. In addition to identifying the various arts occupational areas, the monograph lists the names of national organizations to consult for more detailed information on specific occupational areas. Three appendices provide short job activity descriptions for a select number of careers in each visual arts career category and identify a number of postsecondary education institutions where a student may receive formal training. Identifiers—National Art Education Association

The purpose of this handbook is to encourage a dialogue among art educators, career educators, and those who function in the world of work in art and to acquaint art educators with art career education potentialities through identifying important school programs and audiovisual resources. Each of the five chapters is comprised of papers delivered at four National Art Education Association Career Education Conferences. Chapters included are (1) Defining Career Education: Relating Career Education to the Arts; (2) Art and Career Education: Al-

ternative Explanation for Career Oriented Art Programs; (3) Artist and Patron: The Rewards and Frustrations of Careers in Art; and (4) Art Career Education: Theory into Practice. The final chapter contains an annotated bibliography of print and nonprint materials related to career education in the visual arts. (LRA)

Identifiers—National Longitudinal Surveys

The six articles in the reprint (with supplementary tables) from the October 1979 Monthly Labor Review, marking the International Year of the Child, are about children and work. Two articles examine the labor force experience of young U.S. workers in general and young black workers in particular over the past quarter century (1955-78). A third article reports on efforts to follow the experience of young workers in the labor force by means of a panel survey, while a fourth reports on the most recent experience of school graduates and dropouts in the labor market. The remaining two articles explore the effects of the work situation of adults upon children. One deals with the employment, income, and marital situations of the U.S. families in which children are growing up, and the other examines the arrangements families have effected for the care of children to permit adults to work. Identifiers—Management Evaluation Review Compliance Quality, State Advisory Councils, Vocational Education Amendments 1976, Vocational Education Data Reporting Accounting

Covering 1978, the first year that vocational programs and related activities were supported under P.L. 94-482, this report describes the impact for each section of the Vocational Education Amendments of 1976 on the growth and development of vocational and technical education. Materials, divided into two sections on state vocational and national programs, are presented in the same order that they appear in the act to provide easy access. These results are reported: an all-time high total enrollment, increased male and female enrollment in nontraditional vocational programs, increased enrollment of disadvantaged and minority students, nearly 2,250,000 program completers at all levels, and appropriations and expenditures for vocational education totaling over 5.6 billion dollars. These other specific topics are emphasized: expansion of state advisory councils on vocational education for broader representation of business, labor, educational, and minority interests; states' assessment by Management Evaluation Review for Compliance Quality; implementation of displaced homemaker programs; and development and operation of a Vocational Education Data Reporting and Accounting

System. (YLB)

Identifiers—Distributive Education Clubs of America, Entrepreneurs

These distributive education training and development plans for secondary-level programs provide lists of competencies a student needs to hold a job in sales and marketing occupational areas. The design of the training plans is based on a "pyramid" which incorporates the following five sections or levels of competencies (from general to specific): large group basic, small group occupational code, individual special code, DECA (Distributive Education Clubs of America), and on-the-job-individual competencies which may be identified by the coordinator or employer. Each of the training plans follows this format: name and occupational code, occupational description, sample job tasks and responsibilities, and competency checklists upon which are to be indicated the means of mastering the competencies (the five levels of the pyramid), and a final student evaluation form to scale traits and work habits/abilities. The twenty-two areas are advertising and display services; apparel and accessories marketing; vehicles and accessories marketing; finance and credit services; floristry, farm, and garden materials marketing; food marketing; food services marketing; general merchandise retailing; hardware and building supplies marketing; home furnishings marketing; hotel, motel, and lodging services; industrial and institutional marketing; insurance; international marketing; personal services marketing; petroleum marketing; real estate marketing; recreational marketing; transportation and travel marketing; business services marketing; business ownership (entrepreneurship); and general marketing. Descriptors—\*Accounting, \*Articulation (Education), Business Education, \*Business Skills, \*Career Ladders, Clerical Occupations, Community Colleges, Coordination, \*Curriculum Development, \*Data Processing, Data Processing Occupations, Employment Qualifications, High Schools, Institutional Cooperation, Job Skills, Models, Occupational Information, Office Occupations, Office Occupations Education, Program Content, Technical Institutes, Two Year Colleges, Vocational Education, Vocational Schools

Identifiers—Northeast Vocational Advisory Council WA, Washington

The second phase of a curricular articulation project conducted as a coordinated effort among school districts, vocational-technical institutes, and community colleges involved in the Northeast Vocational Advisory Council (NEVAC) developed career ladders in three vocational program areas and a model useful to others developing similar ladders. The two subject areas identified for curricular exploration and development were data processing and accounting. A secretarial ladder developed in

the first phase was further refined and validated. Instructors in each curricular area met with professionals from the field to develop career ladders, sample job titles, entry pay levels, and competency checklists for each step on the identified career ladders. These materials were validated in representative industries and by teachers providing training in the career field, and the process for dissemination and incorporation into programs was set in motion. (Appendix, amounting to well over one-half of the report, include drafts and final versions of the career ladders and a sample competency checklist worksheet.) (YLB)

This elementary curriculum is a vehicle to provide manipulative activities that reinforce academic skills through meaningful, relevant, activity-based awareness of modern society. The twenty-six activity plans included in the curriculum place a major emphasis upon realistic or concrete experiences that deal with the manipulation and exploration of materials, tools, and processes. Among the activity plans included are (1) All American Popcorn, (2) Building Contractors Construct a Wren House, (3) Flower Cube on the Assembly Line, (4) Planter Box, and (5) Wooden Coasters. Each activity plan follows a typical format: activity title, area titles and major concepts, description of activity and enrichment, related careers, alternate activity, supplies, equipment, activity procedures, followup ideas, evaluation, health and safety procedures, tips to the teacher, and content material. A final section contains seven additional activity ideas. The game directions for nutrient cards and a permission letter are appended. (LRA)

These ten sequential instructional modules are intended to assist secondary students in the development of occupational decision-making skills. Designed for grades 9 and 10 (but adaptable to grades 8, 11, and 12), the minicourse covers three areas—values, occupational information, and career decision making (which links the other two areas). Topics include values clarification; individual values; different rewards from different jobs; setting value priorities; choosing between competing alternatives; individual abilities and interests; steps in decision making (goal setting); errors in decision making and collecting information; occupational costs, rewards, and characteristics; and career decision making. Each unit contains some or all of the following information: developmental and perform-

Identifiers—\*Vocational Evaluation

An optimal vocational evaluation program is described which was provided as part of a treatment of vocational and school behaviors of 119 reluctant learners from twenty-two rural school districts. (The 60-hour vocational evaluation process involved out-of-school psychometric and work sample testing over a two-week period.) An alternative in-school variation of that program is suggested and the effects (generally positive) of the original program on learners are summarized. Three perspectives are discussed with respect to the use of vocational evaluation in rehabilitation and educational applications: as an information gathering process, as a client-reactive process, and a rehabilitative process. The central components of a variety of educational experiments are examined as catalysts for increasing the relevancy of education and for effecting changes in behaviors of special needs students. Vocational evaluation is identified as a key catalyst for affecting the vocational development and school behaviors of the reluctant learners in the three-step Equal Career Opportunities Program (ECO): (1) in-school identification; (2) out-of-school vocational evaluation; and (3) in-school followthrough. In the alternative model which is suggested, vocational evaluation and career guidance are formally joined into a one- or two-semester course, the terminal objective being that students will establish realistic vocational plans and be provided with necessary school resources to attain these goals. The evaluation of the effects of vocational evaluation on the ECO students' vocational development and school behaviors are summarized and presented as suggested minimum levels for the in-school model. Descriptors—Adolescents, Age, Black Youth, College Graduates, College Students, Dropouts, Employment Level, \*Employment Patterns, Employment Statistics, Family Income, Females, High School Graduates, High School Students, Hispanic Americans, Labor Force, \*Labor Market, Males, National Surveys, Occupations, Postsecondary Education, Secondary Education, Student Employment, Whites, Young Adults, \*Youth Employment

A study based on supplementary questions in the October 1978 Current Population Survey revealed an improved job situation among U.S. youths both in and out of school, but it showed dropouts and those from low-income families at a distinct disadvantage. Overall, the number of employed youths (age 16-24) increased by 1.1 million from October 1977 to October 1978 although that segment of the population increased by less than 300,000. Most of the increase in the student labor force was accounted for by high school students. The large differences between the labor force participation rates of black and white youth (students and nonstudents) persisted or increased. The unemployment rate for dropouts was more than double that of high school graduates and three times that of college graduates. Youths from lower income families were less likely to be in the labor force, and if in it, much more likely to be unemployed. Three-fourths of the report consists of tabular data on the employment status of youth (high school or college students, graduates, and dropouts) by sex, age, race, family income, occupation/industry, and duration of employment; on additional combinations of the above variables; on reasons unemployed youth were looking for work; and on youth of Hispanic origin. Methodology for the survey is described briefly. (JT)

Descriptors—Administrator Attitudes, Counselor Attitudes, Cultural Influences, \*Enrollment Influences, High Schools, \*Nontraditional Occupations, Parent Attitudes, \*Sex Bias, Sex Stereotypes, Socioeconomic Status, State Surveys, Student Attitudes, Teacher Attitudes, \*Vocational Education

Using an opinion questionnaire with students, parents, and school personnel and personal interviews with secondary students, a Kentucky research study examined the extent of sex bias in vocational programs, the factors contributing to the enrollment of nontraditional students, and the barriers or problems affecting the enrollment of nontraditional students in the state's vocational education programs. Additional objectives were (1) to determine the effects of socioeconomic status, attitudes toward education, and the culture of the geographic area upon enrollment in nontraditional programs, (2) to make basic recommendations for the elimination of existing stereotyping and bias, and (3) to compile a sex fair comprehensive bibliography of vocational education materials. Selected conclusions include these: all respondents felt vocational teachers exhibited sex fair behavior; students and their parents are unsure as to how nontraditional students were treated by counselors; all groups except the principals were unsure as to whether principals saw the need to eliminate sex bias in the community; and students do not feel that they are adequately prepared for the possible problems and barriers a nontraditional job seeker may experience. Among the eight recommendations made are those supporting increased parental involvement, student orientation to legal rights relative to sex fairness in education, the development of a sex-fair standardized method of student selection for over-capacity vocational courses, and an interdisciplinary approach to encourage the enrollment of nontraditional students. (The fourteen appendixes include survey instruments, summarized responses, and various forms and procedures used. The bibliography is available as a separate document—see Note.) (Author/MEK)

A project was conducted (1) to obtain an operational definition of vocational guidance as it is prac-

ticed in Indiana's secondary schools, (2) to establish a model vocational guidance program as defined by panels of Hoosier practitioners, and (3) to develop an objective, self-administered instrument designed to assess movement toward the model vocational guidance program. In the first of two phases of the project, 174 Indiana secondary school counselors were interviewed regarding the vocational guidance services they provide. In phase 2 practitioners from vocational education and guidance and counselor education were used to identify vocational guidance program functions and means for providing vocational guidance services. Products of the project included the framework for a model vocational guidance program, an outline for organizing comprehensive vocational guidance, planning that includes all service deliverers, and checklists for assessing the existence and quality of vocational guidance services. This secondary vocational guidance planning handbook is designed for secondary school personnel who want (1) to start a vocational guidance program, (2) to assess their vocational guidance services, (3) to expand or diversify their vocational guidance services, (4) to gather ideas for new vocational guidance activities. The first of three major sections defines the Indiana model secondary vocational guidance program and its eight functions. Section 2 presents a comprehensive planning process that includes all service deliverers. The final section provides checklists for assessing the existence and quality of vocational guidance services and offers suggestions for ways to deliver vocational guidance services in the following areas: vocational exploration; recruitment, admissions, and scheduling; vocational counseling; placement; program management; public relations; followup; and evaluation. Identifiers—\*Experience Based Career Education, Oregon

The main purpose of a 1978-79 evaluation of the Jackson County E.S.D. (Educational Service District) Community Experiences in Career Education—(CE)2-program was to investigate the student turnover rate which for two years had exceeded fifty percent. The program provided experience-based career exploration opportunities for high school juniors and seniors who were instructed in job survival skills and placed with employers in the community. Data collected on students included Wide Range Achievement Tests (WRAT), Adult Performance Level (APL) functional literacy tests, written statements on the reasons for entering, dates of entry and exit, attendance, productivity, and program evaluation questionnaire. Results suggested grouping stu-

dents by manner of separation from (CE)2-dropping out, expulsion, graduation or return to school, leaving for work, unrelated reasons, and end of the school year. (CE)2 students were generally below average as measured by the WRAT and APL survey. Those who ultimately graduated and those who returned to school were the most able, while those who left (CE)2 for work were the least. Those who dropped out resembled the top groups in achievement, indicating possible attitudinal differences. Changing requirements to make the program seem less like school to dropouts seemed to be indicated. (YLB)

Identifiers—National Health Service Corps

This manual is designed to help the National Health Service Corps practitioner plan for and obtain continuing medical education. Three introductory sections explain what the manual is about, for whom it is designed, and some of the problems in obtaining continuing medical education. The remaining portion of the manual helps practitioners answer the following questions as they plan for continuing medical education: (1) What do you want from your continuing medical education? (2) What are your specific learning objectives? (3) What are possible formats for continuing education? (4) How do you identify appropriate resources? (5) What steps do you take to obtain leave? (6) How should you prepare for the continuing medical education program? and (7) How can you evaluate the continuing medical education program? Appended is a list of programs that can be used for self-assessment, practice evaluation, and developing a personal learning plan. (LRA)

Identifiers—National Health Service Corps

This manual provides the regional clinical coordinator with ideas of what a clinical support system for the National Health Service Corps (NHSC) providers should include and ideas on how to create effective regional systems. Following an introductory section, the first of three additional sections defines the purpose of clinical support systems as being twofold: first, to support the physician as he adjusts to his new isolated role in the practice of medicine; and second, to fill the gaps in his training. The second section provides a brief discussion of the scope of clinical support service. Section 3 describes four roles of regional clinical coordinators: (1) to understand the needs of and maintain contact with NHSC practitioners, (2) to identify appropriate resources within each state in their region, (3) to develop specific projects with each institution, and (4) to evaluate the effectiveness of the program. A personal continuing medical education assessment form is appended. (LRA)

Identifiers—National Health Service Corps

This manual is directed to those involved with National Health Service Corps (NHSC) in providing clinical support services and continuing education to NHSC physicians. Following an introductory section, the first of three additional sections defines the purpose of clinical support systems as being twofold: first, to support the physician as he adjusts to his new isolated role, and second, to fill the gaps in his training. The second section provides a brief discussion of the scope of clinical support service. Section 3 discusses seven clinical support services objectives and critical concepts: to create and maintain an innovative and responsive continuing medical education project, to maintain close personal contact and clear lines of communication with assigned NHSC personnel, to develop a primary care orientation to the project, to develop an in-depth understanding of the needs of the NHSC practitioners, to provide such clinical support activities as necessary to the NHSC practitioners, to provide continuing education programs, and to carry out a continuous evaluation of the project. Appended are the results of a survey of national health service corps and private physicians that sought to determine physician satisfaction with rural practice and ways the medical center might intervene to improve the degree of satisfaction. Descriptors—Administrators, Business Administration, Case Studies, Certified Public Accountants, \*Cost Effectiveness, \*Decision Making, Dentists, Doctoral Dissertations, Lawyers, Literature Reviews, Nurses, Nursing Homes, Optometrists, Periodicals, Pharmacists, Physicians, \*Professional Continuing Education, Professional Development, Professional Personnel, Publishing Industry, Real Estate Occupations, \*Scholarly Journals, Social Workers, Surveys, Veterinarians

A study determined what business administration considerations were elements in the managerial decision making process to include structured continuing education in a professional journal and what the positive or negative results have been in terms of operating benefits and profits. An initial literature review showed the need for exploratory study to establish baseline data. This first stage of the research used a questionnaire to collect data on 136 publications servicing eleven professions: certified public accountants, dentists, lawyers, nurses, nursing home administrators, optometrists, pharmacists, physicians, real estate personnel, social workers, and veterinarians. Fifty publications reported currently having a regular structured continuing education feature; ten stated they had definite plans to begin one. A second stage of the research involved case studies of a representative publication in each professional category. Eight publications reported that structured continuing education as a marketable feature had provided a positive economic impact. Two rejected it because only a small percentage of their readership had mandatory continuing education requirements. Data analysis findings indicated (1) a good-to-excellent market

potential for structured continuing education in professional journals, (2) publisher expectation that participating readers pay special fees to cover costs, and (3) the occurrence of direct (income) and indirect (increased advertising and circulation) benefits. (YLB)

These ten case studies of the Program for Persons of Limited English-Speaking Ability (PLESA) report different approaches to providing training and employment assistance to unemployed persons of limited English-speaking ability. (A summary report of forty-seven projects is available separately. See Note.) The first four describe projects conducted in Tucson, Arizona; New York City; Bergen County, New Jersey; and Laredo, Texas. The remaining six cases describe selected features or components of projects in Los Angeles, San Francisco, and Orange County, California; Honolulu, Hawaii; and Philadelphia and New Holland, Pennsylvania. Each section (case study) begins with a bibliographic data sheet and project profile sheet which outlines target group; objectives; client recruitment, selection, assessment, and counseling; training; job development and placement; follow-up program; supportive services; budget; and outcomes. Topics discussed within the narrative of the case studies include project planning; target groups; project direction, management, and operation; clients and services; English language instruction; occupational skills training; job development and placement; and results. Target groups include Hispanics, Vietnamese refugees, Filipinos, and Russian and Korean immigrants. Occupations trained for include secretarial, electricians' helpers, import-export clerks, Chinese cooks, nursing, and auto mechanics. (YLB)

Descriptors—Citizen Participation, \*Community Involvement, Hearings, \*Program Effectiveness, Program Improvement, School Community Relationship, \*Vocational Education

Identifiers—Texas

Proceedings are presented of twenty public hearings conducted by the advisory council for technical-vocational education in Texas. The objectives of the hearings were to provide an opportunity for citizens to give input as to needs, assessment of resources, and dialogue regarding technical-vocational, adult, and manpower programs. The first three sections included in the docu-

ment present oral quotes from the hearings and is broken down into sixteen broad categories: quality/relevancy of education; need for skilled workers; image/attitudes; industry/education partnership; findings; special groups; state administration; teachers' salaries, preparation, and certification/counseling; adult education; coordination between agencies/programs; new programs; and miscellaneous. The second portion of the document is comprised of written testimony submitted at the hearings and is divided into the same sixteen categories. A sub-part of section 2 presents the written reports of six study groups appointed to study specific topics. Study groups reporting were comprised of (1) administrators (educators), (2) business/industrial association, (3) manpower/Comprehensive Employment and Training Act/labor/state and federal agencies, (4) Parent Teacher Association/school board/parents/citizens, (5) students/former students, and (6) teachers. A final section gives testimony received from students and former students. (LRA)

Pub Type—Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Civil Rights, Correctional Education, \*Correctional Rehabilitation, \*Criminals, Disabilities, Exceptional Persons, Justice, \*Mental Retardation, Rehabilitation Programs, Social Problems, \*Vocational Rehabilitation

This training manual for criminal justice personnel addresses three general areas: (1) the nature of mental retardation and its relationship to criminal behavior, (2) the history and extent of the problem of the retarded offender, and (3) mechanisms for the delivery of services to this group of offenders. The manual is divided into twelve chapters designed to correct the injustices caused by failure to recognize the offender as being a retarded person or by an unfamiliarity with the nature of retardation and how to deal with this special problem. Chapter titles include Introduction: Why This Manual?; Tom P.: A Case History; Mentally Retarded Citizens: Who Are They?; Myths and Facts; Mentally Retarded Offenders: Who Are They?; A Discussion of the Problems and Issues of Mentally Retarded Offenders; Problems of Identification: Mentally Retarded Offenders; A Clinical and Practical Discussion of Retardation and Criminal Behavior; Retarded Offenders: Habilitative Program Development; Legal Rights; and Other Associated Disabilities. A bibliography is included. (LRA)

Descriptors—\*Career Education, Definitions, \*Disabilities, \*Educational Needs, Elementary Secondary Education, Employment Opportunities, Employment Potential, \*Gifted, \*Low Income Groups, \*Minority Groups, Needs Assessment, Special Education, Student Development, Talent, Talent Identification, Work Attitudes

This Spanish translation of ED 132 428 includes the three papers representing Office of Education attempts to face the need for improving delivery of career education to special portions of the population. New additions are brief sections on basic defi-

nitions and additional considerations of the significance of work. The first paper, on career education for minority and low income persons, states that career education for this segment of the population has been a matter of over-promise and under-delivery. Promises and problems are discussed as conceptual, process, and programmatic assumptions of career education. The second paper, on career education for gifted and talented persons, discusses special problems involved in program development, such as career decision making, the development of talent, and work experience. In the third paper, on career education and the handicapped person, statistical predictions concerning under-employment and unemployment of handicapped high school graduates during the next four years are cited to emphasize the need for making career education opportunities available. These basic career education principles are stressed as particularly relevant for the handicapped: the right to choose from a wide range of personally meaningful work opportunities and emphasis on accomplishments and discovery of an individual's talents rather than limitations. Descriptors—Administrator Attitudes, Employer Attitudes, \*Experiential Learning, High Schools, Parent Attitudes, Program Development, \*Program Improvement, Questionnaires, School Community Relationship, \*Student Attitudes, Surveys, \*Teacher Attitudes, \*Work Experience Programs

To determine programmatic concerns to aid in the establishment or expansion of experiential education programs, a study gathered data by use of a mail questionnaire sent to nineteen experiential education programs in California, Florida, Massachusetts, and Ohio. The five constituent groups sampled were students, teachers/administrators, program coordinators in schools with experiential education programs, worksite supervisors, and parents. Based on a review of the literature, nine clusters of concern were identified as programmatic dimensions of experiential education: (1) goals and objectives; (2) school; (3) placements; (4) worksite supervisors; (5) staff; (6) students; (7) parents; (8) evaluation; and (9) community school interface. These clusters formed the basis for the development of items to be included in the questionnaire. Priority concerns for each group were analyzed according to characteristics of the respondent group and the programs they represent, and ways to increase the likelihood of program success based on the information were suggested. Significant concerns were revealed in a number of areas; for example, girls place greater priority on the aspects of their community placement than boys, and worksite supervisors generally consider their role extremely important to the workplace. Questionnaires and data are included. (Author-MEK)

Descriptors—Adult Development, \*Adult Education, Community Services, \*Educational Gerontology, Financial Support, Geriatrics, Gerontology, Older Adults, Participation, Personnel Selection, Planning, \*Program Content, Program Design, Program Development, \*Program Implementation, Publicity, Recruitment, \*Retirement, Retirement Benefits

Identifiers—\*Preretirement Programs

Preretirement education programs can help people (1) to develop an awareness of issues which influence retirement satisfaction, (2) to gain information relevant to retirement planning, (3) to explore options available after retirement, (4) to identify resources for implementing preretirement plans, and (5) to identify community services for retired persons. Of the various models of preretirement education programs currently in use, the models that provide learner involvement seem to be most effective, particularly with regard to clarifying attitudes and exploring options. Important considerations in program implementation are target population, sponsorship, staffing, publicity and recruitment, meeting spaces and times, attendance of spouses, and fees. Program content varies, but generally includes orientation to the program and discussion aimed at examining characteristics and situations of older persons and an overview of the retirement process, physical health, nutrition, financial or estate planning, legal affairs, consumer education, housing and living arrangements, income maintenance, and use of leisure time. Additional topics that are desirable to include are mental health, employment, family and other social relationships, community resources, widowhood, human sexuality, death and dying, and spiritual needs of older people. Locally developed financial support for the programs seems to be the most likely source of funding. (Author/YLB)

**ED 185 410 CE 025 133****Development of a Plan for Research, Development and Instruction in Adult Vocational Education.**

Identifiers—Illinois

This report of a project to begin to develop a plan for research, development, and instruction in adult vocational education in Illinois has two specific goals: (1) to identify the current status of adult vocational education in Illinois and (2) to recommend key directions for state actions. It presents information collected through a comprehensive review of literature supplemented by interviews with key individuals involved in adult vocational education in Illinois and by information obtained from adults with a need for vocational education. Following an introductory section and another discussing the current status of adult vocational education, major groups of adults who need and could benefit from vocational education are considered individually in five sections. These groups consist of adults who are (1) seeking to upgrade occupational skills for purposes of occupational maintenance or advancement, (2) planning or undertaking a mid-life career change or re-entering the paid work force after an extended absence, (3) unemployed and/or underemployed, (4) seeking vocational education for avocational purposes. Each section describes problems encountered in delivering vocational education to each of these groups, identifies exemplary programs and available opportunities for each group, and makes recommendations for action concerning delivery of

vocational education to each group. (YLB)

Descriptors—Competency Based Education, \*Coordinators, \*Employment Counselors, \*Employment Services, \*High Schools, Internship Programs, \*Job Placement, Management Development, Postsecondary Education, \*Professional Training, Program Development, Secondary Education, Staff Development, Two Year Colleges

Identifiers—Illinois

Twelve members of school faculty and staff participated in a refined competency-based continuation of a pilot program to train individuals to function as placement coordinators in their schools in southern Illinois. Participants enrolled in a weekly placement seminar on campus for the 1978-79 academic year and in a continuous supervised internship in their schools which required them to operate a placement service. Summer internship experiences were provided by agencies other than their local school system. Project objectives were to (1) refine and amplify the identified competencies necessary for an individual to function as a job placement coordinator, (2) provide a training course for coordinators, (3) test the refined competencies for incorporation into a transportable model, and (4) evaluate the impact of program completers. Conclusions indicate that the placement coordinator training benefited the local education agency (LEA) and the participant; the transportable model developed represents an effective training system; LEAs participating in the program make greater developmental progress; and success in the development of an effective placement service is affected by an effective placement coordinator training program, LEA support and developmental initiative, and the acceptance of the school-based placement coordinator by school faculty and administrators, parents, business, and students. Identifiers—Ontario

This report describes a six-year followup of high school students in Ontario. The report is based on surveys conducted while the students were in grade 12 and at two intervals shortly thereafter. The first two chapters present an overview of the characteristics of the respondents and a description of their educational and occupational activities after leaving high school. Chapter 3 reports on a series of questions designed to gauge the link between schooling and work. Findings on who got what kind of education, grades received, records of completion, and ways in which this postsecondary schooling was financed are presented in chapter 4. Chapter 5 is a study of the issues surrounding interruption of schooling after high school, withdrawal after commencing postsecondary programs, and rates of completion. Chapter 6 reports findings with respect to occupational prestige and salary. Chapter 7 presents findings on private vocational schools, adult education, apprenticeships, and short courses, and assesses their importance to the respondents. In chapter 8, a number of individuals give their per-

sonal accounts of schooling and work on the basis of their priorities. The final chapter gives a set of statements regarding equality of educational opportunity in Ontario and presents a set of recommendations. The questionnaire is appended. (LRA)

Descriptors—Guidelines, \*Instructional Materials, Language, \*Sex Bias, Sex Role, Sex Stereotypes, Teaching Guides, Teaching Methods, \*Vocational Education

Intended to aid vocational education teachers in recognizing and dealing with sex biases contained in classroom materials, guidelines are offered to help the teacher deal with sexist language, roles, portrayal of personal traits, and illustrations. It is suggested, for example, that teachers point out sex-biased statements and discuss with students the perceptions they evoke or discourage. Guidelines for dealing with sex biased language deal with masculine generic forms and pronouns, gender nouns that denote occupations, inconsistencies, disparaging words (e.g., "the cute secretary"), and avoidance of reference to gender. Suggestions for dealing with roles address the topics of stereotypical occupational roles, inconsistencies in presenting occupational roles, leadership roles, tokenism, and social roles. Biased portrayal of physical attributes and personal traits are discussed as are omissions, subordinate roles, tokenism, and physical portrayals in illustrations. (MEK)

Identifiers—Denmark, France, Italy, Netherlands, Spain, United Kingdom, United States

This collection of studies focuses on the problem of non-participation in adult education. The collection is the third of four volumes presenting general and national studies of issues, problems, and trends in adult education. (See Note for other volumes in the series.) The first study presented, *Motivation and Participation with Special Reference to Non-Traditional Forms of Study*, is a general analysis of the reasons for negative attitudes toward learning. It suggests that it might be possible to remove such attitudes by developing new types of learning situations. The next seven case studies explore the non-participation phenomenon in seven countries—Denmark, France, Italy, the Netherlands, Spain, the United Kingdom, and the United States. Concluding the volume, two studies of attempts to appeal to particular groups are presented. Involving Industrial Workers in Post-Compulsory Education in Germany contains a global view of the problem of getting German industrial workers into adult education. A Case Study Based on an Urban Overspill Housing Estate is an evaluation of an educational program designed for people living on a housing estate in England. (YLB)

Descriptors—Economic Factors, \*Employed Women, \*Employment Patterns, Employment Statistics, \*Family Characteristics, \*Females, \*Income, \*Labor Force, Labor Market, Social Influences, Tables (Data)

Identifiers—\*United States

This report presents a brief overview of the changing labor market conditions for women and the steps

taken to keep the Bureau of Labor Statistics data relevant to the social and economic setting in which these changes took place. Data tables and discussion are included on the following topics: working women in the 1970s; women workers and their families; women's earnings; spending patterns; and other changes and revisions in reporting BLS statistics on working women. EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Androgyny, Classroom Environment, Counselor Attitudes, Counselor Training, Elementary Secondary Education, Individual Development, Inservice Education, Inservice Teacher Education, Nature Nurture Controversy, Postsecondary Education, \*Self Concept, Sex Bias, Sex Discrimination, Sex Fairness, \*Sex Role, \*Sex Stereotypes, \*Social Attitudes, Social Behavior, Social Development, \*Socialization, Social Values, Teacher Attitudes, \*Teacher Improvement, Teaching Conditions

Identifiers—Project ASPIRE

This first of four workshop modules in the Project ASPIRE (Awareness of Sexual Prejudice Is the Responsibility of Educators) series deals with understanding the development of sexual bias and individual attitudes toward sex-role stereotyping. (See Note about other modules.) The module helps work participants explore (1) the development of an individual's sexual identity, (2) their own sex-defined roles and attitudes as influenced by societal reinforcement, and (3) the values and expectations regarding their own sex roles. The module provides workshop facilitators with instructional guidelines, participant activities, and supplemental reading materials. Examples of the 22 participant activities include "Personal Unfoldment and Group Recall," "What's in a Word? Sexism Perhaps," "Fantasy," and "Values Voting." Each suggested activity is presented in this format: reference to objective, awareness level, purpose, logistics, materials, time required, process, and variations. It is recommended that at least two activities be chosen to treat each module objective. An appendix contains nine participant readings and two facilitator references to support specific activities. (YLB)

Identifiers—Project ASPIRE

This second of four workshop modules in the Project ASPIRE (Awareness of Sexual Prejudice Is the Responsibility of Educators) series deals with deve-

loping awareness of how sex-role stereotyping affects the vocational and life-style aspirations and decisions of students. (See Note about other modules.) The module helps workshop participants (1) explore how perceptions of sex roles influence interactions with and reactions to students; (2) explore stereotypes which have historically limited female or male participation in specific occupations; (3) become aware of the present realities of the labor force, of the changing career options for men and women, and of the positive and negative aspects of such choices; and (4) become sensitized to the need for sex fairness in instruction and career guidance. Workshop facilitators are provided with instructional guidelines, participant activities, and supplemental reading materials. Examples of the seventeen participant activities include "Index for Reality," "The Myth and the Reality," and "Design a Sexist School System." Each suggested activity is presented in this format: reference to objective, awareness level, purpose, logistics, materials, time required, process, and variations. It is recommended that at least two activities be chosen to treat each module objective. An appendix contains ten participant readings and one facilitator reference to support specific activities, an index for educators, and a preliminary guide to the assessment and evaluation of sexism in educational contexts. (YLB)

Identifiers—Project ASPIRE

This third of four workshop modules in the Project ASPIRE (Awareness of Sexual Prejudice Is the Responsibility of Educators) series deals with analyzing and developing procedures for dealing with sexual stereotypes and biases reflected in learning and counseling materials with the schools. (See Note about other modules.) The module helps workshop participants (1) develop criteria for evaluating instructional and counseling materials in terms of sexual and cultural bias, (2) examine currently used materials to determine if they include evidence of bias, (3) examine current procedures and criteria for the selection of counseling and instructional materials, (4) examine the flexibility of the curriculum in order to determine the potential for change, and (5) develop supplemental activities to assist in working with biased instructional materials. The module provides workshop facilitators with instruction guidelines, participant activities, and supplemental reading materials. Examples of the fourteen participant activities include "Who's Who?" "Developing Criteria," "Create a Sex-Fair Story," and "Differential Treatment." Each suggested activity is presented in this format: reference to objective, awareness level, purpose, logistics, materials, time required, and process (and variations). It is recommended that at least two activities be chosen to treat each module objective. An appendix contains seven readings to support specific activities. (YLB)

Identifiers—Project ASPIRE

This fourth of four workshop modules in the Project ASPIRE (Awareness of Sexual Prejudice Is the Responsibility of Educators) series deals with developing skills to help eliminate sex-role stereotyping within the school setting. (See Note about other modules.) The module helps workshop participants (1) become aware of federal guidelines and legislation regarding sex discrimination in schools, (2) gain information about changes which can be made in daily classroom organization in order to eliminate sexist teaching techniques, (3) develop special activities and materials which can be utilized in the classroom and in the counseling setting to counteract sex-role stereotyping, and (4) gain facility in interpersonal skills which can assist them in eliminating sex-role stereotyping. Workshop facilitators are provided with instructional guidelines, participant activities and supplemental reading materials. Examples of the ten participant activities include "Overview of Title IX," "Planning for Change," and "Simulation in Sexism." Each suggested activity is presented in this format: reference to objective, awareness level, purpose, logistics, materials, time required, and process (and variations). It is recommended that at least two activities be chosen to treat each module objective. An appendix contains seven readings and one facilitator reference to support specific activities. (YLB)

Identifiers—District of Columbia

Designed to provide mature adults in an urban setting with an alternative to the high school diploma, the External High School Diploma Program of the District of Columbia is a systematic assessment of an individual's demonstrated competencies in the four generalized life skills areas of health, social/political, consumer/producer, and career assessment/occupational knowledge; the program also provides for assessment of demonstrated competencies in one of the individualized areas of occupational/vocational, advanced academic, or advanced specialized. The five steps in the program are orientation, diagnosis, assessment, evaluation, and recommendation for approval. During the assessment phase, the most important step, the candi-

dates (1) develop a portfolio containing all data on and by them which will be the equivalent of a high school transcript after graduation and (2) earn 100 points in each of the four life skills areas by demonstrating specified competencies and in one of the individualized competencies areas. Evaluation in the occupational/vocational area includes employer testimony, job performance, or documentation. Designed for clients hoping to pursue postsecondary studies, the advanced academic category involved application to a college. All other individuals are included in the advanced specialized category. (Appendixes include lists of generalized life skills and individualized competencies and sample assessment tasks and achievement records.) (YLB)

Descriptors—\*Adult Education, \*Adult Learning, Conferences, \*Educational Policy, \*Educational Research

Themes and thoughts (rather than a literal transcription of proceedings) are presented on a symposium held in November, 1979, on the research, policy, and practice of adult learning. Participants were federal officers, adult education professors, researchers in business and education, and policy developers. The symposium was organized around four major areas: (1) current events in adult education; (2) issues concerning the translation of research into practice; (3) policy implications; and (4)

the future of adult learning. Each area was addressed by a panel with comments from the audience. The document is divided into three parts: the symposium and a general overview, the main meeting discussion summaries, and specific recommendations and written reactions to the meeting. Names and addresses of the participants are appended. (MEK)

Identifiers—\*Bearings, \*Seals (Mechanics)

This manual on bearings and seals is one of a series of power mechanics texts and visual aids for use in training for the servicing of automotive and off-the-road farm and industrial machines. Materials provide basic information and illustrations for use by vocational students and teachers as well as shop servicemen and laymen. Focusing on bearings, the first of two parts addresses topics such as types of bearings, loads on bearings, plain bearings (bushings), diagnosis of plain bearing failures, trouble shooting of plain bearings, anti-friction bearings, bearing capacities, types of ball bearings, types of roller bearings, types of needle bearings, maintenance of anti-friction bearings, diagnosis of failures, lubrication of anti-friction bearings, installation of anti-friction bearings, and trouble shooting of anti-friction bearings. Part 2 focuses on seals and addresses topics such as types of seals, how seals are selected, dynamic seals, radial lip seals, exclusion seals, clearance seals, ring seals, face seals, compression packings, molded packings, diaphragm seals, static seals, nonmetallic gaskets, metallic gaskets, static O-rings, engine cylinder head gaskets, sealants, hardening-type sealants, nonhardening sealants, and tape sealants. Each part concludes with test questions. Answers to the test questions are appended. (A supplementary set of 35mm color slides is also available—see availability note.) (LRA)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—Consumer Economics, \*Consumer Education, Consumer Protection, \*Content Analysis, Course Content, \*Educational Change, High Schools, \*History, Purchasing, Relevance (Education), \*Textbook Content, Textbook Research, Textbooks

A study examined historical changes in the content of consumer education and factors associated with these changes. Analysis was based on key writings on consumer education and an examination of fifteen high school texts published between 1938 and 1978. Only a few topics—budgeting, savings and investment, life insurance, and housing—received extensive coverage in all texts examined. A second group of topics were included in most texts and received extensive coverage when included (food, clothing, autos and transportation, banking services, social insurance, consumer law, and taxes). A third group of topics included in almost all of the texts received coverage varying in adequacy and length (non-profit information services, government regulatory activity, and consumer role in the American economy). Despite recognition of their importance, a fourth group of topics (health, education, recreation, provision of public services, consumer rights and responsibilities, consumer problems, and action to improve consumer protection) received even more variable treatment. Variations in inclusion and treatment of topics often appeared related to different disciplinary perspectives (home economics, social studies, business education). The content of consumer education has only partially responded to social and economic changes and new concerns such as inflation, working wives, product safety, and control of corporate power. Identifiers—\*Dual Careers

Although some social scientists have recognized the conflict and duality of career and family roles, few researchers have examined the consequences of balancing working women's multiple roles. Studies reveal that professional men and women appear to comprehend the meaning and implications of the "Superwoman," a woman caught in the triple bind of the needs and demands for achievement, personal satisfaction, and family commitments. The accumulation of roles women take on as life alternatives increase constitutes barriers to occupational success. Women administrators in higher education (N=68) described a "Superwoman," and then indicated how they coped with anxiety, stress, tension and time management. Many of their perceptions, ideas, strategies, background ideologies and family relationships were similar across the three age groups surveyed. Activity patterns were characterized by a type of cooperation, team effort, creativity and concentration which facilitated the development of leadership characteristics. The composite "Superwoman" shows ego strength; self confidence necessary to maintain and balance multiple roles; poise; and social responsiveness. (Author/BMW)

Descriptors—\*Education, Educational Attitudes, Educational Development, \*Educational Trends, \*Financial Support, \*Futures (of Society), \*Long Range Planning, Prediction, School Personnel, \*Social Influences, State of the Art Reviews

A person's beliefs about the future are very powerful in shaping his or her actions. The issue of what image of the next 10 years is most appropriate for educators today can be examined metaphorically with differing visions of what education can become. By using a series of predictions and by consolidating forecasts from futures research, educators can image a set of likely developments in education's context over the next decade, including forecasts of economic, technological, demographic, cultural, and political change. Implications of these developments for educational equity and practice center on issues of educational finance, educational technology, disparity in educational settings, and retrenchment of traditional approaches to schooling. The responses educators can make to these forecasts of the future and the visions they evoke suggest that the 1980s may be a time of marked educational innovation, not for ideological reasons, but because of financial necessity. Who's Who among American High School Students: Tenth National Opinion Survey.

Education Communications, Inc., Northbrook, Ill.

Pub Date—79

Note—29p.; For related document see ED 174 870. Available from—Who's Who among American High School Students, 3202 Doolittle Dr., Northbrook, IL 60062

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Followup Studies, \*High School Students, National Surveys, \*Opinions, \*Political Attitudes, Secondary Education, Social Problems, Statistical Data, \*Student Attitudes, \*Student Leadership, \*Youth Leaders

Attitudes of student leaders in high schools throughout the United States were examined in a survey conducted by Who's Who Among American High School Students and Northbrook, Illinois. Subjects were students who had been selected for inclusion in Who's Who during the 1978-79 academic year. Some 23,200 completed questionnaires were analyzed on topics such as national priorities and policies, the draft, energy, drug and alcohol use, religious beliefs, career goals, marriage and sex views, capital punishment, the environment, and the media. Statistical analyses were tabulated by total response; breakdowns by sex, race, geographical region, type of community, age, future plans, grade point average, and family incomes were also included. Sexuality and Aging: Implications for Long Term

Care.

Pub Date—Nov 79

Note—24p.; Paper presented at the Annual Scientific Meeting of the Gerontological Society (32nd, Washington, DC, November 25-29, 1979).

Pub Type—Reports - General (140) — Guides - General (050) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Development, Aging (Individuals), Attitude Change, \*Individual Needs, Inservice Education, Interpersonal Relationship, Models, Nursing Homes, \*Older Adults, \*Professional Personnel, \*Residential Care, \*Sexuality, \*Staff Development

With increasing emphasis on treating the whole person, on the maintenance of an individual's former life style, and on patients' rights, long-term care personnel need to become aware that many nursing home residents experience needs related to their sexuality. A model two-day workshop is presented with a focus on the following topics: (1) a broad understanding of sexuality; (2) the need for interpersonal relationships among the aging; (3) common

myths regarding sexuality and aging; (4) physical changes related to sexuality; and (5) the development of programs within the long term care facility that will help residents to meet needs related to their sexuality. A complete model of the workshop, outline of content, resources utilized, a listing of questions and issues raised and discussed, and a summary of participant evaluations are also included. Competency-Based In-Service Training in Recreation for the Aged.

Pub Date—[79]

Note—17p.; Paper presented at the Annual Scientific Meeting of the Gerontological Society (32nd, Washington, DC, November 25-29, 1979).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Competence, \*Inservice Education, Leisure Time, Older Adults, \*Professional Personnel, Recreational Facilities, \*Recreational Programs, \*Skill Development, Surveys, \*Training Methods

Identifiers—\*District of Columbia

As leisure services facilities have expanded with the growth in numbers of older adults, there has been a corresponding need for personnel trained in recreational work with the aged. From survey responses regarding roles and related functions, competencies for these recreational workers were prioritized and subsequently used as the basis for developing an in-service training program for entry level personnel providing leisure services to non-institutionalized older adults. (Although geographically specific, the training program outline and components are adaptable for use by counselors and recreation directors.) (Author/BMW)

Views of Mental Health: A First Step in Needs Assessment.

Pub Date—Sep 79

Note—22p.; Paper presented at the Annual Convention of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Counseling Services, Counselors, \*Human Services, \*Mental Health Programs, Multidimensional Scaling, \*Needs Assessment, \*Program Development, \*Public Opinion, \*Social Attitudes

Mental health professionals and the general public have generally held differing attitudes toward mental illness. As part of a needs assessment survey, 102 persons (20 service providers, 20 referral persons, and 62 potential consumers) were interviewed concerning their views of mental health problems and services. Respondents first listed examples of problems existing in their community and then judged the similarity between problems on the comprehensive list. Multidimensional scaling techniques indicated that each of the groups was organizing its thinking about mental health problems along three dimensions: personal, institutional, and chronological. The dimensions were weighted differently by each of the three groups. Service providers placed more emphasis on the 'personal' dimension, potential consumers on the 'institutional' dimension, and referral persons on the 'chronological' dimension. While the groups seemed to have common grounds for communication about mental health issues, they appeared to disagree about priorities in mental health planning. (Author/BMW)

The Use of Photography in Family Psychotherapy.

Pub Date—2 Sep 79

Note—15p.; Paper presented at the Annual Convention of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Counseling Techniques, Family (Sociological Unit), \*Family Counseling, Interaction, Interpersonal Relationship, \*Marriage Counseling, \*Photographs, \*Pictorial Stimuli, \*Psychotherapy

Photographs and family albums are helpful in

marriage and family psychotherapy to aid in the understanding of family processes, relationship patterns, goals, expectations, values, traditions, and ideals. Based on the assumption that a photograph is a form of communication, photography can be used to: (1) examine typical family picture-taking behavior; (2) study family albums; (3) identify self-concept changes; and (4) treat marital conflicts and sexual dysfunctions. Photographs and family albums also function as family icons, visually articulating the meanings of family relationships, while serving to illustrate family continuity and evolutionary change. Sociocultural and Motivational Considerations in the Assessment of Educational Achievement: A Theoretical Overview.

Pub Date—5 Sep 79

Note—21p.; Paper presented at the Annual Convention of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Academic Achievement, \*Cultural Influences, Educational Research, Elementary Education, Elementary School Students, \*Motivation, \*Performance Factors, \*Predictive Measurement, Self Concept, \*Sociocultural Patterns, Testing Problems

Achievement assessment has recently become an issue of major public concern. Concurrent with demands which have placed increased reliance on measurement and assessment have been criticisms of present testing practices. The effects of sociocultural and motivation variables on achievement patterns of 7,000 Illinois school children were investigated. Achievement, conceptualized as the students' sense of competence (evaluation anxiety and achievement attributions) and motivation goals, was assessed through the use of standardized testing instruments. Results indicated that: (1) sociocultural background directly affects motivation and performance; (2) motivational effects serve to reinforce or enhance the effects of sociocultural background on performance; and (3) both objective performance and the interpretation of that performance affect motivation. Descriptors—Adults, Aptitude, \*Aptitude Treatment Interaction, \*Cognitive Style, Educational Strategies, Employees, \*Human Relations, Interaction Process Analysis, Literature Reviews, Models, Psychotherapy, \*Sensitivity Training, \*Teaching Methods, \*Training Methods

This paper reviews the various matching model (aptitude-treatment-interaction) strategies that might be used in human relations training (HRT) settings. The introduction provides a definition of matching models, discusses the need for a matching model approach in HRT, identifies certain assumptions about HRT, and provides an overview of the rest of the paper. Each of the five types of matching models is reviewed. The utility of each model in the HRT setting is discussed, and specific examples of HRT applications of the models are provided. The history of matching model research is briefly reviewed, including the best approach for HRT, i.e., the capitalization model which calls for a training design that capitalizes on the participants' strong points. Descriptors—Adults, Behavior Patterns, \*Cognitive Style, Counselor Training, \*Human Relations, Interaction Process Analysis, \*Interpersonal Competence, Interpersonal Relationship, Literature Reviews, \*Participant Satisfaction, \*Sensitivity Training, \*Training Methods

Identifiers—\*Field Dependence Independence

Focusing on the cognitive style known as Field-Dependence-Independence (FDI), this literature review includes: (1) an examination of how one can better understand interpersonal behavior in the human relations training setting; (2) how to develop hypotheses about the relationships that might make for successful or unsuccessful matches between participants of varying cognitive styles, and human relations training (HRT) programs of varying degrees of structure; and (3) examples of FDI as a crucial differentiating variable in determining the effectiveness of matching strategies in the fields of education and psychotherapy. Two major questions addressed are: Are participant satisfaction and learning influenced by cognitive style? and What behaviors or interpersonal styles (e.g., task vs. maintenance orientation) might be expected from persons of varying cognitive styles? Suggestions are provided for future research exploring the interactions between training treatments and the cognitive styles of participants. (Author)

**Life Events, Mental Health Functioning and the Use of Health Care Services by the Elderly.**

Pub Date—27 Nov 79

Note—26p.; Paper presented at the Annual Scientific Meeting of the Gerontological Society (32nd, Washington, DC, November 25-29, 1979).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Behavior Patterns, \*Health Services, \*Life Style, Mental Disorders, \*Mental Health, \*Older Adults, \*Physical Health, Quality of Life, Questionnaires, Research Reports, Risk

Identifiers—\*Schedule of Recent Events  
The association of life events and mental health impairment in a community population of older adults (N=986) was investigated. Data, collected in

1972 and analyzed during 1979, examined the relationship between the two variables while controlling for age, sex, race, social resources (a measure of social support), economic resources, and physical health. Subjects completed a questionnaire which included a modified form of the Duke-OARS Multidimensional Functional Assessment Questionnaire and an abbreviated version of the Holmes and Rahe Schedule of Recent Events. Findings indicated that increased life events were associated with health seeking behavior even when physical and mental health functioning were controlled. The associations between increased life events and both mental health functioning and health seeking behavior were small, suggesting that life events, as measured by the modified Schedule of Recent Events, were not important risk factors for elderly living in the community. Grant—MH-29160

Note—10p.; Paper presented at the Annual Convention of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Reports - General (140) — Reports - Descriptive (141) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Adolescents, \*Child Advocacy, Delinquency, \*Delinquent Rehabilitation, \*Delivery Systems, \*Intervention, \*Social Services, \*Youth Problems

This paper addresses the concept of child advocacy as a service strategy for troubled youth, particularly juvenile delinquents. The shortcomings of more traditional approaches to these youth and the concomitant recommendations for the use of advocacy are reviewed. The lack of clearly specified operating principles and techniques for advocacy interventions is noted as an obstacle to the implementation of a child advocacy strategy. The successful advocacy techniques utilized in an ongoing delinquency program, the Adolescent Diversion Project, are detailed. Some implications of the use of advocacy for other target populations are also examined. (Author)

Descriptors—College Environment, \*College Housing, College Students, \*Dormitories, \*Environmental Influences, \*Group Experience, Higher Education, Institutional Environment, Life Style, \*Living Standards, \*Student Attitudes

An ecosystems environmental assessment project was conducted in order to evaluate the residence hall environment at Indiana University, Bloomington campus. Students (N=637), representing a response rate of 67%, completed questionnaires during October 1979. Items about which most students expressed strong feelings, positive or negative, included statements about the quality of food, custodial care, quiet hours, and opportunity for study in their rooms. Overall results indicated a rather favorable perception on the part of students toward their environment. (Author/HLM)

Descriptors—\*Adult Development, \*Attitudes, \*Gerontology, Individual Characteristics, \*Institutionalized Persons, Longitudinal Studies, \*Older Adults, \*Physical Health, Quality of Life, Research Needs

Identifiers—\*Life Satisfaction

The growing body of gerontological research examining the correlates of life satisfaction indicates that physical health is its strongest correlate. Within this framework, the relationship between satisfaction and health among 29 institutionalized subjects was investigated through a longitudinal study. Unlike previous studies, objective measures of health were supplemented with subjective estimates. Unexpectedly, strong independence between satisfaction and objective estimates of health was found. The well-documented correlation between subjective estimates of health and life satisfaction suggests a larger attitudinal orientation toward life rather than an actual interaction between biology and psychology. There is a need for future studies supplementing subjective estimates with objective measures of satisfaction and health, as well as future studies employing a longitudinal design. (Author)

Descriptors—\*Behavior Patterns, Friendship, \*Individual Needs, Life Style, Medical Services, \*Networks, \*Older Adults, \*Participation, Public Agencies, Research Reports, \*Social Services, Use Studies, Welfare Agencies

An area probability sample of 200 elderly residents, living in two California cities, were interviewed to determine the nature of informal helping networks enabling them to maintain independence, specifically the relationship between involvement in informal helping networks and utilization of social and health services. Preliminary findings suggest that the majority receive help from at least one other person, and one-third are engaged in a mutual exchange relationship. Transportation is the most frequently cited type of help. One-fourth of the sample's respondents were characterized as high risk, and the majority of individuals received personal, labor intensive support from family, friends, and neighbors. Sample respondents use formal ser-

vices infrequently. Forty percent of the respondents indicated that, in times of crisis, they rely exclusively on informal helping supports; another 40% receive augmenting help from the formal service network; the remaining 20% felt they would have to rely completely on the formal service network. Descriptors—\*Change Strategies, Delivery Systems, \*Futures (of Society), Postsecondary Education, \*Professional Education, Professional Personnel, Program Descriptions, \*Social Services, Social Workers, \*Systems Approach, \*Values

This paper explores the current and potential contributions that futuristics can make to professional education and to the professions in general. A brief description of how the School of Social Development (SSD) at the University of Minnesota Duluth has incorporated futuristic principles is presented as a basis for analyzing the relationship between futuristics and professional education. Social development, growing out of a social work tradition is referred to as the process of planning institutional change to bring about a better fit between human needs and social policies and programs. Several basic concepts are described as principles of futuristics, including imaging the future, creating the future, a long-term time perspective, an interest in values, a systems orientation, and using futures methodologies to anticipate future demands. The way in which social development has adopted several of these futuristic concepts in developing a new approach to improving human services by choosing specific values is addressed by the following: (1) fulfillment of basic human needs; (2) human dignity; (3) equality of means; (4) participation; and (5) global awareness. A systems approach emphasizing macro-level changes in social service programs incorporated by SSD is also described. (Author)

Descriptors—Achievement, \*Behavior Patterns, \*College Students, Comparative Analysis, Failure, Higher Education, \*Individualized Instruction, Motivation, \*Performance, \*Self Control, \*Success

Identifiers—\*Procrastination

Patterns of student performance were examined in a personalized instruction (PSI) course. Introductory psychology students (N=65) were randomly divided into a completely self-paced group and a group that had an early, instructor-imposed deadline. It was hypothesized that the early deadline group would respond at a more even pace throughout the course than the completely self-paced group. The data supported this hypothesis. Students in the deadline group paced their exam-taking rather evenly across the term, while the self-paced group exhibited a typical flurry of activity toward the end of the term. In addition, attempts were made to predict patterns of performance from a number of relevant variables using multiple regression. Achievement motivation and organizational skills accounted for the most variance in pacing behavior, with motivation/interest in college study habits and GPA accounting for significant portions of the variance. Although geographically specific, this report is intended to serve as an educational resource for community, agency, and legislative personnel regarding the impacts created by revised legislation about children and the approaches used to improve the quality of justice for young people and their families. It is based on changes made in the juvenile delinquency dispositional statute in Alaska. The areas which were impacted by these changes, i.e., the juvenile justice system, the social services system, and miscellaneous children's legislation, are presented in a statute-by-statute format, with a statement of the law followed by an examination of change, legislative intent, extent of and problems with implementation, and general impact analysis of the subsequent changes. The appendixes contain statistics on juvenile delinquents, legislative materials, forms used by social services workers, and project report data. (Author/HLM)

Descriptors—Adults, \*Behavior Patterns, \*Career Development, \*Concept Formation, \*Developmental Psychology, Individual Development, Life Style, Research Needs, \*Self Concept, Social Science Research, \*Sociology, State of the Art Reviews, Time Perspective

Sociological literature on careers reveals that there are four major approaches framing career study, i.e., developmental, objective-empirical, normative, and interactive perspectives. Analysis of these approaches points to an orienting conceptualization of career based on the core characteristics of centrality, duration, and public consciousness. Centrality refers to dominant intention or engagement which involves identity and the self. Duration implies persistence over time and includes the structural attributes of career, contingencies, timing, pat-

tern, and sequence. Public consciousness indicates that the centrality and duration of an individual's career are recognized as part of the institutional arrangements of society. Thus conceived, the concept directs investigators to look for markers or signposts at both the subjective and objective levels and the interplay between the two within and across multiple domains. Life transitions may serve as career markers because they involve changes in customary behavior patterns and in self-concept. (Author)

Descriptors—\*Age Discrimination, Discriminatory Legislation, Employees, \*Employer Attitudes, \*Employment Opportunities, Futures (of Society), \*Labor Force, Labor Market, \*Older Adults, \*Retirement, Surveys, Trend Analysis, Work Environment

Information on the preliminary impacts of the Age Discrimination in Employment Act (ADEA) Amendments of 1978 on approximately 1900 private firms was obtained through mail and telephone surveys during Winter 1979. Findings from the study indicate that employers do not expect the ADEA amendments to have a significant impact on the retirement patterns of their workers. But employers expect that continued high rates of inflation combined with the option to continue working past age 65 may result in an end to the trend toward early retirement and/or in significant numbers of workers choosing to remain in the labor force past the normal retirement age. Inflation appears to be the primary factor which employers expect will affect retirement patterns. Mandatory retirement age policies were significantly associated with the size of the firm. As firm size increased, the incidence of mandatory retirement age policies also increased. Most employers who previously had a mandatory retirement age had chosen not to abolish the policy; instead, most employers simply raised the age to 70. Increasing numbers of firms were considering and/or implementing alternative work policies such as flextime or part-time options. (Author)

Descriptors—Behavior Rating Scales, \*Counseling Effectiveness, \*Counselor Performance, Counselors, \*Relationship, Skill Analysis, \*Therapists, \*Verbal Communication

The relationship between a therapist's verbal and nonverbal communication of therapeutic effectiveness was investigated. In a design intended to eliminate many of the methodological problems which exist in this area of research, subjects (N=102) were asked to rate videotaped segments showing combinations of three different levels of both verbal and nonverbal therapist effectiveness. The rating scales used by subjects were the three Carhuff scales for rating communication of respect, empathic understanding, and facilitative genuineness and a scale derived from the Microcounseling Skill Discrimination Scale. The results indicated that the relationship between verbal and nonverbal communication of therapeutic effectiveness may be additive in nature. (Author)

Descriptors—\*Black Students, Expectation, Failure, \*Goal Orientation, Individual Development, \*Individual Needs, \*Occupational Aspiration, Self Concept, \*Student Attitudes, Success, Surveys

Black graduate students (N=30) in a predominantly black state college in the southern part of the United States were surveyed regarding their personal aspirations and personal concerns. The aspirations of these black graduate students revolve around employment, a decent standard of living, owning a house, and having modern conveniences. Aspirations less typically mentioned include self-development or self-improvement and acceptance by others. Ill-health, accident, or death are the major forces identified as having a possible disruptive influence regarding attainment of aspirations. Several students mentioned a belief that benefits to be derived from their education would be enhanced if they did not have pressing financial problems. Additionally, they believed many operations of the college were decided in favor of administrative convenience rather than for the benefit of students. (Author)

Descriptors—Adults, \*Alcohol Education, Alcoholism, \*Alcoholism, Annotated Bibliographies, \*Legislation, Literature Reviews, \*Prevention, Public Health, \*Reference Materials, \*Resource Materials, Students

This guide is intended as a compilation of literature pertaining to prevention of alcoholism from 1973 to the present, with the exception of a very few earlier, highly significant documents. Materials cited were gleaned from searches of the National Clearinghouse for Alcohol Information database, Dissertation Abstracts, ERIC, Hazelden Foundation Alcohol Data Base, Magazine Index, Social Sciences Index, Reader's Guide to Periodical Literature, Psychological Abstracts, and materials from the Rutgers Center of Alcohol Studies. The categories referenced include the following: (1) history; (2) current policies and philosophies; (3) prevention programs; (4) highway safety and public health; (5) alcohol education; (6) training; (7) legislation and alcoholic beverage control (ABC); and (8) evaluation. A section on audiovisual and multimedia materials and information sources/organization is also provided as well as an author index. (Author/HLM)

**Trend Analysis**

The current prevalence of drug use among American high school seniors (classes of 1975 through 1978) was investigated through a program entitled "Monitoring the Future: A Continuing Study of the Lifestyles and Values of Youth," conducted by the University of Michigan's Institute for Social Research and funded by the National Institute on Drug Abuse. The basic research, involving data collections beginning with the class of 1975, took place in approximately 125 public and private high schools selected to provide an accurate cross section of seniors throughout the United States. Questionnaire results indicated that: (1) about 65% report illicit drug use at some time in their lives; (2) marihuana is the most widely used illicit drug; (3) use of alcohol and cigarettes is more widespread than use of illicit drugs; (4) college-bound students have lower rates of illicit drug use; and (5) regional differences in 1978 were insignificant. Trends in drug use comparing the classes of 1975 through 1978 suggest there has been an appreciable rise in marihuana use and female cigarette smoking, and despite the decline in perceived harmfulness of most drugs (licit or illicit) there has been very little change over the past three years in levels of disapproval for most of them. Identifiers—\*Pennsylvania

The Governor's Task Force on the Mental Health of Juvenile Offenders in the state of Pennsylvania conducted a statewide survey of facilities for the care, treatment, and rehabilitation of adolescents between 12 and 18 years of age. The Task Force surveyed mental hospitals, community-based services, private psychiatric treatment centers, youth development centers, private training schools, county detention homes, day treatment centers, and youth forestry camps throughout the state as well as innovative approaches used by other states. Recommendations made by the Task Force to implement the delivery of mental health services to juvenile offenders centered on: (1) pre-adjudication/predisposition mental health services available to the juvenile court system; (2) provision of ambulatory mental health services at youth development centers and similar programs; (3) decentralized maximum security beds for hard core offenders and secure decentralized psychiatric inpatient beds; (4) establishment of aftercare services and a professional unit liaison with the Office of Social Services; and (5) a review of existing laws affecting juvenile offenders. Descriptors—Community Involvement, Community Programs, \*Crime, \*Neighborhood Improvement, Neighborhoods, \*Physical Environment, \*Police Community Relationship, \*Prevention, Urban Environment, \*Urban Problems

Identifiers—\*Connecticut (Hartford)

The Hartford project, an experimental effort to reduce residential burglary, street robberies, and

fear of those crimes in an urban residential neighborhood, is described. Its most distinctive feature is its integrative approach in which police, community organization, and physical design changes were used to increase the willingness and ability of residents to control their neighborhood and reduce criminal opportunities. Implementation efforts are detailed in terms of: (1) closing or narrowing streets as a strategy for reducing outside traffic; (2) instituting a neighborhood police unit; and (3) creating area organizations to work with the police and initiate resident efforts to improve the neighborhood. The evaluation of the program contains an assessment of success factors including neighborhood involvement and physical changes. The appendices contain the survey instruments, data collection procedures, supplemental data, and the resident survey interview schedule. Extensive tables and illustrations are also included. **Identity Formation in College Students: A Preventive Program.**

Pub Date—[78]

Note—13p.

Pub Type—Reports - Descriptive (141)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*College Students, Course Descriptions, \*Group Counseling, Higher Education, \*Identification (Psychology), Individual Development, Mental Health, Peer Counseling, \*Prevention, Program Descriptions, Self Actualization, \*Self Concept, \*Teacher Role

A preventive program in the area of identity formation, offered in the form of two-credit academic courses, is presented. A theoretical framework, based on the work of Marcia and his collaborators, delineates four identity "statuses" based on whether the individual has considered various alternatives and then made a commitment to a particular alternative in substantive areas such as religion, politics, and occupational choice. A wide variety of formats used to facilitate students' self-exploration includes role-playing, data gathering from the family of origin, interpersonal feedback, guest speakers, open-ended group discussion, the keeping of diaries, and the writing of personal book reports. The role of the instructor is non-traditional in a variety of ways. The long-range plan for the program involves training participants in group facilitation so that they can subsequently lead identity formation groups comprised of fellow students. The difficulties involved in evaluating programs of this sort are noted. (Author)

Identifiers—\*Diversion Programs

The lack of rigorous evaluations and variations in operation of adolescent diversion programs has led to a state of confusion concerning the effects of diversion. In a program at Michigan State University, youths referred to the project from the juvenile court are randomly assigned to undergraduates who are trained and supervised by project personnel or to a control group which receives treatment as usual. The standard 18-week intervention involves a combination of child advocacy and behavioral contracting. Results have been positive, but not conclusive. Project youth tend to have fewer and less serious police and court contacts and better school performance when compared to control youth. A major focus of the research has been to identify the conditions under which such a diversion program can be successful. What is done with the adolescent after diversion appears to affect his/her potential re-involvement with the system. Variations in this,

as well as other variables, e.g., where in the system the youth is diverted, who administers the diversion program, and the type of youth diverted, are likely to account for a wide variety of results found by diversion programs. (Author)

Descriptors—Adolescents, \*Behavior Change, \*Delinquency, \*Energy Conservation, \*Feedback, \*Information Utilization, Outcomes of Education, Program Effectiveness, Program Evaluation, Teaching Methods, \*Training Methods

The usefulness of providing specific information and a progress/feedback mechanism to control utility usage in community-based, halfway houses for dependent-neglected and for delinquent adolescents was explored. The investigation was carried out in a random sample of 12 houses of an Arizona facility, divided into equivalent groups of three houses. The observation lasted 11 months, with baseline periods varying from 6-9 months. Utility unit changes were measured every three days. Each resident in the test groups (schedules varied) was given a manual describing conservation measures, and passed a quiz on this material. In the feedback period each house was notified of increase/decrease changes in utility usage levels. Conditions and time periods varied according to group assignments. Patterns of usage and usage means for each group were analyzed. Percentage-change analyses were employed to detect any differences. Both manual and feedback conditions were effective in reducing utility usage from baseline levels. Change was particularly evident in groups with initially high usage patterns. (Author)

Descriptors—\*Behavior Patterns, \*Child Development, Children, Cognitive Processes, Experiential Learning, Identification (Psychology), \*Learning Activities, Participation, \*Play, \*Sex Differences, \*Sex Stereotypes, State of the Art Reviews

Sex differences in activity selection or choice appear by age 12 or 18 months. These choices are one of the earliest indicators of sex differences in the behavior of young children. Differences in activity participation or toy choices are evident long before the emergence of sex differences in personality characteristics like passivity or sex-typed behavior like aggression. Some theorists view sex-typed participation in activities as an outcome of an already developed gender identity or as an outcome of differential reinforcement or modeling. Sex-typed behaviors can be learned in at least two ways. In the first, antecedent events such as participation in sex-typed activities and toy preference lead to sex-typed behaviors of passivity and aggression. In the second, sex-typed behavior like aggression leads to a preference for sex-typed activities, toy preferences, or dress-style. Assuming that participation in sex-typed activities is an antecedent of sex-typed behavior, there is evidence that changes in sex-typed behavior can be expected as a function of exposure to or participation in activities. Identifiers—\*United States (Midwest)

Various quantities and types of services are provided by public and private agencies for older developmentally disabled persons living in the Midwest. Of the 639 questionnaires mailed to public agencies, private agencies, consumer-oriented agencies, nursing homes, and educational institutions, 325 were returned for a response rate of 55%. Overall, 56% of the agencies are providing services for aging and aged developmentally disabled (AADD) persons. AADD clients are "invisible," and few agencies are aware of them, let alone their needs. The existing services are poorly coordinated; adequate records are not being maintained to document services provided. The services most often provided, i.e., information/referral, adult activities, medical treatment, transportation and staff development, are primarily of an indirect nature; most direct services are provided by nursing homes. Major obstacles to service are lack of resources, negative attitudes, and lack of training. Adequate transportation and housing are identified as the greatest unmet needs of the AADD persons. Even if provided adequate funding, most agencies would do nothing new in terms of service delivery. (Author/HLM)

Descriptors—Group Experience, Helping Relationship, \*Housing, Housing Needs, \*Individual Needs, Interaction Process Analysis, Living Standards, \*Older Adults, \*Personal Space, Public Housing, \*Responses, \*Sex Differences

The influence of angle, approach, and sex of subject on the personal space distance needs of the elderly person was examined. Subjects were 20 females and 20 males, age 65 or older, living in the same retirement housing unit. The behavioral measurement technique showed acceptable test-retest reliability. A significant three-way interaction effect was identified. The main effects of angle and approach were significant; a main effect by sex of the subject was not supported. Elderly subjects allowed a stimulus-individual (identified as a nurse) to approach closer than they approached the same stimulus-individual, suggesting that personal space is a factor to be considered by those giving care to or working with the elderly. Personal space is a complex phenomenon needing further study, especially in relation to the elderly. (Author)

An outreach program was conducted during the 1978-79 year by the DeCordova Museum in Lincoln, Massachusetts for the low-income elderly in conjunction with the local councils on aging and funded by the National Endowment for the Arts and Title III of the Older Americans Act. Components of the program are described, including drop-

in workshops at daily meal sites, drop-in centers in the participating towns and scholarships for transportation, and tuition and supplies for courses at the DeCordova Museum School. The effectiveness of the program is analyzed in terms of ability to reach a group that otherwise had no way of participating in art school classes without financial assistance, specifically those persons whose average age was 72 and average income was \$6500 per year. Identifiers—\*National Institute of Mental Health

Findings are presented from an experimental study of consultants, a three-year project funded by the Human Services Development Branch of the National Institute of Mental Health (NIMH), the purpose of which was to provide a technology for use by consultants within youth-serving organizations in the diffusion and utilization of innovative programs. Guidelines derived from comparative follow-up studies of agencies that did not participate in the field experiment include the need to: (1) seek access to a group through the introduction of a trusted colleague and encourage the leader's cooperation by showing how a visit will benefit the leader's work; (2) select strategies for a group consultation through information supplied by a profile summary of how group members perceive group readiness to effect needed change; (3) identify in advance a group's most troubling needs; (4) assume that the more structured and goal-oriented groups will require a longer time to introduce and establish an innovative change; and (5) prepare strategies for identifying and handling obstacles that arise when certain innovations or changes are proposed. Additionally, reasons for the non-participation of groups in consultation efforts are listed and discussed. (Author)

Descriptors—\*Adjustment (to Environment), Attendance, Class Organization, Cognitive Objectives, Curriculum Development, \*High School Freshmen, Individual Needs, Negative Attitudes, \*School Attitudes, Secondary Education, \*Student Adjustment, Student School Relationship, \*Underachievement

A model was developed and implemented that met the needs of entering high school freshmen with school adjustment problems such as poor academic achievement, excessive absenteeism, poor school behavior, and negative school attitudes. A review of literature indicated that the comprehensive high school was not meeting the needs of this group of students. The proposed program included a team of four teachers, supported by special-service personnel, who were scheduled to work with 48 freshmen in a daily time-block arrangement. The program at-

tempted to improve student performance in a number of areas, including discipline, attendance, attitude toward school, and academic achievement. Program development included a needs assessment, teacher recruitment, in-service programs flexible scheduling, curriculum development, and middle-school/high-school articulation. The program was divided into two phases; phase one involved work with the identified students through their freshman year; phase two involved two staff teams working with the identified students in their sophomore year and a second group of new freshmen. A summative evaluation measured the progress of the original 48 freshmen with respect to 17 program objectives. A plan was outlined to institutionalize the model into the school program. (A step-by-step analysis of the development and a set of recommendations for the implementation of the program was presented.) (NRB)

Descriptors—College Students, \*Counselor Client Relationship, Counselor Educators, \*Counselor Evaluation, \*Counselor Training, Evaluation Methods, Higher Education, \*Interpersonal Attraction, Interviews, \*Practicums, Rating Scales, Research Projects, Supervision  
Identifiers—\*Counseling Evaluation Inventory, \*Counselor Rating Form

The Counselor Rating Form (CRF) and Counseling Evaluation Inventory (CEI) were used in an applied setting to evaluate counselor interns. A sample of 17 counselor trainees conducted two interviews with two internship. After each interview, the trainees rated themselves on the CRF and the clients rated the trainees on both the CRF and CEI. Supervisors rated the trainees on the CRF after viewing videotapes of the counseling sessions with the confederates. Supervisors had previously rated them during trainees' prepracticum course. Results indicated that: (1) supervisor ratings did not increase significantly from prepracticum to internship; (2) there was no significant agreement among client, trainee and supervisor ratings; and (3) there was a significant positive correlation between client CRF and CEI scores. The concurrent validity of the CRF was supported, and holds much promise as a tool in counselor training. However, further research is needed before adapting the CRF as an evaluative instrument. Identifiers—\*Virginia

Thirty exemplary vocational guidance and counseling projects funded in Virginia through Title II (Vocational Education) are described. Ten of the projects were designed to increase sex equity in vocational guidance, counseling and education programs. Eleven were designed to encourage business/guidance exchange of personnel and information. The remainder were developed to increase vocational guidance and counseling services for the handicapped. Each summary includes the project's objectives, methodology, and the name, address, phone number and institutional affiliation of the project director. (JAC)

Needs assessment is part of the decision making and program planning process in mental health centers. Four commonly used approaches for identifying needs are: (1) social indicators; (2) analysis of resources and patterns of use; (3) community surveys; and (4) group approaches. Rarely does a single approach provide all the information necessary to identify needs. An analytical framework should integrate need information with program constraints, and develop feasible alternative mental health solutions. Decision makers can then act on the recommended alternative solutions. Most decisions are made by selecting actions that are politically feasible and reflect marginal changes in the existing base of resources available to the center. (Author/MLT)

Identifiers—\*Monitoring

The monitoring process and the role of monitoring in mental health center decision making are discussed in relation to information systems. Monitoring requires an information system based on the center's annual plan for programs and budgets. This system must contain at least minimal data on client movement, services, staff activity, and costs. The monitoring process includes planning, monitoring, and assessment. Three areas discussed in this paper are the monitoring process, information systems and monitoring and using information systems. Issues addressed include organizational readiness, information system adequacy, integration of system elements, feedback, and the data processing mode (manual versus automated). Specific suggestions and practical examples are included. The final section links information system reports with management in order to assist managers by providing data about program goals, fluctuations in demands for services, and staff productivity. Summary reports aid program and budget planning and program evaluation. (Author/MLT)

ards, State of the Art Reviews

Federal legislation requires mental health centers to establish quality assurance programs which seek to maintain or improve the quality of a center's health care services. Three general measures of quality are: (1) input standards for staff and the setting providing care; (2) process standards for the quality of treatment; and (3) outcome standards for the results of care. Federal guidelines recommend that mental health centers model their quality assurance programs after the Professional Standards Review Organization's (PSRO) assessment method. However, PSRO activities evaluate physical health care, and they focus primarily on input measures of quality. Contrarily, quality assurance programs in mental health centers focus on the treatment process. Clinical peer review is the major monitoring tool, and only clinical personnel may conduct peer reviews and make quality assurance decisions. Although every mental health center's standards should reflect normative mental health standards, each center's standards should be flexible, meet local needs and be self-imposed. (Author/MLT)

Descriptors—Community Services, \*Measurement Techniques, \*Mental Health Programs, Organizational Effectiveness, \*Participant Satisfaction, Policy Formation, Program Development, \*Program Effectiveness, \*Program Evaluation, \*Quality Control, State of the Art Reviews

Outcome evaluation assesses the results or benefits of mental health services received by clients or communities by comparing descriptive data on the mental health status of clients at different points in time. It aids clinicians and managers in planning programs and managing clinical services. A mental health center should establish goal-oriented program planning, information systems, and quality assurance programs before it attempts client outcome evaluation. Outcome studies are still in the developmental stages and should be conducted when there are clearly defined needs, available resources, and clinical and managerial agreement regarding the uses of the resultant data. Seven outcome evaluation methods are described and referenced: (1) level of functioning scales; (2) multidimensional ratings; (3) SCL-90 Symptom Checklist; (4) goal attainment scaling; (5) client satisfaction follow-up questionnaire; (6) community satisfaction studies; and (7) consultation and education outcomes. Client outcome studies can be continuous and provide ongoing feedback, or they can be terminal and provide information about a particular service or group of clients. These studies assist in forming policy, developing programs, and justifying programs. (Author/MLT)

Identifiers—\*Health Systems Agencies

The National Health Planning and Resources Development Act of 1974 (PL 93-641) grants review authority to Health Systems Agencies (HSAs) which seek to improve the quality of health care and

insure the rational expenditure of financial resources. Their review process necessitates the development of adequate mental health standards and criteria and better communication between community mental health centers (CMHCs) and HSAs. The Arthur D. Little (ADL) study which sought to determine the feasibility of developing guidelines, criteria, and standards for PL 93-641, identifies few of the mental health standards and review criteria developed by HSAs. Because CMHCs face data demands from multiple sources, HSAs should coordinate their data needs with other major mental health planning and review processes. The federal site visit process, the Joint Commission on Accreditation of Hospitals survey, and state licensing and review boards also request data from CMHCs. HSAs could use the National Standards for their standards and criteria, an approach which would reduce overlapping and conflicting CMHC assessment and monitoring procedures. (Author/MLT)

This book looks at the problem of drug abuse,  
particularly the use of marijuana by children ages 9  
to 14, and describes one strategy parents can use to  
prevent drug use by their children. On the premise  
that nonmedical drug use is not acceptable for chil-  
dren, parents need to provide guidance and exercise  
discipline with respect to drug use among children.  
The evolution of the drug culture and the risks of  
adolescent marijuana use are explored. A guide is  
presented for parents who want to prevent or stop  
their children from using drugs. Included is a discus-  
sion of the experience of neighborhood parents in a  
suburb of Atlanta, Georgia, as they worked to stop  
drug use among children 15 years of age and  
younger. (CC)

Physical Fitness, \*Sex Differences, State of the  
Art Reviews, \*Work Environment, Work Life  
Expectancy

Participation of women is increasing in the industrial  
workforce and in the traditional male occupa-  
tional groups. The differences between women and  
men in physical performances such as strength,  
stamina, and skill, make mandatory the assessment  
of work requirements in the occupational environ-  
ment, especially in view of the workforce trends and  
legal requirements for equal employment opportunity.  
Use of a taxonomic system based on funda-  
mental human abilities or capacities provides a basis  
for such assessments. One such system of nine fac-  
tor analytically identified physical ability factors (cf.  
Fleishman, 1964) is proposed with an example of  
the physical-work requirements. Data are presented  
from an investigation of the physical-performance  
requirements of 15 benchmark jobs in a county-  
level governmental personnel classification system.

ers

Six major studies are cited in review of the litera-  
ture comparing status and delinquent offenders,  
yielding findings which support a policy of moderation  
in decision making about differential treatment  
of these two types of juvenile offenders. Four of the  
studies on status offenders which indicate that  
recidivism rates may vary in proportion to the de-  
gree to which these offenders have penetrated the  
juvenile justice system suggest a positive correlation  
between degree of system penetration and mag-  
nitude of recidivism rates. Some findings also indicate  
that there is a relationship between type of first  
offense and type of subsequent offense. Overall, the  
evidence suggests that systematic research is  
needed to investigate basic differences between the  
two offender types and the effect of juvenile justice  
system processes on them. (CC)

ship, Personality Problems, Rejection (Psy-  
chology), \*Runaways, \*Siblings, \*Social Class,  
\*Social Development, Student School Relation-  
ship, Work Attitudes

Fourteen young men and women, who as teenagers  
had run away from home, were subjects of an  
intensive clinical case study which was a followup of  
a larger-scale survey of runaways conducted in the  
early 1960s. A major purpose of the research was to  
determine how the former runaways had fared as  
adults and whether or not their early behavior had  
foreshadowed later adjustment problems. Intra-  
family comparisons between the runaways and a  
sibling were also made. Two factors seen to be most  
prominently associated with differential long-term  
outcomes—whether or not the youthful act was a  
repeated or an isolated occurrence, and the in-  
dividual's social class. In general, repeaters most  
nearly fit a model of running away as a sociopathic  
act, indicative of severe disorders. A single act of  
running away was associated with little long-term  
disability. Siblings of runaways, with one exception,  
had made successful adjustments to adult life. Dis-  
cussion centers on the prognostic value of repeated  
running away for the prediction of psychosocial dis-  
ability, the contribution of individual psychology to  
the outcomes observed, and on the finding that  
premature separation from adult authority may lead  
to a prolonged and ambivalent dependence on it.

The predictive value of the high-school-level battery of the tests of General Educational Development (GED) for two-year college academic performance was investigated. GED tests scores were examined to determine if they could substitute for a complete high school record as a source of predictor data. Student record data from a registrar's office of a community college was evaluated. The results support the premise that the GED is a valid and positive predictor of first semester, two-year college GPA. There were no significant differences between academic performance of high school graduates and non-high school graduate GED recipients in the study. (Author/BCR)

This guide is one of a four-book series on female development designed to provide a model for a sex-fair graduate training program in counseling, educational psychology, and career education. It focuses on the female experience in America, especially developmental, psychological, counseling and career/life style issues. This book is divided into four major units: (1) female development, psychologically and physically; (2) career patterns and life styles; (3) feminist approaches to counseling and therapy; and (4) critical counseling issues facing women such as depression, divorce, widowhood, abuse, and physical health. The lesson format includes a rationale, learning objectives and activities, facilitator instructions, and suggested references. The appendix contains an annotated bibliography of additional media resources. (Author/NRB)

Descriptors—\*Androgyny, Change Strategies, \*Counseling Techniques, \*Cross Cultural Studies, Equal Education, \*Females, Graduate Study, Higher Education, \*Sex Role, Sex Stereotypes, \*Womens Studies

This guide is one of a four-book series on female development designed to provide a model for a sex-fair graduate training program in counseling, educational psychology and career education. It concentrates on sex roles in American society, examining the variables which contribute to sex-role stereotyping, and developing strategies for moving toward androgyny. The book consists of three units dealing with: (1) sex-role stereotypes in America; (2) sex roles across cultures; and (3) sex roles in American institutions. Units are divided into several lessons each containing a rationale, learning objectives, facilitator instructions, and suggested references. The appendix contains an annotated bibliography of additional media resources. (Author/NRB)

Three functions of educational change and innovation are to hypothesize a solution in a school problem solving process, to meet educational goals more efficiently, and to stimulate interest and progressive development in school personnel. The retrospective study of a five-year implementation of a reading improvement program concluded that this program change accomplished all three functions. The school district coupled a new basal reader program and a criterion referenced testing system with computer assisted instructional methods in an attempt to increase student reading achievement. When teachers were asked to report on their perceptions of the program implementation period, they showed that they adapted in different ways. Program implementation was accomplished through structuring skills (correlation guidelines), time (schedules), and routines (classroom and computer procedures). Some teachers developed new organizational arrangements and approaches; but other teachers continued to use old techniques while adding on the new components, creating the sensation that they were teaching two separate reading systems. Teachers found support in exchanging ideas and complaints with other teachers. Overall, many teachers felt that they had developed a new awareness of the components of reading instruction. (Appendixes provide questionnaires and the interview format used in the study.) (RL)

Identifiers—\*Wisconsin

Intended for use by local school districts to facilitate the implementation of kindergarten through grade 12 developmental reading programs for all students in Wisconsin, this booklet explains the legislation that mandates such programs. Divided into four parts, the booklet discusses the purpose and intent of a developmental reading program, including an overview and program criteria, the employment of a reading specialist, the duties of the specialist, and the duties of the local school board. **EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Basal Reading, Comparative Analysis, Elementary Education, Grade 3, Grade 6, \*Reading Achievement, Reading Diagnosis, \*Reading Instruction, \*Reading Research, \*Reading Teachers, Surveys, \*Teacher Effectiveness, Teacher Role, Teaching Methods, Teaching Styles, \*Time Factors (Learning)

A study was conducted to investigate selected reading instruction process variables employed by third and sixth grade teachers and their effect on pupils' reading achievement, to explore the difference between third and sixth grade teachers' reading instruction process variables, and to investigate the relationship between selected pupil variables and pupils' reading achievement. A sample of 27 third grade teachers and 31 sixth grade teachers were assigned to one of five success status categories based on the pattern of mean reading achievement levels recorded for their actual 1974, 1976, and 1978 classes. The teachers were administered the Survey of Teacher Emphases and Practices in Reading Instruction in 1978. Differences were noted between third and sixth grade instruction in the use of skill books and teacher-made games and individual instruction. Interim findings for 1974 and 1976 indicated a linear pattern of continued emphases; effective teachers of reading reported significantly different instruction and diagnosis emphases and noted significantly different pupil engaged time in reading instruction than did less effective teachers. However, the 1978 data for this pattern was reversed. Teachers identified as effective for the six-year period reported less emphasis for these components than did the less effective teachers. (MKM)

This guide provides a description of a mastery learning reading program based on a language approach to teaching reading. All suggested activities stress the use of skills to obtain meaning from reading as the main goal of instruction. Sections include a discussion of the elements of this mastery learning instructional program that notes the need to adjust time limits for individual progress; suggestions for the reading content of the program; suggestions for planning the program, including class diagnosis, classroom and school organization, and the involvement of parents; methods for assessing student progress; a discussion of roles and responsibilities in the program for principals, teachers, and support teachers; and ways to monitor and evaluate the mastery learning reading program. Appendixes include information on suggested reading skill sequences and information on research performed in classes using the program. (MKM)

Identifiers—\*Piaget (Jean)

Jean Piaget's theory seems to lend support to reading specialists who believe that concrete operational thought constitutes a necessary and sufficient condition for learning to read. Preoperational children cannot deal with the complex relationships inherent in reading because they are tied perceptually to the immediate situation or representations of past

perceptual situations. They cannot make mental comparisons or explore the similarities and differences in previous cognitive encounters. In situations when relationships are not perceptually apparent but must be "seen" through reason, preoperational children are at a loss. Even though the preoperational child has the symbolic function, it must be remembered that symbols are a part of functioning and therefore cannot go beyond the level of that functioning. Briefly, symbols are meaningful only if the individual has an operative scheme into which the symbol is assimilated. Before schemes are operational, symbols can do no more than reflect reality—and the reality reflected is devoid of multiple characteristics and complex relationships. The reality of print, however, is one of complex multiple relationships. It is therefore not surprising that preoperational thinkers are likely to have difficulty in learning to read. (Author/FL)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Attitude Measures, \*Diagnostic Tests, \*Disadvantaged Youth, Instructional Materials, Reading Attitudes, \*Reading Diagnosis, \*Reading Instruction, \*Reading Materials, Secondary Education  
Identifiers—\*Upward Bound

Three steps in teaching reading to Upward Bound students are considered in this paper: individualized needs assessment, determination of students' attitudes toward reading, and the actual instruction. In discussing the diagnosis of students' individual needs, the paper describes the Nelson Reading Test and additional diagnostic tests that may be used. It then points to the importance of determining students' attitudes toward reading and discusses the Estes Attitude Scale, noting results obtained when it was administered to Upward Bound students at Florida Agricultural and Mechanical University. Finally, the paper observes that the actual instruction of reading may be conducted in a number of ways and that the selection of high-interest materials is very important to instruction. An appendix discusses various instructional materials and assesses their appeal and success with Upward Bound students. (Author/GT)

Identifiers—\*National Assessment of Educational Progress

The reading and literature objectives for the 1979-80 assessment by the National Assessment of Educational Progress (NAEP) are categorized into four major areas: values reading and literature, comprehends written works, responds to written works, and applies study skills in reading. These major objectives and their subobjectives are presented as statements followed by amplified descriptions. Following each subobjective are a few italicized questions illustrating the kinds of questions one might ask or the kinds of skills one might expect students to display. (RL)

This annual publication contains summaries of more than 1,100 reading research reports that appeared in print between July 1, 1978 and June 30, 1979. The summaries are arranged into six major categories. The first category contains a listing of other general bibliographies offering summaries of reading research, while the second category presents summaries of studies concerned with teacher preparation and practice. The third category contains summaries of reports concerned with the sociology of reading. The majority of summaries appear in the fourth category, which deals with the physiology and psychology of reading. Report summaries placed in the fifth category cover the teaching of reading, while the final category presents summaries of studies concerned with the reading of atypical learners. (FL)

A cost-effective, computer-based, Navy-related basic reading skills program was developed for United States Navy recruits reading below sixth grade level. The program, called Performance-Related Enabling Skills Training (PREST), is designed to enable recruits to improve their reading and study skills and, thereby, increase the probability of their successful completion of recruit training. The cost-effectiveness of this program is significant in light of current escalating instructor-related costs and the increasing need to accommodate greater numbers of recruits. (Author/MKM)

Identifiers—\*Job Literacy, \*Naval Training, Navy  
This study reviews the literature on past, present, and projected literacy requirements for United States Navy enlisted personnel, literacy skills of

those entering the Navy, and activities developed to bridge the gap between the two. Through an examination of research reports, historical accounts, and instructional methods and materials, the history of reading instruction in the Navy is traced from the early voluntary efforts of chaplains, to the beginning of job-related literacy needs, through the development of formal curricula for incoming recruits, to current experimental efforts to provide job-related literacy training at various points during enlistment. Identifiers—\*Maryland, \*Project STAR  
This is the first of three volumes that constitute the final evaluation report of Project STAR (State Technical Assistance Resources), an undertaking of the Maryland State Department of Education designed to help 36 elementary schools improve their reading programs. This volume is essentially descriptive and is divided into seven parts. The first part contains a general overview of the project and provides information about its goals, staff, and process model. The second part provides a discussion of change as it relates to the redirection of reading programs in the project schools. The third part focuses on the inservice component used to bring about change in the project schools, while the fourth part contains participant reactions to such elements of the project as its successful components, project outcomes as related to goals, the use of a teacher/staff perceptual survey, program improvement efforts, and the use of confidence sheets. The fifth part presents narratives by participants that describe briefly some of the project activities, and the final part summarizes findings related to the adult education parenting projects offered in 24 of the schools that were designed to assist parents who wanted to help their children read better. Appendixes contain several project documentation forms, an overview of the process model, a list of project goals and objectives, a trainer of trainers model, and a model for delivery systems within the project. **Interdisciplinary Approach to Failure Prevention.**

Pub Date—[78]  
Note—16p.; Best copy available.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Compensatory Education, \*Consultation Programs, Economically Disadvantaged, \*Educationally Disadvantaged, Elementary Education, \*Interdisciplinary Approach, Language Skills, \*Parent Participation, Parent School Relationship, Perceptual Development, \*Reading Instruction, Remedial Instruction, Rural Youth, School Psychologists

A reading project for educationally disadvantaged elementary students in an impoverished rural area in northeastern New York State has been carried out successfully over a six-year period. The project began with the establishment of a resource center with special linguistic and perceptual instructional materials and progressed to a phase that involved grouping of students in classes not exceeding a 20:1 pupil/teacher ratio, training of teachers in remedial techniques, intensive parent involvement, improved communication between parents and teachers, and use of the school psychologist and reading teacher as an interdisciplinary team that functioned as curriculum planners and consultants to teachers. In subsequent phases of the project, individualized programs were developed for children with learning deficits, and parent workshops, diary and newsletter writing projects for children, and parties and game nights for parents and children were established. The project gave special emphasis to the development of effective motivational techniques, to direct instruction procedures for small group teaching, to perceptual training, and to parent involvement. Several evaluations have been conducted during the various phases of the project, and positive results have been noted in students' emotional and intellectual development. (GT)

**Signaling in Text and Its Interaction with Reader Strategies.**

Arizona State Univ., Tempe.  
Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.

Pub Date—Apr 80  
Grant—NIMH/ROI-MH-31520-01

Note—28p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Research (143) — Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Content Area Reading, \*Context Clues, Discourse Analysis, \*Organization, \*Reading Comprehension, \*Reading Skills, \*Surface Structure

Identifiers—\*Reading Strategies, \*Schemata

Research has identified three reading strategies that are affected in various ways by signaling—the emphasis of superordinate relationships in text. Using a structure strategy, readers follow the text's superordinate relations to focus on the text's message and how it relates to supportive details. Readers who use the detail/list strategy focus on learning facts; they develop a flat, list-like structure instead of developing hierarchical structures of interrelationships among major text propositions. In contrast to these two systematic strategies, the default/list strategy represents no systematic plan. The type of signaling studied in relation to these three strategies explicitly cued superordinate text structures. Such explicit signaling promoted a switch from the detail/list to the structure strategy; thus, it dramatically affected protocol organization and types of information recalled. Explicit signaling also facilitated the substitution of the structure strategy for the default/list strategy, increasing recall in those readers making the switch. It did not appear to influence readers who already were using the structure strategy. (RL)

Identifiers—Center for the Study of Reading II.

This report describes the work of the text analysis groups of the Center for the Study of Reading,

whose goals are to investigate the problem of reading comprehension from the standpoint of comparing properties of texts to the difficulty or ease of reading and to construct appropriate theories to account for text properties. The text analysis groups note that it is essential to develop tools not only for evaluating the difficulty level, but also for distinguishing challenging texts from confusing texts and for identifying sources of difficulty in given texts. The report discusses the groups' decision to analyze and collect a body of analyzed texts, with which to compare developing theories of text properties and their development of a system to annotate, store, and retrieve analysis of texts. Their method of text analysis is divided into lexical analysis, syntactic analysis, text-level inference analysis, and an illustration and layout analysis. Discussion of the properties of the texts of "Hansel and Gretel," "The Dog and the Cock," "Babar Loses His Crown," and "The Wonderful Desert" are included. (MKM)

This report presents the text analysis of "Babar Loses His Crown," a story for beginning readers. (The techniques used in arriving at the analysis are presented in a Reading Center Technical Report, Number 168, "Problems and Techniques of Text Analysis.") Tables are given for a statistical lexical analysis and for a syntactic analysis. Analyses of text level properties, such as intermediate level plot structure, highest level plot summary, story grammar, and text connective inference are also included. An examination of the illustrations and layout includes reports on the relation between texts and illustration, analysis of the layout, analysis of sentences interrupted by line ends, and analysis of illustrations and graphics. This report presents a text analysis of "The Wonderful Desert," a brief selection from the "Reader's Digest Skill Builder" series. (The techniques used in arriving at the analysis are presented in a Reading Center Technical Report, Number 168, "Problems and Techniques of Text Analysis.") Tables are given for a statistical lexical analysis and for a syntactic analysis. Analyses of text level properties include an analysis of text structure, paragraph analysis and expository description, and an analysis of discourse properties, rhetorical devices and text-connective inferences. An analysis of the layout includes reviews of illustrations and graphics, the text layout, and sentences containing line breaks. (MKM)

Descriptors—Bookkeeping, \*Clerical Occupations, Comparative Analysis, Job Performance, Job Skills, Job Training, \*Office Occupations, \*Readability, \*Reading Ability, Reading Habits, \*Reading Materials, Reading Research, \*Reading Skills, Secretaries

Identifiers—\*Job Literacy

A study was undertaken to determine the operational reading levels and skills of beginning office employees and to compare the readability of classroom and on-the-job materials. Clerks and secretaries who had been employed for two years or less were observed and interviewed to collect the data. Statistical analysis revealed that secretaries read significantly different materials than did general clerks. Most of the reading was for verifying, comprehending, and proofreading; but the secretaries verified different materials than clerks, while the general office clerks read more materials for comprehension. Secretaries read more rough draft materials, whereas clerks read more printed materials. There was an approximate balance in the reading of typed materials between the two groups. Readability of on-the-job materials varied between 10.5 for order forms/invoices to 12.9 for labels on packages. No significant readability differences were found between instructional and on-the-job materials. It appeared that textbooks, an instructional simulation, and on-the-job materials provided similar distribution of comprehending and proofreading materials, though simulation materials emphasized more verifying skills than on-the-job materials. Descriptors—Affective Behavior, Classroom Techniques, Elementary Education, Grade 5, Grade 6, Interaction, \*Questioning Techniques, \*Reading Achievement, Reading Research, \*Small Group Instruction, \*Socioeconomic Status, \*Student Teacher Relationship, \*Teacher Behavior, Teacher Effectiveness, Teaching Methods, Teaching Styles

The effects of student socioeconomic status (SES) and four teacher behaviors—teacher structure, teacher affect, cognitive level of questions, and group size—on student reading achievement were analyzed. Subjects were 36 fifth and sixth grade classroom teachers and their 820 students. Data were collected with the Reading Comprehension Subtest from the Iowa Tests of Basic Skills, an estimate of SES, and the Georgia Assessment of Teacher Effectiveness (GATE). The results upheld many previous findings, indicating that high SES students scored higher in reading than did low SES students. Although the analyses produced no significant interaction F-ratios, high and low frequency of selected teacher behaviors seemed to make a difference in student reading behavior. Apparently, structured academic time did not produce better reading achievement for either high or low SES students, but structured student behavior had a negative impact, especially on low SES students. Students under the influence of hostile teacher behavior also were negatively affected. Low SES students achieved better with low cognitive level questions. Students who had the opportunity to participate in small group activities, either prescribed or independent, achieved at a higher rate. (RL)

Descriptors—Diagnostic Tests, Graduate Study, Higher Education, Pretests Posttests, Reading Consultants, \*Reading Diagnosis, \*Reading Difficulties, \*Reading Research, \*Reading Teachers, Reading Tests, \*Reliability, Remedial Reading, \*Teacher Education

A study was conducted to investigate the degree to which subjects could be trained to improve the reliability of their diagnostic decisions about cases of reading difficulties. Twenty-eight graduate students enrolled in a reading diagnosis course were trained from G. B. Sherman's Model of Reading and Learning to Read, and practiced on simulated cases of reading difficulty. Pretests and posttests were administered, in which the students were asked to diagnose cases, write their diagnoses, and transfer their diagnoses to checklists. Statistics were run to calculate the students' diagnostic agreement with each other. The students' diagnostic agreement approximately doubled from pretests to posttests, indicating that subjects can be trained to improve the reliability of their diagnostic decisions about cases of reading difficulties. (Eleven appendices include copies of materials used in the course.) (Author/MKM)

Phonic Generalizations—A Survey of Seven College Level Reading Textbooks.

Pub Date—80

Note—128p.; M. A. Thesis, Kean College. Not available in paper copy due to marginal legibility of original document.

Pub Type—Dissertations/Theses - Masters Theses (042)—Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Basal Reading, \*Beginning Reading, Higher Education, \*Phonics, Reading Instruction, \*Reading Research, \*Reading Teachers, \*Research Utilization, \*Teacher Education

Results of the examination of teacher's manuals, grades one through four, that accompany a number of basal reading series used in schools in Staten Island, New York, indicated that although teacher's manuals included many phonic rules, none of the examined texts gave any utility or frequency data or cited any research studies to support the inclusion of the selected phonic rules. This discovery led to the decision to investigate seven undergraduate level texts used to teach reading methods courses in colleges and universities in the New York City metropolitan area to see if they adequately prepared and acquainted future teachers with the research available on the value and limitations of phonic generalizations. The study revealed that only two college texts included references to the major studies of T. L. Clymer (1963), M. H. Bailey (1967), and R. Emans (1967). Two texts cited other research studies. Each of the seven texts presented a number of phonic rules, yet did not give any utility data to support the usefulness of the rules presented. No studies after 1971 were cited, although none of the texts had been revised or published any earlier than 1975, and little overlap was found in the cautions presented in the texts for using phonic rules. **Identifiers—**\*Kean College of New Jersey

A study was conducted to determine how many of the 350 reading specialists who have graduated from Kean College in New Jersey since 1974 are making actual use of their Reading Specialist Certificate. By examining the current professional status of these people and seeking their opinions, some idea of the adequacy or inadequacy of this institution's preparation procedures was sought. Follow-up studies of students of remedial reading programs and follow-up studies of graduate teachers' programs were reviewed. Questionnaires were mailed to 350 reading specialists and data were elicited from 105 (43%) of these people. Interviews were then conducted with five persons. Results showed that 81% of the respondents were presently making use of the Reading Specialist Certificate, primarily in one of three positions—classroom teacher, reading specialist, and remedial reading teacher and that 86% were enjoying their present job. In designing this curriculum guide, the contributors drew materials from a variety of sources (social studies texts and reading workbooks) to help teachers develop student reading skills while indirectly exposing students to the customs, vocabularies, and histories of various ethnic groups and cultures. Activities are suggested for teaching word analysis skills, word meaning skills, comprehension skills, organizational skills, speed reading skills, study skills, real life reading skills, and newspaper reading skills. An answer key, a word frequency list, a test for quickly assessing reading ability, and materials on sustained silent reading are attached. (RL)

**Descriptors—**Comparative Analysis, \*Competence, Educational Research, Internship Programs, \*Job Performance, Reading Instruction, Reading Research, \*Reading Teachers, Teacher Attitudes, \*Teacher Behavior, Teacher Educators, Teacher Evaluation, \*Teacher Interns, \*Teaching Methods

Data on the ideal/actual competence of reading teacher interns were collected in a survey of teaching interns, cooperating teachers, and university supervisors. The experimental group included 34 interns who had completed a one-year field based program in diverse settings prior to internship. The control group included 64 interns who had completed traditional on-campus courses with little or no field experience prior to internship. The data revealed that cooperating teachers for the experimental interns had significantly more negative perceptions of intern competencies than did all the other respondents. The mean score of experimental interns was more positive than that of their cooperating teachers. It was proposed that experimental group interns may have developed more self-confidence in teaching, tending not to rely on their cooperating teachers for guidance. Competencies rated most important by all groups included being regularly prepared for daily teaching, matching

materials and activities to instructional level and using individual, small group, and total class instructional strategies. Items rated least important by all groups were appropriate nonverbal behavior, organized introductions and conclusions of learning experiences, and balanced use over time of instructional strategies. **EDRS Price - MF01/PC01 Plus Postage.**

**Descriptors—**\*Content Area Reading, Higher Education, Readability, Secondary Education, \*Semantics, \*Teaching Methods, \*Vocabulary, \*Vocabulary Development, Vocabulary Skills, \*Word Study Skills

Content area teachers should be aware of the five levels of vocabulary with which their students must cope. The five levels include standard words at the least complex level, transitional terms that have different meanings in the content area than in standard usage, technical terms specific to the subject area, changeable terms (similar to transitional terms) whose meanings change even within the content area, and phrases appearing in adjective-noun structures yet conveying meaning only as a unit. These five types of vocabulary can be taught at three instructional levels: the specific level of rote memory, the functional level that involves paraphrasing, and the conceptual level that introduces categories and analogies. Research has shown that teachers using only exercises at the specific level will inhibit vocabulary development beyond simple rote memory; so teachers need to vary instruction with specific, functional, and conceptual learning tasks in order to stimulate meaningful student vocabulary development. Teachers can also apply the levels of vocabulary and the criteria for vocabulary instruction as taxonomies for studying the readability of materials and for preparing, evaluating, and discussing instructional materials and objectives. **Descriptors—**\*Adolescent Literature, \*Adolescents, High School Students, Literature Reviews, \*Reading Habits, \*Reading Interests, Reading Material Selection, Reading Research, Secondary Education, \*Student Motivation

This paper discusses the role of reading in the lives of high school students and discusses research that suggests ways to motivate adolescents to read. Research reviewed in the paper indicates that the major factors that influence adolescent reading are gender, age or maturity, intelligence, and socioeconomic background. The summary of the literature concludes that many of the problems in getting adolescents to read are still the same as in the past: other pressures on their time, difficulty in finding interesting material, and the encroachment of the media-television in particular—upon their reading opportunities. Diagnosis, Reading Programs, \*Reading Research, Reading Skills, \*Reading Tests, Remedial Reading, \*Test Validity

**Identifiers—**\*Nelson Denny Reading Test, \*Stanford Diagnostic Reading Test

This paper discusses an investigation that compared college students' reading gains when using general or specific diagnosis. It reports that significant gains were made on many subskills of the Stanford Diagnostic Reading Test by the group that had the prescriptions developed as a result of a differential (specific) diagnosis and that there were no significant gains noted on the Nelson-Denny Reading Test, a general survey test. An analysis of two other research studies on this topic shows that results of this study support the results of a study by G. L. Cox and J. E. Swalm and contradict the results of a study by B. D. Smith. It is noted, however, that since Smith used the Nelson-Denny Reading Test to test gains from specific diagnosis, her findings are not necessarily valid and not necessarily contradictory to those of the other two studies. The evidence in the literature indicating that the Nelson-Denny Reading Test is not an appropriate test for evaluating the reading ability of college students in developmental programs and that survey tests are often used inappropriately as measurements of achievement in college reading programs is discussed in the light of the findings from these research reports. **Descriptors—**\*Administrator Role, Guides, \*Kindergarten, Program Descriptions, Program Evaluation, Program Improvement, \*Reading Instruction, Reading Programs, \*Teacher Role

This handbook is designed to assist those who administer kindergarten reading programs. Although its primary focus is upon the role of the principal, the handbook also contains ideas for kindergarten teachers. The first chapter provides background information about the place of reading in the kindergarten and offers some insights into various effective reading programs. The second chapter examines typical characteristics and diversities of the five-year-old child. The third chapter focuses specifically on the administrator's role in developing a kindergarten reading program and suggests ways of working with teachers and parents. The fourth chapter provides guidelines for implementing a reading program, while the fifth chapter describes different patterns for organizing such a program. The final chapter presents a plan for continuous diagnosis and assessment of the program. (FL)

**EDRS Price - MF01/PC01 Plus Postage.**

**Descriptors—**\*Cloze Procedure, Comparative Analysis, \*Context Clues, Discourse Analysis, Elementary Education, Grade 4, \*Reading Ability, Reading Achievement, \*Reading Comprehension, Reading Research, Sentences

A three-way mixed factorial design was used in a study of the ways good and poor readers used context in cloze tasks. Reading ability (good versus poor readers) and booklet format (sentence versus

sentence fragment presentation) served as between-subject factors, while context (whole versus partial passage) served as a within-subject factor. Subjects were 78 fourth grade students whose reading achievement had been measured by the Stanford Achievement Test. All three main effects were found to be significant: good readers scored higher than poor readers; students with sentence booklets scored higher than those with sentence fragment booklets; and performance was better on whole passages than on partial passages. The results replicated findings by M. H. Neville and A. K. Pugh, showing that good readers were better than poor readers at utilizing the context provided by complete passages. Good readers gained much more from the intrasentence context afforded by the sentence booklets than did the poor readers. Surprisingly, the results suggested that poor readers made better use of intersentence context than good readers. When semantically acceptable responses were scored, however, intersentence context produced significant, nearly equivalent gains for both good and poor readers. (RL)

**Do Beginners Learn to Read Function Words Better in Sentences or in Lists?**

Pub Date—Apr 80

Note—11p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Beginning Reading, \*Function Words, \*Learning Processes, Primary Education, \*Reading Instruction, \*Reading Research, Teaching Methods

First grade students practiced reading ten unfamiliar function words; half studied the words embedded in printed sentences and half studied the words in unstructured lists and then listened to sentences comprised of the words. Posttest measures revealed that those who studied the sentences learned more about the syntactic/semantic identities of function words, whereas those who studied the lists remembered the orthographic identities of the words better and could pronounce the words faster and more accurately in isolation. The findings show that there are multiple aspects of printed words to be learned by beginning readers, and that the aspect that gets learned depends upon how the words are practiced. These results lend support to the theory of printed word learning in which various identities of words become amalgamated in lexical memory as a consequence of reading experiences with the words. Descriptors—Educational Research, Elementary Secondary Education, \*Ethnography, \*Evaluation Methods, \*Program Development, Program Effectiveness, \*Program Evaluation, \*Program Improvement, \*Reading Programs, School Districts

Identifiers—\*Right to Read

An ethnographic paradigm was used to collect the needed information on effective Right to Read program planning and staff training in several New York school districts. The paradigm encompassed six steps: determining program goals and objectives, completing needs assessment, determining planning strategies, writing and accepting the plan, implementing the plan, and evaluating outcomes. These six areas were addressed at a regional meeting, where data were collected from participants and presenters by using questionnaires and interviews. A second major measurement area focused on monitoring participating districts' efforts to organize and practice the skills gained at the regional session. Common elements reflected in this evaluation scheme were identifying the adequacy of programs, planning emphasis and progress, identifying problems and assets, and determining program impact. The results of combining these two inquiries led to five generalizations about how the districts could maintain or improve their Right to Read programs. The main benefits from using ethnographic inquiry were the redirecting of resources and funds to problem areas, reviving staff enthusiasm, and increasing district capabilities for achieving quality reading instruction. In general, ethnographic analysis provided helpful information that statistical treatments or basic surveys alone could not have provided. (RL)

Descriptors—College Students, \*Grade Point Average, Higher Education, \*Program Effectiveness, \*Reading Comprehension, \*Reading Programs,

\*Reading Rate, Reading Research, \*Student Improvement, Study Habits, Vocabulary Development

After research between 1960 and 1977 relating to college reading program effectiveness was identified, a statistical procedure called Meta-Analysis was used to integrate findings and determine any composite benefit of instruction. Of 676 references on the initial list, 66 studies were identified as having quantifiable data within the limits of the research criteria. Only 28 studies employed adequate controls and maintained satisfactory validity to warrant inclusion in the Meta-Analysis. Overall, reading-study instruction proved generally beneficial as measured by the dependent variables reading rate, comprehension, grade point average (GPA), vocabulary, and study habits. The "average" student receiving college reading instruction was "better off" than 83% of untreated students. For the 6,140 students who participated in the college reading-study programs or served as controls, significant composite gains in rate, comprehension, vocabulary, and GPA were found. Typical students increased their reading rates by 100-150 words per minute, with corresponding increases in comprehension. An unexpected benefit of instruction was the significant gain measured by change in GPA, with participants achieving a .37 GPA advantage over nonparticipants at the conclusion of instruction. (RL)

Descriptors—\*Cognitive Processes, \*Comprehension, \*Discourse Analysis, Interaction, Linguistics, Models, \*Readability, Reading Research, \*Recall (Psychology)

This paper advocates the view of readability as an interaction between text structure and the cognitive processes and structures possessed by a reader. A simulation model of prose comprehension that yields predictions of both propositional recall and text readability based on the frequencies of different processing events is discussed. The paper notes that the model is being extended to include the knowledge based aspects of comprehension, including the representation of text-relevant world knowledge and top-down processes that observe the constraints established in a text as a result of the interaction between a text and a reader's knowledge. Experiments that examine the kinds of expectations which are made during reading and the factors that determine the content and specificity of these expectations are reported. The early stages of a simulation model that integrates knowledge structures with top-down and bottom-up processes are also described. (Author/FL)

A questionnaire was designed to give content area teachers an opportunity to review 35 reading/learning skills that are necessary for vocabulary development, the comprehension of written materials, and the efficient use of study time. Over 400 secondary school teachers in seven content areas (English/language arts, social studies, science, mathematics, home economics, business education, and industrial arts) were asked to indicate the relevancy of each skill for learning their subject matter and their expectations of a student's ability with that skill. The data, analyzed across and within content areas, indicate widespread recognition of the relevancy of the reading/learning skills as well as the expectation that students will need help in applying these skills to learn content. (A copy of the questionnaire is included.) (Author/MKM)

Practical strategies for implementing a skill-centered approach to reading instruction are discussed in this paper. The first two strategies presented pertain to the beginning implementation stage: making a commitment to a skills approach and paying attention

to principles for educational change. Sections are included on whole-staff involvement in the whole-school reading program, maintaining the whole-school reading program, and refining the whole-school reading program. Emphasis is placed on the importance of inservice work in implementing the program. (MKM)

Descriptors—Achievement Gains, Grade 2, Grade 5, Individualized Instruction, \*Individualized Reading, Models, \*Program Evaluation, Program Implementation, \*Reading Achievement, \*Reading Programs, Reading Research, Teaching Methods

Identifiers—\*Individually Guided Education

The relationship between the organizational and instructional features of IGE (Individually Guided Education) schools and the reading achievement of second and fifth grade students is discussed. A theoretical model of how variations in different organizational and instructional features would be linked is presented and evaluated in terms of how adequately it fits data obtained from the schools. The results of the causal analysis used suggest that the instructional and organizational features, as measured in this study, are not able to account for much of the variance associated with the reading achievement of the second and fifth grade students. Two studies were undertaken to continue a line of research designed to identify the subskills of word identification that correlate most highly with reading comprehension and to develop empirically based instruments to assess those subskills. The issues studied related to the broad area of structural analysis and concerned assessment of skills in the subareas of inflected endings, possessives, and affixes. In the first study, a prototype of the Inflected Endings Subtest was administered to 143 third and fourth grade children. The results indicated that most students had mastered all of the inflected endings assessed, with the exception of the possessive use of the apostrophe. In the second study, a prototype of the Affixes Test was administered to 275 fourth and fifth grade children. The results indicated that while some of the affixes assessed in the test (un-, -ful, -less, for example) were fairly well known by the children, others (pre-, -ant-, -ent, for example) were still not understood by a majority of the children. In general, performance on prefixes was significantly greater than performance on suffixes. Overall, girls significantly outperformed boys and fifth grade students achieved higher scores than did fourth grade students. (Author/FL)

Identifiers—\*Anaphora

Anaphora, a linguistic structure that refers to previously mentioned or implied text, has been implicated as a possible cause of reading comprehension difficulty among children. Reading research has focused on the surface structures of anaphora (pronouns and noun demonstratives, for example) and has viewed comprehension of anaphora as a language learner's systematic acquisition of these various structures. Such an analysis ignores the fact that anaphora reflects a complex relationship between an anaphoric structure and its antecedent. Research in cognitive science reveals that in comprehending anaphora, readers must bring a range of social, factual, and logical, as well as linguistic knowledge to the text. Linguistic analysis of anaphora indicates that it plays an important role in text comprehension by linking the various parts of the text. The study of anaphora promises to provide information concerning the structure of texts and the psychological processes involved in text comprehension. (Appendixes contain anaphora experiment materials and a summary of a cohesion and coding scheme.) (Author/FL)

A total of 411 elementary school children seven

to twelve years old read short prose passages and selected the most appropriate continuation sentence from four alternatives. The completion sentences were constructed so that the correct (target) response involved either an explicit (simile) or an implicit (metaphor) metaphorical comparison. It was found that the children selected significantly more explicit target sentences than implicit target sentences. The children also made more correct selections when the referent of the metaphorical comparison was specifically denoted than when the identity of the referent had to be inferred. Thus, the measurement of children's understanding of metaphorical language was all too easily confounded by general language variables (indirectness and referential specificity) having no particular connection to metaphorical language. Descriptors—\*Black Dialects, Black Students, Elementary Education, \*Error Analysis (Language), Language Usage, \*Learning Disabilities, \*Miscue Analysis, Oral Reading, \*Reading Research, Reading Tests, Test Validity

A study was undertaken to determine if the removal of black English dialect as oral reading errors would influence the scores obtained on three oral reading diagnostic tests: the Gray Oral Reading Test, the Gilmore Oral Reading Test, and the Spache Diagnostic Reading Scales. In addition, the study investigated whether there were differences in the influence of black English miscues on the scores of learning disabled students compared with the scores of a normal group of elementary school students. The 40 children in the sample population (20 control children who were matched by age and sex with 20 children identified as learning disabled) were given all three tests. Each test was scored first using test manual criteria and then rescored using those criteria but eliminating dialect miscues from the error count. On all three tests, learning disabled children scored lower than did control children and, on all three tests, the effect of removing dialect miscues as errors caused an overall increase in reading scores. On the Gray and Spache tests, but not on the Gilmore test, control children benefited more from the removal of dialect responses as errors than did the learning disabled. In addition, the results indicated that dialect had a greater impact on the scores of the Gilmore Test than it did on either of the other tests. (Author/FL)

A model for faculty development and curricular change that focuses on the history, culture, and contributions of women in the humanities is the subject of this overview of a National Endowment for the Humanities final report on establishing a women's studies section at Stephens College (Missouri). The report is divided into sections describing project activities, a curriculum review, evaluation by faculty from regional colleges and universities, the impact

of the new curriculum on those students who participated, a projection for the women's studies section in the next year, and dissemination of the month-by-month materials of the workshops. Extensive appendixes include nine papers on women in the humanities, various course syllabi on women in the humanities, six departmental curricula on women's education, and the mission and goals of Stephens College in women's education. Identifiers—\*Writing across the Curriculum

The work of teaching faculty in the major disciplines how to teach writing often falls to the writing program administrator (WPA), and this paper explains one WPA's hypotheses, reasoning, and methods used in promoting writing in a college engineering department. Principles underlying the program related to the motivations of faculty and the structure of teaching writing are discussed, and a six-hour seminar required of engineering faculty appointed to teach writing is outlined. Also discussed is the program designed to provide writing tutors to the classes of the members of the engineering faculty who do not want to teach writing, along with the training course required of the tutors. Among the benefits of the program listed are that a large number of engineering students learn to write better and that the tutors become more confident of their own abilities to write and speak persuasively. Identifiers—\*Nineteenth Century

The origins of local news in the United States country press between the 1840s and 1870s are discussed and traced in this monograph. Specifically, it deals with why local news reporting in standardized form began when it did, who provided the news, and what the news items revealed about the patterns of life in rural areas and towns in the United States. It notes that although local news columns were a regular feature of the eighteenth century English provincial press, they became a standard part of American newspapers later and only gradually over a long period of time, appearing occasionally in the 1840s, especially in the cities; somewhat more regularly in the 1850s; and typically by the 1860s and 1870s. An analysis is provided of the writing of two volunteer reporters who wrote under the pseudonyms of "Shears" in the 1840s and "Pocumtuck," following the Civil War, about local occurrences in South Deerfield, Massachusetts. The monograph notes that volunteer local reporters tended to write descriptive reports with little analysis of the events. (MKM)

This report provides details of a study conducted to learn how handwriting was being taught in Ontario (Canada) schools. The report is presented in two parts. Part one contains an introduction to the study, a review of the literature on handwriting, analysis of curriculum guidelines used by Ontario school boards, an examination of the methods of handwriting instruction used in Ontario classrooms, attitudes toward handwriting instruction, analysis of student handwriting samples, and a summary/conclusion. Part two is an annotated bibliography on the history of handwriting, its developmental aspects, methods of instruction, handwriting style, the evaluation of handwriting quality, lateralization of the brain, "handedness," teaching handwriting to learning disabled children, general resources on handwriting instruction, and miscellaneous handwriting topics. Appendixes are also included, providing samples of materials used in the study, interview schedules, and a classroom observation checklist. (RL)

There are many critical problems that are influencing the status of literature and the teaching of literature in the United States today, according to this paper. Some of the problems cited are the poor quality of recent best selling books; the smaller number of people who read books compared to the number of people who read magazines and newspapers, the current vogue of contemporary literature courses and the unpopularity of traditional literature classes in colleges, a trend to basic skills courses away from literature electives and an omission of literature in competency tests in high schools, the higher costs of paperbacks used to supplement the hardback anthologies that are so susceptible to the censor's influence, new copyright laws that restrict supplementing the hardback anthologies with teachers' favorite materials, and the relative paucity of money recently allocated to library services. The important humanizing factors involved in experiencing literature are noted and an appeal is made to teachers to see that literature not only endures but flourishes in human lives. (MKM)

 \*Evaluation Methods, \*Literary Criticism, \*Lit-  
 erature Appreciation, Novels, Secondary Educa-  
 tion

A rating scale was developed by Stephen Dunning for evaluating adolescent literature objectively. The distinguishing features of the scale's five categories are designed to produce a numerical score between 5 and 25 (each category a 1-to-5 ranking for poor/excellent quality), indicating the relative worth of a specific literary work. The first four categories are traditional elements of literary analysis: style, structure, characterization, and theme. The fifth category, adult role and adult/adolescent relationships, is a unique feature of most adolescent literature. Raters who use this scale have discovered that their ratings do not always match their subjective reactions; so one adjustment to using the scale is the addition of written statements to augment the numerical ratings and to document the similarities and differences between objective and subjective responses. Samples of eleventh grade student ratings and responses have been compared to those of teachers, illustrating how students and teachers respond to literature in different ways. (The novels rated and discussed are Maureen Daly's "Seventeenth Summer," "If I Love You, Am I Trapped Forever?" by M. E. Kerr, Robert Cormier's "The Chocolate War," and Alice Childress' "A Hero Ain't Nothin' But a Sandwich.") (RL)

Descriptors—\*Academically Gifted, College Preparation, \*Educational Research, English Instruction, Literary Genres, \*Literature, \*Literature Appreciation, Novels, \*Reading Research, \*Responses, Secondary Education  
 Identifiers—\*Reader Response

This report discusses college English preparatory or gifted and honors English classes and describes research conducted with students from four college preparatory English classes in 1974. The study involved 96 academically talented seniors who were asked to respond to two structurally dissimilar novels, a free-verse poem and a short story. The major finding from the study was that the form of a literary selection had a significant influence on students' response to that selection. Approximately three-fourths of the students proved inconsistent in their choices of response modes when responding to dissimilar literary selections. The traditional novel with a strong story line and standard structural pattern elicited a form-oriented response mode. Neither a form nor content orientation was clearly observable in students when they responded to the nontraditional novel. (MKM)

Descriptors—Child Language, \*Cognitive Development, Cognitive Processes, Concept Formation, \*Language Acquisition, \*Language Skills, \*Learning Theories

Identifiers—\*Piaget (Jean)

This paper suggests that language study focus its attention more on the pedagogical needs of educators by offering them a more comprehensive dialectical and unifying theory of language development that could then present the process as a holistic endeavor instead of as a set of separate linguistic acquisitions. Specifically, it suggests the use and application of Jean Piaget's cognitive dialectic theory of development (equilibration theory) or a similar one, for general heuristic language development purposes and as a unifying theory for language development. The paper contains two major sections. The first offers a brief and general neo-Piagetian interpretation of equilibration theory that is still taking form. The second presents a particular interpretation of language development first from a dialectical viewpoint and then as a progressive equilibration. (FL)

Information about the Riverside Instructional Support System (RISS)—a program designed to help elementary and middle school teachers and principals monitor basic skills in reading, language, and mathematics—is provided in this handbook. The first part of the handbook identifies the components of RISS, including primary, intermediate, and middle school diagnostic tests; a class worksheet on which diagnostic test data are reported; individual profiles used to monitor and assess primary students' oral language skills, elementary students' language arts and mathematics skills, and middle school students' language, social studies, and mathematics skills; a middle school teacher judgment report; and an elementary criterion-referenced test collection. The second part of the handbook identifies skills in a number of RISS categories, including elementary oral language skills (general information, reasoning, listening, and speaking); elementary language arts skills (word study, reading comprehension, punctuation, word usage, written expressions, and study skills); elementary mathematics skills (computations, concepts, and applications); and middle school language arts and mathematics skills. Descriptors—Budgeting, \*Career Planning, \*Community Involvement, Course Descriptions, Employment Interviews, \*English Instruction, Goal Orientation, Job Search Methods, \*Job Skills,

\*Occupational Information, Secondary Education, \*Writing Skills

A semester-long high school English course brings local professionals into the classroom to help the teacher introduce students to the language arts skills associated with the working world. The five major areas of the course are composition, career interests, income tax, insurance, and goal setting. The first content area, composition, covers specific skills related to writing various business communications, and local businesspeople respond to and evaluate the student letters. The second area, career interests, helps students assess their technical and academic interests, locate the schools in which those interests and skills can be developed, locate a job within an interest area, and interview for the job. A representative from a state employment office is a guest instructor and conducts mock interviews. The third area, income tax, presents material from the Internal Revenue Service and includes a seminar with a local bookkeeper and a question and answer session with a tax consultant. The fourth area, insurance, allows the most contact with local businesspeople in a seven-hour seminar on five major types of insurance. The last section, goal setting, uses film, cassette programs, and community individuals to stress that students can achieve their personal goals through a planned, step-by-step process. (AEA)

Topicalization: A Stylistic Process.

Pub Date—Mar 80

Note—20p; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Audiences, Discourse Analysis, \*Language Styles, \*Literary Devices, \*Nouns, \*Sentence Structure, \*Writing (Composition)  
 Identifiers—Composition Process

Although the nature of topicalization is complex and cannot be easily separated from considerations of syntactic structure and sentence focus, analysis of language usage has indicated that topicalization is more a stylistic than a syntactic process. Topicalization refers to moving a noun phrase (NP) into the initial position of a sentence. Examples of language use demonstrate that speakers and writers often use passive constructions as part of their rhetorical strategies because the passive allows movement of NPs into virtually any position within the sentence. The apparent ease with which NPs can be topicalized seems to have less to do with the distinctions between old and new information than with packaging the information so that it is processed and interpreted by the audience in ways that favor the motivations of the speaker/writer. Even the syntactic configurations characteristic of "objective" prose enable simple transformations of NPs that systematically suppress agency, which is another way of manipulating audience response. What this evidence indicates is that syntactic rules exist because they favor certain descriptions of the world over others; thus, any attempt to construct a grammar based on "case" relations as somehow inherent in the construction of sentences is not only doomed to failure but abdicates the responsibility of discovering how sentences come to be produced and interpreted. Identifiers—\*Broadcast Journalism

This book, the seventh in a series surveying broad-

cast journalism, provides behind-the-scenes details of news coverage during 1978-79, evaluating the growth and sophistication of the news media. The first section of the book discusses the treatment of major issues and news events, including the "odd couple" of politics and broadcasting, the "impossible necessity" of expanding network news coverage, the advent of the ABC television network's news department, the local news scene, foreign news (particularly the United States-Iran crisis), and the interactions between democratic government and information dissemination. The second section of the book focuses on three particular topics: the continuing energy crisis, how the news media reported the nuclear accident at Three Mile Island, and the technological advances marking the beginning of a communications revolution. The third section contains essays on Three Mile Island, recent U.S. Supreme Court rulings on broadcasting issues, and the changes that have occurred in network foreign news coverage. (RL)

**Self-Heuristics and the Writer's Self Discovery.**

Pub Date—Mar 80

Note—18p; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—College Students, \*Discovery Learning, Higher Education, \*Inquiry, \*Questioning Techniques, \*Self Evaluation (Individuals), Teaching Methods, \*Writing (Composition)

Identifiers—\*Composition Process

A four-part heuristic model seeks to enhance teacher and student-writer awareness of the significance of the self as writer. The questions in the heuristic examine the relationships between the self and the self as writer, between the self and the subject matter, between the self and the audience, and between the self and the form of the composition. Exercises that teachers can use in conjunction with this heuristic include the completion of a writing inventory by the students and a discussion of the inventory in the classroom, writing and discussing short paragraphs about student problems with writing and writing teachers, and reading about the writing processes/difficulties of established or famous writers. (A writing inventory and the heuristic model for self-analysis in the writing process are attached.) (RL)

**Teaching Your Child to Listen.**

Ferguson-Florissant School District, Ferguson, Mo. Pub Date—79

Note—30p.

Pub Type—Guides - Non-Classroom (055)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Auditory Discrimination, \*Early Childhood Education, \*Language Acquisition, Learning Activities, \*Listening, \*Listening Comprehension, Listening Skills, \*Memory, Parent Child Relationship, \*Parent Participation, Teaching Methods, Validated Programs

Identifiers—National Diffusion Network

This guide was developed for parents of young children to help them improve the child's ability to listen, to discriminate different sounds, and to understand and remember what is heard. Background information on the development of listening skills is presented and general guidelines for conducting listening games are offered. Activities are presented in sections on careful listening, distinguishing sounds, rhyming sounds, and remembering. Checklists are provided for checking progress and for determining if a child has poor listening habits or a hearing problem. (MKM)

**The Composing Processes of Anxious and Non-Anxious Writers: A Naturalistic Study.**

Pub Date—Mar 80

Note—25p; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Anxiety, \*Behavior Change, \*Behavior Patterns, Case Studies, College Students, Educational Research, \*Inhibition, Observation, \*Writing (Composition), Writing Instruction

Identifiers—\*Composition Process, Writing Apprehension, \*Writing Research

Case studies of the writing habits exhibited by anxious and nonanxious writers in workshops to reduce writing apprehension and in regular literature/composition classes have revealed how certain aspects of the composing processes of anxious writers differed from those of nonanxious writers. Some of the common problems were the lack of structured writing times, procrastination, and distractions. The writers who overcame their problems often needed help only to organize their writing tasks into discrete steps or to budget their time properly. Such case studies are theoretically and pedagogically useful to writing teachers, because they can show discrepancies between writers' perceptions of their effectiveness and their actual performances throughout their writing processes. When teachers record naturalistic observations of writers at work, they invite self-evaluation by anxious writers to modify work habits and streamline the writing process. In this way, students' writing apprehensions decrease, and some of them learn to enjoy writing. (RL)

**Document Not Available from EDRS.**

Descriptors—\*Artists, Cultural Activities, Cultural Enrichment, \*Financial Support, \*Fine Arts, \*Grants, \*Grantsmanship, Literature, Program Proposals, \*Proposal Writing

Support for work in the arts is examined, noting the specific ways of obtaining this support from both the public and private sectors. The major sources of information on grants and grantsmanship are listed, including libraries and their resources, professional associations, workshops, institutes, subscription information services, news media, programs, and catalogs. A section on government support of the arts contains a history of how government support developed, the kinds of programs that provide arts funding through selected government agencies, and listings of state and local programs. Similar sections provide information sources about support of the arts by foundations and corporations. A section on applications offers guidelines on what to do before, during, and after writing individual and organizational proposals. Six appendices list state and jurisdictional arts agencies, state education agency arts directors/coordinators, state humanities committees, reference collections operated by the Foundation Center, regional cooperating collections, acronyms used in arts grantsmanship, and the regional offices of the Department of Health, Education, and Welfare. **Speaking and Writing: The Semantic Connection.**

Pub Date—Mar 80

Note—13p; Paper presented at the combined Annual Meeting of the Secondary School English Conference and the Conference on English Education (Omaha, NE, March 27-29, 1980).

Pub Type—Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Basic Skills, Developmental Stages, Language Patterns, \*Low Achievement, \*Oral Language, Relationship, Secondary Education, \*Semantics, Speech Skills, Teaching Methods, \*Writing (Composition), \*Writing Skills

Because inexperienced or basic writers depend on the semantics of everyday spoken dialogue when writing, research on written composition and the developmental links between spoken and written language should be more accessible to the practitioners who teach writing to those students. A review of the literature supports the theory of a semantic connection between speaking and writing, and a tenth-grade writing sample demonstrates a

dependence on the reader's familiarity with a particular sociocultural context for the writing's full semantic value. Teachers who work with unskilled writers should avoid correcting only surface forms and should give students the opportunity to talk through the context-bound aspects of their writing with concerned readers. The interaction of talk and writing is essential to achieving competence for student writers who depend on the semantics of spoken language. (AEA)

**Editorial Groups: A Writing Process.**

Pub Date—Mar 80

Note—11p; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Editing, Group Activities, Higher Education, Organization, \*Small Group Instruction, Teaching Methods, \*Teamwork, Writing (Composition), \*Writing Instruction

Identifiers—\*Composition Process

Organizing writing students into three-member editorial groups is a teaching technique that focuses student attention on the stages of the writing process, their progression, and their interrelation. The technique also increases peer cooperation and evaluation, while enabling teachers to spend less time grading homework and more time working with students who need special attention. In each editorial group, one student concentrates on one facet of the composition—authoring, editing, or proofreading. Each group submits one paper for each writing assignment, and group members receive the same grade for their combined efforts. During the course, each group member will shift to a different responsibility within the group; and ultimately, after several of the group assignments, students will be expected to write one or more papers alone. As part of the emphasis on peer involvement, all students in the class are asked to comment on all the papers written for the course. Although editorial grouping may not be feasible for every writing class, most students who have been involved with the technique thus far have expressed interest and enjoyment concerning their increased involvement in the writing process. Identifiers—Holistic Scoring, New Jersey, \*Writing Evaluation

The development of the portion of a basic skills test that would adequately assess the writing ability of entering college freshmen in New Jersey is described in this paper. The stages of the test development process that are discussed include the decision to incorporate a writing sample in the form of an essay on a specified topic, the selection and piloting of an essay topic, the recruitment and training of readers to holistically score the essays, and a statistical analysis of the writing test data. Listed as significant results of this effort are the provision of a data base for a statewide assessment of the writing ability of all freshmen entering all colleges in the state, and the bringing together of college faculty from throughout the state for scoring essays and interpreting test results. Publishing Student Writing: An In-Class Model.  
Pub Date—Mar 80

Note—8p; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College English, Course Descriptions, Higher Education, Student Motivation, \*Student Publications, Teaching Methods, \*Writing (Composition), \*Writing Instruction

Identifiers—\*Writing for Publication

After reviewing the benefits of the in-class publishing of student writing, this paper describes such a college freshman publication and the process of producing it. The reasons presented in support of publishing student work include the observations that most students have no other opportunity to publish; that the composition classroom should be a workshop where students learn revision, proofreading, and preparing a manuscript for close scrutiny; and that the relative immediacy of such a publication generally intensifies the writing efforts of unpublished students. Described in the process of producing the publication are marketing the product to the students, arranging financing, collecting and selecting manuscripts, organizing the contents, and distributing the complete booklet. Descriptors—\*Editing, Educational Needs, Higher Education, Secondary Education, \*Writing (Composition), \*Writing Instruction

Identifiers—\*Composition Process, \*Revision (Written Composition)

If revision is as important as most teachers think it is and if students do not revise their work or cannot do it well, then teachers need to find ways to get students to revise involuntarily. Teachers could begin by emphasizing that revision is done primarily for the reader's benefit. That the revision stage of writing should rely heavily on adapting to and for one's audience is not new, but most studies supporting rhetorically-oriented revision still attend only to the microlevels of discourse, dealing almost exclusively with the word and the sentence. A shift from this position, getting writing teachers and their students to treat revision as transformation, would get students to think of drafts of compositions as bases on which to build by adding, deleting, and reordering—rhetorically-oriented revision at both the micro- and macro levels. The result of this attention to revision as transformation enables students to master the necessary skills of revision, to face writing tasks without fears, and to prevent writing from being a waste of time. Descriptors—\*Black Students, Course Content, \*Cross Cultural Studies, Higher Education, \*Humanities Instruction, \*Multicultural Education, Program Descriptions, Self Esteem, Teaching Methods, \*Writing (Composition), \*Writing Instruction

A redesigned college composition/humanities program that has as its primary goal the raising of the self-esteem of a predominantly black student body is described in this paper. First discussed are the deficiencies of an earlier program, traditional freshman composition followed by sophomore humanities, that centered around the cultural achievements of white Europeans. The new program is presented as implementing a thematic textbook designed specifically for the course, remedial skill-building exercises using programed material, patterned essay writing based on personal experience, and the student-centered or dramaturgical methods of Kenneth Macrorie and James Moffett, all within the context of the study of African, Oriental, and Western humanities. Descriptors—\*Audiences, College Students, Comparative Analysis, Educational Research, Higher Education, Knowledge Level, \*Language Styles, \*Organization, Teaching Methods, \*Writing (Composition), \*Writing Instruction, Writing Skills

Identifiers—\*Audience Awareness

A series of three experiments obtained objective measures of skilled and unskilled writing that was prepared in response to a potentially hostile audience. The principal differences between the two groups of writers were that skilled writers were far more likely than unskilled writers to go beyond the narrow constraints of the task, to generate new ideas, to use original language, to engage in explicit planning, and to address directly the concerns expressed in the letter they were answering. In contrast to these skilled writers, the unskilled writers tended to ignore their audience, responding primarily to the outline they were given as a writing aid. The results also showed that unskilled writers were much more likely to respond to their audience if the outline were removed or if the letter they were answering was made more detailed and explicit. Students in college basic skills programs will become more proficient writers not simply by being taught specific writing strategies, but also by greater exposure to the total linguistic system through reading. In the first of two reading projects initiated in an Ohio State University basic skills program, eight students participated voluntarily in weekly two-hour sustained silent reading sessions and kept journals of their reading responses. Although the students had great difficulty selecting appropriate texts, two students eventually found appropriate books and increased their reading comprehension scores dramatically during the ten-week project. In the second project, students were required to spend one hour per week in a reading laboratory, reading from a programed text and answering questions about their reading. The results of this project were encouraging, especially the gains made in reading comprehension skills. Neither project was designed to measure improvement in writing skills; but in any case, the benefits derived from sustained silent reading involve a familiarity with linguistic structures, and reading should not be expected to affect writing directly. There is a need for reading programs for basic writers and for research into the relationship between reading and writing. David Bartholomae's research in this area suggests that work in reading affects basic writers' performance in writing. (GT)

Descriptors—College Students, Creative Thinking, Discovery Processes, Educational Needs, Higher Education, Innovation, \*Problem Solving, \*Relevance (Education), \*Rhetoric, \*Writing (Composition), \*Writing Instruction

Identifiers—Composition Process, \*Invention (Rhetorical), \*Writing across the Curriculum

The new trend in writing instruction is toward "content area writing"—the rhetorical situations and composing problems that students will face in their non-English courses and in their professions. The focus of content writing instruction should be to prescribe the inventional techniques that are common to all forms of writing, and to survey the writing skills and structural constraints that are peculiar to the discourse of specific disciplines. Current writing theory suggests a number of inventional options and restrictions with which students must cope during their academic and professional careers. Reviewing this research will show teachers that rhetorical invention in the early stages of any composing process is important, and that problem solving is a skill generalizable to any kind of writing. The heuristics that apply to any given writing tasks can be evaluated for their transcendence, flexibility, and generative capacity. Structural consciousness—awareness of the constraints that particular forms of writing place on the writer's freedom of invention—is another factor that freshman composition students need to learn. These options and limitations are just a sampling of the things that content area writing classes must discuss. (RL)

Descriptors—Course Descriptions, Course Organization, Engineering Education, Higher Education, \*Interdisciplinary Approach, \*Professional Development, \*Retraining, \*Technical Writing, \*Writing (Composition), \*Writing Instruction, Writing Skills

The issues and problems confronted by a professor of literature when asked to teach a technical writing course for engineers are related in this paper. The first section of the paper explains how the professor was "recycled" from a teacher of litera-

ture to a professor of technical writing at his college. The second section describes some of the considerations involved in establishing and teaching the course, among them what text to use, what material to cover, how the students and engineering faculty would respond to the course, how to staff multiple sections of the course, and how to get students to see what they could write about after they had covered the basic techniques. The third section describes the "retraining" undertaken by the professor, which involved reading books on the subject, attending conferences, joining professional societies and reading professional journals, working as an editor for engineering professors, and auditing engineering courses. **EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*American Indian Literature, American Indians, \*Child Psychology, Children's Literature, Elementary Education, \*Folk Culture, \*Language Arts, \*Legends, \*Story Telling, Teaching Methods

Identifiers—\*Fairy Tales

Stories from oral tradition such as legends, myths, and fairy tales may more fully describe reality than any newscast for young children. As Bruno Bettelheim points out, stories meet the psychological need of all human children. The Yakima Indian legend "When Mosquitos Ate People" can be used in a flannel board story telling setting with young children. In the story the mosquito man is a giant whom children may see as representing adults and the coyote is small, but his cunning allows him to defeat the monster. This legend touches the child's perception of himself or herself and the relationship of the child to the world. Many stories, such as this one, deal with seeing through the eyes of different animals, altering a listener's perception and serving to round out one's personality. By placing the story in an earlier time, the problem of confusing the actions taking place in the legend with reality is removed. Traditionally the manner of story telling deals with instilling certain cultural values and concepts. American Indian stories are told in a cycle or when the time is appropriate, and constantly referred to illustrate points that the child should remember to modify his or her behavior. Indian story collections that may be used in the classroom include the "NW Indian Readers Series," "Grandfather Stories of the Navahos," "Son of Raven, Son of Deer," and "Wo Ya-Ka-Pi." (MKM)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Choral Speaking, \*Drama, Elementary Secondary Education, \*Oral Interpretation, \*Poetry, Readers Theater, \*Student Attitudes, Student Motivation, Teaching Guides, Teaching Methods, \*Theater Arts

Designed to help students respond in a positive way to poetry, poetry theater integrates dramatic technique with various aspects of reading, writing, analyzing, and reciting poetry. Poetry theater presentations require approximately five class periods to complete, allowing 45 minutes per class. The first class period should be devoted to choral reading. In this period, the class should be familiarized with the techniques of choral reading and then broken into groups of five or six students. Each group then creates a presentation of the same poem used with the entire class. The second class session should be devoted to the discussion of themes for a presentation, finding poems related to the theme chosen; selecting lines, phrases, or words from those poems to use in the presentation; deciding on the final order of

the poem to be presented; assigning specific lines to people in the group; determining appropriate movements and voice levels; and practicing. The third and fourth class sessions should involve refinement of the presentation, and the last session is the presentation itself. In addition to providing positive experiences with poetry, poetry theater gives students valuable group work experiences and helps them to become more creative. (FL)

**Reading Strategies for College Students.**

Pub Date—Mar 80

Note—9p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Guides—Classroom—Teacher (052)—Speeches/Meeting Papers (150)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—College Students, \*Critical Reading, Higher Education, Observation, \*Reading Comprehension, \*Reading Instruction, \*Teacher Education, Teaching Methods, Writing Skills

College students need experiences in reading and reacting to good writing if they are to learn to read effectively. Observing and reacting is an important skill that encompasses many of the skills effective readers employ such as paraphrasing, understanding the structure of a piece of literature, noting the use of generalizations and specifics, and examining language and how language is used to create a tone and convey images, humor, and a sense of the speaker. A useful class technique is to ask each student to write observations of what he or she remembers from a particular piece of writing. After writing and then reading each observation, each student writes an observation about what the others have written. This exercise increases the student's skills in listening and broadens the scope of the student's next observation. One of the problems in college reading instruction is the way in which college reading instructors are prepared. Too few have had courses emphasizing the reading processes of the mature reader. Too many college reading instructors rely on workbooks with multiple choice answers as a method for teaching reading—a method that requires the readers to worry about the workbook author's answer, rather than developing an image of themselves as readers, reactors, and opinion formers. (MKM)

Descriptors—\*Characterization, College Freshmen, \*Descriptive Writing, Discourse Analysis, Females, Higher Education, \*Literary Styles, Males, Prose, Research, \*Sex Differences, \*Sex Stereotypes, \*Student Attitudes

Essays in which 40 freshman composition students described unusual or extraordinary persons were analyzed for the characteristic choices that males and females made and for the typical ways men and women were described. The analysis yielded seven findings with social implications. Both males and females tended to choose males as objects for description. Male writers were more likely than female writers to describe middle-aged and older subjects, but both males and females avoided describing older women. Male writers wrote significantly more concrete descriptions than females. Both males and females were more concrete when describing persons of the opposite sex. Both sexes also used a broader range of descriptors and used them more frequently when describing males than females. Females tended to reserve some descriptors exclusively for males, the most frequent ones emphasizing activity. Females used descriptors pertaining to interpersonal relationships more frequently than males. (RL)

**Coordination Problems in Graduate Programs for Two-Year College English Teachers.**

Pub Date—Mar 80

Note—11p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Speeches/Meeting Papers (150)—Information Analyses (070)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Administrative Problems, Coordination, Educational Needs, \*English Teacher Education, Graduate Study, Teacher Education, \*Two Year Colleges

Six problems in coordinating a graduate program for two-year college English teachers are discussed in this paper. The problems are: how to implement national guidelines for such programs, how to staff the programs, how to accommodate traditional university personnel guidelines and regulations to the nontraditional staff for the programs, how to attract preservice and inservice teachers into the programs, how to help graduates obtain suitable placement, and how to arrange for the certification of suitable programs. The paper concludes that those involved in graduate programs for two-year college English teachers need a national effort to deal with these and other issues. (FL)

Descriptors—Adults, Cognitive Development, \*Cognitive Processes, Dyslexia, Elementary Secondary Education, Language Research, Learning Disabilities, Linguistics, Orthographic Symbols, \*Spelling, Spelling Instruction, Teaching Methods, \*Written Language

The purpose of this book is to encourage a more serious study of spelling by discussing it as both a skill and a problem and by highlighting some previously ill-understood processes involved in learning to spell. The 22 chapters are arranged under the following eight categories: spelling instruction and spelling reform, spelling and language, spelling and word recognition, spelling strategies, spelling errors, spelling and development, spelling and language disorders, and spelling and dyslexia. Specific topics discussed in the chapters include: linguistic information in spelling, orthographic awareness, American black English and spelling, visual factors in spelling, spelling errors in handwriting, the development of orthographic images, spontaneous spelling by language disordered children, lexical and nonlexical processing of spelling in dyslexia, and unexpected spelling problems. Pub Type—Books (010)—Reference Materials—Bibliographies (131)

**EDRS Price—MF01/PC12 Plus Postage.**

Descriptors—Annotated Bibliographies, \*Audiovisual Aids, \*Drama, \*English Instruction, Higher Education, \*Instructional Materials, Literary Criticism, Literature, Secondary Education Identifiers—\*Shakespeare (William)

The purpose of this annotated bibliography is to identify resources for the variety of approaches that teachers of courses in Shakespeare might use. Entries in the first part of the book deal with teaching Shakespeare in secondary schools and in college, teaching Shakespeare as performance, and teaching Shakespeare with other authors. Entries in the second part deal with criticism of Shakespearean films. Discussions of the filming of Shakespeare and of

teaching Shakespeare on film are followed by discussions of 26 feature films and then by entries dealing with Shakespearean performances on television. The third part of the book constitutes a guide to available media resources for the classroom. Entries are arranged in three categories: Shakespeare's life and times, Shakespeare's theater, and Shakespeare's plays. Each category lists filmstrips, films, audio-cassette tapes, and transparencies. The general format of these entries gives the title, number of parts, grade level, number of frames or running time, whether color or black and white, producer, year of production, distributor, titles of parts, a brief description of content, and reviews. A directory of producers, distributors, and rental sources is also provided in the book. (FL)

Importance of...and Methods for...Writing Board Minutes.  
Oklahoma State School Boards Assoc., Oklahoma City.

Pub Date—Mar 80

Note—38p.; Paper presented at the Annual Oklahoma State School Boards Association Workshop for Presidents and Clerks (2nd, Oklahoma City, OK, March 15-16, 1980). Best copy available.

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Boards of Education, Clerical Occupations, \*Documentation, Guidelines, Information Storage, \*Recordkeeping, \*Records (Forms), \*Reports, \*Technical Writing, Writing Skills

The Oklahoma State Board of Education prepared this handbook to serve as a guide for local board presidents, clerks, and secretaries in recording the minutes of school board meetings. The information that is compiled and presented was gleaned from reference books listed in the bibliography. Chapters of the guide describe board of education meetings, the duties of clerks and secretaries (before, during, and after meetings), writing the minutes, typing the minutes, and the disposition of permanent minutes. A glossary of terms and samples of materials prepared by clerks and secretaries are attached. (RL)

Descriptors—Advance Organizers, \*Content Area Reading, \*Discourse Analysis, Expository Writing, Reading Assignments, Reading Instruction, Secondary Education, \*Study Guides, Study Skills

This paper describes the composition of one particular kind of study guide called a pattern guide that can be used by content area teachers to aid their students in reading and understanding their textbooks. The purpose of the guide is stated as highlighting the reading and thinking skills to be used as well as the most important concepts to be learned. Six steps are described for the preparation of a pattern guide: (1) identify the important concepts in a chapter; (2) read carefully and note the portions of material that correspond to the previously determined concepts; (3) identify the organizational pattern used by the author, e.g. compare/contrast, time order, cause/effect, or simple listing; (4) note signal words in the four relationship categories that help to identify the patterns; (5) integrate the essential concepts, the author's writing pattern, and the reading/thinking process the student will use—for example, the causes of the Civil War might be the essential idea to be learned, cause/effect may be the writer's organizational pattern, and determining causal relationships would be the student's reading thinking process; and (6) decide how much help over the entire chapter is needed by the students. Suggestions for several pattern guide formats are presented and analyzed. (MKM)

"The Tutoring Experience"—The Use of a Handbook With Writing Lab Tutors.

Pub Date—Mar 80

Note—8p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Guides, Higher Education, \*Laboratory Manuals, Tutoring, \*Tutors, Writing (Composition), \*Writing Instruction

Identifiers—\*Writing Laboratories

A writing lab director's rationale for the development and use of a tutors' handbook emphasizes its function as a time-saver for all those involved in the lab and as a morale builder for the tutors. The handbook relates information about the paperwork involved in the lab and about the definition, purpose, and advantages of tutoring. Other benefits derived from use of the handbook include specifying goals for tutors and giving them a sense of security. The handbook is introduced at an initial orientation period, freeing later orientation time for reviewing resource materials and discussing negative student attitudes. The long-range effectiveness of the handbook cannot yet be gauged, but it appears to be more effective than a series of individual handout sheets and has been enthusiastically received by the tutoring staff. Landwehr, John  
Generative Rhetoric-Sentence Combining: A New Approach to Expository Writing.

Pub Date—Mar 80

Note—17p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Course Descriptions, \*Generative Grammar, Higher Education, Sentence Combining, Teaching Methods, \*Writing (Composition), \*Writing Instruction

The freshman composition course at Mayville State College (North Dakota) progresses from basic grammar to sentence combining to the development of expository writing skills based on the principles of generative rhetoric. The course begins with a brief review of grammar, emphasizing the phrase, clause, and sentence, and then moves on to the process of sentence combining. The next phase of the course introduces generative rhetoric, including the cumulative sentence, the general idea stated in the base clause, and the more specific details developed in the phrases and clauses of the lower levels, either coordinately or subordinately. Once students have grasped this idea, they begin to work with constructions that authors commonly use, including the noun phrase, the absolute, and the verbal phrase. Constant writing assignments serve to strengthen the skills they have learned. Once they have mastered sentence construction, they then apply the same principles of construction to the development of paragraphs. They learn to take a single word or idea, add several coordinate or subordinate ideas to produce a good sentence, and then to expand this sentence into a paragraph. After learning to write a good paragraph, they are taught how to apply the skills to answering essay test questions from other disciplines. The course concludes with an introduction to reading fiction and poetry, with an emphasis on authors' use of variety in sentence structure. (FL)

Prince, Gilbert  
The Bible as Literature: Coping with Sectarian Interpretations.

Pub Date—Feb 80

Note—10p.; Paper presented at the Annual Meeting of the California Association of Teachers of English (22nd, Los Angeles, CA, February 15-17, 1980).

Pub Type—Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Biblical Literature, Figurative Language, Higher Education, \*Literary Criticism, \*Literature Appreciation, \*Student Attitudes, Teaching Methods

Sectarian interpretation of presumption is a major problem facing the teacher of the Bible as literature. Students should be made aware of the pitfalls of interpreting the text from a theological point of view, including "over interpretation" or adding details to scripture, a reliance on poetic license, and an unfamiliarity with basic Biblical terminology. Four levels of reading—literal, figurative, allegorical, and typological—can be exemplified by several scripture passages, and the notion of the Bible as propaganda can be discussed. (AEA)

Descriptors—\*Banking, \*Business Communication, Educational Needs, Educational Research, \*Professional Development, Professional Personnel, \*Professional Training, \*Writing (Composition), \*Writing Skills

Identifiers—Writing Research

The 80 loan officers in a commercial banking division provided data about their writing on the job. The data were collected during interviews and with a questionnaire. The executives reported no specific training for the writing they did. The bank did not offer any guidelines or training courses for performing job-related writing tasks, assuming that people qualified for executive positions had good writing skills. Writing was considered an extremely important aspect of the subjects' jobs, comprising an estimated 20% of the work scheduled and it was used as a factor for promotions. All the executives agreed that writing contributed to the bank's image with its customers and to the writer's image with colleagues and superiors. The two main goals of business writing were considered to be efficiency and effectiveness. As a result of these findings, six recommendations were made to college business writing instructors. These recommendations included emphasizing the importance of the writer's sense of audience, developing analytical thinking skills, making students aware of available composing strategies for particular writing tasks, teaching students how to write summaries, organizing written materials to suit audience needs, and demanding accuracy and clarity in student writing. (RL)

Meyers, George Douglas  
Speaking as a Pre-Writing Activity: Its Application to Teaching Community College Freshman Composition Pupils.

Pub Date—Mar 80

Note—18p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Bibliographies, Educational Research, Literature Reviews, \*Speech Communication, Two Year Colleges, \*Writing (Composition), \*Writing Instruction

Identifiers—\*Dyadic Communication, \*Prewriting

A study conducted to determine if speaking activities facilitated growth in writing involved approximately 60 community college students enrolled in freshman composition. A review of the literature supported the notions that a definite relationship exists between talking and writing, that prewriting activities affect the quality of composition, and that dyadic communication offers the optimum opportunity for using oral language skills to strengthen writing. The study design included pretested experimental and control groups, with the experimental group experiencing 35-40 minutes of paired conversation prior to out-of-class writing. The students produced four sets of essays written in the traditional rhetorical modes sequence of description, narration, exposition, and argument that were rated for general merit and mechanics. Results of the study indicated that using speaking as a prewriting activity produced positive effects for assignments composed in each of the discourse modes: for description, in mechanics; for narration and exposition.

tion, in general merit and total evaluation; and for argumentation, in all three—mechanics, general merit, and total evaluation. (An extensive bibliography is appended.) (AEA)

Identifiers—\*Cohesion (Written Composition), \*Writing Research

M. A. K. Halliday and R. Hasan have provided a system for analyzing the cohesive relations that enable a sequence of T-units to be considered a complete text. (A T-unit consists of a main clause and all its dependent clauses.) These concepts of cohesion proved effective in analyzing the differences between five "high" and five "low" quality essays written by college freshmen. At the most general level of analysis, the two essay sets differed according to the mean number of words separating cohesive ties, with more cohesive ties appearing in T-units from the good essays. The Halliday-Hasan classifications for span of text also helped distinguish between good and poor writers, with the good writers using substantially more immediate ties and fewer mediated-remote ties than the poor writers. Mediated ties appeared about eight times more frequently in the better essays, a finding that further supported the notion of extending the lexical-semantic domain of a given T-unit beyond its normal bounds. It was proposed that poor writers' dependence on mediated-remote ties partially explained their frequent failure to elaborate and extend lexical-semantic domains, a shortcoming that prevented them from providing as much really new information as the good writers did. (Examples of each of the types of cohesive ties in the Halliday-Hasan system are attached.) (RL)

Critical Listening Activities: A First Step in Language Arts.

Pub Date—[79]

Note—9p.

Pub Type—Guides - Classroom - Teacher (052)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Elementary Education, Language Arts, \*Learning Activities, \*Listening Comprehension, Listening Habits, \*Listening Skills, \*Oral Language, Teaching Methods

Four activities are suggested to develop student appreciation for the relationships between listening and the other language arts. The activities are designed to improve on present classroom instruction, which usually provides little time for formal oral language instruction. Each activity begins with some aspect of oral language training and proceeds to reading and writing instruction. The titles of the activities reflect their specific emphasis within oral language development: "Describe Me Well" (giving oral directions), "What Did Ya Hear?" (developing critical listening skills), "Sum of This and Sum of That" (summarization), and "Imagine Me Today" (expressive language in creative dramatics and the development of images). What should be evident in using these activities is the need for more direct instruction in oral language skills and the importance of these skills within the scope of language arts instruction. Hearing without listening must be replaced by listening which is active, questioning, critical, and evaluative. (RL)

Identifiers—\*New Zealand, \*Oregon Curriculum Study Center

A project to investigate the effects on the language development of secondary school pupils of a study of transformational grammar as represented in the Oregon English Curriculum involved 250 students in a large, coeducational high school near Auckland, New Zealand. The students were divided into three matched groups who studied different English programs over a period of three years. The three programs were the whole Oregon Curriculum (identified as TG) of transformational grammar, rhetoric, and literature; the Oregon Curriculum without the grammar thread (RW) but with extra reading and creative writing; and a textbook based program that focused on traditional grammar and incorporated supplementary literature from other school resources (LLE). The aspects of language on which the growth of students was compared included essay writing, sentence structure, usage, spelling, reading comprehension, vocabulary, literature, and attitudes. The results presented in both narrative and tabular form show that the effects of grammar study are negligible in terms of improving writing skills, and that the attitude of the RW group toward English as a subject of study was more positive than that of the other two groups. Language As Social Event.

Pub Date—Apr 80

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980). Best copy available.

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Cognitive Processes, \*Decoding (Reading), Elementary Education, \*Language Acquisition, \*Language Processing, \*Linguistic Competence, Reading Comprehension, \*Reading Research, Young Children

A taxonomy developed for the study of the growth and development of written language from the perspective of social event was tested with a group of 68 children, aged three to six years. The subjects were presented with a wide variety of environmental print messages (road signs, toys, fast food signs, and household products) and were questioned regarding what the print said, what helped them determine the message, and anything else they might know about the object. Responses were analyzed from the semantic, syntactical, graphic, and semiotic perspectives, as well as in terms of response time and evolution. Results indicated the following: children pragmatically demonstrated highly developed levels of linguistic awareness; children expected print to be meaningful; and children's access to the pragmatic and semantic systems of language led to conventional control of the syntactic and symbolic systems of language. The latter finding is the reverse of the current instructional model. (DF)

Who Is Qualified to Teach Business Writing and Technical Writing?

Pub Date—Mar 80

Note—16p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (31st, Washington, DC, March 13-15, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Business, Business Skills, Educational Research, Higher Education, \*Occupational Surveys, Teacher Attitudes, \*Teacher Characteristics, Teacher Qualifications, Teaching Skills, \*Technical Writing, \*Writing Instruction To determine the teaching philosophy, the aca-

demic and professional background, and the teaching methods most valued by experienced teachers of business writing and technical writing, a study was conducted that involved a search of relevant professional literature and an analysis of questionnaire responses from 24 experienced professionals. Those responding to the questionnaire included five directors of college programs, seven college teachers, and 12 writing teachers employed full time in business or industry. The results showed that, while acknowledging the benefit of a broad, liberal education, most professionals placed a higher value on pragmatic thinking, objectivity, logical thinking, and on writing free of ambiguity. They also valued a strong background in science, technology, and an understanding of the organizational methods and problems of business and industry. In addition, they valued knowledge and skill in language and composition, especially coursework in business writing and technical writing, and they valued teaching methods that worked quickly and efficiently. A supervised internship in business or industry—especially one that emphasized writing and teaching writing—was considered the most valuable kind of professional training. (Author/FL)

Descriptors—Higher Education, \*Language Skills, Listening Skills, \*Professional Education, Program Descriptions, Reading Skills, Speech Skills, \*Student Motivation, Student Needs, Teaching Methods, Technical Writing, \*Writing (Composition), \*Writing Instruction

College students who have clear goals for careers in engineering, management, law, medicine, and teaching have a pressing need to become proficient in writing, speaking, listening, and reading. While they should continue the reading and analysis of imaginative literature that they began in high school, they should also develop their latent powers in the other dimensions, especially listening and speaking, and should learn the basic techniques and subtleties of professional writing and reading as well. Exercises that combine as many of the four skills as possible have proven to be both well-liked by students and very efficient in increasing overall mastery of language skills. Two typical assignments—interviewing and abstracting—illustrate how the student is required to produce coherent, useful communication using several skills in conjunction. Success of the pedagogy is shown by growth in syntactic maturity, organization, emphasis, documentation, and student confidence. (Author/FL)

Descriptors—\*Bilingualism, Bilingual Students, Developmental Stages, Elementary Education, Grade 3, Language Acquisition, \*Language Research, Linguistic Competence, \*Monolingualism, Native Speakers, \*Reading Achievement, \*Syntax

The interview techniques developed by Carol Chomsky were used in a comparative study of the language acquisition of 32 bilingual and monolingual third grade students. After these students were matched for age, socioeconomic status, IQ, family environment (both parents in the home), and reading ability, they were placed in four group—bilingual-high reading-ability (BH), bilingual-low (BL), monolingual-high (MH), and monolingual-low (ML). Over a period of two weeks, the four boys and four girls in each group were interviewed in four situations designed to have students determine implicit subjects (ask/tell), verbs (promise/tell), underlying relationships not expressed in surface structure, and pronominalizations. The major group differences that were found for these patterns of language development were between high/low reading achievement groups, not between bilingual and monolingual children. Chomsky's major findings were confirmed, showing the late acquisition of some syntactic structures and the wide range of differences in rate of acquisition among children. But acquisition of the selected grammatical structures was found to be a function of individual development rather than age. Some of the data also raised questions regarding the order of acquisition within

the supposed hierarchy of language constructions. Another significant finding that differed with Chomsky's findings was that ask/tell and promise structures were not known by all children over nine years old. (RL)

Descriptors—Educational Research, Elementary Secondary Education, Program Content, \*Program Development, \*Program Effectiveness, \*Program Evaluation, \*Spelling, \*Spelling Instruction

The Cedar Rapids Community School District used the CIPP (context, input, process, and product) evaluation model to improve its spelling program. During the CIPP model's final stage of product evaluation, the district used test data to decide whether the revised spelling program maintained spelling ability and provided for additional growth. The Iowa Tests of Basic Skills (ITBS) spelling subtest results from fall 1975 (before program implementation) were compared to fall 1977 results (after implementation). The spring 1977 and spring 1979 results of district developed spelling tests were also compared. These district tests were in two formats—editing/multiple choice and list/dictation. The ITBS results indicated increases in spelling scores for all grades. Comparison of the 1977 and 1979 district spelling tests in the editing formats showed maintenance for grades two through four and growth in grades five through ten. The tests in the list/dictation format showed maintenance for grades two through eight and growth in grades nine and ten. (A copy of the teacher-administrator management guide to the district's spelling program is appended.) (RL)

Descriptors—\*Business Education, \*Business English, Career Education, \*College English, Curriculum Development, \*English Curriculum, Higher Education, \*Interdisciplinary Approach, Thematic Approach

A current trend indicates that credentials in English can and do move people successfully into business related careers. Colleges of business administration and English departments might take an important cue from the trend and work together to offer a double major or co-major in English business. Such a program would offer undergraduate students a chance to develop marketable skills in reading and writing as well as a sound knowledge of business, would help English departments serve their campuses and communities better while boosting their enrollments, and would provide the business community with high quality employees who are capable of assuming a broad range of responsibilities without extensive and expensive staff development. Coursework could include business report and public relations writing and literature dealing with the effects of industrialization on individuals, working class life styles, blacks and women in business, and the effect of money on people and their behavior. Techniques of literary analysis could be taught using books that analyze and predict business and economic trends or that rate the literary merit of advertising "poetry" and popular culture. Arguments against such business/English programs pale in the light of the growing trend toward career switching and the potential for students to develop an awareness of language in combination with a classic business preparation. A study was conducted to determine how effectively children write when motivated by viewing a work of art and what kind of art they would choose most frequently for motivation. A group of 55 students from second, fourth, and eighth grade classrooms were selected to respond to reproductions of familiar paintings with either fictional or factual writing. After an introductory session during which the students discussed and wrote about a teacher-selected painting, students were free to select pictures of their choice from a group of 15 reproductions. The most frequently chosen piece was a realistic painting called "The Country School" by Winslow Homer. Since students were not questioned as to their reasons for choosing their pictures, the results of the study were inconclusive. (Extensive samples of student writing are included.) (AEA)

Descriptors—Cognitive Processes, \*Connected Discourse, Recall (Psychology), Research, Sentences, \*Writing (Composition), \*Writing Skills Identifiers—\*Cohesion (Written Composition), \*Text Coherence, Writing Research

In a study conducted to show the importance of sentence connections as a way of looking at a writer's cognitive processes, three devices used to achieve coherence in written discourse were compared and proved to be unequally effective. The devices were cohesion (use of a textual reference in a sentence that has an antecedent in a preceding sentence), major argument overlap (use of a reference that is a relational concept to a proposition in a preceding sentence), and the given/new obligation that requires that each sentence convey two kinds of information—given information and new information. Given information is information writers believe readers already know either from prior knowledge or from preceding sentences. New information is information writers believe readers do not yet know or are not thinking about until writers call attention to it. This given/new obligation demands that the writer arrange material so that readers' expectations are fulfilled. Since subjects in the study did not remember sentences that had only major argument overlap and textual cohesion, it was concluded that in the absence of shared prior knowledge, the fulfillment of the given/new obligation is necessary for coherence. Descriptors—College English, College Freshmen, Educational Research, Higher Education, \*Individual Instruction, Learning Processes, Teaching Methods, \*Writing (Composition), \*Writing Instruction

Identifiers—\*Writing Apprehension  
A "naturalistic" study of eight college students

enrolled in a freshman writing class was conducted to determine what variables are critical to the learning process. After observing and tape recording four individual conferences with each of the students, the recorded transcripts were analyzed to determine the one or two main concerns that students expressed about their writing. The nature of the concerns, as well as the needs of the students, changed from the first to the last conferences. Teachers need to be aware of how much influence they have on students' verbalizing their concerns about their writing and how much these concerns govern what the students do when they compose and the decisions they make while writing, both about how to proceed and how to revise. Descriptors—Audiovisual Aids, Communication (Thought Transfer), Course Descriptions, Curriculum Development, Higher Education, Persuasive Discourse, Teaching Methods, \*Technical Writing, \*Writing (Composition), \*Writing Instruction

Noting that technical writing is becoming an increasingly important element in the college curriculum, this journal issue presents eight articles that provide information for use by technical writing instructors. The first article surveys resources and strategies currently available, while the second article reflects upon some of the adjustments and transitions the new teacher of technical writing must face. The third article focuses on the persuasive purpose of technical communication. The fourth considers the dimensions of time and space in technical writing and indicates that technical writing can provide the communication arts with a virtually complete set of formulas for achieving form in functional discourse. The fifth and sixth articles focus on visual perception and emphasize the importance of visual aids, while the seventh article discusses curriculum development and provides suggestions for structuring a technical communication program. The final article treats the subject of the consultant's teaching of technical writing and analyzes what is right and wrong with teaching in the industrial setting. (FL)

Descriptors—Educational Needs, Elementary Secondary Education, \*Motivation Techniques, Student Motivation, Teacher Role, Teaching Methods, \*Writing (Composition), \*Writing Instruction, \*Writing Skills

Identifiers—\*Writing Processes

The four articles in this monograph are concerned with why it is important to teach composition and with identifying the characteristics of "good" writing. The first article presents an argument for a curriculum that stresses many kinds and purposes of writing so as to produce writers who respond with freedom and diversity to a variety of writing situations. The second article offers a definition of "good" writing: writing that affects its audience. The third article concentrates on transactional writing—the writing that instructs or informs—and the final article stresses the importance of the writing process in students' sense of self and sense of power. Descriptors—Competence, Elementary Secondary Education, \*Minimum Competency Testing, Program Content, Program Descriptions, \*Program Implementation, Remedial Instruction, Teaching Methods, Tutoring, \*Writing (Composition), \*Writing Instruction, \*Writing Skills

The five articles in this journal issue are intended for use by school administrators, and provide information on how to organize effective programs for achieving student writing competency. The first article discusses the development of New York State's Preliminary and Regents Competency Tests in Writing, analyzes sample student responses to one test, suggests ways of improving student writing, and lists topics related to achieving writing skills that need to be addressed. The second article describes the development of one school writing program, identifies myths about the teaching of writing, describes in concrete terms the roles of teachers and students in a writing program, and offers advice for establishing a similar program. The third article discusses how to prepare remedial students for essential writing competencies. The fourth article presents reasons for setting up a tutorial writing center, discusses the advantages of tutoring over regular classroom instruction, and describes how to train tutors. The final article analyzes the results of the Regents Competency Tests for students in one community, and concludes that teaching the mechanics of writing does not insure that students will be able to transfer the knowledge to the writing of entire compositions. Identifiers—\*Justificatory Rhetoric

CS 205 541

To widen the concept of justificatory rhetoric (which has previously been considered as a presidential rhetorical form delivered in a context of foreign policy emergency) and to show some of its inherent hazards, this paper analyzes a 1978 address by Governor James Hunt of North Carolina, in which he justified his decision not to pardon the demonstrators known as the Wilmington Ten but instead to reduce some of their prison sentences. The paper begins by explaining the Wilmington Ten case and the circumstances that led to Hunt's decision to take executive action in it. It then outlines characteristics of justificatory rhetoric—it justifies an action already taken or in progress, it takes place in a context demanding immediate action, the crisis situation is removed in space from those asked to accept the justification, the action is based on little information and contemplation, and its themes are based on the themes of free world leadership and antagonism to Communism—and shows how Hunt's address represents a domestic version of the presidential justificatory form. Finally, the paper considers Hunt's purpose as expressed in the address, shows that his strategic approach was to defend the mechanism of government and the judiciary from outside attack, and assesses Hunt's strategy as one that steered toward the solution of the legitimization crisis in a self-serving way. Descriptors—\*Communication (Thought Transfer), \*Communication Problems, Elementary Secondary Education, Interaction, \*Interpersonal Competence, Interpersonal Relationship, \*Interprofessional Relationship, \*Speech Communication, \*Student Teacher Relationship, Teacher Administrator Relationship

Using typical statements made by teachers and school administrators as examples, this self-help primer offers tips for developing conversational patterns that promote interpersonal understanding. The tips are designed to help readers learn about 40 effective conversational habits, including being specific, talking sparingly, admitting mistakes, listening actively, accepting compliments appropriately, using humor productively, being venturesome, accepting others' uniqueness, taking the initiative, and avoiding such blocks to communication as minimizing other people, threatening, scapegoating, belittling, committing verbal abuse, using sarcasm, and giving advice. For each conversational habit dealt with, the primer offers a brief discussion of it and presents sample statements representing preferred and nonpreferred ways of talking to another person. (GT)

Descriptors—Change Agents, \*Communication (Thought Transfer), \*Communication Problems, \*Communications, \*Communication Skills, Information Theory, \*Interaction, \*Mass Media, Social Change, Social Values, Telecommunications

This essay argues that communication is at the intersection of four social changes that may in their effects add up to a third sociotechnological revolution. The four changes posited are: a historic shift in the character of infrastructures; a new emphasis on visual modes in the coding of images and ideas; a

change in the nature of technology, from "thing" to "concept"; and a new socio-organizational framework (called either communications or telematique) to unify the diverse changes from teletext to teleprocessing. The essay suggests that for society, the major problem is the change of the scale in which social interactions take place. It notes that the widening of the arena brings people and exchanges (economic and political) into closer and more rapid contact, increasing the volatility of our problems. It also suggests that the idea that scales can be reduced is seductive, but has snares. In dealing with these issues, the essay begins with a discussion of scale in the rustic setting. It then moves on to how Lord Birkenhead sought 50 years ago to forecast the future but failed to anticipate communications. It then discusses the character of the new "revolutions" in communication and concludes with a discussion of the matching of scales as the major sociological issue for the democratic policy. Crepes, Earl

**The Theory and Practice of Genre Criticism: Genre Criticism: The Analysis of Form, Part I; Genre Criticism: Judgment Argument and Evidence, Part II; [and] Genre Criticism: A Topical Bibliography, Part III.**

Pub Date—18 Mar 80

Note—76p.; Study prepared at Northwestern University.

Pub Type—Information Analyses (070) — Reference Materials - Bibliographies (131)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—Classification, Higher Education, \*Persuasive Discourse, \*Public Speaking, \*Rhetoric, \*Rhetorical Criticism, \*Speech Communication

A three-part study of the forms of rhetorical criticism is offered. Part one reviews the nature of genre criticism, enumerates several concepts of form and the types of genre criticism they produce, and discusses the implications of this relationship between form and genre. Part two is an essay on the methodological implications of form-grounded genre studies, addressing the nature of judgment for the genre critic, the role of argument in generic studies, and the criteria by which critics evaluate the evidence concerning specific forms of persuasive discourse. Part three is a topical bibliography, presenting resources concerned with genre in the arts: the philosophy of form; rhetoric and genre; and 12 categories of genre studies (American, apology, concession/withdrawal, crisis/confrontation, eulogy, the inaugural address, politics, religion, science, war, women's liberation, and miscellaneous topics). Descriptors—Adolescents, Association (Psychology), Children, \*Cultural Influences, Foreign Countries, \*Habit Formation, Perception, \*Programming (Broadcast), Realism, \*Selection, Social Influences, Television, \*Television Research, \*Television Viewing, Violence

Identifiers—Australia

Two underlying assumptions of the Cultural Indicators approach to television research were examined, using data on the television viewing habits of 76 second grade, 150 fifth grade, 509 eighth grade, and 350 eleventh grade students in Perth, Australia. The assumptions were that commercial television presented an organically composed total world of interrelated stories produced to the same set of market specifications, and that television audiences viewed largely nonselectively and by the clock rather than by the program. The evidence on selection and habit in television viewing countered a "purely ritual" overstatement of the Cultural Indicators assumption. Two of the three content types most related to social reality (crime adventure and cartoons) were quite predictable from viewing habits. But habitual television watching itself did not account for all content-specific relationships, because viewing comedy and news programs related to other viewing habits without being related to be-

liefs about social reality. This evidence pointed to content differences (selection) as a key factor in television viewing even though habit could be considered an important antecedent to much of the viewing that produced the cultivation of a biased conception of the real world. Greater than average viewing times for cartoons and game shows were associated with perceiving the world as relatively mean and violent, while the reverse was true for drama and news viewing. (RL)

Descriptors—Computer Managed Instruction, \*Educational Change, Educational Television, \*Futures (of Society), \*Speech Communication, Teacher Education, Teacher Improvement, Teacher Role, \*Television Teachers

Predominant in a list of the problems and predictions for education in general and speech communication education in particular for the next 50 years are both the changing form and function of the educator. A scenario of education in 2030 includes a nationwide teacher agreement that results in the release of students from mandatory attendance at schools except for extended study sessions, teacher supervision of study sessions based on computerized placement, professional teachers' organizations evaluating and recommending commercial education packages, a three-day work week for teachers, the role of "TV teacher" as a permanent part of national educational systems, and the establishment of commercial education firms that produce packaged television programs. In addition, communication teacher education curricula include units on thought transference, a major factor in the expansion of teachers' cognitive capabilities. (AEA)

Descriptors—Bachelors Degrees, \*Career Development, College Credits, \*Correspondence Study, Education Work Relationship, \*External Degree Programs, Higher Education, \*Independent Study, Individualized Instruction, Mastery Learning, Nontraditional Education, Program Descriptions

An individualized, undergraduate degree program at Central Michigan University offers a variety of instruction options to students whose career and personal circumstances limit their access to more traditional forms of higher education. The program, sponsored by the university's Institute for Personal and Career Development, is designed to accept transfer credit for previous relevant academic experiences, award credit for relevant career/life experiences, allow students to earn credit away from campus and by examination, offer a number of unique learning devices and delivery systems, and provide academic advisers who can assist students in constructing academic programs that fit. Individualized credit earning options include such activities as planning and implementing an academic program, preparing an experiential learning portfolio that contains descriptions and documentation of learning achieved through work or life experiences, mastering learning package courses, designing student initiated planned experiences, participating in arranging independent studies, and taking correspondence courses. The program is characterized by students working closely with academic resource persons, receiving relatively quick feedback and reinforcement, and being graded on the basis of having mastered learning objectives. Descriptors—\*Behavior Patterns, Group Dynamics, Interpersonal Relationship, \*News Media, News Reporting, Politics, \*Presidents, \*Press Opinion, \*Public Relations

Although different philosophies may motivate presidential-press relations, causing frequent friction or adversity, there is nevertheless a strong degree of cooperation and collaboration between the press and a president of the United States. This interdependence has been particularly evident in recent administrations, and it progresses chronologically through a three-stage cycle. In the "honeymoon" stage, a pleasant period beginning after a president's election and inauguration, the president's and the media's definitions of what is newsworthy happen to coincide. The honeymoon stage usually consists of human interest items and stories about the administration's goals and plans during official tenure. The second, or competitive, stage begins when the president's and the media's definitions of news begin to drift apart. This stage is characterized by news manipulation, with the administration attempting to ensure that its "news" is the only news the press receives. When a president makes a conscious decision to place reelection—therefore the preservation or rejuvenation of popularity—above the development of new programs, the third phase, detachment, has been initiated. A review of the Carter administration's relations with the press shows that it has progressed predictably through these stages. (RL)

Originally presented at the November 1979 Association for Communication Administration (ACA) seminar, the articles in this journal issue discuss the assessment and accreditation of graduate programs in communication. The 14 articles examine the following topics: a proposed instrument for program quality assessment; the status of program evaluation and standards; program review in a new era; speech as a liberal study; the rhetoric of quality assessment; the dangers of imposing common minimum standards on all communication programs; the importance of disciplinary credibility and departmental power; a department head's experience in having his department evaluated; the evaluation of speech communication graduate programs; the procedures of one department evaluator; preparation measures necessary for a department scheduling an outside evaluation; methods a department can use to protect itself from discontinuance; the way decisions are made on who will be terminated; and how departments can survive a mandated cut-back. Among other features, the journal includes reports on one of the seminar sessions and on the seminar as a whole, reviews of relevant books, and news briefs about items relating to communication administration. Descriptors—Accountability, \*Communication Skills, Elementary Secondary Education, \*Inservice Teacher Education, Management Development, Minimum Competencies, Program Development, \*Program Implementation, \*Speech Communication, Teacher Education, \*Teacher Role, \*Teacher Workshops

In view of recent public demands for the establishment of minimum competency standards in a number of areas, including oral communication skills, and in view of classroom teachers' frequently inadequate training in speech communication, speech communication teachers have the responsibility of organizing and implementing oral communication competency inservice workshops for teachers and administrators in their districts. Speech communication teachers have the training both to assist educational administrators in functioning as group leaders and to assist teachers in developing more effective interactional skills. In organizing oral communication competency workshops, speech communication teachers should first identify potential areas of inservice training, after which they should explore and use whatever avenues seem most effective in setting up opportunities for workshops. In implementing workshops, teachers should keep in mind six general guidelines: begin with a specified and clearly stated objective, establish a time line, use a warm-up activity, provide for continuing resources, plan resources carefully, and provide for evaluation. (GT)

Empirical Studies on Television Composition.

Pub Date—Jan 80

Note—30p.; Essay prepared at Temple University.  
Pub Type—Information Analyses (070) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Acoustics, \*Editing, \*Production Techniques, \*Research Needs, \*Research Problems, State of the Art Reviews, \*Television, Television Lighting, \*Television Research

A review of research on television's major compositional factors was undertaken to determine the status of such research and to note the major variables involved in the structure of television pictures. It was found that such research could be grouped in four categories—lighting and color, staging, editing, and sound—and that these areas covered only a small portion of the compositional variables involved in the structure of television images. It was suggested that one reason for the slow development of empirical research on television composition was the inability of early media theorists to distinguish television from film in terms of scope and nature. Other possible explanations for the dearth of research on television composition are the complexity inherent in the control and measurement of television's compositional factors and the lack of understanding of biometric research procedures, particularly in the areas of perception, neurology, and physiology. Descriptors—Broadcast Industry, \*Computer Assisted Instruction, \*Computer Oriented Programs, Curriculum Development, Higher Education, \*Journalism Education, \*Programmed Instruction, \*Speech Communication

Speech communication and journalism instructors should be aware of how computers are used in the mass media and what role computer systems can play in broadcast education. Many radio and television stations commonly use computers for accounting and business functions, and they are beginning to expand their computer operations to program logs and the composition and editing of news stories. The classroom applications of computers include using packaged programs, such as the Statistical Package for the Social Sciences (SPSS), for learning methods of statistical analysis on which more and more media operations depend. Computers can be used in other class activities to simulate the ways these tools are used in actual media operations. One of the more popular computer systems used by noncomputer science departments is PLATO, a very structured learning system of programmed instruction that works well for many types of self-paced materials. Other computer programs that can be helpful to the faculty member include programs for grading exams, programs that monitor student progress, and programs that keep student records. (RL)

Descriptors—Adults, Employee Attitudes, \*Organizational Communication, \*Organizational Development, \*Organizational Effectiveness, \*Program Effectiveness, \*Program Evaluation, Research Methodology, \*Staff Meetings, Work Attitudes, Work Environment

Identifiers—\*Communication Research

Field research was conducted to evaluate the workgroup meetings of an organization. The evaluation served to determine whether management's established objectives for the meetings were reached and to develop research strategies useful in examining individual communication activities. Two questionnaires (for supervisory/nonsupervisory personnel) and organizational records (the minutes of the meetings) were used to collect the data. Statistical tests were applied to determine whether the communication program was effective in achieving the six goals that were established. It was concluded that the workgroup meetings, as perceived by the participants, achieved the goals set down by management at the program's inception. Although all individual goals were perceived to be achieved at fairly high levels of effectiveness, the goals that at-

tained the highest levels were the informative, integrative, and adaptive goals. A slightly lower level of achievement was perceived for productivity goals. (Author/RL)

In an era in which the credibility of public schools is falling with the general public, community forensics performances by students have the potential for cultivating public awareness of the effectiveness of the schools. Forensics is intrinsically related to basic speaking and listening skills, and since there is great potential for demonstrating the tangible results of forensics instruction, forensics teachers need not feel threatened by demands for accountability or for minimum competency testing. Numerous forensics skills have been identified; one brief definition of forensics is that it is educational activity primarily concerned with using an argumentative perspective in examining problems and communicating with people. Forensics teachers should establish contacts with other faculty members and with school administrators and should offer the assistance of the speech squad in a variety of school programs and instructional areas. They should also establish contacts with members of community groups. Among the activities possible for forensics students are presentations in oral interpretation, extemporaneous speaking, and debate. (GT)

A study was undertaken to examine how the variables that comprise the construct social situation (interlocutor, setting, and topic) influenced which language variety—standard English (SE) or black English (BE)—was chosen as a means of communication within a black English-speaking community and how that language variety was used to elaborate topics of conversation. Twenty-eight students at the City University of New York were assigned to one of the eight social situations derived from J. Fishman's construct of social situation, which provided the social context in which linguistic variation was examined. Language use within the context of conversation was examined with respect to J. Dore's analysis of how topics are changed, extended, or resumed. The findings suggested the following: that language is used across a series of hierarchically arranged concentric contexts—those emphasizing a community's use of language and those emphasizing the individual's use of language; that the variables of each context can produce differing effects on language use depending on what level of the hierarchy language use is being studied and how these variables interact with one another; and that variables that are associated with one context more than with another can in no way be excluded from influencing language in those contexts where they are not a dominating influence. Lange, James C. Wiseman, Richard  
Concomitants of Political Knowledge: Demographic versus Psychological Predictors.

Pub Date—Apr 80

Note—34p.; Paper presented at the Annual Meeting of the Eastern Communication Association (Ocean City, MD, April 24-26, 1980).

Pub Type—Reports - Research (143) - Information Analyses (070) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Communication (Thought Transfer), \*Cross Cultural Studies, \*Demography, \*Developing Nations, \*Information Dissemination, \*Predictor Variables, \*Psychological Patterns, Research, Research Methodology

Identifiers—\*Communication Research

Based on the assumption that the variables used in diffusion of information studies in developing nations are subject to Western bias, theoretically complex, difficult to compare across cultures, and difficult to operationalize, a study was undertaken to test the predictive ability of simpler demographic variables. The data were drawn from a nationwide sample of 4,863 Ghanians and were collected by information agency interviewers of that country using a quota scheme to approximate census figures. Analysis of results showed that, using a modification of the D. Lerner and E. Rogers and L. Sverning model, variables from the biosphere (age and sex), the culture (education and occupation), the environment (road class and town size), and the use of mass media explained as much or more of the variance in political knowledge of the respondents as did studies using psychological variables such as empathy, cosmopolitanism, socioeconomic status, or achievement motivation. The findings suggest the use of a causal process model and the simpler demographic variables for market analysis and testing campaign effectiveness when a full-scale sociometric analysis is not feasible, especially in developing nations where little is yet known about the dynamics of the interview situation or about cross-cultural comparability of data. Kaufman-Everett, Ileen N. Backlund, Philip M.  
A Descriptive Study on the Efficacy of Orientation Programs for Novice Instructors.

Pub Date—Apr 80

Note—12p.; Paper presented at the Annual Meeting of the Eastern Communication Association (Ocean City, MD, April 24-26, 1980).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Research, Higher Education, School Surveys, \*Speech Communication, Teacher Attitudes, \*Teacher Education, \*Teacher Education Curriculum, \*Teacher Orientation, \*Teaching Assistants

A survey of graduate teaching assistants and associate instructors at 102 graduate speech communication departments provided information on the amount, type, and assessment of orientation programs currently available to novice instructors. Of the 1,246 graduate students who were polled, 352 supplied data. Only 2.6% of these teaching assistants (TAs) did not have teaching responsibilities. Of the remaining 343 TAs, 20.4% were not required to take part in instructional training/orientation programs, while 60.6% were required to have such training before taking over a class. The study revealed that more than half of the orientation programs were of rather short duration (less than a full quarter or semester), and that the amount and type of such training correlated to the amount of responsibility apportioned to the TA. Discussions about problem situations, evaluation methods, and techniques of critiquing student presentations were included in the vast majority of the teacher training programs. On the other hand, discussions on lecture methods, lesson plans, learning models, and experiential methods were included in only one-third to two-fifths of all orientation courses. Although 41.1% considered their programs as adequate, slightly more than one-half the TAs did not feel sufficiently trained for their emerging roles as teachers. (RL)

Pearson, Judy C.  
The Relationship between Communication Apprehension and Assertiveness.

Pub Date—Apr 80

Note—22p.; Paper presented at the Annual Meeting of the Eastern Communication Association (Ocean City, MD, April 24-26, 1980).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Assertiveness, Behavior, \*Communication Skills, Comparative Analysis, Educational Research, Higher Education, Interpersonal Competence, \*Measurement Techniques, Self Expression, Speech Communication, \*Test Validity

Identifiers—\*Communication Apprehension, \*Communication Research

A study involving 215 college students was undertaken to determine the relationship between assertiveness and communication apprehension by factor analyzing the items on the Rathus Assertiveness Schedule (RAS) and on the Personal Report of Communication Apprehension (PRCA). Six factors emerged from the analysis: apprehensive about speaking, apprehensive about interpersonal communication, preventing others from taking advantage, being candid, being contentious, and making complaints in restaurants. Of the six factors, the first came exclusively from the PRCA, the second from both instruments, and the remaining four exclusively from the RAS. The linkage between assertiveness and apprehension about communication, as measured by these two instruments, appears to be apprehension about interpersonal communication. The findings generally confirm the previously established factor structure of the RAS; however, they challenge the unidimensionality of the PRCA. (FL)

An Imagery Exercise in Self-Awareness and Literary Sensitivity.

Pub Date—Apr 80

Note—15p.; Paper presented at the Annual Meeting of the Central States Speech Association (Chicago, IL, April 10-12, 1980).

Pub Type—Guides - Classroom - Teacher (052) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication Skills, Higher Education, \*Imagery, \*Literature Appreciation, \*Oral Interpretation, Oral Reading, \*Self Concept, Self Evaluation (Individuals), Sensitivity Training, Sensory Experience, \*Speech Communication, Speech Instruction, Teaching Methods

The ability to communicate the imagery of a literary selection is difficult for beginning students in undergraduate oral interpretation classes. Awareness of indirect sensory images must begin with direct awareness of self. The sensory self-description of how one looks, sounds, smells, tastes, feels, and moves is a means of stimulating self-awareness and literary sensitivity. Whether it is used alone or in conjunction with other teaching methods, the strength of this instructional strategy is its starting point—an imagery description of the self in words and actions that emanate from the self. Once students experience these self-induced verbal stimuli, they have more concrete ideas of how to communicate imagery in the performance of literature. (Procedures for using self-descriptions in the classroom and examples of student self-descriptions are included.) (RL)

Descriptors—\*Attitudes, College Students, \*Congruence (Psychology), \*Eye Fixations, Eye Movements, Feedback, Interaction Process Analysis, \*Interpersonal Attraction, \*Interpersonal Relationship, Males, Personal Space, Problem Solving, Reinforcement, Speech Communication, \*Speech Habits

Identifiers—Communication Research

In an experiment studying the relationship between reciprocity and compensation in dyadic communication, 96 male college students were videotaped during hypothetical problem solving situations. An attitude scale was used to manipulate subjects' impressions of mutual similarity. Time was used to test development in the dependent variables: confirmation, disconfirmation, and looking/mutual gaze behaviors. The results showed that verbal confirmation and disconfirmation were reciprocal; that verbal confirmation and gaze were slightly but positively and significantly related; and that reciprocity (on verbal confirmation) and compensation (on gaze) could be concurrent. The findings also revealed that dyads with similar attitudes did not confirm more than dyads with dissimilar attitudes; conversely, dyads with dissimilar attitudes did not disconfirm more than dyads with similar attitudes. Subject behavior in the dissimilar attitudes condition showed significantly more mutual gaze. In contrast with previous studies, gaze seemed to communicate challenge rather than liking. It was suggested that compensation be seen as agency and reciprocity as communion. (RL)

The Status of Mass Media Coverage of Campaign '80.

Pub Date—Apr 80

Note—11p.; Paper presented at the Annual Meeting of the Central States Speech Association (Chicago, IL, April 10-12, 1980).

Pub Type—Information Analyses (070) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication (Thought Transfer), Comparative Analysis, \*Elections, Information Sources, \*News Media, \*Political Influences, \*Politics, United States History

Identifiers—\*Media Effects, \*Presidential Campaigns

Some of the similarities and differences in the news media coverage of the United States presidential campaign of 1980 are discussed in this paper. Among the differences related are the loss of the symbolic power of the primary elections, which forced the media to look for significant trends elsewhere; the mixture of politics with the entertainment media, best epitomized by cartoonist Garry Trudeau's endorsement of candidate John Anderson in his cartoon strip; and the candidates' return to the use of the "talking head" format for television spot commercials in preference to the "minidocumentary" spots of earlier campaigns. Among the similarities noted are the post-primary television news features and computerized vote projections, the use of candidates' pictures on the covers of national news magazines, the extended Sunday television interview programs featuring candidates, and the television spot commercial featuring celebrities. The paper then offers an explanation of the media coverage of the 1980 campaign based on the theory of James Barber, which holds that in presidential campaigns, a 12-year cycle exists consisting of three stages—"conflict," "conscious," and "conciliation." (FL)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Communication Skills, \*Curriculum Development, \*Educational Needs, Educational Research, Higher Education, Law Schools, Law Students, Lawyers, \*Legal Education, Professional Education, School Surveys, \*Speech Communication, \*Verbal Ability

Although the study of communication has been consistently recognized as a vital segment of legal training, it has not been universally adopted as part of the law school curriculum. A survey of 150 law schools was designed to determine the communication skills and training necessary for competent performance in both law school and professional practice. Of the 84 responding schools, 81 schools provided usable data. The findings of the survey confirmed the contention that some aspects of com-

munication training are viewed as highly relevant to the formal education of an attorney. The five communication topics considered most important were basic argumentation, listening, principles of persuasion, interviewing, and structuring messages and speeches. These topics are generally taught in a variety of communication courses; but they are rarely applied to the legal setting in those classes, suggesting that the usual communication course may be inadequate preparation for prelaw students. (A bibliography on legal communication is attached.) (RL)

Why College Students Watch Soap Operas.

Pub Date—Apr 80

Note—16p.; Paper presented at the Annual Meeting of the Broadcast Education Association (Las Vegas, NV, April 12, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavioral Science Research, Behavior Patterns, \*College Students, Higher Education, \*Popular Culture, \*Programming (Broadcast), Sex Differences, Television Research, \*Television Viewing

Identifiers—\*Soap Operas

A survey of 549 college students investigated the size and motivation of the campus audience for soap operas. About half the student population (40% of the women and 10% of the men) claimed to watch the daytime serials. Most of the women viewing the soap operas watched two or three serials per week, with 83.3% following at least two regularly, and 46.1% following at least three regularly. The serial-viewing males watched less; 41.4% watched only one serial, with percentages declining sharply and directly as the number of serials watched increased. "Intriguing plots" and "topics of conversation" were the reasons most often chosen for watching daytime serials. Despite the consensus of the critics, both male and female respondents thought that the female characters were more likely to be the troublemakers in the soaps, an apparent change from past conceptions of the long-suffering female being put upon by men. Descriptors—Child Development, \*Child Language, Discourse Analysis, Individual Activities, \*Language Patterns, Language Research, \*Oral Language, \*Orientation, Preschool Children, Preschool Education, \*Social Environment, Speech Communication, \*Speech Habits

Identifiers—Communication Research

The intent of this study was to determine the extent to which preschool children's speech to self, their private speech, was differentiated from their social speech. Ten randomly chosen preschool children, six boys and four girls with a median age of 56 months, were observed in conditions supportive of oral communication (free play), and in conditions not supportive of oral communication (doing puzzles with a noncommunicative adult). The data suggested that the language of preschool children was sensitive to social context. Most private speech was generated in that situation where a response was likely to be elicited from another person. Discourse analysis showed that questions to self by preschool children had the same discourse structure as questions posed to another person. Analysis of individual utterances indicated that the children's private and social speech utterances were predicated (the syntactic subject was pronominalized or deleted). These data supported hypotheses that the language of young children is an outgrowth of their verbal interaction with another person. Thus, the private speech of preschool children in this study was undifferentiated from their social speech. (RL)

Descriptors—\*Business Communication, \*Communication Skills, Education Work Relationship, Employment Qualifications, \*Job Skills, Occupational Information, \*Speech Communication, Surveys, \*Writing Skills

Identifiers—Speech Communication Association

A study was conducted by the Speech Communication Association (SCA) Task Force on Career Opportunities to obtain and disseminate information about the skills required for a variety of jobs in nonacademic settings and nonteaching jobs within academic settings. Forty-two SCA members responded to a questionnaire in which they listed their job titles and descriptions, identified their jobs as entry or nonentry level, and ranked up to seven required skills for both their jobs and related entry level jobs. The skill most frequently mentioned was writing, with 83% of the respondents citing some form of writing such as letters, memos, reports, speeches, proposals and grants, and news releases. Other skills mentioned in order of decreasing frequency were speaking, interpersonal or small group skills, research skills, organizational ability, listening skills, analytic ability, general management skills, supervisory experience, and knowledge of a particular corporation or industry. Other information elicited by the questionnaire included skills required on entry level jobs and sources of skills both from formal course work and from on-the-job experience. Among the conclusions drawn from the responses were that career options should be explored before graduation, that curricular changes for speech communication majors may be required, and that internships will be a critical component of the speech communication curriculum. Descriptors—\*Adjustment (to Environment), Behavior Change, Expectation, Information Needs, Information Networks, \*Information Seeking, \*Information Sources, \*Interpersonal Relationship, Life Style, Older Adults, Orientation, \*Retirement, Self Concept, \*Self Esteem, Social Problems, Work Attitudes

In a study using qualitative and quantitative indicators to measure adjustment to retirement, it was proposed that people come to understand who they are in relation to the other social objects in their environment, including other persons. The study sample was comprised of 12 retired and 12 non-retired persons, all within about 18 months of their retirement date. Data were collected during interviews with the subjects and with a battery of paper and pencil instruments that measured self concept, significant others, communication networks, the quality and quantity of retirement-related conversations, and expectations for retirement. The results supported the theory that a significant life event, such as retiring, disrupts the long established interactive patterns that transmit information about personal self worth. Both the quantity and quality of interactions influenced individual perceptions of the retirement lifestyle. The size and composition of individual communication networks influenced both attitudes about the self and about retirement. A disquieting finding was that the individuals who were more satisfied with their jobs were less satisfied with retirement, possibly because their self-concepts were more intimately bound to their jobs. Self-Worth and Communicator Style: What Is the Relationship?

Pub Date—Nov 79

Note—23p.; Paper presented at the Annual Meeting of the Speech Communication Association (65th, San Antonio, TX, November 10-13, 1979).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Communication Skills, Group Dynamics, Higher Education, Peer Evaluation, Psychological Studies, Self Concept Measures, \*Self Esteem, Speech Communication, \*Speech Habits

A study to determine the relationship between feelings of self-esteem and style of communication involved 71 college students enrolled in a basic speech communication course and implemented an inventory of self-worth (ISW) developed to isolate internal feelings about self that would most likely be consistent across situations. The subjects completed the ISW and a communicator style questionnaire (CSQ). They had been involved in classroom group work for a semester and were also asked to rate each of the members of their five to seven person group using the CSQ. An analysis of the data indicated that self-reports of communicator style elements appeared to be a better indicator of self-worth than were rater's observations, that clear differences in communication style between low and high self-worth individuals were not observable by raters, and that conclusions cannot be drawn about a subject's self-esteem by observing communication style, or vice versa. (Data analysis in tabular form is appended.) (AEA)

Descriptors—Black Culture, Black Employment, \*Blacks, Career Development, \*Communication Problems, \*Employed Women, \*Females, \*Interpersonal Relationship, \*Males, Professional Personnel, Self Concept, Sex Role, Social Change. Rapid societal changes in traditional male-female relationships partially explain current black male-female communication conflict; but first-generation black professional women face unique problems in maintaining effective communication in two subcultures. Data from a doctoral dissertation on black professional women's perceptions of their communication with black males suggested a strong influence of cultural conditioning on the participants' perceptions, goals, values, and communication strategies. Although most of these women had a positive image of the black male, they also indicated that the black male's ego was the primary cause of any communication problems. Although it was apparent that the black professional women faced unique communication problems in dyadic relationships with black males, no concrete evidence emerged from the study to suggest that such communication barriers would lead to the deterioration of black male-female relations. Effective communication between the black male and the black professional woman will require developing new communication strategies and tactics by both parties. Extensive demographic data is considered a valuable means of revealing what communication problems and what strategies for dealing with communication problems result from various cultural backgrounds. Descriptors—\*Communication Skills, Discourse Analysis, \*Persuasive Discourse, Responses, \*Speech Communication

Identifiers—\*Audience Response

Arguing that systematic analysis of message strategies ought to become a major focus of study within the field of speech communication, this paper offers a limited case study to illustrate the kinds of strategies that might be uncovered. The paper places the illustration within a persuasive context and indicates the kinds of approaches a speaker might use in response to a listener's belief that he or she is not the kind of person who supports the advocated position. The first approach discussed is "altercasting" (making salient roles or beliefs that are in agreement with the advocated position and which the listener might be willing to ascribe to himself or herself). The second approach offered reflects an attempt to change the view the listener holds of supporters of the advocated position. The final strategy discussed involves an attempt to change particular aspects of the self-concepts of the listener in such a way as to facilitate agreement with the advocated position. (Author/FL)

Noting that one means of better understanding the nature of cultural differences is to elucidate the cognitive differences between members of differing cultures, this paper examines Alexander Luria's sociohistorical theory of functional cognitive systems. The paper first describes Luria's notion of functional systems, the crux of which postulates an interdependent, processual relationship between cognition and social interaction. It next integrates this notion with current empirical research on perception. Finally, it presents implications for future research on cross-cultural communication based on this theoretical and empirical work. (FL)

Identifiers—\*National High School Debate Resolutions

The five chapters of this book are intended to prepare high school debaters and their coaches for the efficient investigation of the 1980-81 High School Debate Problem Area and Resolutions. The first chapter contains an overview of the problem area—consumer interests—describing the basic concepts of regulation and risk, the definitions of the major terms (consumers, consumer interests), the various consumer protection strategies and agen-

cies, and the sample solutions that are available. The next three chapters examine the debate resolutions: safety guarantees on consumer goods, the regulation of commercial advertising, and standards of testing/marketing for potentially carcinogenic substances. A final chapter reviews general procedures for researching the debate issues, suggesting references and indexes that provide or update information on the debate topics. A selected bibliography of books, government documents, and periodical information is included. (RL)

Descriptors—\*Assistant Principals, Comparative Analysis, Elementary Secondary Education, Enrollment, Expenditure Per Student, \*National Surveys, \*Principals, \*Salaries, Tables (Data), Trend Analysis

Using information obtained from the Educational Research Service, this report briefly summarizes in table form the current salary schedules for principals and assistant principals. Section 1 compares 1979-80 minimum and maximum salary schedule summaries by school district enrollment size. Section 2 makes the comparison by using a per pupil expenditure factor. Section 3 contains an analysis of trends in maximum scheduled salaries from 1976-77 to 1979-80. The survey was intended primarily for school administrators who determine the salaries and wages of public school personnel. The major purpose of the survey was to provide administrators with accurate data to allow them to compare employee compensation levels in their system with those in other school districts of comparable enrollment size and per pupil expenditure level. Identifiers—\*Grants Consolidation

This book, a collection of six papers by different authors, examines grants consolidation or the combining of several categorical programs into a single broader category serving the same target populations. According to the book, grants consolidation is seen as a possible compromise between the extremes of narrow categorical aid and unrestricted general revenue sharing. Section 1 offers different frameworks for viewing grants consolidation and for evaluating the probable consequences. Section 2 examines the strengths and weaknesses of the categorical system and available policy options. A final section focuses on the potential effects of grants consolidation on the educational system. An annotated bibliography is included. (Author/LD)

The purpose of this report was to assess six Technical Assessment Curriculum Development (TACD) projects funded by the U. S. Office of Education in 1975, 1977, and 1978, and awarded to five institutions of higher education. The goals of the TACD projects were to assess appropriate training competencies needed in local and state educational agencies for the planning and administration of community education programs, and to develop an appropriate training curriculum and training materials for community leaders, administrators, related personnel, or community teams at local and state educational agencies. The report contains specific descriptions, summaries, and findings from the surveys of TACD projects. Chapter 1 presents a description of the study methodology and procedures. Chapter 2 contains the findings, activities, and curriculum materials from the six projects. Chapters 3 and 4 conclude with a summary and synthesis of TACD projects with considerations for the future. (Author/MLF)

Descriptors—Boards of Education, Catholic Schools, Dual Enrollment, \*Educational Cooperation, Elementary Secondary Education, Government School Relationship, \*Institutional Cooperation, \*Private Education, Private School Aid, Private Schools, \*Public Education, Public Schools, School Organization, State Federal Aid, Student Characteristics

The characteristics of private elementary and secondary education briefly described include enrollment patterns, school organization, the status of boards of education in private schools, the financing structure, and the population they service. Areas of collaboration between public and private education exist in shared time arrangements, provision for bus nonpublic school students, and participation of private school children in programs of government financed services and materials. Areas of coexistence in which both systems of schools pursue their ways separately are curriculum and school funding. However, in areas of coexistence there are also areas of competition such as enrollment and finances. The strongest area of competition is that for government funds. The viewpoints of opposing sides are summarized. In the final section of the speech, suggestions are made for ways public and private school educators can increase cooperation, smooth out coexistence, and decrease competition. (MLF)

Descriptors—Costs, \*Declining Enrollment, Elementary Secondary Education, \*Expenditure Per Student, \*Financial Problems, \*Financial Support, Grants, Inflation (Economics), Program Costs, \*Resource Allocation, Retrenchment, School Funds, \*School Support, State Aid, Unit Costs

Identifiers—Canada

The major problem to be faced in Canada in the next decade is resource allocation. Administrators must make conscious efforts to distinguish between changes in price levels that are the effect of inflationary pressures and increases in costs that are the result of changes in quality or quantity of inputs. A second area extremely important in dealing with declining resources will be the way available resources are distributed. Critical will be an understanding of the difference between average and marginal cost. Average cost measures include cost per student, cost per teacher, and cost per classroom. Marginal cost may be defined as the actual saving or cost that results from adding or subtracting one more unit to the system. When resources are allocated according to a formula based on average

cost (such as amount per student) during a period of declining enrollment, fund allocation goes down more than actual marginal savings go up. Although the number of students has declined, the total cost for teacher salaries or plant maintenance remains the same. School boards must be helped to adjust to this situation through a reorganization of allocation systems to reflect true costs more accurately. (Author/JM)

Identifiers—Ontario

This presentation is concerned with Ontario's publicly supported university financing system as it affects faculties and colleges of education. This program allows universities autonomy in designing programs and allocating funds, relies heavily on provincial grant revenue, utilizes a complex formula system recognizing program cost differentials, and accounts for a high proportion of total revenue. Preservice or bachelor of education programs are funded through per student grants computed at \$2,656.00 per full time equivalent (FTE), with bachelor of education students weighted as two FTE. Graduate education programs are funded through a similar formula but with a freeze on funding as of 1975-76. No public funding is available to colleges of education for general teacher inservice education, but it is available for programs leading to Ministry of Education specialist or other certificates through student grants of \$235.00 per FTE. As enrollment in preservice programs declines, it is significant that 12 students in one certificate course are necessary to offset a loss of one student in the preservice program. Serious money and student shortages now face colleges and faculties of education. They are attempting to replace the loss of preservice students by concentrating on graduate and continuing education, but the shift will not be easy. (Author/JM)

Descriptors—Decision Making, Employed Women, Occupational Surveys, \*Policy Formation, \*Power Structure, \*Professional Occupations, Tables (Data)

Identifiers—Arkansas, Louisiana, New Mexico, Oklahoma, Texas

This paper reports on two processes used to begin a long-term series of studies on educational power structures in the states of Arkansas, Louisiana, Mississippi, New Mexico, Oklahoma, and Texas. Purposes of the study were to determine if (1) substrata or pools of power undergird educational power structures, (2) certain paths to power are typically followed by influentials, (3) separate power structures exist for grades K-12 and postsecondary education, and (4) power structure changes can be predicted. The research method used involved asking the executive director of each state education association to make a list of the five to ten most influential decision-makers in the state and then asking each of those persons to do the same. After two rounds of interviews with 112 persons, consensus was reached on 50 top leaders. The other method used was also a modified reputational process. The paper draws no conclusions, since additional work in progress is testing the efficacy of the processes. Observations are made, however, about the number of noneducators who are influential in educational decision-making, and the number of individuals originally tagged as second and third raters who move into the power structure. Identifiers—New York (New York), \*Wisconsin  
The first half of this paper reviews the school enrollment trend in the state of Wisconsin and discusses the implications of school closings. It offers planning suggestions to local districts in light of statewide declining enrollments. The second half of the paper—a review of recent literature related to "cutback management"—is presented to assist local personnel in understanding how organizations react to diminishing populations. Some of the areas explored include organizational decline and resource scarcity, organizational responses to municipal budget decreases, the closing of government facilities, public policy and program termination, cutbacks in the private university, and strategies for reduction in force. Identifiers—\*Sweden

In recent years a number of industrialized countries have developed projects that in one way or another associate school buildings with community facilities designed for different functions or uses. The texts brought together in the present volume concern Sweden, which acted as the host country for a symposium held in 1976 on "School and Community Building in Relation to Urban Dynamics." The papers are preceded by a brief description of the general context and trends of coordination in Sweden. Three of the papers are devoted to experiences in Göteborg, Sweden's second largest city. The first, "Policies for the Provision of Facilities in the Development of the City of Göteborg," examines the general problems of facilities planning in a big city. It is followed by a descriptive study, "Ranbergs Centrum," an example of the way in which the facilities problems of new housing estates in the periphery of a city are handled. The third paper, "Planning Process of the Coordinated Centre of Västra Frölunda," is more methodological and describes how the lessons learned from previous experience were applied to a new project. The volume ends with an account of two recent projects in Upplands Väsby that show clearly that coordination does not necessarily have to result in large complexes but can be achieved also on a small scale in the form of dispersed neighborhood units. Descriptors—Administrator Attitudes, \*Budgeting, \*Cost Effectiveness, Cost Estimates, \*Costs, Elementary Secondary Education, Instructional Materials, Long Range Planning, \*Needs Assessment, School Surveys, Tables (Data), Teacher Attitudes, \*Textbooks, Textbook Standards

One purpose of this study was to examine the adequacy of existing policies regarding the provision of textbooks in a large suburban school district. Another purpose was to determine the cost of meeting a proposed standard for textbook availability, namely, that every student should be provided with copies of the texts he or she uses in all basic academic subjects. Data were gathered from two sources: a survey of teachers and administrators in a sample of 25 schools and an analysis of expenditures for textbooks and other instructional materials. Results showed that needs varied sharply by both grade level and subject matter, with the greatest needs found at the middle or junior high school level. The study also provides descriptive information on textbook usage for classroom and out-of-classroom experiences as well as data on the need for supplementary materials. Extensive tables are included and the appendix offers an alternative cost analysis and a summary of findings. (Author/LD)

This volume is the second in an annual series surveying the lifestyles and values of youth. Presented here are detailed statistics on the prevalence of drug use among American high school seniors in 1978 and on trends in those figures since 1975. Research involved annual data collection in approximately 125 public and private high schools across the U.S. Explored are students' attitudes about drug use, exposure to drug use, and perceptions about the availability of drugs. New subjects covered this year include the intensity and duration of the highs usually experienced with the various drugs and the cross-cohort comparisons of the rate of initiation into drug use. Also new this year are two figures in each drug chapter that deal with trends in drug use at earlier grade levels. Finally, two new chapters have been added that deal with certain relevant aspects of the social milieu in which American teenagers find themselves. (Author)

Descriptors—\*Compliance (Legal), \*Educational Facilities Planning, Elementary Secondary Education, Equipment Maintenance, \*Facility Requirements, Safety, School Buses, \*State Legislation

Identifiers—\*New York

In New York State, all plans and specifications for the erection, repair, enlargement, or remodeling of school buildings in any public school district must be reviewed and approved by the Division of Educational Facilities Planning. The Division also strives to offer advice and counsel to school districts and architects to help them resolve their school building problems. This 1975 edition of the manual includes all amendment and revisions to the original manual issued in 1965. Both minimum requirements, which must be followed, and optional recommendations are included. The words "shall" and "must" indicate requirements "should" and "may" indicate recommendations. The requirements and recommendations are arranged under the headings of structural and safety planning; materials; visual environment; site and utilities; mechanical and electrical planning; heating, ventilating, and air conditioning; plumbing and gas facilities; electrical work; and existing buildings. Thirteen appendices contain additional material, and an index concludes the manual. (Author/MLF)

Descriptors—\*Accreditation (Institutions), Curriculum, Discipline Policy, Educational Legislation, High Schools, \*Institutional Evaluation, Methods, \*Program Evaluation, School Administration, State Boards of Education, State Departments of Education, \*State Standards  
Identifiers—New York

This handbook contains the tentative secondary school registration standards and procedures approved by the New York State Board of Regents for the 1979-80 school year. It explains the program providing for the registration (or accreditation) of New York schools and outlines the steps that will make up the registration procedure. Most of the publication consists of the guide for the review of secondary school programs. Part 1 of the guide allows both the secondary school and the state education department to evaluate secondary school educational practices. In workbook form, it asks for information about the school concerning such areas as achievement, curriculum and instruction, school facilities, and student supervision. Part 2 of the guide allows the school and the education department to determine to what extent the secondary school meets the requirements established by relevant New York laws and directives. Also in workbook form, this portion of the guide concerns such areas as attendance, instructional program, handicapped children, and school libraries. The standards and procedures in this book are tentative and will be field tested until the fall of 1980 when final standards and procedures will be adopted. A 10-page glossary of terms used in the guide is included. (Author/JM)

Descriptors—Educational Innovation, \*Educational Research, Educational Researchers, \*Educational Trends, \*Information Dissemination, Institutional Cooperation, National Surveys, \*Policy, Program Costs, Research Needs, \*Research Utilization, Trend Analysis

Identifiers—Austria, Belgium, Cyprus, Denmark, Finland, France, Ireland, Luxembourg, Netherlands, Norway, Research and Development, Spain

This volume constitutes an updating of a survey carried out five years ago concerning educational research policies in member states of the Council of Cultural Cooperation. Countries whose educational research policies are assessed include Austria, Belgium, Cyprus, Denmark, Finland, France, Ireland, Luxembourg, Netherlands, Norway, and Spain. For each country, the volume includes information on the role of research, general framework of the educational research system, and future development. Regarding the role of research, information appears concerning such areas as the relationship between researchers and policy-makers, the relationship between researchers and the schools, and cooperation among researchers and among institutions. Regarding the general framework of educational research, material is included about such aspects as promotion, planning, and financing of research; expenditures on educational research and development; priority fields of research; and research dissemination and impact. Information on future developments concerns trends that may change research policies and projected cooperation among European nations. (Author/JM)

Identifiers—Leadership Behavior Description Questionnaire

This model of teacher supervision was designed to improve instruction in the Aspinwall Elementary School in the Fox Chapel School District, Pittsburgh, Pennsylvania. The project sought to accomplish three things: improve the achievement level of underachieving students, increase teacher instructional effectiveness, and change the teachers' perception of the principal's supervisory behavior. Treatment included a diagnostic assessment of the students' specific skill deficiencies and a self-evaluation of the teachers. A prescriptive approach was used with the students, and two commercially published criterion reference programs were utilized. Teachers wrote goals in the form of a behavior checklist and these goals were monitored by using a modified clinical supervision approach. Evaluation of the project suggested that the model could improve achievement, and teacher and administrator performance. The appendix includes samples of the materials needed to conduct a similar program. (Author/JM)

Descriptors—Academic Achievement, \*Attendance, Group Counseling, Group Guidance, Groups, High Schools, \*High School Students, Humanistic Education, Individualized Instruction, \*Low Achievement, Program Descriptions, \*Self Concept

Growing out of concern about the increased absenteeism and poor achievement of a select population of students at Fox Chapel High School, Pittsburgh, Pennsylvania, this program aimed to decrease absences and improve student achievement and self-concept. It also involved a review of the climate provided for learning and of the teaching-learning process. An intervention strategy utilizing study teams made up of the director of pupil personnel services, a psychologist, a counselor, the school nurse, a remedial reading teacher, principals, and core teachers was developed. An individualized diagnostic-prescriptive approach was also used. The creation of a humanistic and affective school environment was of fundamental concern in the improvement of the students' self-concept. An evaluation of the model indicated that students did improve in attendance, achievement, and self-concept. (Author/JM)

Descriptors—Elementary Secondary Education, Equal Education, Evaluation Criteria, Federal Programs, Inservice Education, \*Program Administration, Program Evaluation, \*Sex Bias, Sex Discrimination, Sex Role, \*Sex Stereotypes, \*Supervision, Test Construction, Vocational Education

Identifiers—Program Monitoring

The goal of this program was to improve the monitoring of sex bias and sex-role stereotyping in a federal educational program. A federally-supported vocational education program was chosen as the target of the project. The project improved the monitoring of the program by (1) identifying the potential criteria to be used in eliminating sex bias, (2) formulating an instrument to be used by program monitors, (3) providing inservice training for project officers in the use of the instrument, and (4) evaluating the extent to which monitoring in the program improved as a result. The evaluation of the effectiveness of the project was based on an analysis of the content of site visit evaluation reports of project monitors over a 30-month period. The evaluation revealed that the overall quality of monitoring for sex bias and sex-role stereotyping improved significantly in the vocational demonstration program. (Author/JM)

Identifiers—Alberta, \*Canada

The influx of Eastern European immigrants during the nineteenth century in Canada elicited hostility and bigotry from the dominant population. Educators aimed for assimilation of immigrants into the mainstream of Canadian society and used the school curriculum to inculcate nationalism. Up to the 1940s and 1950s, Canadian history-education and social studies stressed the greatness of the British Empire. By the 1970s, the emphasis on chauvinism was replaced by indoctrination of minorities with middle class values. Today however, multicultural education is being supported by the federal government, and the provinces too are promoting cultural pluralism in education through programs like the Alberta People Program. As such programs are implemented, problems have arisen because the educational philosophy behind multiculturalism has not been clearly defined, study units are not based on a well-delineated theory of curriculum development, and teachers have been left out of the curriculum design. To rectify the situation, new directions in educational theory must be developed, and the role of the teacher in curriculum design must be expanded. Teachers involved in such pedagogical design must keep in mind the importance of continuity, interest, and activity. (Author/JM)

Identifiers—\*Program Evaluation and Review Technique

Two systematic ways of analyzing and planning the components of a program or project, both used extensively by industry and government, are discussed in this paper. The methods are Program Evaluation and Review Technique (PERT) Networks and Critical Path Method (CPM) Arrow Dia-

grams. The purposes of this paper are (1) to explore the need for systematic planning in education, (2) to compare CPM and PERT both in the past and in the present, (3) to explain the critical rules for developing PERT Networks and CPM Arrow Diagrams, (4) to list the implications for education that may be seen in each of these methods, and (5) to explore the future of systems planning in education. This paper is intended to be used by any educator who wants to improve his or her school district, building, or classroom through effective planning and systematic development of specified objectives. Machine Politics in Local School Districts.

Pub Date—Apr 80

Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141) — Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Boards of Education, \*Educational Theories, \*Governance, \*Political Influences, \*Political Power, \*School Districts

Identifiers—\*Pennsylvania

One purpose of this paper was to describe the present process of machine government and private-regarding practices in local school government. Another purpose was to theorize from these data, based on selected conceptual notions, about the political process in educational governance. Data for the study came from a Pennsylvania superintendent whose school district was involved in charges of school board member corruption. The paper offers a descriptive account of the community, the political machine, and the amount of money involved, as well as how the system operated. The major conclusion stemming from the data, is that private-regarding machine government still exists in the governance of public education, and it can, and often does, produce corruption in that government. Further, it appeared that as corruption occurred in the districts mentioned, it was intricately entwined with machine politics and corruption at all levels of government. The paper theorizes that when an electorate becomes dissatisfied with a machine-type school board, it can be more effective in changing the board through the elective process than it can be when dissatisfied and confronted with a reform-type school board structure. Needs of Elementary and Secondary Education in the 1980's. A Compendium of Policy Papers.

Committee Print, 96th Congress, 2d Session, Congress of the U.S., Washington, D.C. House Committee on Education and Labor.

Pub Date—Jan 80

Note—704p.; Not available in paper copy due to small print of original document. Parts may be illegible.

Pub Type—Information Analyses (070) — Collected Works - General (020)

EDRS Price - MF04 Plus Postage. PC Not Available from EDRS.

Descriptors—Curriculum Design, \*Declining Enrollment, Demography, \*Educational Change, \*Educational Trends, Elementary Secondary Education, Governance, Individualized Instruction, Leadership, Social Change, Technology, Vocational Education

This publication is a collection of articles by various authors on educational trends during the 1980s. The diverse collection of writers offers background information for future decisions about legislation and educational policy. In the category of leadership and governance, most of the papers are oriented toward single issue interests, the general fragmentation of leadership at all levels, and the challenge to leaders in the current era of change and stress. The major points from the social change and demographics papers relate to the manner in which changing societal values and changes in the age distribution of the population are affecting the schools. Finally, the papers on knowledge, technology, and curriculum emphasize the potential for change in the content and delivery of instruction and the benefits that could accrue through the application of research findings in curriculum design and school operation. A continuing theme among the papers is the emphasis placed on the many ways in which change is taking place in American society and the

difficulties that citizens confront in efforts to cope with change. (Author)

Carey, Diane  
Motivating and Dissatisfying Factors among Professional Educators, Educators.

Pub Date—Apr 80

Note—54p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Elementary Secondary Education, \*Industrial Personnel, \*Job Satisfaction, \*Motivation, Motivation Techniques, \*Professional Personnel, Questionnaires, \*State Departments of Education, Statistical Surveys, Tables (Data), \*Teachers

The purpose of this study was to identify and rank positive and negative motivating factors affecting professional staff of the State Department of Education and to compare the factors with those found affecting other professional educators at the elementary and secondary levels and also industrial employees. Results obtained by use of a critical incident instrument indicated that the major motivating factors were recognition, achievement, and responsibility. The major dissatisfying factors were department policy and administration, supervision, and interpersonal relations. Implications for participative management techniques and collective bargaining are discussed. An extensive bibliography is included. (Author)

Descriptors—Case Studies, \*Change Strategies, \*Educational Change, \*Educational Innovation, Elementary Education, \*Models, \*Program Implementation

Identifiers—Change Models (Havelock), Concerns Based Adoption Model, Individually Guided Education, Linkage Model (Havelock)

The research discussed in this paper was intended to identify factors that promote or retard change in schools and to relate those factors to the modifications they foster. Data were collected from 13 Wisconsin elementary schools to determine what factors affect (1) the decision to adopt an innovation, (2) the rate of implementation of an innovation, (3) the adaptation of an innovation, and (4) the decision to abandon or replace the innovation. The findings were compared to six current models of change. The models, discussed in detail, were the problem-solving model; the social interaction model; the research, development, and diffusion model; the linkage model; the concerns-based adoption model; and the Individually Guided Education model. Results showed that none of the six models proved adequate in explaining the adoption histories of the 13 sites. The paper then discusses assumptions and utility of each of the change models and suggests an alternative conceptualization of the adoption process. The paper concludes that future research should attempt to relate differing patterns of adoption to the degree of implementation of an innovation. (Author/LD)

School finance reform has reflected, over the last 10 years, the changing relationship between education and state government. Emerging from the case histories presented here is the conclusion that, gradually, the barriers separating education policymakers from general government have been lowered. At the same time, the fragmentation among education interest groups has increased. While the process of school finance reform has varied among the states, a number of common elements characterize reform in six states discussed here (Maine, Florida, New Mexico, California, Missouri, and South Carolina). First, reform occurred when compromises were made within study commissions prior to legislative consideration. (Oregon, where such compromises were not made, offers this publication's sole example of the failure of reform.) Second, the involvement of governors and key legislators was necessary. Although the role of traditional education groups was relatively low, new interests, including taxpayers, minority groups, cities, and nationally recognized organizations, played an important role. The availability of state funds, judicial pressure, and long periods of planning time were all important. The reform process did not change significantly throughout the 1970s in spite of emerging issues like declining enrollment and accountability. (Author/JM)

Descriptors—Administrator Role, Cost Estimates, Elementary Secondary Education, \*Long Range Planning, Needs Assessment, Objectives, Programmed Instructional Materials, \*Staff Development

This publication provides an overview of long-range planning and then provides a partially-programmed text to help school administrators conduct long-range planning for staff development. Section 1 presents a rationale for long-range planning, defines it, and provides an overview of the issues affecting it. This section discusses selecting the participants in long-range planning and the development of the process. Also included are points to be considered in designing the long-range planning process and a brief planning model. Section 2 is an outline for a multiyear staff development planning document. It explains each step in creating the plan, and provides workspace in which to do so. This section includes information on doing a needs assessment, preparing a mission statement, writing goal statements, doing a discrepancy analysis, writing objectives, deriving criteria to signify attainment, and writing and figuring the cost of activities. Matthews, Kenneth M.  
An Exploratory Study of Changes in Economic Conditions and Teacher Salaries in Metropolitan Areas.

Pub Date—17 Mar 80

Note—13p; Paper presented at the Annual Meeting of the American Education Finance Association (San Diego, CA, March 16-18, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Cost Indexes, \*Economic Factors, Elementary Secondary Education, Income, Inflation (Economics), \*Metropolitan Areas, Questionnaires, \*Teacher Salaries

Encompassing the years between 1969 and 1979,

this study of 18 standard metropolitan statistical areas (SMSAs) attempted to determine if changes in selected economic indicators were correlated with changes in teacher salaries. Researchers looked at changes in consumer price indices, per capita personal income, and average beginning teachers' salaries in 335 school districts. In addition, a questionnaire was sent to superintendents in the sample districts. The findings of the study do not support significant causal relationships between changes in the cost of living or changes in local income and changes in metropolitan teachers' salaries. The evidence reported is consistent with two conclusions. First, changes in teachers' salaries in referent districts have a greater impact on changes in teachers' salaries in metropolitan districts than either changes in the cost of living or changes in the incomes of local populations. Second, changes in the amount of discretionary funds available to metropolitan districts have a greater impact on changes in teachers' salaries than either changes in the cost of living or changes in local incomes. Also of interest is that per capita personal incomes in the sample SMSAs increased much more than average beginning salaries for teachers. (Author/JM)

Public Support for Financing Capital Outlay.

Pub Date—1 Apr 80

Note—14p; Not available in paper copy due to marginal legibility of original document.

Pub Type—Guides - Non-Classroom (055) — Opinion Papers (120)

**EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.**

Descriptors—Administrator Attitudes, \*Advisory Committees, Boards of Education, Bond Issues, \*Capital Outlay (for Fixed Assets), Citizen Participation, \*Community Support, Elementary Secondary Education, Federal Aid, Planning, Public Relations, \*Public Support, \*School Community Relationship, School Support, State Aid Two major concerns related to large-scale capital outlay are convincing the community of the need for the expenditure and planning for the financing of the project. In an era when the public is resisting increased taxation, school districts must develop a plan of action for soliciting funds and must be able to conduct an effective fund campaign. This article discusses several considerations affecting the funding of capital expenditures. First, the groups that will support and resist additional funding must be identified, and methods of using positive groups and changing the minds of negative groups must be formulated. Second, a detailed plan of action must be developed, including appointing an advisory committee, completing a feasibility study, and conducting a publicity campaign. Then the "selling campaign" must be carefully planned and undertaken by a citizens committee that is carefully chosen and organized. Fourth, several methods of financing capital outlay must be considered: the bond issue, building and site sinking funds, the "pay-as-you-go" method, and state and federal funding. Finally, before beginning a funding campaign, a district must attempt to cut other expenditures and obtain other funds. (Author/JM)

Dupre, Beverly Brown  
Community-School Congruency through Use of Instructional Gaming and Simulation.

Pub Date—Oct 77

Note—24p; Paper presented at the Conference on Education Sponsored by the Mayor of New Orleans (1st, New Orleans, LA, October 1977).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Community Role, Decision Making, \*Educational Games, Elementary Secondary Education, Process Education, Role Playing, \*School Community Relationship, \*Simulation

Interest in gaming and simulation, as traced back in educational history to the late 1800s, has prompted educators to consider gaming and simulation as a curriculum process which employs the utilization of symbolic models for the attainment of defined goals. In an attempt for schools to be accountable, gaming and simulation is considered to be a process which enables schools to construct learning environments for students which are more congruent with the real world. The process necessitates having assistance from the local community. The role of the community would be to provide

settings, materials, and supplementary artifacts which would represent the real world. All endeavors of society could be represented. Examples of community sectors that could assist in bringing awareness of their operations to students for the purpose of exploration and valuing could include various businesses, labor trade unions, manufacturing, marketing, service, and governmental agencies. Project SAFE [Survey of Administrative Functional Efficiency]. A Feedback Project Designed to Assist Principals.  
Pub Date—[80]  
Note—8p.

Pub Type—Reports - Descriptive (141)  
EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Administrator Characteristics, \*Administrator Evaluation, Administrator Responsibility, Administrator Role, Elementary Secondary Education, \*Feedback, Personality Traits, \*Principals, Program Descriptions, Teacher Administrator Relationship, Teacher Attitudes  
Identifiers—Survey of Administrative Functional Efficiency

After a brief explanation of Project SAFE (Survey of Administrative Functional Efficiency) as a system designed to provide necessary feedback to school principals, the author lists the components of the project: (1) a confidential report to the principal summarizing the results of administering the SAFE instrument in the school, (2) a profile of the staff's view of the ideal principal and how the participating principal compared to it, and (3) feedback on how teachers might attempt to improve selected situations at the school. The author then lists dissertations completed as Project SAFE research and their findings. The research concerns the relationship between the administrative functioning of principals and other variables such as demographic variables and desired personality traits. One study found significant personality trait predictors of principals' efficiency for eight different principal functions. Another examined the impact of a communications and leadership training program on teachers' views of ideal principal personality traits and found no effects. (Author/JM)

This monograph offers an analysis of the legal aspects of school communications. Many of the cases analyzed originated from communication by individuals, including school district employees, board of education members, students, and school patrons. Some of the topics covered include defamation, libel and slander, application and abuse of privilege, freedom of student expression, publications, board of education communications, employee communications, and communications with the public. Identifiers—Energy Requirements  
This report is an assessment of the energy needs and concerns of the United States cultural community: performing and visual arts groups, museums, historic properties, archives, libraries, community arts centers, zoos, aquariums, scientific collections, auditoriums, and individual artists and craftsmen. The findings and recommendations represent a distillation of the experience, ideas, and concerns of 25 cultural service organizations, 18 government agencies, and 27 cultural institutions, all of which are listed in the appendix. It was found that there are six energy-related issues that are relevant to all types of cultural institutions and groups in all parts of the country: (1) rising energy costs, (2) threats posed by energy shortages, (3) energy legislation and regulations, (4) energy-related information and technical assistance, (5) alternate energy sources, and (6) energy-efficient architecture and design. Recommendations are made regarding steps that government agencies, cultural service organizations, cultural institutions, and individuals might take to help resolve these issues. (Author/MLF)

Identifiers—\*Humanities Enrichment Program, \*Master Teacher Program, National Humanities Faculty

The Humanities Enrichment Program (HEP) and The Master Teacher Program (MT) were sponsored by the National Humanities Faculty to improve and encourage humanities instruction. The 40 schools in the program participated in curriculum development workshops, demonstration lessons, and public information meetings. A consultant also contacted local school administrators in an effort to improve humanities advocacy. Evaluation of this program revealed a positive effect on the personal and professional growth of participating teachers, although its impact on the humanities curriculum or on the effectiveness of humanities instruction is uncertain. The MT program was similar to HEP but placed responsibility on a master teacher who directed the work of a task force of local teachers in each of 50 schools in developing a humanities curriculum. Evaluation of this program revealed an even more positive effect on participating teachers, but fewer teachers were influenced. Master Teachers were only marginally effective at stimulating colleagues and local program changes or curriculum development. Data sources of both evaluations were questionnaires, interviews, observations, case studies, and project documents. Evaluators concluded with the proposal that if touching the lives and actions of a few teachers is well worth doing, these projects had impact. (Author/JM)

Superintendents' Reactions to School Finance in Alberta.

Pub Date—Mar 80  
Note—22p.; Paper presented at the Annual Meeting of the American Education Finance Association (San Diego, CA, March 16-18, 1980).  
Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Administrator Attitudes, \*Educational Finance, Elementary Secondary Education, \*Grants, Program Descriptions, \*Property Taxes, School Surveys, \*Superintendents

Identifiers—\*Alberta

The purpose of this paper was to report on the system of school finance in the province of Alberta. The first part of the paper consists of an outline of the legal framework in the Canadian constitution, a description of the current school finance plan, and a summary of a 1979 study of the plan. The bulk of the document concerns a survey of 94 school superintendents concerning their views on (1) the school foundation program fund, (2) the school grants regulations, (3) the property tax, and (4) the entire school finance system. The survey revealed a strength of the system to be its provision for the implementation of a basic provincial educational plan. Weaknesses in the system were related to tax equity and local autonomy. Other issues discussed include the Heritage Savings Trust Fund and grants to private schools. (Author/LD)

Identifiers—\*Cost of Education Indexes  
The desire to create an effective cost of education index (CEI) arises from a desire to achieve greater equity in state and federal school funding mechanisms. Before such a measure is useful, however, much more thought must be given to the specification of factors differentially affecting demand and supply. Consensus regarding classification of variables must be reached by researchers before sufficient reliability can be attributed to a model to permit its adoption in state aid formulas. More than the areas of transportation and teachers' and administrators' salaries must be included in determining costs before such indices can be utilized. Although ambitious attempts at creating a CEI have been made, they still suffer from some omissions, such as the inability to explain capital expenditures. Perhaps the first application of a successful CEI should not be to adjust state or federal school funding mechanisms but to judge the equity of present expenditures. Development of an acceptable CEI is of utmost importance because without it (1) the thrust of the school finance reform movement will be blunted, (2) federal aid programs cannot recognize differences in costs of compensatory programs, (3) state legislators are reluctant to enact equity provisions, and (4) notions of fiscal equity are impossible to define, investigate, or achieve. Descriptors—\*Basic Skills, Elementary Secondary Education, \*Federal Aid, \*Federal Legislation, \*Federal State Relationship

Identifiers—\*National Basic Skills Improvement Program, \*South Carolina

The National Basic Skills Improvement Program is authorized to provide grants and contracts to enable children to master the basic skills of reading, mathematics, and effective communication. In mid-1978 the South Carolina Legislature established the South Carolina Basic Skills Assessment Program. In the first half of 1979 an intensive project was carried out in which statewide basic skills objectives for South Carolina were identified. The project involved the efforts of both a contracting agency and a contractor. This paper, by outlining the components of the federal legislation, provides a national perspective at a symposium centered on the lessons derived from the six-month project. Discussed specifically in relation to the South Carolina project are how to get the most out of a contract and contractor, and whether the development of objectives and tests will improve the basic skills of children. (Author/MLF).

Identifiers—\*Fund for Improvement of Postsecondary Education

An important indicator of the success of a funding agency is the achievement and impact of the projects it supports. This paper, one of three related documents, examines the effectiveness of the Fund for the Improvement of Postsecondary Education, a fund to improve educational opportunities. A telephone survey was conducted in 1979 of all of the fund's grant recipients from 1973-78. More data were gathered from 50 case studies conducted of the fund's projects. Four areas of the projects were examined, including innovation, effect on host institution, influence on other organizations, and continuation after federal support was withdrawn. Some of the results showed (1) over three-quarters of the projects were innovative; (2) over 50 percent caused significant changes in the operation of their host institution; (3) dissemination activities of the projects were extensive; and (4) 70 percent of the projects met the necessary criteria to be considered institutionalized. Educational administration is an applied professional field that is more like medicine and law than it is like sociology or economics. However, education has struggled for years to take a broad and somewhat ill-defined field of endeavor and create a hard discipline. This attempt has helped separate the practitioner and the professor. Collaborative arrangements between university personnel and elementary and secondary school personnel would result in a data base that could improve the quality of educational research and lead to increased knowledge in the field. Identifiers—\*Ontario

The purposes of this study were to compare the responsiveness of educational expenditures per pupil in Ontario, first, to changes in instructional expenditures per pupil during 1971-77, and second, to changes in proxy measures of educational quality and price levels of teacher services for 1974-77. Variables used to represent quality and price levels were academic qualifications, years of teaching experience, pupil teacher ratio, and beginning salaries. Data for the analysis were obtained from Ontario Ministry of Education reports. The paper concludes that, on the average, instructional expenditures per pupil have been more responsive to changes in educational quality than to changes in the price level of teacher services. In addition, teachers' salaries in recent years have declined somewhat in comparison to salaries of all other employees in Ontario. (Author/LD)

Descriptors—Accountability, Change, Consultants, \*Education Service Centers, \*Organization, Program Descriptions, Program Evaluation, \*Program Implementation, \*Regional Laboratories, Surveys

Identifiers—Appalachia Educational Laboratory WV

The Educational Services Office (ESO) of the Appalachia Educational Laboratory (AEL) sought an organizational strategy that would improve its ability to meet client demand without sacrificing the integrity of its programs or the fulfillment of its institutional responsibilities. Three alternative organizational strategies were identified: full-time assignment of staff to specific programs, a matrix management strategy (assigning staff by function across programs), and the state consultant model (assigning staff to specific states across programs). These three strategies were assessed using criteria extrapolated from a third-party survey of client preferences. These criteria included accessibility of staff, clear channels of communication, increased visibility of the laboratory, availability of on-site technical assistance, and expansion of information services. The state consultant model (SCM) emerged as the best strategy and was then assessed using internal office criteria derived from experience with a previous ESO organizational strategy. Based on this assessment, adaptations of the SCM were made. These adaptations included utilizing four data sources in matching states with available grants, appointing evaluators to monitor progress, and developing accountability procedures. These "mutual adaptations" are considered to be factors affecting the transportability of the model. Appended is a six-month state consultant plan for the ESO. (Author/JM)

**Partisan School Board Elections: New Evidence to Support the Case for Them.**

Pub Date—Apr 80

Note—32p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Board Candidates, \*Boards of Education, \*Elections, \*Political Influences, School Districts, Statistical Studies, Tables (Data)

Identifiers—\*Canada, \*Partisan Elections

This study examined partisan elections in large urban school districts in Canada. It investigated the extent to which the existence of political parties in a school board election serves to aggregate the educational attitudes and opinions of candidates. Also, it investigated the extent to which political parties aggregate differences in the personal characteristics of candidates. Further, it measured the extent to which their educational opinions and attitudes are related to their personal characteristics. The study used information collected from 29 candidates who ran for office in a 1978 Vancouver (British Columbia) school board election. The results showed that the existence of political parties does serve to aggregate the educational attitudes and opinions of candidates running for school board office. The parties present the voters with distinctly different ideological and policy positions on educational questions. In addition, little relationship exists between personal characteristics of candidates and their educational attitudes and opinions. Finally, the paper concludes that certain advantages do exist for partisan school board elections in large urban school districts. (Author/LD)

Descriptors—Elementary Secondary Education, \*Evaluation Methods, \*Teacher Effectiveness, \*Teacher Evaluation

This paper discusses teacher evaluation, including why teachers should be evaluated, what should be evaluated, and how it should be evaluated. Major problems in the evaluation process are listed, followed by a more detailed discussion of the why, what, and how. The paper concludes that dissatisfaction exists in the field of education with current approaches to teacher evaluation. The reason is the failure of research to yield a shared operational definition of teacher effectiveness or adequate instrumentation for reliably measuring and assessing teacher performance. Identifiers—\*Canada

In countries other than Canada, schools are used to accomplish four goals: manpower development (to develop skills needed to implement national policies); cultural survival (to prevent the loss of indigenous culture or language); social priorities (to accomplish social goals); and political purposes (to disseminate propaganda). In Canada, the school is not expected to fulfill these goals. Instead, there are

a number of commonly perceived purposes for education such as providing custodial care, teaching the basics, developing the whole child, solving society's problems, job training, and teaching particular viewpoints. The primary purpose of the schools in Canada should be to develop each child's cognitive capabilities. Schools today should not be held accountable for social, artistic, moral, and physical development. In the future, however, as more instruction is done at home by machine, the school will expand its role into that of provider of moral, emotional, and social support and provider of adult and leisure education. Identifiers—\*Florida

This report describes the 1979-80 program for financing public K-12 and adult education administered by school districts in Florida. The intent is to supply general information for those having a casual interest in state funding of schools. In addition, the document should be a useful reference for individuals wishing to identify legal authorization for various portions of the funding program. The first section of the report describes key features of the Florida Education Finance Program and provides background information about local, state, and federal support of education in the state. The second section identifies legal authorizations, outlines the requirements for participation, defines terms, and describes the current formula for distributing state funds to public schools. Identifiers—\*Florida

This statistical report describes some of the cost analysis information available from computer reports produced by the Florida Department of Education. It reproduces examples of Florida school and school district financial data that can be used by state, district, and school-level administrators as they analyze program costs and expenditures. The report contains both descriptive and comparative information. The program cost analysis report series shows program costs for any Florida district or school. Two reports profiling program cost information allow one district or school to be compared with any group of Florida districts or schools. Three reports profiling district or school indirect cost information allow one district or school to be compared with any group of Florida districts or schools. Likewise, four reports profiling school district expenditure information allow one school district to be compared with any group of Florida school districts. For the purpose of illustration, only sample information is shown. It should be used in conjunction with the actual computer reports, for which an order form is included. (Author/LD)

In 1976-77, the U.S. Office of Education funded a series of investigations of community education by various organizations. These studies were designed to provide perspectives on community education that were prepared by groups essential to the community education process. This publication introduces the concept of community education as a new foundation for education, provides historical and societal perspectives, and then presents summaries of the reports made by the various organizations. Some of the subjects covered in the summaries include: the role of state educational agencies, the role of the state board of education, community education and school administrators, community education in junior colleges, a guide for the hearing impaired, involvement of older people, and the role of parks and recreation services. The appendix offers four case studies of community education. (Author/LD)

Structure, \*School Districts, Social Isolation, Teacher Discipline

This paper presents an analysis of the "adjacent curriculum," a term defined as that knowledge that is organizational in origin and that is transmitted to the organization's members for the purpose of maintaining the organization as an abstract but functional entity. This "curriculum" consists of such material as conduct codes, evaluation forms, and other transmissions that serve, in addition to their specific function, to establish organizational legitimacy. This causes organizations to be viewed as established, unchanging, and "received," and disallows the emergence of a valuable dialectical relationship between the organization and the individuals it serves. Recommendations concerning important federal statutory revisions, budget and appropriations items, and regulatory issues are offered in this booklet. Issues discussed are of particular concern to New York State. Recommendations include the following: (1) on the postsecondary level, federal and state programs serving the same students should be integrated into coherent plans, state and federal funds for students with special needs should be coordinated, and tax deferment accounts and tuition tax credits should be targeted for students with special needs; (2) issues of institutional integrity and program quality must be given careful legislative attention by adjusting institutional eligibility requirements for federal programs; (3) federal programs for the education of the handicapped need more flexibility and resources; (4) unemployment and underemployment of youth are urgent issues requiring comprehensive and long-range federal programs and federal, state, and local priorities linking education and employment; and (5) the federal role in child health and nutrition must be expanded to include preventive health care through the schools, and health professions legislation requires further review and extension. This manual was designed to assist schools receiving consolidated application funding in their development of a comprehensive educational program and in their writing of a school plan to reflect that program. The funds administered through the consolidated application are from both state and federal programs designed to improve the quality of the school program. The task of those participating in the consolidated application funding program is to examine the effectiveness of the school program and its responsiveness to student needs, interests, and ways of learning, and then to restructure the existing program to make it as effective and responsive as possible. Chapter 1 describes the program requirements to be met in operating programs through the consolidated application. Chapter 2 contains a summary of requirements that a written plan must meet. The appendices are basic educational references chosen to assist program planners. The programs included in the consolidated application include the School Improvement Program; Titles I, IV-B, and IV-C of the Elementary Secondary Education Act; the California State Compensatory Education Program; the Limited-English-Speaking Program; the Non-English-Speaking Program; California State Preschool Funding; the American Indian Education Program; the Miller-Unruh Program; and the staff development programs funded by California Assembly Bill 551. Identifiers—California (Los Angeles), Colorado (Denver), Illinois (Chicago), Jackson (Jesse), Missouri (Kansas City), \*PUSH for Excellence Program, Tennessee (Chattanooga), Tennessee (Memphis)

This report, the second in a series of six, describes the PUSH for Excellence (PUSH-EXCEL) Project's origins, goals, approach, and extent of implementation. Each of the six reports tracks PUSH-EXCEL's progress in six sites: Chattanooga, Chicago, Denver, Kansas City, Los Angeles, and Memphis. Chapter 1 discusses the social movement

that became the Reverend Jesse Jackson's PUSH for Excellence Project. Chapter 2 considers PUSH-EXCEL's conceptual and structural approach and the local programs that are operationalizing it. Chapter 3 describes the first crucial sequence of PUSH-EXCEL, the implementation of activities to engage students, parents, schools, and communities in joint ventures to solve the problems of schools. This evaluation report concludes with the suggestion that PUSH-EXCEL may have succeeded as a "movement" based on an inspirational message that can motivate students, parents, and teachers to achieve high educational goals; however, as a "program," it lacks specifics whereby its objectives can be achieved, and operationally it is still in a developmental mode. A coherent program of parent, community, school, and student involvement has not evolved. The evaluators suggest that PUSH-EXCEL's proponents must determine whether it is to remain a movement or become a program as well. (Author/JM)

Descriptors—Control Groups, \*Decision Making, Elementary Education, \*Organizational Development, Power Structure, \*Principals, Sociometric Techniques, Tables (Data), \*Teacher Administrator Relationship, \*Teacher Participation, Workshops

Identifiers—\*Power Equalization

The effects of a three-year Organization Development (OD) intervention on power equalization were examined in seven experimental and seven control schools. The principals and teachers from experimental schools participated in OD workshops, in a project-coordinating council for planning and policy, and in school goal-setting activities. The power of the principals and teachers became more equalized in experimental schools than in control schools. Teacher participation in decision-making was positively related to power equalization; teacher satisfaction with the administration was partially related to power equalization. Principals in schools where power equalization occurred tended to lose power during the intervention. By the end of the intervention, newcomers were comparable to experienced teachers in power. The results support the view that OD can help reduce power differences in schools. (Author)

Current vs. Ideal Procedures for Determining Educational Program-Evaluation Budgets: A Survey of School Evaluators.

Pub Date—Apr 80

Note—43p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Administrator Attitudes, \*Budgeting, \*Federal Programs, National Surveys, \*Program Evaluation, \*Resource Allocation, School Districts, State Departments of Education, Tables (Data)

Both smaller and larger school districts allocate 3 percent of total budgets, or \$4.00 per pupil, for program evaluation. Of this \$4.00, \$3.00 is spent on outcome or process evaluation, 60 cents on program planning/needs assessment, and 40 cents on dissemination/utilization. Findings are from an evaluation budget procedures survey of evaluation directors of 55 local education agencies (LEA) and 14 state education agencies (SEA). A majority recommended a 4-8 percent, sliding scale, program cost allocation for evaluation. LEA respondents judged evaluation more important to subsequent program operation than to program funding. Misunderstanding, high costs, political considerations, and poor quality evaluations lower the priority that educational leaders hold for evaluation. It is recommended that evaluators spend more time communicating and encouraging use of evaluation findings. (Author)

Descriptors—Academic Freedom, \*College Faculty, \*Court Litigation, \*Employment Practices, \*Faculty Promotion, Higher Education, \*Tenure

Identifiers—\*American Association of University Professors

The objective of the research reported in this speech was to investigate the extent to which alternatives to tenure will withstand legal scrutiny and the degree to which higher education, through the alternative configurations, and the courts, through legal interpretations, are modifying traditional tenure. Tenure principles of the profession are compared with legal principles identified in court cases involving nontenured faculty and with the alternative configurations. Eighty post-1972 court cases were utilized to explain the degree to which the courts have internalized 38 tenure principles identified from analysis and synthesis of professional literature and grouped under the general principle that "tenure is an earned status." Among the conclusions are that neither the alternative-to-tenure configurations nor the courts have altered the classical structure of tenure; the alternative-to-tenure configurations will withstand legal scrutiny; and a significant number of institutions are adopting alternatives to tenure which take a variety of configurations. The purpose of this paper is to describe and illustrate the procedure for setting up a school-community relations program. The first chapter describes the following recommended components of such a program: using a programmatic approach, using the five school-community relations processes, and designating the primary responsibilities for the program. The next four chapters explain the procedure for implementing a program with these components. Each chapter includes a description of the goals, an explanation of the process, and a case study illustrating one step in setting up the program. By following the recommended sequence and suggestions, the paper claims, a school can establish an effective school-community relations program. (Author)

Descriptors—\*Confidential Records, \*Disclosure, Elementary Secondary Education, National Sur-

veys, \*Privacy, Questionnaires, School Districts, \*School Personnel

Determining acceptable practices in maintaining personnel files is a pertinent issue for school personnel administrators today. Recognizing this, the Georgia Association of School Personnel Administrators accepted the study of this topic as a committee assignment from the American Association of School Personnel Administrators. A survey instrument was mailed to 168 randomly selected school systems throughout the U.S. and data pertaining to the general contents of personnel files and relevant procedural questions were received from 129 systems. Results showed that 87 percent of those responding allowed employees to obtain copies of materials from their own files. A second survey instrument relating directly to personnel file privacy and confidentiality was mailed to selected school systems throughout the U.S. It focused on the areas of housing and supervision of employee files, release of information, and records retention and disposal. Results showed that 61 percent of the systems surveyed outline procedures for maintaining confidentiality of information contained in employee files. The final report of the committee includes a review of pertinent professional literature, relevant legislation and its effect on personnel file management procedures, and recommendations relevant to school personnel records. Teacher Absenteeism. A Study of the Ohio Association of School Personnel Administrators.

American Association of School Personnel Administrators, Seven Hills, Ohio.

Pub Date—80

Note—17p.

Available from—American Association of School Personnel Administrators, 6483 Tanglewood Lane, Seven Hills, OH 44131 (\$3.00)

Pub Type—Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Elementary Secondary Education, Literature Reviews, Program Descriptions, \*Teacher Attendance

This paper discusses teacher absenteeism via a 1978 preliminary study of 90 school systems by the American Association of School Personnel Administrators. The major causes of employee absenteeism, cited by the participating personnel directors, were (1) personal illness, (2) illness in the family, (3) personal leave days, (4) emergencies, (5) emotional problems, and (6) alcohol and drug-related absences. Based on the survey and a review of studies from Pennsylvania and Michigan, the paper recommends that administrators establish an employee absence monitoring system and try to reduce absenteeism through more organized efforts. It suggests a specific program that would (1) deal with all employees and be well communicated throughout the school system, (2) be supported by administrators at the top, (3) recognize and reward regular attendance, and (4) involve the teacher's immediate supervisor. Identifiers—Education for All Handicapped Children Act, \*Individualized Education Programs

Recent federal and state laws and regulations mandate new and increased services for handicapped students served by local school districts and educational service agencies. Public Law 94-142 requires that free appropriate educational programs be provided for all handicapped children. To react appropriately to both federal and state mandates and to meet the demand for new and changing programs, local education agencies must initiate effective

planning for implementation of full services for handicapped students. The model described in this speech, Team-Management Decision-Making for Educators and Administrators to Meet Special Education Mandates (TEAMS), is currently being utilized in over 40 districts in four states. Outlined in this speech are characteristics of groups that should be represented on the local planning TEAM, and procedures for developing a full service delivery system. (Author/MLF)

This paper includes presentations and discussions of the second annual conference for facilitators of organization development in education. Eighty persons attended the conference, held February 1-3, 1979, in Eugene, Oregon. Organization development is defined in this paper as a sustained effort at system self-study and improvement, focusing explicitly on change in formal and informal procedures, norms, or structures, using behavioral science concepts. The format of this report follows that of the conference, with summaries of panel presentations plus discussions of interest and application groups. A list of participants and their addresses and telephone numbers is included to help stimulate the networking and sharing that were goals of the conference. (Author)

This report describes proceedings of the third annual conference for facilitators of organization development in education. Forty persons attended the conference, which was held January 31-February 2, 1980, in Eugene, Oregon. The format of the conference, summarized here, was a mix of presentations to the total group, small group interaction and work, and informal networking focusing on topics of interest to current practitioners. A list of participants and their addresses and phone numbers is included to help stimulate the networking and sharing that were goals of the conference. (Author)

Descriptors—Case Studies, Decision Making Skills, \*Educational Administration, \*Internship Programs, \*Minority Groups, Needs Assessment, \*Program Descriptions, Records (Forms), School Districts, Surveys, \*Teacher Administrator Relationship, \*Women Teachers

This document, based on the experiences of the authors in five Iowa school districts, describes a program for encouraging women and other minorities to become school administrators. Chapter 1 discusses promoting the awareness that discrimination

is a significant problem. Methods described are use of a sponsorship program for informal contact between administrators and staff members, and an internship program for exploring interest and potential in the area of administration. Chapter 2 presents behavioral studies on specific cognitive and skill-building components and defines power, influence, responsibility, and authority as they pertain to decision-making. A final chapter discusses experiences of the authors while implementing the program in districts of various sizes and ethnic compositions. Included is a copy of a needs assessment survey and a bibliography covering women in administration titles from January, 1977-June, 1979. (Author/LD)

This volume is a progress report on the status of women in elementary and secondary education. Two other volumes focus on postsecondary education. The most recent statistics available are used, and often updates of previous studies have been sought. The report emphasizes national data, and broad surveys or studies received preference. The intention of the publication is to report on the similarities and differences between females and males in elementary and secondary education. The report is organized according to concerns—student, and then professional. Information is first presented on the student-related concerns of enrollment; role portrayal in instructional materials; courses; athletics and extracurricular activities; and outcomes (including grades, knowledge, aptitudes, graduation, intent to continue education, intended areas of future study, and attitudes). Then, information is presented on the professional concerns of training, employment, salary, and governance. (Author/MLF)

The Texas plan for computer services provides services to public school districts through a statewide network of 20 regional Education Service Centers (ESO). Each of the three Multi-Regional Processing Centers (MRPCs) operates a large computer facility providing school district services within from three to eight ESC regions each of the five Regional Processing Center (RPC) computer facilities provides services to school districts within one ESC region; and Remote Job Entry (RJE) terminals transmit data and instructions from an ESC or a school district to an MRPC where actual processing takes place. Among the computer applications available to school districts are class scheduling, grade reporting, student master files, at-

tendance accounting, test scoring, payroll, financial accounting, tax accounting, and personnel accounting. This booklet contains information about the objectives and financing of the plan, and tables that show for the MRPCs and the RPCs the personnel, participation in each service offered, hardware information, and the 1979-80 budget. A directory lists the statewide advisory committee for computer services and education service center executive directors. (Author/LD)

Identifiers—Education for All Handicapped Children Act, \*Resource Cost Model

The research described in this report attempts to estimate the costs of providing an appropriate education to all school-aged handicapped children by 1980-81. The study begins by addressing the aspects of special education that will help to predict future costs—patterns of growth to the present, legal and political mandates, the nature of various handicapping conditions, and the range of programs and services for handicapped children. Two different economic approaches to cost estimation are analyzed. The report then summarizes the available information concerning the costs of special education and presents a particular approach to special education cost estimation, known as the resource-cost model approach. Data to operate the resource-cost model for national cost projections are established, and the results of the model's projections of the national costs of special education are presented. Sensitivity analyses for each of the model's variables are conducted. Following the conclusions of the study are a discussion of the policy implications of the results and suggestions for further research in the area. (Author/MLF)

Pub Date—Mar 80

Note—12p.

Pub Type—Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Academic Achievement, Analysis of Covariance, Classroom Environment, \*Comparative Analysis, \*Elementary School Mathematics, Intermediate Grades, \*Open Plan Schools, Predictor Variables, Primary Education, \*Reading Achievement, Regression (Statistics), \*Self Contained Classrooms

This mini-report deals specifically with one classroom environment variable, the physical structure of the classroom as an open-space or a self-contained room. The data for the analyses were drawn from 190 primary grade classes (grades 1-6) and 182 intermediate grade classes (grades 4-6). Classes were analyzed as units, using class means. A total of 29 variables were involved in the multiple regression analyses in order to determine what variables relate significantly to classroom structure. A series of analyses of covariance were run, using the post-test reading and mathematics scores as the dependent variables and the corresponding pretest scores as the covariants with classroom structure (open-space or self-contained) as the independent variable. Results indicated that there are significant reading test differences between the two classroom structures in the primary grades. Reading achievement gains in self-contained classrooms were significantly greater than those in the open-space classrooms. For the intermediate grades it appears that the self-contained classroom provides a better learning environment than does the open-space

classroom. The students read more on their own, need less extra help but receive more, are more frequently referred when they have reading or math problems, and present less behavior problems for teachers. At the same time, the open-space classroom is associated with higher interest in reading. (Author/MLF)

Descriptors—Achievement, Behavior Rating Scales, Biological Influences, Classroom Observation Techniques, \*Data Analysis, \*Decision Making, Definitions, Educational Diagnosis, Elementary Secondary Education, \*Emotional Disturbances, Family Influence, \*Identification, Informal Assessment, Interviews, Social Influences, Workshops

Designed as a resource for professionals involved in the identification of children with emotional disabilities, the document is a compilation of 10 papers presented at a workshop on the topic. "Identification of Emotionally Disabled Pupils—An Overview" by C. Smith provides a definition of emotionally disturbed students. "Setting Analysis Data in the Identification of Emotionally Disabled Pupils" by L. Miller focuses on the need for analysis to be integrated with information about the individual, social, and etiological factors. D. Sodac's paper, "The Use of Behavior Rating Scales in the Identification of Emotionally Disabled Pupils" discusses 10 commercially available or high utility rating scales. "The Use of Objective Observational Data in the Identification of Emotionally Disabled Pupils" by G. Fitzgerald traces the development of the procedure and discusses techniques. M. Shepp in "The Use of the Clinical Interview in the Assessment of Self-Concept and Affective State" presents theory and practical applications of the use of the interview technique. "Biobehaviorism—A Review of Biological Factors Which Affect Children's Behavior" by G. Harper discusses biochemical problems of emotionally disturbed children. "Academic Assessment in the Identification of Emotionally Disabled Pupils" by P. Rootes surveys potential instrumentation. Other papers are: "The Use of Home/Family Data in the Identification of Emotionally Disabled Pupils" (L. Pool); "Social Functioning Data" (J. Tewksbury); and "Translating Data into Decision Making" (K. Gerken). (PHR)

Identifiers—\*Child Find

Designed as a resource for all educational personnel involved with Child Find/Serve activities, the manual contains three sections which may be used independently or as a group to provide an overview of the Child Find/Serve process. The first section is an activity based handbook developed to assist in the evaluation of existing and beginning programs.

Guidelines and suggested strategies are presented to help local, intermediate, and state education agencies in the identification, appraisal, and educational services of handicapped children (to age 21). The second section contains five monographs on the following topics: (1) changes in Child Find as a result of P.L. 94-142 (the Education for All Handicapped Children Act), (2) child tracking systems, (3) interagency coordination of Child Find efforts, (4) direction service, and (5) the role of an advertising/public relations firm in Child Find. The third section is an annotated bibliography of publications covering aspects of the Child Find/Serve program. (PHR)

Administrative Interventions to Provide Educational Services for Declassified Students.

Pub Date—Sep 79

Note—15p; Paper presented at the American Psychological Association (New York, NY, September, 1979).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Administrative Change, Administrator Role, Educational Diagnosis, Educational Needs, \*Educational Responsibility, Elementary Secondary Education, \*Identification, \*Intervention, \*Mainstreaming, Needs Assessment, Research Needs, School Psychologists, \*Slow Learners, Special Programs

Identifiers—\*Declassified Students

Administrative steps necessary to provide needed educational programs for transitional students (students who have been declassified and are no longer eligible for special education programming) are discussed. The administrative steps include recognizing the new subpopulation of students, arranging for the gradual transfer of students from special education to regular education, determining available alternative programs and funding resources, and providing opportunities for changing teachers' expectations regarding the academic potential of transitional students. Along with the administrative needs, the school psychologist needs to assume a consultative role in assisting instructional personnel in working with transition students. Research is needed in the areas of identification, instruction, and assessing the academic gains of this population in nonspecial educational curricula. (Author/PHR)

Descriptors—Adult Education, \*Disabilities, Early Childhood Education, \*Educational Policy, \*Educational Practices, Educational Research, Elementary Secondary Education, Foreign Countries, \*Gifted, History, Models, Non English Speaking, Preschool Education, \*Program Development, \*Special Education, Talent Development, Teacher Education

Identifiers—Aboriginal People, \*Australia

The paper explores special education in Australia during the period 1970-80. Separate sections discuss the following aspects: (1) beginnings of special education in Australia, (2) early developments in public provision for the education of handicapped children, (3) progress in the provision for special education during 1970-80 (including such activities as the appointment and report of the Australian Pre-Schools Committee), (4) policy in special education in Australia, (5) practice in special education in Australia, (6) teacher education and training, (7) continuation of education in adulthood, (8) research in education, and (9) the integration of services. A summary and comments are provided in a final section. The author concludes that the weakest area in the provision of services is education of handicapped children from birth to 3 to 4 years. Appended are sections discussing the education of talented children, children from non-English speaking backgrounds, Aboriginal children, and R. Andrew's model illustrating the progression of the

handicapped from school to work. (PHR)

Descriptors—\*Child Development, \*Child Rearing, Emotional Development, \*Gifted, Moral Development, \*Parent Role, Social Development, \*Talent

Part of a 10 booklet series on talented and gifted education, the booklet discusses the parenting of gifted and talented children. Some myths and realities about giftedness are examined, along with differences and similarities between gifted and other children. The nurturance and broadening of children who are gifted intellectually, in the visual and performing arts, and in physical development are considered. The emotional development of gifted children is defined, and basic stages of growth are outlined, including trust, autonomy, initiative, and testing rules and relationships. Social development is discussed in terms of understanding individual style, peer groups, social growth indicators, and ways to support growth. Moral growth is described in terms of inner controls, values and decisions, and parental guidance and expectations. Techniques and notes of assurance are presented on providing

experiences for gifted children which fully develop their intellect, emotions, social sensibility, and morals. Lists of suggested readings and sources of information on talented and gifted children are also given. (DLS)

Intended for parents, the booklet (part of a 10 booklet series on talented and gifted education) discusses the gifted preschool child. An initial section considers how learning processes are broken down by developmental specialists. The use of questioning strategies with a gifted child is presented as an important parenting skill. A developmental scale is provided to help determine how the child's abilities compare with the range of "normal." The question of preschool testing is considered, along with television and companionship with other gifted children. Some ideas for types of developmental activities both in and out of the home are presented, with emphasis on making use of commonplace situations. Also discussed are low cost items to make for the child, and ideas for selection of games, toys, and experiences, with a checklist for evaluation. A list of related reading matter for both the gifted children and their parents is provided along with a list of sources of information on the talented and gifted. (DLS)

Descriptors—\*Gifted, \*Informal Assessment, \*Parent Role, \*Screening Tests, Student Characteristics, \*Talent, \*Talent Identification Identifiers—Parent Resources

Intended for parents, the booklet (part of a 10 booklet series on talented and gifted education) discusses the identification of gifted and talented children and offers general information on their development. Giftedness and talent are defined, and some guidelines for parents' identification of giftedness and talent are presented, focusing on such areas as dramatic and representational play, humor, reading, vocabulary, abstract thinking, and peer relationships. The identification process is examined in terms of testing, teacher observation, and parent identification. Parents' and children's rights are also considered. A bibliography is presented, along with a list of sources of information on the talented and gifted. Also provided are descriptions of common identification tools and a sample copy of the Boyd Developmental Progress Scale. (DLS)

Intended for parents, the booklet (part of a 10 booklet series on talented and gifted education) discusses how parents can counsel their gifted or talented child. Some tips for effective counseling are presented, focusing on such things as observation, listening, accepting, and making suggestions. The question of when a parent should counsel his or her gifted child is considered. Some helpful attitudes a parent can have toward giftedness are described, touching upon such issues as being different, the responsibility of using one's ability, and having others appreciate one's achievement. A list of sources of information on the talented and gifted is also provided. (DLS)

**Special Report on Dental Care for Handicapped People.**

Public Health Service (DHEW), Arlington, Va.; Rehabilitation Services Administration (DHEW), Washington, D.C.

Pub Date—Dec 79

Note—65p.

Pub Type—Reports - General (140) — Guides - Non-Classroom (055)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Dental Health, \*Dental Schools, \*Dentists, \*Disabilities, \*Health Services, Professional Education

Identifiers—\*Department of Health Education and Welfare

The document presents a Department of Health, Education and Welfare (HEW) special report on dental care for the handicapped. The nature and extent of the problem of providing dental services to the handicapped population is examined. The handicapped population is defined and their oral health status reviewed. Factors contributing to the poor oral health of the handicapped are considered. Current HEW programs impacting on dental care for handicapped people are described, including those in the Health Care Financing Administration, Office of Education, Office of Human Development Services, and Public Health Service. Nine areas needing strengthening or improvement are discussed, including the coordination of federal activities related to the oral health of the handicapped and the training of dental students and practicing dentists in the care of handicapped persons. Fourteen suggested actions for the department are offered, including the establishment of a focal point within the department for activities relating to the oral health of handicapped people, and changes in the Medicaid law and/or regulation. Identifiers—\*Cardinal Stritch College WI

The report discusses preparing secondary teachers to work with learning disabled (LD) students, and describes a secondary teacher preparation program in learning disabilities at Cardinal Stritch College in Milwaukee, Wisconsin. Aspects considered include the role of the secondary LD teacher, the period of adolescence, "survival" curricula, national surveys on programing options, and choosing a program option. Recent literature relating to LD program development is summarized, along with some relevant state and federal legislation. Characteristics associated with LD students are reviewed and the preparation of a secondary LD teacher is examined. Suggestions and resources for both the teacher trainer and the secondary LD teacher are presented, covering such areas as reading, mathematics, written composition, spelling, and career awareness/vocational education. Included in the five appendices are a mainstream behaviors checklist and a list of educational materials for the secondary LD student. (DLS)

Descriptors—\*Basic Skills, Child Development, Daily Living Skills, \*Disabilities, Home Instruction, \*Learning Activities, \*Parent Participation, \*Preschool Children, \*Self Care Skills

The booklet presents developmental and basic skills learning activities for parents to use at home with their handicapped preschool children to better prepare the children for school related experiences. Under each activity are provided a statement of what the activity seeks to accomplish, a list of materials necessary for the activity, suggested methods to be used in carrying out the activity, and suggested ways in which the activity can be enriched and extended. The section on basic concept development activities focuses on such aspects as color, naming body parts, identifying common objects, grouping by size and shape, position in space, and weight. Among the language development activities presented are those which stress following directions, developing good listening, rhyming words, and asking and answering questions. Motor skill development activities focus on such things as drawing basic shapes, tracing patterns, developing small and large muscle coordination, developing eye-hand coordination, developing body balance, and developing tactile awareness. Social skill development activities presented are geared toward such areas as role playing, toileting, dressing, eating, using the telephone, and socializing. (DLS)

Identifiers—\*University of Washington

Based on a behavioral technology based program at the University of Washington, a manual is presented for professionals who wish to establish a program to train retarded persons for, and place and maintain them in, nonsheltered employment. A detailed analysis of the components of such a program is provided, along with a general description of the program itself and a discussion of its underlying rationale. An outline of basic behavioral technology is also provided, covering such aspects as goal setting, measurement, and behavior change techniques. Some vocational, self help, and social skills necessary for the retarded to succeed in competitive employment are detailed, along with intervention programs to teach each of these skills. Descriptions of how to write an individual program plan and how to teach the relationship between work, money, and products are provided. A section discusses how to find jobs for clients once they have completed training, and how to insure that they remain employed. Procedures and methods to increase cooperation between the client's home and the program are outlined. Two methods to evaluate the effectiveness of a training program are described, and information about program administration is provided. (DLS)

**The Effectiveness of Special Education Classes: A Follow Up Study in a Community Mental Health Center.**Maimonides Mental Health Center, Brooklyn, N.Y.  
Pub Date—[78]

Note—9p.; Last page has faint print and may not reproduce well.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Emotional Disturbances, Family Status, Parent Influence, \*Program Effectiveness, Psychotherapy, Siblings, Socioeconomic Status, \*Special Classes, Student Attitudes

The effectiveness of special class placement was studied in 33 emotionally disturbed children (ages 8 to 19 years) attending an outpatient psychiatric clinic. It was found, among other things, that there was a positive relationship between success in a special class, and socioeconomic status, intactness of family, and absence of psychopathology in siblings. It was also found that the earlier the S was placed in a special class, the better chance he or she had for improvement, both academically and emotionally. Ss whose parents were receiving treatment for psychological problems also tended to fare better in special classes than those whose parents were not in therapy. A final contributing element in appraising the efficacy of the special classes was the Ss' evaluation and perception of the learning environment; progress in learning was shown to be correlated with feelings of acceptance of the learning environment. **The Career Development Needs of Talented Students: A Perspective for Counselors.**

Wisconsin Univ., Madison. Dept. of Counseling and Guidance.

Pub Date—79

Note—20p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Career Choice, \*Career Counseling, \*Career Development, \*Career Guidance, Case Studies, Child Development, \*Gifted, \*Needs, \*Talent

Identifiers—\*Maslow (Abraham)

Intended for counselors, the paper discusses some of the critical periods and patterns of gifted child development that relate to career and life style determination. Case histories of two gifted and talented students are offered, following their lives from early childhood through early adulthood. Maslow's need hierarchy (focusing on the elements of security, acceptance, esteem, and actualization) is used as a framework for understanding these two case histories. Twelve critical issues with regard to the development of gifted and talented children are outlined, including the fact that talented people are likely to look for a career as their principal means of self expression, that they experience conflict between achieving excellence and being accepted as normal, and that many gifted women still perceive marriage and career as mutually exclusive and make unnecessary compromises in career planning. Some general career guidance needs of the gifted are discussed and summarized. (DLS)

Identifiers—Pennsylvania

Highlights of the findings of eleven program evaluation and planning committees within the division of special education in Pennsylvania and op-

tions in the future implementation of each program area are summarized. The committee had the following purposes: (1) to revise the structure of long range and short range planning within the division of special education (DSE), (2) to revise the structure of evaluation within the DSE, and (3) to develop mechanisms for refining (1) and (2). Committees were designed to devise a set of processes to solve specific problems through examination of the general planning process, the specific needs assessment procedures, outside planning inputs, and child oriented data concerns. The major portion of the document contains appended material on such topics as the short range planning model for the physically handicapped, district needs assessment recommendations from the classroom hearing impaired program, guidelines for outside program evaluation consultants from the itinerant hearing impaired program, and an example of programwide student performance data collection from the gifted program. Identification of Declassified Students: Characteristics and Needs of the Population.

Pub Date—Sep 79

Note—15p.; Paper presented at the Annual Meeting of the American Psychological Association (New York, NY, September, 1979).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Diagnostic Tests, \*Disabilities, \*Educational Diagnosis, Elementary Secondary Education, \*Eligibility, Etiology, \*Identification, Needs Assessment, Student Evaluation

Identifiers—\*Adaptive Behavior Assessment, Declassified Students, Texas (Corpus Christi)

Procedures for the identification and assessment of the needs of declassified students in the Corpus Christi Independent School District are discussed. Declassified students are defined as those who cannot be considered as retarded when adaptive behavior criteria as well as intelligence criteria are used. Assessment is made by a diagnostic team consisting of a school psychologist and educational diagnostician. Tests are given in the areas of intellectual skills, personal adjustment, educational/learning skills, and perceptual motor skills. Adaptive behavior assessment is made using such instruments as the Vineland Social Maturity Scale, the Adaptive Behavior Inventory for Children, and the Texas Environmental Adaptation Measure (a parent interview). Adaptive behavior assessment of 596 students in a 3 year period resulted in declassification of 45% of the students. Half of the declassified students appeared eligible for special education programs; for the remaining half few programs are available and new assessment procedures need to be developed which not only identify declassified children but which discern possible reasons for poor academic performance. (PHR)

Adaptive Behavior Assessment and the Implementation of P.L. 94-142.

Pub Date—Nov 79

Note—13p.; Paper presented at the Annual Meeting of the Texas Psychological Association (San Antonio, TX, November, 1979).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Compliance (Legal), \*Diagnostic Tests, \*Educational Diagnosis, Educational Legislation, Elementary Secondary Education, Evaluation Criteria, \*Handicap Identification, Informal Assessment, \*Mental Retardation, \*Slow Learners, \*Student Evaluation

Identifiers—\*Adaptive Behavior Assessment, Texas (Corpus Christi)

Assessment of the adaptive behavior of public school children being considered for placement in the special education programs for the mentally handicapped in the Corpus Christi (Texas) Independent School District (CCISD) is discussed. Formal and informal assessment procedures are used, with a team of two associate school psychologists having the responsibility for the formal assessment of students. Assessment of the child incorporates review of the child's folder with a diagnostic team; an adaptive behavior test; an interview with parents; and a site visit to the child's school to speak with his/her teacher and observe the child in the classroom. A written report is made to the diagnostic team and a determination of placement is made. Instruments used in the assessment include the Texas Environmental Adaptation Measure (a locally developed experimental measure), the Adaptive Behavior Inventory for Children, the American Association of Mental Deficiency's Adaptive Behavior Scale—Public School Version, and the Vineland Social Maturity Scale. Assessment of adaptive behavior (as conducted in the CCISD) satisfies a number of the requirements of Public Law 94-142 (the Education for All Handicapped Children Act), such as the need for nondiscriminatory assessment techniques. Assessment has also proved useful in providing more information about students and involving parents, as well as resulting in the declassification of large numbers of students who would have been classified as mentally handicapped by previously used assessment criteria. The manual was designed to provide an overview of the Developmental Physical Management program used at the University of Alabama in classes for infants and children with multiple disabilities. The multidisabled child may be affected by one or more of the following problems: slow development, lack of normal integration of basic reflexes, abnormal muscle tone. Theory, basic assumptions, and the developmental sequence of instruction are discussed. Charts are presented which detail activities with the following aims: (1) normalizing muscle tone, (2) integrating basic reflexes, (3) facilitating desired muscle groups, (4) facilitating contraction, and (5) developing equilibrium are presented. Twenty-three techniques or uses of equipment are discussed, including vestibular stimulation, platform shoes, rubbing with towels, and the flexion seat. Among appendices are a chart on the development of balance as it relates to reflex maturation, a glossary of terms, and references. (PHR)

Identifiers—\*Money Skills

A program designed to teach money skills to the mentally retarded individual who already has the ability to count at least 20 objects is presented. An overview of the program is provided along with a list of the program goals and a section on training paraprofessionals to use the program. An evaluation instrument is included to assess the students' strengths and weaknesses in money counting and to prescribe a starting point. A section on assigning objectives describes how to determine which of the six levels to begin each student and how to record student progress. The following four sections each cover one of the program goals: (1) identifying coins and their values, (2) counting with coins of the same value, (3) combining coins of different values, and (4) counting change to \$1.00. Each goal is further broken down into a group of objectives. Specific strategies for each of the objectives are provided as well as the materials needed and a statement of expected student behavior, teacher instructions, and suggested feedback for errors. goals. Kakalik, James S.

Interrelationships of Federal Programs for Education of Handicapped Children.

Rand Corp., Santa Monica, Calif.

Spons Agency—Office of the Assistant Secretary for Education (DHEW), Washington, D.C.

Report NO.—Rand-N-1262-HEW

Pub Date—Aug 79

Contract—300-76-0065

Note—113p.

Available from—The Rand Corporation, 1700 Main St., Santa Monica, CA 90406 (\$5.00)

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Disabilities, \*Educational Cooperation, \*Educational Legislation, Elementary Secondary Education, \*Federal Programs, \*Program Evaluation, \*Program Improvement

An investigation of the interrelationships and functioning of federal programs aiding the education of handicapped children and an evaluation of possible program improvement is presented. An introductory section discusses the purpose and scope of the study, the approach used, and information sources. Section 2 provides a general discussion of alternative federal roles and functions, along with the rationales for each alternative. In Section 3 a discussion of each federal program and its role is presented, including such programs as Head Start, Centers and Services for the Deaf/Blind, and Regional Postsecondary Education. The final section examines policy options for making improvements in the federal programs. Among suggestions are an increase in educational legislation (e.g., P.L. 94-142, the Education for All Handicapped Children Act) funding; consolidation of certain federal demonstration projects; and a shift in the emphasis of the federal special education Personnel Preparation program toward inservice training. Scripts for Preparing for a Hearing, Conducting a Hearing, Writing a Decision.

National Association of State Directors of Special Education, Washington, D.C.

Pub Date—78

Note—23p.

Available from—National Association of State Directors of Special Education, 1201 16th St., N.W., Washington, DC (\$125 set of 3 cassette tapes, slides, scripts)

Pub Type—Guides - Non-Classroom (055) — Non-Print Media (100)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Compliance (Legal), \*Decision Making, \*Disabilities, Due Process, Elementary Secondary Education, \*Hearings, Instructional Materials

The text of three slide/tape presentations, designed as a media resource for trainers of hearing officers, or as self study modules by hearing officers, is presented. The first module focuses on some of the critical activities a hearing officer should complete in preparation to conducting a hearing. The second module discusses appropriate procedures for conducting a smooth hearing. The final module surveys the information to be included in a decision, and provides a format for writing a decision. Instructions for both automated and manual presentation of the materials are provided. (PHR)

Descriptors—\*Adjustment (to Environment), \*Adults, \*Employment Problems, \*Learning Disabilities, Social Experience

Three papers concerning learning disabled adults and a list of resources available for disabled people are presented. The first paper, "Colin's Own Story," was written by a 16 year old learning disabled individual, and recounts his struggles and what it is like to be learning disabled. Two poems by the author further describe his emotions and feelings about life with his disability. In the second paper, "Learning Disabled Adults Face the World of Work," Dale Brown, a learning disabled adult, describes the problems this population faces in obtaining and retaining employment. The author relates that among the problems a learning disabled person must cope with are perceptual disabilities which cause such problems as accident proneness and trouble learning a sequence of tasks. The final paper by Lynn Park, "Forming a New Organization for Adults with Learning Disabilities," traces one woman's experiences, leading her to found the Association of Learning Disabled Adults, which is designed to educate the public and provide counseling and referral services. A short list of resources for further information on learning disabilities is provided. (PHR)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Evaluation Methods, \*Learning Disabilities, \*Student Evaluation, Test Bias, \*Testing Problems, Test Reliability, Test Validity

The author traces reasons to support his contention that the state of the art in assessing learning disabled students is not good. Among issues examined are the following: use of tests for purposes other than those for which they were intended; technical adequacy of currently used tests (standardization, reliability, validity); the use of deficit scores to identify the learning disabled; bias in assessment; bias following assessment; and assessment of abilities vs. assessment of skills. The questions of who is to test and who is to make decisions regarding placement are addressed. Six factors, including increased disillusionment on the part of classroom teachers with the kinds and quality of assessment and increased emphasis on the rights of children are seen to be bringing about change. The importance of differentiating assessment, viewing tests as samples of behavior, and using technically adequate tests is underscored. (CL)

Descriptors—\*Behavior Patterns, \*Emotional Disturbances, Exceptional Child Research, Expectation, \*Labeling (of Persons), \*Stereotypes, \*Teacher Attitudes

Two groups of classroom teachers (N=36) and two groups of teacher trainees (N=36) were asked to complete behavior checklists for a hypothetical child labeled normal or emotionally disturbed and for a videotaped child labeled normal or emotionally disturbed. Analysis of results indicated that teachers and trainees held quantitatively similar stereotypes for normal and disturbed children but differed with respect to their susceptibility to label induced bias. Teachers tended to be more realistic in their evaluations of "normal," nonbiased behavior, but were influenced by the biasing label to a greater extent than the trainees. (Author/CL)

Descriptors—\*Behavior Patterns, Elementary Secondary Education, \*Emotional Disturbances, Exceptional Child Research, \*Labeling (of Persons), \*Learning Disabilities, \*Teacher Attitudes

The relationship between the diagnostic label assigned to a child (emotionally disturbed-ED, learning disabled-LD) and the type of behavior exhibited by that child was investigated with 128 special education graduate students. Ss were asked to complete one of four randomly assigned case studies in which the label assigned to the child and/or the type of behavior exhibited by the child had been manipulated.

**EC 123 901**

lated. Four label and behavior conditions were simulated and analyzed. Results suggested that label-inappropriate behavior (e.g., LD child with ED behavior) was more disturbing and less accepted than label-appropriate behavior (e.g., ED child with ED behavior). Implications for teacher training and ecological intervention were discussed. (Author/CL)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Age Differences, \*Definitions, Elementary Secondary Education, Exceptional Child Research, \*Intelligence Quotient, \*Learning Disabilities, Student Evaluation

Identifiers—Severe Discrepancy Levels

Three investigations examined the effects of IQ and chronological age (CA) on the calculation of severe discrepancy levels of 102 hypothetical and 125 actual severely learning disabled students (5 to 17 years old). Results indicated that IQ was highly influential on obtained severe discrepancy levels (SDIs) and related percentage discrepancies; that CA acted more as a moderator than as a predictor

of the SDL and percent discrepancy levels; and that high levels of error can be expected if the SDL is calculated without regard to its discrepant level and used as a placement or evaluation criterion against which to measure achievement differences. A formula is proposed to obtain 50% discrepancy levels at various IQ and CA levels. (CL)

Descriptors—Behavior Patterns, \*Behavior Problems, \*Check Lists, Ecology, \*Emotional Disturbances, \*Learning Disabilities, \*Teacher Attitudes  
Two versions of the Disturbing Behavior Checklist (DBC), an indicator of the relative disturbingness of behaviors characteristic of mildly handicapped (emotionally disturbed and learning disabled) students were field tested with 250 and 150 university students, teachers, supervisors, and school psychologists. Both checklists were relatively reliable. In light of ecological theory which suggests that disturbance may result from an interaction between a child's behavior and reactions to that behavior within an ecosystem, use of the checklist to match teachers and children may be helpful. Because a critical issue in current assessment efforts is the widespread use of technically inadequate tests, the study examined tests chosen by 159 school professionals during a computer simulation of placement decision making about potentially handicapped students. Chi square analysis showed technically adequate devices were chosen proportionately more often than technically inadequate devices when norms were considered. This differentiation was not found when adequacy was defined by validity and reliability. The author concluded that more emphasis is needed in training school professionals on the importance of technically adequate assessment devices. (Author/CL)

Descriptors—Elementary Education, Evaluation Methods, Exceptional Child Research, \*Formative Evaluation, \*Learning Disabilities, \*Mild Mental Retardation, \*Student Evaluation

The effects of two components of formative evaluation (frequency of measurement and data utilization) were compared to isolate formative evaluation components which teachers might routinely use to monitor achievement in learning disabled students. Fifty-two learning disabled and educable mentally retarded elementary students enrolled in regular class programs and receiving reading in-

struction in a special education resource room were randomly assigned to either a pretest non-data-based change group, a daily measurement non-data-based change group, a daily measurement data-based group, or an untreated control group. Analysis of results of oral reading data supported daily measurement and data-based changes as effective components of formative evaluation. (Author)

\*Program Evaluation, \*Research Methodology

Identifiers—Program Component Research

The monograph describes an approach to special education research that addresses both the promise of immediate payoff for decision makers inherent in program evaluation/validation, and the need to identify effective intervention variables of model programs that could be incorporated into other service settings. The approach, termed "program component research," is illustrated in a successful Child Service Demonstration Center for Children with Learning Disabilities. The application of program component research demonstrates that experimental research can be integrated within existing programs in such a way to benefit both research and service. (CL)

School identified learning disabled (LD) fourth graders (N=50) were compared with 49 fourth

graders who were underachieving in school (non-LD) but were not identified as LD. Both groups were administered a battery of psychoeducational tests and their performances were compared on all measures. Results indicated considerable similarities between groups. An average of 96% of the scores were within a common range, and the performance of LD and underachieving Ss on many subtests was identical. Findings could be interpreted to support either of two conflicting viewpoints: that schools are failing to identify many LD students, or that too many non-LD students are labeled LD. (Author/CL)

Descriptors—Administrators, \*Decision Making, Elementary Secondary Education, \*Evaluation Methods, \*Learning Disabilities, \*Student Evaluation, Student Placement, Teamwork

Questionnaire data from 100 directors of special education were analyzed to examine the manner in which decisions are made about learning disabled (LD) children in school settings. Information was obtained on the membership of teams making screening, placement, and instructional planning decisions; major steps involved in the assessment and decision making process; factors thought to influence the outcome of team meetings; and major problems faced by directors in the decision making process. Results indicated that although most directors agreed on some components of the process, there was considerable variation in their descriptions of how the process was carried out. Appended is a 13 step model of the assessment/decision making process. (Author/CL)

Forty fourth grade children participated in an investigation of the extent to which ratings of a peer would be differentially affected by categorical labels and assigned attributes. After viewing a videotape, Ss were assigned to one of four treatment groups (label and attribute conditions). Results from a scale requesting opinions about the child on the videotape indicated that positive attributes (humor, sports ability) produced favorable peer ratings when compared to neutral ones. No effects were observed relative to differential ratings of a child as a function of a special education label assigned to him. (Author/CL)

One hundred fifty-nine members of pupil placement teams participated in an examination of the extent to which sex, socioeconomic status, physical appearance, and nature of referral problem biased the psychoeducational assessment and decision making process for children with suspected handicapping conditions. Ss were assigned to 16 conditions in a computer simulated decision making exercise. Test usage was consistent across conditions. Only the nature of the referral problem influenced outcome decisions. Although test results indicated average behavior, decision makers classified students referred for "behavior problems" as emotionally disturbed significantly more often than any other classification. Decision makers perceived scores on intelligence tests, achievement tests, and the disparity between the two as most influential on their decisions. Personality test scores and behavior rating data were seen as having a greater influence on outcome decisions when the student demonstrated behavior problems. Decision makers perceived naturally occurring pupil characteristics as differentially influencing their decisions. (Author/CL)

Descriptors—Academic Achievement, \*Disabilities, Exceptional Child Research, \*Prediction, \*Referral, Sex Differences, \*Student Characteristics, Student Placement

Decision makers and psychologists (N=224) who had previously participated in at least two placement team meetings individually completed a computer simulated decision making program on a child referred for a suspected handicapping condition. Ss were randomly assigned to 16 different conditions varying on the basis of the referred child's sex, socioeconomic status, physical attractiveness, and the nature of the referral difficulty. Ss had access to test scores and information which indicated performance within the average range for the referred student's age and grade. Analyses revealed that the

nature of referral information significantly affected Ss' prognoses for academic success. When Ss were told the student was referred for academic problems, they predicted difficulties in math, but not in reading or speech. Ss predicted that girls referred for academic problems would have significantly more difficulty acquiring reading skills than would girls with behavior problems. (Author/CL)

Educational decision makers (N=224) participated in a computer simulated decision making experience to ascertain the extent to which referral information on a child with a suspected handicapping condition biased classification decisions. Ss were randomly assigned to 16 conditions varying on the basis of the child's sex, socioeconomic status, physical attractiveness, and nature of referral problem. Ss had access to test data, all of which reported pupil performance in the normal range. Only the nature of the referral problem was influential in the simulated decisions. A referred child was more likely to be diagnosed as emotionally disturbed when the referral statement of the problem was listed as behavioral rather than academic. Ss ignored standardized test information indicating average performance and retained the stereotype created by the referral information. (Author/CL)

Identifiers—Education for All Handicapped Children Act

The authors suggest that efforts to comply with the protection in evaluation procedures provisions of P.L. 94-142 (the Education for All Handicapped Children Act) have been characterized by attempts to identify a single fair test for use with specific groups of minority children, and that such efforts will not result in improved efforts to eliminate bias in assessment. Defining assessment as the process of collecting data to make decisions about pupils, the authors conceptualize a model in which instructional decisions are made using data on the history of intervention effectiveness with individual students. Operationalization of an instructional cascade and systematic documentation of pupil progress throughout levels of the cascade are proposed as alternatives to current norm referenced decision making practices. Descriptors—\*Decision Making, Elementary Secondary Education, Evaluation Methods, Intervention, \*Learning Disabilities, \*Program Evaluation, \*Student Evaluation, Student Placement

Proceedings from the Minnesota Roundtable Conference on Assessment of Learning Disabled children include two major presentations reviewing research and reactions to those presentations from conference participants. J. Ysseldyke's presentation "Psychoeducational Assessment and Decision Making" reviews basic considerations underlying his research on the assessment-intervention process; describes some of the issues involved (such as definitional debates, use of tests for purposes other than those for which they were intended, and questions regarding the tests' technical adequacy); and outlines six areas of research (including computer simulation studies and ecological research on placement team decision making). Reactions to the paper are given by B. Keogh, L. Goodman, and R. Woodcock. Discussion highlights on the topic follow. In the second major presentation, "Behavioral Research Methodology as a Basis for the Formative Evaluation of Learning Disability Services," S. Deno outlines background factors and assumptions of a 3 year study on the effectiveness of teacher implemented systematic formative evaluation. T. Lovitt, P. Newcomer, and J. Jenkins provide reactions, with highlights of the discussion included. A summary of discussion comments concluding the conference is also provided. (CL)

Descriptors—\*Basic Skills, Evaluation Methods, \*Learning Disabilities, \*Models, \*Student Evaluation

Identifiers—Assessment of Basic Competencies Test, Individualized Education Programs

The authors present an approach to the assessment of learning disabilities based on a definition of significant enabling skills for school learning. Students' competence in information processing, language, and mathematics is assessed in 11 tests. By using the Assessment of Basic Competencies test, it is possible to determine a child's location in each of 11 developmental sequences, as well as to identify strengths and weaknesses in clusters of skills. Assessment results provide data for designing the individualized educational program. (Author)

Descriptors—Accountability, Compliance (Legal), Data Collection, \*Disabilities, Elementary Secondary Education, \*Evaluation Methods, Federal Legislation, \*Mainstreaming, \*Student Evaluation, Student Placement

Identifiers—Education for All Handicapped Children Act

The authors consider reasons for increased emphasis on measuring pupil progress in special education, the use made of pupil progress data, the desirable qualities of measurement systems, and some problems associated with current commercial

cially available data systems. Techniques for measurement are discussed, based on the requirements of P.L. 94-142, the Education for All Handicapped Children Act, for the least restrictive environment (LRE). The authors assert that measurement rooted in the principle of LRE is more consistent with the intents of the law and more useful. In addition, they suggest that such measurement better meets the requirements for technical adequacy. (Author/CL)

The paper considers problems in current assessment and evaluation practices with learning disabled students and discusses forces for change. Among the weaknesses noted are inadequate conceptual and definitional frameworks, practitioner bias, and technical inadequacies of currently used norm referenced tests. The authors outline three factors influencing change: move to curriculum based assessment, increased concern for teacher accountability, and better application of research findings in educational practice. Descriptors—Behavioral Sciences, \*Evaluation Methods, \*Identification, \*Learning Disabilities, Program Development, \*Program Evaluation, Research, Student Evaluation

The monograph considers four issues in behavioral assessment of learning disabled (LD) students: primary assumptions of the behavioral approach, identification of LD students, program planning for identified students, and program evaluation. Among factors examined in the first section are the components of experimental analysis of behavior, including direct observation and recording and single subject research designs. The section on identification of LDs reviews the basis for creating service programs that use behavioral assessment techniques to identify LDs and speculates on effects of person centered and situation centered orientations. The use of behavioral assessment in making program planning decisions (including developing individualized education programs) is the focus of the third section. The final part reviews the role of behavioral assessment procedures in both formative and summative evaluation. (CL)

Descriptors—Compliance (Legal), Data Analysis, Educational Methods, Elementary Secondary Education, \*Learning Disabilities, Program Development, \*Program Effectiveness, \*Program Evaluation

Identifiers—\*Data Based Program Modification, \*Individualized Education Programs

The authors describe the development and use of a structured, data base approach to developing individual education programs for special education students. The components of the "Data-Based Program Modification" (DBPM) approach are described to include five decision areas: problem selection; program selection (least restrictive yet most effective); program operationalization (including identification of goals and frequent measurement of goal progress); program improvement; and program certification. Five areas of data gathering in the DBPM are also identified: initial needs assessment, program planning, implementation evaluation, progress evaluation, and outcome evaluation. (CL)

**A Guide for Teaching Creative Thinking Skills and Creative Problem-Solving in the Gifted Classroom.**

San Diego City Schools, Calif.

Pub Date—79

Note—147p.; For related information, see EC 123 927.

Pub Type—Guides - Classroom - Teacher (052)

**EDRS Price - MF01/PC06 Plus Postage.**

Descriptors—\*Class Activities, \*Creative Thinking, Elementary Education, \*Gifted, \*Problem Solving, Teaching Guides

The guide offers elementary teachers narrative statements about creative thinking in teaching and learning and contains over 100 ideas for gifted classroom activities. Narratives address the following topics: rationale for creative thinking in the classroom, definition of creative thinking, individual development of creativity, teacher and learner responsibility in creative thinking, and creative problem solving. Classroom applications of creative thinking skills are divided into three dimensions: gathering and/or isolating data (awareness, fluency, flexibility); doing things with data (perseverance, elaboration, complexity); and doing things differently (courage, curiosity, imagination, originality). Finally, creative thinking and creative problem solving are covered with sections on the creative problem solving (CPS) process, CPS process for a futuristic problem, a CPS center in the classroom, and materials for a CPS center. A list of teacher and classroom resources associated with creative thinking skills concludes the document. (SBH)

Descriptors—\*Class Activities, Cognitive Development, Convergent Thinking, \*Creative Development, \*Creative Thinking, Divergent Thinking, Elementary Education, Games, \*Gifted, Instructional Materials, Memory, Puzzles, Student Evaluation, Teaching Guides

Identifiers—\*Structure of Intellect

The document offers suggestions for developing a Structure of Intellect (SOI) program for gifted elementary students. An introductory chapter covers the definition of SOI, rationale for using the SOI model with gifted students, purpose of the guide, assessment of intellectual ability, preparation of the SOI prescription, classroom activities based on the SOI, organization and teaching strategies, and SOI tasks to be used in remedial reading. Also provided in this initial section are resources which include a list of teachers, references, SOI classification of educational materials, an outline of Erickson Elementary School lab materials, materials list for the SOI Abilities Workbook, and the SOI Institute list of materials and services. Subsequent chapters are color coded for five areas (cognition, memory, convergent production, divergent production, and evaluation) and usually include an introduction and

sections with a glossary of pertinent SOI factor definitions; a list of commercially prepared materials; descriptions of activities; and task cards (which consist of mazes, puzzles, graphs, and other instructional materials). (SBH)

Identifiers—\*Gifted Handicapped

The document presents proceedings of a workshop on the causes of underachievement in gifted children, the selection of appropriate assessment techniques for use in diagnosing underachievement in the gifted, and remedial strategies for use with the gifted underachiever. Sections address the following topics: definition of the mentally gifted child; identification; definitions of underachievement; factors contributing to underachievement (handicapping conditions, disadvantage and cultural differences, sex role stereotypes, and inadequate education); and remedial strategies (sample cases are offered to illustrate). Appended materials include a chart on facilitating and limiting culturally supported attitudes and abilities, an outline on causes of underachievement among mentally gifted students, a list of characteristics of underachieving gifted students, seven case studies of gifted underachievers, the Characteristics of Talented Pupils Checklist, an annotated bibliography of selected assessment instruments for the disadvantaged gifted, and a list of ways to help the underachiever. Identifiers—\*Bridge Youth Advocacy Program PA, \*Status Offenders

The Bridge Youth Advocacy Program is designed to provide an alternative community based service

for status offenders (10 to 18 years old) diverted from the juvenile justice system and to increase appropriate use of social services by the police, court, and magistrates. Governed by the Catholic Social Services of Luzerne County (Pennsylvania), the program has six components: family counseling, runaway youth program, youth development and coordination program, life skills education, big brother/big sister program, and youth advocacy program. Efforts to increase referrals include outreach, continuing liaison activities, and a formalized referral system. The program has been successful in substantially increasing the number of referrals to the Youth Advocacy Program and in increasing the number of referral sources. The goal of delivering services to the status offender and his family has also been met. (SBH)

Descriptors—\*Blindness, \*Deaf Blind, \*Deafness, Foreign Countries, \*Multiple Disabilities, Program Descriptions, \*Program Development, Resources, \*Services  
Identifiers—\*Alberta

The document presents the final report of the Sensory Multihandicapped Project, which planned a comprehensive program for the education of children who were sensory multihandicapped (deaf blind, deaf with other handicaps, or blind with other handicaps) in Alberta, Canada. Project activities included reviewing the literature, visiting sites serving the sensory multihandicapped in North America, communicating by letter with persons and agencies serving that population outside North America, soliciting briefs from the public, discussing the issues with public and private agencies serving the sensory multihandicapped in Alberta, and employing a number of consultants. The final report briefly outlines the project's operating plan, along with its working definitions, components, and general procedures. The bulk of the report consists of its recommendations. The general conclusion produced by the project was that the government of Alberta should proceed to implement educational, residential, resource, and support services for Alberta's sensory multihandicapped population. Appendixes include cost estimates of such a program, and an outline of the sequence of events for its implementation. (DLS)

Identifiers—\*At Risk (for Handicap), \*Ontario (London)

The preliminary report—two-thirds of which consists of tabular data—describes an early identification system used in London, Ontario (Canada) for kindergarten and first grade high risk students, and provides some data bearing on the internal consistency and concurrent validity of the system. Simple descriptive summaries of some characteristics of 5,413 students who were screened by the system are presented. High risk students were more likely than other students to be boys, in grade 1, over age for grade, and on the active caseload of the speech and language teachers. (Author/DLS)

The report—half of which consists of appendixes—describes a pilot project in London, Ontario (Canada) designed to examine the issues involved in including constant communication and cooperation between classroom teachers (CTs) and learning resource teachers (LRTs) as part of the remedial process for students with learning problems. A series of seven intervention steps developed for each LRT to structure the remedial process to ensure involvement of the CT are outlined. Findings are discussed in terms of LRT/CT agreement about the student's problem and negotiation of the intervention plan, communication with the student, monitoring the program, and followup. Several problems encountered by the LRTs during the intervention procedure are examined. Various forms are appended. (DLS)

Identifiers—\*At Risk (for Handicap), \*Ontario (London)

The paper reports on a 1 year followup study to establish the short term predictive validity of an early identification system used in London, Ontario (Canada) for kindergarten and first grade high risk students. Ratings of the students by the evaluation teams in January were compared with the students' actual placements as of the following September. Results suggested that the identification system had a satisfactory level of both short term validity and efficiency. A number of limitations of the study indicated a need for further evaluation. Descriptors—\*Disabilities, Elementary Secondary Education, \*Geographic Regions, \*Gifted, \*Individualized Instruction, Literature Reviews, \*Mainstreaming, National Surveys, Questionnaires, \*Student Placement

The paper, nearly half of which consists of appendixes, reports on a national survey investigating the relationship of individualized instruction for handicapped and gifted students to their placement, and the extent to which geographical area affects their placement and instruction. The literature is reviewed, focusing on legislation and mainstreaming service delivery models. Eight areas of exceptionality are considered: learning disabilities, emotional disturbances, mental retardation, giftedness, speech handicaps, and visual impairment. Significant relationships were found between all possible combinations of the four variables (placement, geographical area, instruction, and type of exceptionality), with the exception of type of exceptionality with geographical region. Among the results it was also revealed that placement in the least restrictive educational environment was not a good predictor of individualized instruction, but that placement in the most restrictive environment was. Appendixes include survey questionnaires and data in tabular form. (DLS)

Descriptors—\*Competency Based Teacher Education, Demonstration Programs, Ecology, Higher Education, \*Multiple Disabilities, Practicums, \*Program Development, \*Program Evaluation, Severe Disabilities, Special Education Teachers, \*Teaching Skills, \*Visual Impairments

A 3 year project was initiated to develop, implement, and evaluate a program for training personnel to work with visually handicapped/multiply handicapped children. The ecological systems model proposed by N. Hobbs was examined as the primary consideration in the development of the program. Teachers under the project were prepared for roles which included itinerant, resource, and residential teaching of the more normal visually handicapped students (grades kindergarten through 12) as well as working as specialists with profoundly low functioning visually handicapped individuals. Among project accomplishments were a literature search in which professional competencies were generated and reviewed, development of an interdisciplinary team course, and development of a Master's comprehensive examination. An evaluation component

was designed to determine the effectiveness to which program graduates are meeting the needs of handicapped children and the degree to which the program facilitates the acquisition of specified competencies. Data gathered from questionnaires administered to students, faculty, and employers formed the basis for program changes and modifications. Appendices, which make up approximately half the document, include the following: a list of states with job opportunities, a typical plan of studies, a chart of objectives and competencies, a list of tests, and guidelines for practicum. Descriptors—Demonstration Programs, \*Disabilities, \*Early Childhood Education, Home Programs, Inservice Teacher Education, \*Outreach Programs, Paraprofessional Personnel, \*Parent Education, Program Descriptions, \*Program Evaluation, \*Rural Education, Teacher Education

Identifiers—\*PEECH Outreach Project

The document provides seven appendices containing information on the PEECH (Program for Early Education of Children with Handicaps) Outreach Project. Appendix I contains a financial report form for the project. Outlined in Appendix II are PEECH Outreach goals and objectives (including the presentation of a Home Intervention Training Program), project services (such as technical assistance for replication), and responsibilities and qualifications of project staff. Appendix III consists of the final evaluation report. The report notes that five objectives were accomplished: (1) development of a model program for training handicapped children (6 months to 6 years) living in a rural area; (2) training of parents as paraprofessional educators of handicapped children; (3) use of parent paraprofessional educators as home teachers of handicapped children under the direction of certified teachers; (4) provision of preservice and inservice training of project personnel and parents of handicapped children involved in the project; and (5) provision for demonstration, dissemination, coordination, replication, and evaluation of the project. Included in the report is a detailed account of Project PEECH evaluation. A chart summarizing data on personnel receiving service is given in a fourth appendix. Tables with specific objectives data are presented in Appendix V; while Appendix VI offers copies of reports to outreach sites. A final appendix inventories PEECH Outreach professional books, texts, and training materials. (SBH)

Descriptors—\*Delivery Systems, Disabilities, Electromechanical Aids, \*Equipment, Mobility Aids, \*Models, \*Physical Disabilities, \*Program Development, Prostheses, \*Resource Centers, Sensory Aids

The document describes a model for an assistive device center that can provide a cost effective, coordinated delivery system to assure that handicapped students who need adaptive aids and equipment have access to them and are trained in their most

efficient use. The model is explained in terms of purposes and objectives, personnel, location and facilities, services and implementation, education and outreach, and interagency cooperation and funding. Guidelines for implementation and an estimated budget are presented for the model's four phases: planning and awareness, design and development of operating procedures, full scale operation, and full scale operation on a fee for services basis. Appended are brief descriptions of seven assistive device centers and two government agencies involved in funding, a list of vendors of assistive devices, and a list of resources. (SBH)

**Competency Testing, Special Education and the Awarding of Diplomas.**

National Association of State Directors of Special Education, Washington, D.C.; North Carolina State Dept. of Public Instruction, Raleigh. Div. for Exceptional Children.

Pub Date—Feb 79

Note—51p.

Available from—National Association of State Directors of Special Education, 1201 Sixteenth St., N.W., Washington, DC 20036 (\$3.50)

Pub Type—Reports - Evaluative (142) - Reference Materials - Bibliographies (131) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Disabilities, \*Graduation Requirements, \*Minimum Competency Testing, Secondary Education, \*State Standards, Surveys

The report summarizes information from a survey involving 54 state and territory directors of special education who responded to six questions regarding the following: mandated competency testing programs, individuals required to take the test, special procedures used in administering the test, awarding regular or special diplomas to handicapped students, and issuance of certificates of attendance. A table presents survey responses by state. Appended are an annotated bibliography on competency testing, a copy of the Florida Resource Manual for the Development and Evaluation of Programs for Exceptional Students, and sample diplomas. Note—80p.

Available from—National Association of State Directors of Special Education, 1201 Sixteenth St., N.W., Washington, DC 20036 (\$4.00)

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—\*Data Collection, \*Decision Making, \*Disabilities, \*Educational Administration, Elementary Secondary Education, Guidelines, \*Management Information Systems, Program Development, School Districts, State Departments of Education

Identifiers—\*Management by Information

The document offers guidelines for developing a management by information system for special education services, a system that organizes people, equipment, procedures, and communications to collect and present accurate data that administrators can use to make decisions and to provide information to state and federal governments. Following a definition of management by information and its benefits are sections which explain how to design, implement, and operate a management by information system. Based on the experiences of managers in five state and five local education agencies, the booklet uses specific examples to develop a step by step process for the system's four phases: assessment, planning, testing, and implementation and operation. Pitfalls of the system are briefly delineated. Appendices contain brief summaries of the systems at each of the state and local education agencies that Management Analysis Center personnel visited, a list of questions for determining possible external constraints that may affect system development, and an outline of data elements. **The Community Imperative: A Refutation of All Arguments in Support of Institutionalizing Anybody because of Mental Retardation.**

Syracuse Univ., N.Y.

Pub Date—79

Note—9p.

Available from—Center on Human Policy, Syracuse University, 216 Ostrom Ave., Syracuse, NY 13210

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Community Programs, \*Deinstitutionalization (of Disabled), \*Institutionalized Persons, Literature Reviews, \*Mainstreaming, \*Normalization (Handicapped), \*Severe Mental Retardation

The document cites research to support the viewpoint that community integration is preferable to institutions for the severely and profoundly mentally retarded. Refuted are such arguments against deinstitutionalization as that retarded people should be segregated, that institutions are a more efficient and less expensive way to provide services, and that some people are so retarded they cannot benefit from educational programming. **Increasing the Attending Behaviors of a Multi-Handicapped Learner Through the Functional Movement Training.**

Pub Date—[77]

Note—11p.

Pub Type—Reports - Research (143) - Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, \*Attention, \*Behavior Modification, Case Studies, Exceptional Child Research, \*Movement Education, \*Multiple Disabilities, Program Effectiveness, \*Reinforcement, \*Severe Mental Retardation, Training Methods

The study investigated the effects of the overcorrection procedure of functional movement training (in which praise and physical contact are offered for correct positions) on establishing and maintaining the visual attending of a multihandicapped, profoundly retarded learner (20 years old) in a public school program. The effectiveness of positive reinforcement was contrasted with the effectiveness of positive reinforcement plus functional movement training. The learner was required to maintain eye contact and visually attend for a specific period of time, for each condition of the study. However, in the positive reinforcement plus functional movement training condition, functional movement training was used as an additional consequence for incorrect responses to the verbal cue, "Look at me." The results indicated that reinforcement alone was less effective than positive reinforcement plus functional movement training in increasing the attending behaviors of a multihandicapped learner. **Standardized Intervention Programs: Preliminary**

**Data on Descriptive Characteristics, Methods of Dissemination and Problems of Implementation.**

Pub Date—Jun 79

Note—16p; Paper presented as part of a symposium entitled "Issues in the Dissemination of Standardized Intervention Programs" at the Annual Convention of the Association for Behavior Analysis (5th, Dearborn, MI, June, 1979).

Pub Type—Reports - Research (143) - Reports - Evaluative (142) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Disabilities, Exceptional Child Research, \*Information Dissemination, \*Intervention, \*Program Evaluation, \*Program Implementation, Surveys

To gather descriptive data regarding basic characteristics of existing standardized programs and to determine the extent to which the programs have been adopted and replicated following their initial development, a questionnaire was designed and sent to the developers of 20 standardized behavior intervention programs serving normal and moderately to severely handicapped individuals in school, home/residential, and work settings. Among findings collected from 17 respondents were that 82.4% had observed "program drift" (gradual deterioration in the quality of program implementation); that the

practices of using demonstration and training centers and of providing long term training (more than once a week) in program procedures were rated most effective in getting standardized programs into the field; and that the problem which was the most serious to developers was the lack of sufficient funding to implement programs with maximum care and precision. Respondents offered suggestions (such as to develop an efficient quality control system) for reducing program drift. (SBH)

Descriptors—\*Career Development, \*College Programs, \*College Students, \*Demonstration Programs, \*Experiential Learning, Higher Education, Internship Programs, \*Physical Disabilities, Work Study Programs

Identifiers—\*Academic Internship Program CA

The Academic Internship Program for Handicapped Students at the University of California, Riverside, focuses on the multiple career development problems faced by college students with physical disabilities. The problems these students face include a narrow range of career exposure, lack of work experience, prejudice and stereotyping by employers, and lack of interest in their career development by faculty members. The project addresses these problems by providing students with part time paid and volunteer internships, educating local employers concerning their support of the internship program, and encouraging more active involvement of faculty in the career development of these students. The booklet includes sections on the following: faculty involvement, project management and staffing, internship development, placement of interns, resolution of student transportation problems, career development, program relationship to support services and allied professionals, and future plans. **EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Career Development, \*College Programs, \*College Students, Higher Education, \*Internship Programs, \*Physical Disabilities, Program Descriptions, Program Evaluation

Identifiers—\*Academic Internship Program CA

The paper describes the Academic Internship Program for Handicapped Students at the University of California, Riverside. An introductory section provides an overview of internships in terms of function, purpose, supervision, grading systems, needs of interns, and conclusions from the literature. The project addresses student problems in the following areas: narrow range of experience, undeveloped communication skills, occupational illiteracy, lack of work experience, job stereotyping, and lack of interest by faculty members. Data is presented on evaluation of the internship program by students, faculty, and employers. Among conclusions are that all three populations involved with the academic internships were positive in their evaluations of the experience; students believed their internships related directly to their academic programs and career goals; and except for some specific physical handicaps, disabled interns performed just as well, and in some cases better, than nondisabled students. Descriptors—\*Adolescents, \*Community Involvement, Community Programs, \*Needs Assessment, Program Descriptions, \*Youth Agencies, \*Youth Problems, \*Youth Programs

Identifiers—\*Aunt Martha's Youth Service Center IL

The report describes Aunt Martha's Youth Service Center (IL), a multipurpose agency which focuses on the needs of adolescents. Founded in 1968, the agency now (1978) has a staff of 40, a 21 member board of directors, 199 volunteers, 28 foster parents, and serves a 15 township region. The goals of the program are to increase opportunities for young people to develop as productive, positively involved community residents and to create and maintain volunteer and paid assignments for youth. Among services provided for youth are a walk-in counseling center, a teen health clinic, a youth employment training program, and a speakers' bureau. An evaluation is underway to consider the agency as a whole. Among appendices are volunteer training materials, information on budget and sources of revenue, and literature on Aunt Martha's. (PHR)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—Cognitive Processes, Elementary Secondary Education, Exceptional Child Research, Guidelines, \*Induction, Information Utilization, \*Logical Thinking, \*Mild Mental Retardation, Problem Solving, \*Teaching Methods

The booklet focuses on the use of the logical inductive strategy to teach problem solving skills to mildly retarded learners. An introductory section examines three research studies on interventions in the area of problem solving with the retarded learner and concludes, among other things, that mainstreaming has underscored the need for this population to have competent problem solving skills. The second section explores strategies and tactics, such as role strategies. Discovery type inductive strategies, especially the guided discovery

strategy, in which the learner is provided some structure for the experience, are reviewed. The fourth section describes the logical inductive strategy, with emphasis on the three stages—mass, differentiation, and integration; and the five steps that comprise the strategy—labeling, detailing, inferring, predicting/verifying, and generalizing. The final section discusses methods of implementing the strategy and presents two simulated lessons and a chart illustrating the inductive problem solving sequence. (Author/PHR)

Affective education methods in special education are the concern of the text. Goals, definitions, and processes in affective education are considered in Chapter 1, which also examines such topics as the relationship between affective education and mainstreaming, teacher role, and pupil focused affective education. Specific program content is presented in the succeeding three chapters for special preschool, elementary age, and adolescent students. Each addresses the basic support needs for affective growth, affective tasks of each age group, and appropriate affective educational processes. A final chapter touches on evaluation of affective education. (CL)

Pub Date—Nov 79

Note—24p.

Pub Type—Reports - Research (143) — Reports - Evaluative (142) — Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Autism, \*Educational Needs, Exceptional Child Research, Needs Assessment, Observation, Special Classes, \*Student Evaluation, \*Student Placement

Identifiers—Iowa

The educational needs of 73 children who exhibited characteristics associated with autism were studied. Ss were children clinically diagnosed as autistic and having severe communication and behavior disorders. Trained observers completed behavioral observations, teacher interviews, student record reviews, and behavior and language questionnaires. Teachers also completed the questionnaires. Twenty-seven Ss were judged autistic without reservation, 11 were judged autistic with reservation, 10 were judged nonautistic with reservation, and 25 were judged nonautistic. For each child the observers further determined the most appropriate program delivery option and support services, the need for a data based behavior program, and communication level. The distribution by age, county of residence, and communication level suggested the need for five self contained categorical classes (or equivalent programming) for autistic students. Inservice recommendations were also made. (CL)

Descriptors—Course Evaluation, \*Deafness, Exceptional Child Research, Postsecondary Education, \*Program Evaluation, \*Student Characteristics, \*Teacher Characteristics

The relationship between student, course, and instructor characteristics and the ratings 283 hearing impaired students gave their instructors and courses at the National Technical Institute for the Deaf were examined. A previously field tested instrument containing 30 items divided into five subscales (practical gain, teacher personality, difficulty, teacher skill, and personal gain) and an overall dimension was administered to each S. Results indicated that lower faculty rank, smaller class size, greater student effort, and higher expected grades were each associated with more positive overall ratings of courses. Results were consistent with findings reported for hearing counterparts. (CL)

Perceived versus Measured Communication Ability of Deaf College Students.

National Technical Inst. for the Deaf, Rochester, N. Y.

Pub Date—Apr 80

Note—26p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—\*Communication Skills, \*Deafness, Exceptional Child Research, Higher Education, Lipreading, Manual Communication, Postsecondary Education, Program Effectiveness, Reading, Receptive Language, Writing (Composition)

Approximately 290 deaf college freshmen participated in a study of the relationship between perceived and actual abilities in eight communication modes (including reading, writing, speech reading with and without sound, and reception of manual and simultaneous communication). Ss rated their abilities before and after a communication course. Actual abilities were measured during the course. Correlational analysis indicated that accuracy of self ratings increased significantly from pre- to post-course measures on each communication mode. Results suggested that communication training can improve the accuracy of student ratings of their own communication skills. (Author/CL)

Descriptors—Elementary Secondary Education, Higher Education, \*Instructional Innovation, \*Second Language Instruction, \*Second Language Learning, \*Textbook Content, \*Textbook Evaluation, \*Units of Study

Despite some exceptions in recent years, most elementary foreign language texts continue to be organized in a typical "twenty-five lesson" format bound by an old-fashioned idea of continuity. It is argued that this format is a major source of student frustration and a barrier to optimum second language acquisition. As one possible alternative, an organization into a larger number of minimal increments

units is proposed. These small increments would allow for greater refinements in sequencing, early maximizing of student communication potential, and easier assimilation of basic structural features with less interference from exceptions and peripheral complications. The implied perspective and curricular framework is foreign language instruction at the college level, but much of what is said may also apply to instruction in the schools. (Authors)

Identifiers—\*Linkage

A study was conducted preliminary to establishing a linkage between the needs of business and government for personnel qualified in foreign languages on the one hand, and the need for career opportunities for college students studying foreign languages on the other. This volume reports on the accomplishments of each phase of the study. The initial phase consisted of a survey of the literature, to be embodied in an annotated bibliography. The government and business sectors were then queried extensively on their needs for foreign-language-trained personnel. Finally, the results of this needs assessment coalesced into models for curriculum

and material development. The project is seen as paving the way for a working relationship among the business, government, and academic sectors, whose mutual lack of communication has in the past resulted in wasted talent and training on the one hand, and imperfectly met personnel needs on the other. Identifiers—General Certificate of Education, \*United Kingdom

Advanced level French syllabuses of the nine GCE Boards in the United Kingdom are examined. The Southern Universities Joint Board has recently introduced the most radical innovations. As an alternative to its traditional examination it offers Syllabus "B" which dispenses with prescribed texts, but where each student must produce for the Oral Examiner a record of completed reading in French. The Northern Ireland GCE Examinations Board places great importance on the oral. Some perspectives on the teaching of literature are presented. Some competencies required by the parts of the language examination are also identified. (SW)

Developments in Sixth-Form Curriculum and Examinations.

Pub Date—78

Note—11p.

Journal Cit—Journal of the Modern Language Association of Northern Ireland; n1 p13-22 1978

Pub Type—Journal Articles (080)—Opinion Papers (120)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Achievement Tests, \*Curriculum Evaluation, Educational Testing, Foreign Countries, Higher Education, Language Skills, \*Language Tests, \*Modern Languages

Identifiers—\*Northern Ireland, \*United Kingdom

The sixth-form curriculum and examinations in Northern Ireland and Britain are examined. "A" level modern language examinations represent rigorous intellectual demands, in which the examiner looks for evidence of imagination, creativity, linguistic subtlety, and critical appraisal far beyond the "O" level. For the ablest students who have a gifted teacher, such a program has merit, but for many, it is a difficult task. Figures on outcomes of students enrolled in the sixth-form curriculum in England and Wales are presented. The "A" level examination system, linked with the entry requirements to degree courses, is considered by many teachers to stimulate good teaching that results in the achievement of high standards. A substantial body of educational opinion, however, is in favor of a widening of curriculum in the sixth form. (SW)

Identifiers—\*England, \*Wales

Proposals currently being debated for a reform of the examination system at 18+ in England and Wales, and comments on the proposals, are presented to aid in future planning of language courses in Northern Ireland. The context in which the new proposals arose is briefly examined. The following three standard course proposals are diagrammed for comparison: Cambridge Local Examination, Midhurst Grammar School, and Associated Examining Board. All three studies envisage much wider reading, including texts other than literary (especially Midhurst and Associated Examining Board). All explore methods of testing at present in experimental use in one board or another (e.g., multiple choice questions, techniques for examining listening comprehension). The three proposals also involve very heavy teaching and private study programs, in particular on reading. Comments are made on the following skill areas: listening comprehension, written comprehension, oral skill, written production, and reading. Each of the three proposals and a fourth one for beginners' German N level proposed by Dr. Harding are discussed. (SW)

It is proposed that modern languages be placed in the center of the secondary/comprehensive curriculum. Modern language study in the secondary school is considered from the following standpoints: academic; linguistic; travel; skill development in speaking, listening, and other language processes; and cultural and social benefits. It is also proposed that mixed-ability teaching methods best fit comprehensive education. The mixed-ability method is briefly compared with streaming, banding, and setting methods. (SW)

Descriptors—Articulation (Education), Core Curriculum, Educational Testing, Foreign Countries, \*Language Attitudes, \*Language Enrollment, \*Modern Languages, Secondary Education, \*Second Language Instruction, \*Second Language Learning

Identifiers—\*United Kingdom

The problems facing modern languages in comprehensive schools in Great Britain are discussed. Questions raised by the situations are: why do fewer pupils in the fourth form and even fewer sixth formers study a language? Why do even fewer choose to continue with their language studies when they progress into higher education? Phases in school reorganization that have influenced modern language study include: (1) the common core curriculum in the lower forms; (2) the system of options operating in the fourth form; (3) transfer between schools; (4) the place of second foreign language in the curriculum; and (5) examination systems. The most significant feature resulting from the adoption of the common core curriculum in secondary schools is that the introduction of a second foreign language in the lower forms has become generally impossible. Easier options for students than taking foreign languages result in children escaping the study of a language in their third year. When heads of schools do not offer second languages with small enrollments, the unfortunate consequence is that the minority languages die out, or are taught in small pockets of resistance. Examination systems have revealed that students have gained a wide variety of experience in their early levels. It is projected that the only language that will be widely taught in secondary schools in the 1980s will be French. (SW)

Identifiers—\*Bilingual Programs, Lau v Nichols

A manual was developed to assist administrators to assess the needs of their institutions, parents, students, staff, and educational programs relative to bilingual program planning. A second area of focus is the identification of Lau students, or students whose home language is other than English and who are not performing conceptually and linguistically at a level equal to or better than the district standard of proficiency. The core of the manual is a Needs Assessment Bank of Questions addressed to different role groups and covering a wide range of issues. Questions pertinent to particular needs and addressed to specific role groups can be selected for survey instruments, interview questionnaires, and other devices. The purpose and use of needs assessment for bilingual education planning are discussed to provide a general approach to needs assessment implementation. The discussion focuses upon: (1) identification of goals, (2) design of assessment procedures, (3) development of assessment instruments, (4) development of sampling plans, (5) collection of data, and (6) analysis of data. A brief discussion of the purpose and methods of conducting a sociocultural survey of the students' community is included. (SW)

Identifiers—Civil Rights Act of 1964 Title VI, Lau v Nichols

This manual deals with the Lau Center's technical assistance approach for assisting school districts in their efforts to develop an educational master plan to meet compliance guidelines of Title VI of the 1964 Civil Rights Act as it pertains to limited or non-English-speaking students. The following areas are addressed: (1) impact of "Lau v. Nichols" decision on community/parent involvement in an educational master plan, (2) the direct effect of the decision on school districts, (3) minimal Lau remedies, (4) what school districts need to do to comply with the remedies, (5) Lau Centers, (6) the San Diego Lau Center's position on bilingual/bicultural education, (7) the technical assistance process of the San Diego Lau Center, (8) the purpose of Title VI Lau Steering Committee, (9) selection and responsibilities of steering committee members, and (10) community workshop case studies. The case studies are designed to aid in the development of a comprehensive educational master plan. The following areas are discussed: noncompliance, student language determination, curriculum development, staff development, counseling and guidance, community relations, and administrative reorganization. Data from the Survey of Income and Education, conducted nationwide by the Bureau of the Census and the National Center for Education Statistics, provided information on the birthplace and language characteristics of persons of Chinese, Japanese, Korean, Filipino, and Vietnamese origin in the spring of 1976. The largest single group within this total identified itself as Japanese—620,000. Though they live in the United States, 57 percent of those studied were born in Asia. The Japanese contrasted sharply with the other groups, since nearly three-fourths of them were born in the United States. Two-thirds of the people studied lived in households in which Asian languages were spoken. A person's birthplace was related to his or her current language exposure and usage. Among U.S.-born Asians, excluding the Japanese, about three out of five lived in households in which Asian languages were spoken. In contrast, more than four out of five Asians born abroad lived in such households. Fewer than a third of U.S.-born Japanese lived in Japanese-speaking households, but nearly 7 in 10 foreign-born Japanese did so. (SW)

A description is presented of forty classroom-tested activities for motivating students to practice listening comprehension and speaking skills in any foreign language. Some of the activities include practical suggestions and follow-up activities. All the activities are preceded by a statement of purpose, categorized by proficiency levels (beginning, intermediate, and advanced), and grouped under three subheadings: (1) *tete-a-tete* conversations, (2) small group interactions, and (3) whole class activities. The table of contents is arranged to provide a cross-reference to each communication activity. A list of sources is included. (Author/AMH)

These 16 papers in French and English deal with questions related to the purpose of learning a lan-

guage, one's native language as well as a second one. Specifically, the presentations deal with the following topics: (1) consideration of learners' needs; (2) the usefulness of learning English in Quebec; (3) the tension between knowledge and competence with regard to a second language; (4) language styles; (5) norms in the teaching of French as a native language; (6) language for special purposes with reference to French as a second language; (7) error analysis and the teaching of second languages; (8) literature in teaching French as a native language; (9) teaching and learning strategies; (10) methods in teaching French as a native language; (11) communication skills; (12) techniques for teaching language skills to native speakers of English; and (13) perspectives for the future. The contributors are: K. Chastain, A. Boudreau, M. Perez, A. Lowe, J. Hamers, G. Bibeau, R. Pelchat, H. Cedergren, L. Van Toch, M. Buteau, A. Mareuil, H. Holec, S. Savignon, Y. Sirois, A. A study was conducted of the Baie Sainte-Marie Acadian dialect, a particular form of the French language derived from the French spoken in France during the 16th and 17th centuries. The purpose of this study was to analyze and explain a certain number of morphosyntactic deviations from standard French, from both a synchronic and a diachronic perspective. The two questions of particular interest were: (1) the relative importance of the influence of the English and French systems, and (2) whether the deviations discovered were clearly and systematically structuring themselves. Four male and four female informants, representing two age groups (30 to 60 years of age, and over 60) recorded conversations with other Acadians. From the transcript, a corpus of 16,000 words was derived. The analysis concentrated on verbal and prepositional syntagma. Analysis of the data showed that: (1) there was a close correlation between the number of years of schooling and the number of deviations from standard French, and (2) most of the deviations were archaisms going back to the first half of the 17th century. The conclusion was drawn that the Acadian dialect is more archaic than anglicized as far as the source of the deviations is concerned. While the question of the self-structuring of the deviations proved to be more difficult to answer, the data furnished several examples of systematic simplification of the verbal morphology. (AMH)

Three essays are presented that deal with phonetic correction and that are intended specifically for Anglophones. They deal with the following topics: (1) methods and processes useful in phonetic

correction with students called "false intermediates"; (2) a synthesis and a methodology of methods of phonetic correction of the "French R" with particular reference to speakers of English; and (3) the teaching of rhythm and its role in the phonetic correction of French. The first essay outlines a methodology for phonetic correction designed for students who exhibit the ability and the desire to converse spontaneously and who have had some years of instruction in French. An outline is given for a dynamic and somewhat eclectic program that is considered appropriate for these students. The second essay discusses the norm proposed for the pronunciation of the "French R" and the difficulties involved for speakers of English. It outlines a method that uses insights and techniques from traditional procedures as well as from on-going research. The final essay describes the rhythm of the French language and provides a detailed description of several exercises designed to facilitate its acquisition. (AMH)

This text, designed to provide teachers and teacher-trainees with a comprehensive and up-to-date grasp of the theoretical foundations of foreign language teaching, is based on the assumption that a teacher-trainee needs to gain broad but systematic knowledge of the process of second language acquisition in order to understand and adapt teaching techniques. The subject matter of the text, divided into twelve chapters, is examined from the interdisciplinary perspectives of linguistics, psychology, and education. The following topics are covered: (1) language-learning and teaching; (2) first language acquisition; (3) comparison and contrast of first and second language acquisition; (4) human learning-theories, cognitive and learning styles, personality factors, and sociocultural variables; (5) contrastive analysis and language learning; (6) error analysis and interlanguage; (7) discourse analysis; and (8) foundations of measurement and research. Although specific techniques and procedures are not within the scope of the book, general approaches and methods are described in the final chapter. (AMH)

Book one of an intermediate-advanced level German refresher course for college students is presented. This volume consists of nine lessons and 30 prerecorded tapes. Each of the nine lessons is subdivided in the text into five parts, as follows: narrative, dialogue, questions and answers, exercises, and memorization. The book is designed for those stu-

dents who have already successfully completed the equivalent of an elementary college-level German course of one year or more. Mastery of book one, with its accompanying tapes, prepares the student for the advanced-level corpus of German materials contained in books two and three. Book four is a special military supplement. Book two, part one, of an intermediate-advanced level German refresher course for college students is presented. The volume consists of 42 lessons of text material and 42 prerecorded tapes. A typical unit is made up of spontaneous dialogues, substitution drills, and tests. A dialogue for listening is a short conversation between German speakers who did not use scripts and whose speech contains authentic segments of spoken language. A dialogue for memorization is a repetition of the dialogue for listening with an opportunity for students to repeat parts of the dialogue on tape to facilitate memorization of the material. A dialogue for fluency is a further step in facilitating student memorization of the dialogue. A dialogue for listening permits students to hear the original dialogue once again. The students listen to improve pronunciation and to hear the intonation of the native German speakers. The dialogue for participation is an informal checkup. Students test their ability to perform each of the two roles on tape from memory. On the tests at the end of each unit, students are asked to listen and immediately provide a suitable written English translation. (SW)

Book four, part one, of an intermediate-advanced level German refresher course for college students is presented. The volume consists of 25 lessons of text material and 50 prerecorded tapes. A typical lesson with its two accompanying tapes is made up of interrogation, military terminology drill, and a comprehension test. The materials of the first tape of each lesson are divided into four sections: interrogation for listening, interrogation for memorization, additional interrogation for listening, and military terminology drill. The interrogation for listening is a short exchange between an interrogator and a subject in a typical military situation. The interrogation for memorization is a repetition with an opportunity for students to repeat it on tape to facilitate memorization of the material. The military terminology drill consists of a series of military terms, heard first in English and then in German. After students have completely memorized the dialogue they listen to improve pronunciation and to hear the intonation of native German speakers. After this there is an informal checkup by which students test their ability to perform each of the two roles on tape, in turn, from memory. (SW)

Descriptors—Bibliographies, \*Bilingual Education, Bilingual Studies, \*Bilingual Teacher Aides, Classroom Techniques, \*Competence, Cooperative Education, \*Curriculum Development, Educational Research, Elementary Education, Instructional Materials, Internship Programs, Mexican Americans, \*Skill Analysis, Spanish, Teacher Education, Teaching Methods, \*Teaching Skills

A study was conducted to identify the competencies needed by bilingual teacher aides in an elementary school program. A task analysis, in the form of a 341-item questionnaire, was disseminated to 131 bilingual teacher aides in Arizona to determine both the difficulty and frequency of the tasks performed by the aides. To further validate the results, personal interviews with 40 monolingual teachers in bilingual programs and 40 bilingual teacher aides were conducted. Based on study results, it was concluded that bilingual teacher aides are unprepared to perform in the areas for which they are employed. The results were used as a basis for planning a curriculum specific to immediate needs of the bilingual teacher aide. A sample questionnaire, a literature review, recommendations for the development of training materials for the bilingual teacher aide, and bibliographies to guide teacher aide trainers are included. Bibliographies are on the following areas: (1) Spanish for bilingual teacher/teacher aides, (2) the Mexican American child in the classroom, (3) Mexican history and culture for the classroom, (4) communication patterns, methods and material in bilingual education, (5) classroom management for the bilingual teacher aide, (6) cooperative education/internship, and (7) concepts of bilingual education. Descriptors—\*Articulation (Speech), \*Consonants, Language Patterns, Language Research, \*Language Universals, Phonemics, \*Phonetics, Phonology

Identifiers—\*Ejectives (Phonetics), \*Implosives (Phonetics)

Two possible explanations based on elementary facts of physics are suggested for the universal preference for place of articulation of implosives and ejectives. Languages show a preference for ejectives in the order: velar, alveolar, and labial while implosives occur most often in the opposite order. A language will only have velar implosives if it has alveolar and labial. It will only have labial ejectives if it has alveolar and velar. The fact that this tendency holds in so many languages suggests a phonetic basis. Various explanations of this phonetic basis are summarized and two new hypotheses are suggested. The first of these is based on the action of the larynx in changing air pressure. The other involves the different sizes of the cavities created by closures at the

different places of articulation and the differences in ability to change the size of those cavities. (PMJ)

Descriptors—Alaska Natives, \*American Indian Languages, \*Bilingual Education, Cultural Education, \*Eskimo Aleut Languages, \*Instructional Materials, \*Reading Materials, \*Reference Materials, Second Language Instruction, Second Language Learning, Uncommonly Taught Languages

A bibliography on Alaska native languages covering educational publications printed during 1968-78 is presented. The document concentrates on printed materials produced for school use in modern practical orthographies and is divided into two major sections, Indian languages and Eskimo-Aleut languages, and within these into sections by language. All Alaska native languages except Eyak are represented. The introductory paragraph at the beginning of each section briefly describes the language's status, service agencies, bilingual education programs, and present active research. For most languages, the name and address of at least one linguist knowledgeable on the language is included, as well as a list of a few ethnographic or literary works on the background of the people and their culture. The reference section lists such basic works as dictionaries and grammars. Because of the availability of a number of relevant works, sections on bilingual education materials are added for Central Yupik and Inupiaq. These include reports, curricula, and similar materials, in English, referring specifically to these languages. Materials designed primarily for learning the native language as a second language, including nontechnical (teaching) grammars, graded lessons, conversational lessons, and basic vocabulary materials, are included. All materials are designated by the appropriate educational level. (SW)

The fourth annual report of the National Advisory Council on Bilingual Education summarizes the condition of bilingual education in the United States and describes the administration and operation of Title VII. The Council recommendations include the following: (1) that the Commission on Foreign Languages collaborate and coordinate its effort with the National Advisory Council; (2) that there should be a separate Department of Education at the Cabinet level; (3) that the Bilingual Education Act be expanded to provide more than short-term transitional projects designed to promptly mainstream students into an all-English program; (4) that the bilingual education program take a holistic approach to education of the entire family and conduct research on adult learning; (5) that research be conducted that examines the existing methods of implementation of bilingual programs at the second-

ary level; (6) that longitudinal studies be conducted of those projects which would assess the cognitive and affective development of limited English proficiency children; (7) that the Office of Bilingual Education (OBE) place a higher priority on materials development and dissemination; (8) that the OBE develop conceptual models for inservice training programs in the target languages; and (9) that the OBE institute training programs for the preparation of bilingual personnel at the secondary level. Federal and state programs in bilingual education are detailed, and current federal research in bilingual education is described. (SW)

Descriptors—French, German, Indo European Languages, \*Language Planning, \*Linguistic Borrowing, Public Policy, \*Regional Dialects, \*Sociolinguistics, \*Unwritten Languages

Identifiers—\*Alsatian Dialects, \*France (Strasbourg)

The effects of differing and often opposing language policies on the sociolinguistic position of the Alsatian language are discussed. An attempt is made to show how the function and scope of Alsatian have been reduced, and how borrowings from French have created a dialect with unique characteristics. It has survived despite its lack of official status and has become a symbol of Alsatian ethnic identity. The primary area of focus is the dialect variety spoken in the city of Strasbourg. Alsatian, a German dialect spoken in Eastern France, is thought to have been influenced by alternating French and German dominance and concomitant differing language policies. Subjected to policies aimed at producing linguistic assimilation and uniformity, Alsatian has survived as an unwritten speech. Through intensive and prolonged exposure to French, it has incorporated numerous French borrowings that underwent characteristic phonological and morphological changes. More recently, a general trend toward regionalism in France and an upsurge of protest movements, aimed at defending the rights of minorities, have generated a revival of the dialect. (SW)

Descriptors—\*Child Language, \*Concept Formation, Developmental Stages, \*Discrimination Learning, Form Classes (Languages), Function Words, \*Language Acquisition, Language Research, Learning Processes, \*Semantics

Nonsense forms with nonsense labels were utilized in a match to sample task to observe whether children's word extensions are based on static form characteristics or on functional action characteristics. The stimuli consisted of: (1) a single model object which performed an action; (2) a selection array consisting of one object similar in form to the model, but with no demonstrated action; and (3) another object of a very different form than the model's, but which performed a similar action to that of the model's. Subjects were 31 normal preschool children ranging in age from 2;3 to 5;9. When form and action were in competition for the basis of the children's selection responses, action was the more frequently noted basis. More data are being collected from older children to observe when a shift in basis of extension occurs. Longitudinal data are also being collected on four children, two of whom are presently action based, and two of whom are presently form based in their word extensions. Implications for contrastive investigations with language impaired children are noted. (Author/SW)

Regression, Surface Constraints and the Acquisition of Mid Vowels. *Kansas Working Papers in Linguistics*, Vol. 4, No. 2.

Kansas Univ., Lawrence. Dept. of Linguistics. Pub Date—79

Note—21p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Articulation (Speech), \*Child Language, \*Consonants, \*Language Acquisition, \*Phonology, \*Speech Communication, \*Vowels

Identifiers—\*Constraints

One English speaking child's phonological, semantic, and syntactical development from 15 to 21 months old is detailed in order to investigate the development of the mid vowel categories in English as reflected in spontaneous speech production. Prior research on this topic is summarized to reveal certain trends in the development of mid vowels. This study compared the child's four basic categories of vowels with the full range of an adult's in order to determine correspondences. Realization rules based on these correspondences were postulated. These rules accept adult surface forms as input and give the child's sound categories as output. These are shown to be functionally related. The pattern of mid vowel development from Stage I to Stage II suggests that these vowels can be described by the term regression. It is concluded that phonological acquisition is characterized by an interaction of the inventive nature of the child and the inherent constraints on the phonological category system. (PMJ)

Descriptors—\*Abstract Reasoning, \*Child Language, \*Comparative Analysis, \*Concept Formation, \*Developmental Stages, \*Discrimination Learning, \*Fundamental Concepts, \*Language Acquisition, \*Language Research

Recent literature on the acquisition of "more" and "less" is reviewed with special emphasis on some key issues. The overriding goal of studies in this area has been the discovery of the developmental sequence that the child follows in acquiring "more" and "less," and, more generally, all comparative structures. The earliest empirical studies on this area provided some initial evidence that "less" means "more" for young children. On the basis of these empirical findings, the investigators, along with others, concluded that "less" and "more" are synonyms for children at some immature point in their development. However, contradictory empirical evidence indicated that at least some groups of children do not treat "less" and "more" as synonyms. Because of the discrepancies found between some of the studies in children's responses to "less," investigators became more aware of the possibility that the type of task required of the child may influence the accuracy and type of responses. It is suggested that "less" is never synonymous with "more" for a child. There is some evidence that the non-linguistic response bias of choosing the greater of two amounts coincides with not knowing "less." Virtually all the studies conclude that children learn "more" before "less." It is concluded that the acquisition of an adult-like understanding of "more" appears to take years of development. (SW)

Descriptors—\*Discourse Analysis, \*English (Second Language), \*Expository Writing, \*Indians,

\*Native Language Instruction, Post Secondary Education, Rhetoric, \*Second Language Instruction, \*Writing (Composition), Writing Skills, Written Language

A study was conducted to investigate: (1) what linguistic and mental abilities are involved in composition; (2) to what extent undergraduate students in India possess these abilities, in English and in their native language; and (3) to what extent these abilities are being taught. The major portion of the paper discusses the nature of composition, its value as text (cohesion), and its value as message (coherence). Composition features which produce coherence are analyzed in a hierarchy of three categories: communicative purpose, communicative function, and communicative act. The various language functions and their corresponding speech factors are tabulated. The purpose, function, and acts of expository writing which most students will use are detailed. Informational strategies used in composition writing—the synthesis, structuring, weighting, signposting, redundancy, surprise value, and tonality of the information are discussed. An empirical investigation of the student papers revealed that they did not possess in their native language or in English the skills necessary for composition writing. These skills must be taught concurrently with the grammar of the language. (PMJ)

Identifiers—\*Ewondo

A descriptive grammar of Ewondo, a Northwest Bantu language spoken in southern Cameroon, Africa is presented. Ewondo is a dialect cluster which is part of a larger dialect cluster usually called Yaunde-Fang. The variety of Ewondo presented is based on the speech of a single individual, who comes from Yaunde-Eturi. Occasional references to other dialects are included. Contents of the grammar are as follows: symbols, phonology, stem and word formation, noun classes, noun formation, modifier nouns, pronouns, verbs, stem extensions, auxiliary verbs, adverbs, prepositions, conjunctions, sentence types, relative clauses, coordination, and if-clauses. Some exercises, a dictionary, and a brief bibliography are included. (SW)

Trends in foreign language education in the United States have addressed themselves to the questions "Who?" "What?" "Why?" and "How?" In the period when the grammar translation method was in vogue, "Who?" was answered by the other three questions, since this approach to foreign language instruction was appropriate only for an intellectual elite. During the audiolingual period, national interest was emphasized in answering "Why?" "What?" was spoken language, and "How?" was with the use of drills to reinforce supposed "cognitive" patterns of language acquisition. "Who?" was again subordinated to the other three interrogatives, as students who could not sustain the regimen dropped or were dropped from language programs. A third development was natural language learning, in which the process of first language acquisition was superimposed on a "methodology" of second language education that emphasized social interaction. The current state of instruction completes the advancement of "who" and starts with the premise that "what," "how," and "why" are largely up to the students themselves. There is every indication that today's students are very interested in foreign language study for a wide variety of reasons. They deserve access to a variety of methodological approaches to meet their individual needs. (JB)

Descriptors—Career Education, Cluster Analysis, \*Educational Objectives, \*Educational Research, \*Educational Trends, Language Teachers, Program Development, Questionnaires, \*Second Language Instruction, \*Second Language Learning, Second Language Programs, \*Surveys

Educational goals and objectives of foreign language programs in the United States are described. Trends in objectives are divided into a practical and a personal domain. Practical considerations include: (1) the duty of the school systems to provide a thorough basic education for the taxpayers' dollars, (2) career education, (3) equality of educational opportunity, and (4) lifelong learning. Among personal considerations are: (1) personal development, (2) interpersonal communication, (3) multicultural education, (4) development of a global perspective, (5) developing the full potential of the gifted, and (6) revived emphasis on a humanistic and liberal education. Results of a survey of 580 foreign language teachers from around the world are reported. Seven focused approaches to language teaching are identified by clusters of choices of objectives that characterized teachers of given languages in given geographic areas. These clusters are compared to the author's predicted clusters. The realities, as opposed to the predictions, showed that most teachers related language learning to their students' career plans. Varying objectives within the United States and international differences in objectives are discussed. Suggestions for accommodating a language program to student needs are offered. The survey questionnaire is appended. (JB)

Descriptors—Case Studies, Cognitive Style, \*Individual Differences, Induction, Language Processing, \*Language Research, \*Learning Processes, Psycholinguistics, \*Reading Skills, Remedial Instruction, Second Language Instruction, \*Second Language Learning, \*Translation, Vocabulary Skills

The decoding behavior of Cindy, a junior high school student of French, was analyzed. An examination of a transcript of her attempt to translate a French passage aloud into English revealed that she was not taking advantage of contextual guessing. During remedial sessions, an attempt was made to discover the best method of helping Cindy acquire the strategies of a contextual guesser. A reasonably successful model was found in a translator who kept some segments in the foreign language and read each task only once. Cindy was able to adapt the strategies of this model to her own needs, and the results was a list of 12 differences in strategic approach between Cindy and the model. At the end of the sessions, Cindy's decoding behavior had improved considerably. These results imply an important role for inductive techniques in teaching reading strategies in second languages. The implementation of an inductive approach is seen as requiring: (1) a re-evaluation of many former assumptions about learning ability, (2) the establishment of a procedure for identifying individual learning styles, and (3) a classification system for self-report data. This general assessment of the foreign language teaching profession moves from a discussion of the milieu in which the foreign language teacher works to an attempt to address the question, "Can teachers really make a difference?" The need for vision in the teacher's role is affirmed in the context of the difficulties of identifying the characteristics of the effective second language teacher. The essay culminates in an effort to synthesize knowledge about several issues that influence the daily decisions of every language teacher in every classroom. The following conclusions are set forth: (1) the instructor must be discriminating in decisions about use of the native language; (2) the practice of new language structures and vocabulary can take many forms, the only requisite being that students attend to meaning in order to respond; (3) careful analysis and judgment by an instructor will result in less use of rote learning than is currently the case; (4) the instructor must exercise great care in choosing his response to wrong answers or no answers from students; and (5) in responding to requirements to mainstream handicapped children, a knowledge base can be built both from the field of special education and from new classroom experience. This new method for teaching college English in India is based on prior assumptions but is given a justification and a methodological framework previously lacking. The method, which lies somewhere between the manipulative control and regimentation employed at the school level and the total freedom of the existing college method, is described in three parts: (1) the organization of the materials, (2) the teacher's presentation, and (3) the exercises and practice by the students. The linguistic and literary qualities that reading texts should reflect in order to encourage the habit of reading and develop reading skills are listed. Suggestions are made for: (1) motivating the students to read, (2) improving reading speed and comprehension, (3) handling special vocabulary and problems of syntax, (4) writing exercises for the students, (5) leading oral discussions based on the reading, (6) expanding vocabulary skills, and (7) preparing grammar exercises based on the reading. Suggestions for written work, which should reinforce the oral activities and be part of every class, are also offered. (PMJ)

Descriptors—Elementary Secondary Education, \*English (Second Language), Expressive Language, Language Experience Approach, \*Language Usage, \*Second Language Instruction, Second Language Learning, \*Student Experience, Teacher Role, \*Teaching Methods, \*Writing Instruction, \*Writing Skills

A method is described for teaching writing to students for whom English is nearly a "first" language by virtue of the nature and circumstances of their use of it. The basic tenet of the approach is that the student can only learn to write well if he has a belief in himself and in the value of his own responses. To write well, the student must grapple with aspects of the language in direct relation to what he has to say. The writer is directed to express feeling and thought on a level of actual experience, not an abstract one. The teacher can help by: (1) suggesting ways to select and order the experiences of the student, and (2) discussing his use of the language in relation to his content. Traditional prescriptive models of writing are concerned with the initial set of rules of the language and with the end product. However, this approach is concerned with the personal and social functions of language as well as with the selection, ordering, and extension of experience and language. Samples and analyses of student writing illustrate the point. (PMJ)

Identifiers—\*Evaluative Programs for Innovative Curricula

Results of an experimental study in India comparing two alternative procedures for teaching the set English text for class IX are examined against the background of the general mental ability, verbal reasoning ability, numerical reasoning ability, and general intelligence of the pupils. Other variables considered in the analysis are sex, age, and socioeconomic background. The two procedures compared are the oral presentation of structural and vocabulary items: (1) independent of the reading passage, and (2) in the context of the passage. Procedure 1 appears to be weighted against pupils with higher general intelligence. Procedure 2 is more effective with students of average general intelligence. This successful method, which relates language drill to actual communicative activity, should be adopted by language instructors since it increases reading comprehension, one of the major tasks of teachers in India. Extensive tables and graphs display all the data obtained in the study. (PMJ)

Identifiers—Speech Acts

An understanding of the structure and function of discourse in social communication and in its internal representation to the individuals is sought in this multidisciplinary collection of papers. The approaches are divided into theoretical orientations and empirical orientations. The theoretical papers deal with: (1) comprehension in conversation, (2) creativity in verbalization and its implication for the nature of stored knowledge, (3) semantic processing units in understanding text, (4) the discovery of a functional theory of discourse, and (5) a critical review of theories of speech production. Topics covered in the empirical papers that have a sociolinguistic and psychosocial perspective include: style variables in referential learning, the effects of setting and dialect on young children's use of language, and prose processing. Papers emphasizing psycholinguistic concerns focus on: (1) the encoding of articles and quantifiers in textual comprehension, (2) the psychology of conversation, and (3) children's illocutionary acts. Topics with an applied basis include: (1) the ways in which speakers use noun phrases to instruct their listeners; (2) verbal teaching patterns; and (3) what is remembered from prose. Each article includes a specialized bibliography for further reference. (PMJ)

Descriptors—Child Language, Connected Discourse, \*Discourse Analysis, Language Acquisition, \*Language Patterns, \*Language Processing, Language Research, Language Usage, Problem Solving, Psycholinguistics, \*Reading Comprehension, Recall (Psychology), Second Language Learning, Semantics, \*Sociocultural Patterns, Sociolinguistics, \*Speech Communication, Story Telling, Syntax

Two theoretical orientations—schema theory and cultural norms for the use of language unify this multidisciplinary collection of papers examining discourse. Chapters by Adams and Collins; Warren; Nicholas and Trabasso; Stein and Glenn; and Freddie and Hale highlight the application of schema theory to the study of story recall, reading, and the transfer of story schema to increase comprehension of prose. Five chapters focus on cultural schemata. The ways different interpretive frames are used to synthesize what people have seen and how the frames are realized in speech is explored by Tannen. Nix and Schwarz explain how differences in the cultural experiences of Black and White American children alters their interpretation of passages. Freddie and Duran illustrate how dialogue involves scripts for managing social interaction. Ochs offers evidence for the specificity of certain syntax rules suggesting that language structure in part may reflect social processes and structure. Scribner explains how western methods and culture influence problem-solving approaches. Papers by Keller-Cohen and Cherry discuss how discourse theory can be used to study the first and second language acquisition of children. Clements investigates Grimes' theory of how propositions are staged so as to achieve varying degrees of textual importance or relevance in the total text. (PMJ)

Identifiers—\*Bilingual Inventory of Natural Language, \*Reading Miscue Inventory

The progress and problems of five Spanish-speaking fourth graders who have learned to read only in English are traced. An attempt is made to ascertain the relationship between oral fluency in Spanish and English and reading ability in English, the effects of dialect-based miscues on reading comprehension, and the types of reading strategies these students employ. Measurement tools used were the Bilingual Inventory of Natural Language and the Reading Miscue Inventory. The results of these are tabulated, and explained in detail with examples. Results of the study show a high degree of correlation between oral fluency in Spanish and English, and reading ability in English. Dialect-based miscues did not hamper reading comprehension; the students did not demonstrate a need to have the printed word make sense. However, the ESL teacher is mandated to stress the centrality of meaning in the reading process. (PMJ)

Identifiers—Aspira Decision, Bilingual Education Act 1968, \*New York (New York)

A longitudinal sociological study was conducted on the impact of the implementation of the Bilingual Education Act and the Aspira consent decree in New York City. The study sought to develop a theoretical framework for analyzing the participation of the Puerto Rican community in the implementation of the bilingual education policies. The question of whether federal laws and the courts can protect the educational interests of language minorities was investigated. Bilingual education provided in connection with the Aspira consent decree was directed to Puerto Rican students who were unable to participate effectively in classes taught only in English. The political development and educational problems confronting Puerto Ricans before and after federal endorsement of bilingual education were analyzed. It is suggested that it has been difficult for new groups to use the traditional political process to promote and protect their interests. The data reviewed suggest that the federal policies concerning bilingual education have provided some limited resources to promote the educational and economic interests of the Puerto Rican community in the school system. Limitations concerning the Aspira consent decree are discussed. (SW)

**Suggestopedia and Literacy.**

Pub Date—79

Note—22p.

Pub Type—Opinion Papers (120)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Adult Basic Education, Experiential Learning, \*Instructional Innovation, \*Literacy Education, \*Reading Instruction, \*Sensory Integration, Teaching Methods, \*Writing Instruction

Identifiers—\*Suggestopedia

The emotional and paracognitive characteristics of an adult who is faced with the need to learn to read make the use of the suggestopedic instructional method, which operates below the level of consciousness, attractive. Among learner characteristics to which suggestopedia can be directly applied are integrative and instrumental motivation, and those aspects of cultural conditioning that will not allow the learner to accept an imposed written language, which must grow from his/her own verbal command. The complex anxieties of the adult learner can be answered by the total relaxation and security that is the essence of suggestopedia. The inclusion of artistic elements in instruction, especially music, is crucial. Because an ideal mood for learning is established from the beginning, remarkable results can be achieved in a short time. A global approach toward teaching children to read and write is described. With some modifications, a similar program could be instituted for adults. (JB)

The first of 10 volumes of a basic course in Persian is presented that is designed for use in the Defense Language Institute's intensive programs. The course, employing the audiolingual methodology, is designed to train native English speakers to level three proficiency in comprehension and speaking and level two proficiency in reading and writing Persian. A guide to Persian pronunciation and a drill on various Persian sounds is presented. A section on vocabulary provides for each word a transcription of the word with symbols adopted from "Webster's Collegiate Dictionary," the meaning of the word in English, and the word in the Persian alphabet. Each of the 18 lessons contains the following: (1) a cartoon guide, (2) dialogue in Persian, (3) idiomatic translation of the dialogue into English, (4) recombination in Persian, (5) drill blocks in Persian, and (6) questions in Persian. Tapes accompany the texts. (SW)

The second of 10 volumes of a basic course in Persian is presented that is designed for use in the Defense Language Institute's intensive programs for native English speakers. The central feature of the daily lesson is the structured dialogue, which systematically incorporates a number of grammatical features. Grammar is not explained through conventional explanations or discussions. After students perceive the morphological changes through intensive oral usage and class drill, they gain additional practice by after-class reading. The following sequence of text material is followed: (1) grammar perception drills using the familiar and known vocabulary to introduce the new morphological patterns; (2) daily dialogue involving new morphological patterns and new vocabulary; (3) dialogue translation into English; (4) grammar analysis, which exemplifies the structural patterns in a very simple language; (5) grammar drills; (6) a Persian narrative and questions; (7) aural-oral and written homework; and (8) vocabulary lists. Tapes accompany the text. (SW)

A supplement is presented to volumes one, two, and three of a basic course in Persian that is designed for use in the Defense Language Institute's intensive programs for native English speakers. Part one introduces the student to a phonemic transcription which is derived from the International Phonetic Alphabet (IPA). Part two applies the modified IPA to the transcription of the dialogues of the first 38 lessons of the basic course. Part three adds the lesson-by-lesson vocabulary to volume one and repeats the vocabulary of volumes two and three in IPA transcription. (SW)

The fifth of 10 volumes of a basic course in Persian is presented that is designed for use in the Defense Language Institute's intensive programs for native English speakers. The central feature of the daily lesson is the structured dialogue, which systematically incorporates a number of grammatical features. Grammar is not explained through conventional explanations or discussions. A series of perception drill patterns are used prior to the introduction of the daily dialogue, which is followed by a translation in idiomatic English. The grammar analysis section contains a summary of the various functions and usage of a given item, and grammar drills utilize the new structural patterns as well as new vocabulary and review vocabulary. In the reading and question section, assimilated lexical items are used in the narrative to provide a situational application of the material. This volume attempts to present common situations and the normal mode of speech appropriate to each situation in the dialogues. The reading section and dialogues are designed to prepare the student for understanding newspapers and radio/television. Military terminology is also gradually introduced, and a few of the lessons are based on films about Iran. Tapes accompany the text. (SW)

The sixth of 10 volumes of a basic course in Persian is presented that is designed for use in the Defense Language Institute's intensive programs for native English speakers. This volume is, for the most part, a continuation of the material and methods presented in volume five. The central feature of the daily lesson is the structured dialogue in which a number of grammatical features are systematically incorporated in a daily situation. Since many of the basic structures, patterns, and vocabulary of the language have already been introduced, a more varied selection of vocabulary and some essential but more complex sets of phrases are included. In order that students may benefit from each lesson, a summary of the contents of the book and the intended use of each part are presented. Each lesson begins with a series of perception drill patterns to be used extensively prior to the introduction of the daily dialogue, which is followed by a translation in idiomatic English. The grammar analysis section contains a summary of the various functions and usage of a given item. The grammar drills utilize the new structural patterns as well as new vocabulary and review vocabulary. The reading section consists of a narrative containing the assimilated lexical items. Tapes accompany the text. (SW)

The seventh of 10 volumes of a basic course in Persian is presented that is designed for use in the Defense Language Institute's intensive programs for native English speakers. The central feature of the daily lesson is the structured dialogue in which a number of grammatical features are systematically incorporated in a daily situation. Each lesson begins with a series of perception drill patterns to be used extensively prior to the introduction of the daily dialogue, which is followed by a translation in idiomatic English. The grammar analysis section contains a summary of the various functions and usage of a given item, and grammar drills utilize the new structural patterns as well as new vocabulary and review vocabulary. The reading and questions section consists of a narrative containing the assimilated lexical items. A list of new vocabulary introduced in the dialogue completes the daily lesson. This volume attempts to present common situations and the normal mode of speech appropriate to each situation in the dialogues. The reading section and dialogues are designed to prepare the student for understanding newspapers and radio/television. Military terminology is also introduced. Tapes accompany the text. (SW)

The eighth of 10 volumes of a basic course in Persian is presented that is designed for use in the Defense Language Institute's intensive programs for native English speakers. This is the last book of the structural phase of the basic course series. Each lesson begins with a series of perception drill patterns to be used extensively prior to the introduction of the daily dialogue, which is followed by a translation in idiomatic English. A simplified and concise discussion of the use and function of Arabic derivatives in Persian is presented. The reading section of this volume is more extensive and more advanced in style; it represents a fair sample of the everyday written form of the Persian language. The homework section contains, for the first time, mostly translation materials. Grammar drills utilized new structural patterns as well as new vocabulary and review vocabulary. A list of vocabulary introduced in the dialogue completes the daily lesson. Tapes accompany the text. (SW)

Descriptors—Advanced Courses, \*Audiolingual Methods, Communicative Competence (Languages), Cultural Education, Instructional Materials, \*Intensive Language Courses, \*Language Skills, Language Usage, \*Persian, Reading Comprehension, \*Reading Materials, \*Second Language Instruction, Standard Spoken Usage, Vocabulary Development

An advanced reading text designed for use with a basic course in Persian offered by the Defense Language Institute is presented. The course is an intensive program for native English speakers. The book, which is an adaptation of material originally developed in Iran, is used when the students have completed volumes one to eight. The material is idiomatic and covers a wide range of topics that are rich in cultural information and is basically conversational in style. The text is introduced around the 30th week of instruction and continues to the end of the 47-week course. It is presented to the students in 68 lessons, which require them to practice listening, speaking, reading, and writing, both in class and at home. A supplementary volume containing a glossary and cultural notes is published under separate cover. (SW)

Descriptors—Audiolingual Methods, Communicative Competence (Languages), \*Intensive Language Courses, Language Usage, \*Persian, \*Reading Comprehension, \*Second Language Instruction, \*Skits, Standard Spoken Usage, \*Supplementary Reading Materials, Vocabulary Development

A supplementary reader and skits for a basic course in Persian are presented that are designed for use in the Defense Language Institute's intensive programs for native English language speakers. The collection of skits is written about everyday activities of the Persian people. The places and situations, as well as the language, have been chosen to portray the most ordinary and recurrent events of daily life in Iran. The skits are intended to be acted out in class with some preparation on the part of the students. Short stories and essays have been prepared to give the more ambitious student some extra reading material. They are intended to provide a useful and varied selection of words in an interesting context, and they should be easier to read than the daily newspapers and magazines. They should be read during the student's own time and as an extra curricular reading activity. (SW)

Descriptors—Audiolingual Methods, Communicative Competence (Languages), \*Glossaries, Grammar, Instructional Materials, \*Intensive Language Courses, Language Usage, \*Persian, Reading Comprehension, \*Second Language Instruction, Standard Spoken Usage, \*Vocabulary Development

A glossary and notes that accompany an advanced reading text for a basic course in Persian are presented. The course is an intensive program for native English speakers offered by the Defense Language Institute. Idiomatic phrases and sentence structures are explained and special grammar and cultural notes are included. A number of lexical items were omitted in order to encourage the use of a regular dictionary by the students. The English equivalents given for each Persian entry relate primarily to the context of the text. The entries are listed in the order they appear on the pages of the text. Tape recordings are available in which exact information is given on the number and location of each lesson in the text. This is followed by the vocabulary and then the text. The vocabulary is recorded in reading style, but the text is recorded in conversational form. In view of the difficulty of parts of the text, complete translations have been prepared and included. (SW)

Semantic Encoding in Children: A New Method of Investigation.

Pub Date—Apr 80

Note—11p; Paper presented at the annual meeting of the American Educational Research Association (Boston, MA, April 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Language, Children, \*Cognitive Processes, Language Acquisition, \*Language Processing, \*Language Research, Psycholinguistics, \*Research Methodology, \*Semantics, \*Visual Stimuli

Identifiers—\*Encoding (Psychological)

A familiarization procedure was used in two experiments investigating word encoding in second and sixth graders. Previous studies using release from proactive inhibition had indicated that developmental changes on some encoding dimensions occur during this period. It is argued that the dependence of release from proactive inhibition on deliberate recall decreases its pertinence to the process of encoding. In the experiments, 20 second graders and 20 sixth graders were individually familiarized to a single semantic category. In experiment 1, the children were exposed to either a series of animal names or words designating body parts. In experiment 2, these categories were replaced with positive and negative words. A two-choice reaction time task followed familiarization. The targets for the task were two words: an animal name and a body part name for experiment 1, and a positive and a negative word for experiment 2. In both experiments, children of both age groups responded faster to the word from the familiarized category than to the novel word. Experiment 1 confirmed previous findings that the taxonomic classes animals and body parts are encoded by children, while experiment 2 revealed that children also encode the evaluative connotation of words, a finding that had previously emerged only inconsistently. This is a collection of 60 essays on dialectology written in the period from 1942 to 1979. The essays fall into the categories of theoretical, applied, and critical dialectology. Some of the more recent titles include: "System and Variety in American English," "Dialect Differences and Social Differences in an Urban Society," "Dialectology and the Integration of the Schools," "Can Linguistics Solve the Composition Problem?" and "Changing Patterns of Southern Dialects." Important older titles include "Some Principles of American Dialect Study," "The Relationship of the Speech of the American Negroes to the Speech of Whites," "Some Social Differences in Pronunciation," "Dialect Geography and Social Science Problems," "Dialect Differences and Inter-Group Tensions," and "A Study in Ethnolinguistics." The "Linguistic Atlas of New England" (1952) is included, as are a variety of regional dialect studies. The section on critical dialectology is devoted to 19 reviews of the work of other dialectologists. (JB)

Descriptors—Adults, Adult Students, Class Activities, \*Educationally Disadvantaged, \*English (Second Language), Interaction, Intonation, Kinesthetic Methods, Language Acquisition, Language Research, \*Multisensory Learning, Native Language Instruction, \*Second Language Instruction, \*Second Language Learning, Suprasegmentals, \*Teaching Methods, Visual Aids

English as a second language for the non-academically oriented adult can be facilitated by structuring their early linguistic input in a way similar to the way a parent structures input for a child learning a first language. The four components through which children learn their native language and which also concern adult learning are: (1) functional interaction; (2) visual/kinesthetic cues; (3) modified parent/teacher speech; and (4) music, rhyme and rhythm. Interactional cues give the learner conceptual knowledge of language and an understanding of function prior to production of speech. Body movement in conjunction with cognitive input facilitates long-term recall. Visual cues such as cards, posters, and charts are particularly good for use with students who scarcely read or write their native language. The visuals and real objects serve to cue comprehension, conversation, and grammatical exercises and they have the psychological advantage of transferring attention from the learner to the purpose of the exercise. The type of speech style students hear is another factor. Non-academic learners respond to simplified syntax and limited vocabulary geared by the teacher to the learners' optimal way of learning. Finally, musical and rhythmic activities sensitize the student to the intonation patterns and rhythm of the language. (AMH)

Descriptors—Achievement Tests, \*English (Second Language), Essay Tests, \*Language Tests, Minimum Competency Testing, Secondary Education, Standardized Tests, \*Test Construction, Test Reliability, \*Test Validity

The soundness of the existing system of examination at the high school level in India is assessed with particular reference to the English section. The purposes to be served by the examination are discussed and the shortcomings of the system are described. The test and the passing procedure is found inferior to those systems which utilize standardized tests. The fixed passmark and pass-fail decision are liable to serious error. The value of the test is pre-ordained by administrative sanction rather than by empirical evidence. A scheme for making the pass-fail decision more systematic is suggested. In the new model, minimum requirements for passing are tested separately from those designed to order a candidate's achievement. Questions in the two-stage model differ substantially in difficulty. The assumptions about the hierarchical structure of language skills that underlie the model are similar to those that inform decisions about grading and presentation of instruction. Sample portions of the new model and discussion about the grading of this test are included. (PMJ)

Descriptors—\*Course Content, \*Course Objectives, \*Critical Reading, Higher Education, Language Teachers, Literature, \*Literature

Appreciation, \*Media Selection, Reading, Student Teacher Relationship, Teacher Effectiveness, Teacher Qualifications, Teacher Role, \*Teaching Methods

The existing methods for the teaching of literature in colleges and universities in India are summarized with reference to the aims of such programs. Lectures, tutorials, and seminars do not promote the learning of literature or critical thinking because teachers are not adequately prepared to be specialists in different periods or styles of literature and students do not work independently. The "Practical Criticism" method wherein students read on their own and discuss together with the teacher only interjecting corrections, and the "Peripatetic Method" of the ancient Lyceum are favored. Group discussions, workshops, and seminars will promote the development of critical thinking. Those involved in setting course materials must follow the same careful procedures for selection, grading, and presentation as are followed in language instruction. (PMJ)

Descriptors—Contrastive Linguistics, \*Error Analysis (Language), Language Acquisition, Learning Processes, \*Linguistic Theory, \*Second Language Instruction, \*Second Language Learning, Teaching Methods

The use of error analysis in second language instruction is discussed. Error analysis is seen as an effective aid to second language remedial teaching if errors are treated as evidence of learners' strategies, and analyzed in terms of their significance. A rule-oriented analysis explains why errors are made and implies what ought to be done to equip the language learner with better strategies. Priority is given to errors that cause hindrance to communication, but it is argued that "local" errors that are stigmatized or considered "foreign" by the native speaker should not be ignored. Theories about native language learning and second language learning are considered. (SW)

Identifiers—India

Some of the errors in selected areas of English grammar and lexis made by a sample of 100 first year college students from Madhya Pradesh, India, were investigated. The errors of students are described in linguistic terms, and some of the probable sources of errors are explained. The rules of grammar and usage that should be established to help the learners overcome their learning problems are indicated. Samples of students' English were obtained through two exercises: a free composition and a passage for translation from Hindi into English. Out of 141 scripts collected from four colleges, 100 were selected for analysis. An erroneous expression is considered to be any word, phrase, or sentence which deviates from its manner of use by an educated native speaker of standard British English or violates any rule of contemporary English grammar or usage. Categories and subcategories of errors

were established in terms of the rules of grammar or usage violated. In all, 4161 errors were identified and categorized under 15 major areas listed in order of frequency of recurrence. Of these, errors in the verb phrase are discussed because they form the bulk of the total errors, and it is the verb phrase which is central to sentence construction. Errors in the verb phrase are divided into three major categories: verb forms and patterns, auxiliaries, and tenses. (SW)

Identifiers—India

An integrated approach to teaching English composition to undergraduate students in Indian universities is proposed. The integration in approach is realized in terms of an onward progression from the first to the third year of the degree course. The idea of an integrated approach (viewing the sentence and the paragraph in an integrated manner) can be realized through the adoption of two teaching strategies. The first strategy, dealing with the sentence, is called "meristic" and the second, dealing with the paragraph, is called "holistic." The meristic approach seeks to equip the student with an ability to grasp the mechanics of expression, while the holistic approach is aimed at facilitating an understanding and control of the nature and processes of paragraph organization. It is suggested that a composition instructional program at the undergraduate level necessitates a meristic approach in the initial stages and a holistic approach at an advanced level. It is further suggested that the theory of discourse be introduced at the holistic level. At the advanced level, the students will be able to understand and appreciate the distinct organizational formats and grammatical components of the various types of discourse. (SW)

This study was undertaken to provide recent and comprehensive information on the state of Chinese studies in the United States. An extensive questionnaire was completed by 111 American institutions of higher education offering Chinese instruction. Overall enrollments and enrollment trends are discussed, and the degrees awarded in 1978 are enumerated. Characteristics of teachers of Chinese are described. A catalogue of information on instructional materials emphasizes the assessment of instructional needs in first- through fourth-year courses. Aspects of Chinese language instruction in the United States, which is represented by a wide variety of programs, are discussed. Characteristics of students of Chinese are examined. Funding of Chinese language instruction and potential funding resources are reported. A shorter questionnaire was

completed by institutions offering only self-study programs. Responses from institutions that had recently dropped Chinese instruction from their curriculum are also analyzed. (JB)

**Identifiers—Bilingual Programs, New York**  
This guide is designed to help administrators, program coordinators, and teachers of bilingual children devise more effective ways of helping children learn. The role of evaluation in program planning and execution is described and some general factors to be considered when planning and evaluating bilingual education programs are reviewed. The roles of formative and summative evaluation are discussed as feedback for pupils, teachers, and program administrators. Aspects of standardized tests are explained and features of good program objectives are presented. Eight general categories of language skills encompassed by bilingual programs are illustrated in a bilingual language skills matrix. Linguistic competence and linguistic performance are differentiated and it is shown that only linguistic performance, that is, the degree of mastery of language skills as demonstrated or assessed in the classroom, can be assessed with confidence in school settings. The various roles of testing and evaluation are described in the broader contexts of bilingual program planning. A selected bibliography is appended. (Author/AMH)

The study described here offers a model of target-context relations in language comprehension. It is based on the hypothesis that the same formal mechanisms that produce cohesion in discourse and texts are critically involved in language comprehension. The model posits that: (1) the comprehension of a target turn is primarily dependent on the formal relationship between the target turn and its context, (2) a discrete set of logical templates is part of the processing machinery, and (3) processing time for turns tied to context by different templates will not vary significantly. The structure of the model requires that a response to a target turn be processed along one of three paths: unit template to last turn (UT), topic only (TO), and no relationship to last turn or to topic (NN). The data were derived from the audio portion of 52 ten-minute conversations between a confederate and a naive subject. As predicted, processing time following (UT) target turns was significantly less than processing time following the other two types. The results support the hypothesis that humans can accomplish complex cross turn comparisons as quickly as tasks involving simpler comparisons. The accurate predictions of the model in a live conversational design contribute to the validity of models of language comprehension in general. (AMH)

Articles by social work educators on some of the critical issues in community mental health are presented. Examined are some conceptual and program developments related to coordination, continuity of care, and the use of teams in planning and service delivery for community mental health (Lawrence K. Berg). The issue of civil commitment to and civil rights in inpatient facilities of persons diagnosed as mentally ill is addressed (Leila Calhoun Deasy). Some current issues for clinical social work practice in mental health are presented, considering programs of prevention, immediate, brief intervention, and long-term care (Patricia L. Ewalt). Two sets of guidelines for program evaluation in mental health are offered. One deals with judging the work of evaluators (Harris K. Goldstein) and the second is concerned with how mental health administrators can use the products of evaluation (James Proctor). Pointed out is the need to establish a rational and clear framework for social work practice in community mental health (Arthur J. Katz). Citizen participation is discussed as a means of maximizing the effectiveness of the service delivery program (Samuel O. Miller). The origins and applications of social work practice and education in primary prevention are also presented (Helen Reinherz). Deinstitutionalization and chronic mental patients are identified as related issues and part of a current and ongoing crisis for community mental health (Max Silverstein). (MSE)

Descriptors—College Curriculum, "Community Health Services, Curriculum Design, "Curriculum Evaluation, "Field Experience Programs, Graduate Study, Higher Education, "Mental Health, Practicums, Professional Education, Program Descriptions, "Social Work

Community mental health curriculum in schools of social work education is discussed. The contents are compiled from a series of empirical studies, interviews, and meetings with social work faculty and students, and from analyses of curriculum materials as part of a three-year study conducted by the Council on Social Work Education. Chapter 1 discusses the domain of the community mental health field, including the community mental health centers and center programs, the 1975 amendments, and implications for social work education. In Chapter 2 the curriculum study and its findings are summarized. Issues examined include: mental health concepts in the social work curriculum, teaching-learning patterns, class-field experiences, and alternative curriculum models and innovations. Specific curriculum innovations implemented at the following schools of social work are discussed in

Chapter 3: University of Chicago, Simmons College, New York University, West Virginia University, University of Kentucky, Florida State University, and the University of Michigan. Recommendations for future directions of social work education are included. It is suggested that there is a need to delineate the boundaries between community mental health curriculum and the rest of the social work curriculum. It is also recommended that guidelines be developed regarding the selection of field practicum settings available to social work students. An extensive bibliography is provided, along with names of the members of the Advisory Committee to the Community Mental Health Curriculum Project and participating schools and faculty liaisons. Four papers presented at a seminar on graduate education sponsored by the Advisory Centre for University Education at The University of Adelaide and the Flinders University Educational Research Unit in Australia are presented. In "Teaching and Learning in Graduate Education: An Overview,"

Robert Cannon provides a background summary of developments and thinking about graduate education in Australia, Britain, and the United States. This paper has been revised in view of more recently published statistics, articles, and reports. In "Graduate Education: Some Issues," D. R. Stranks questions whether the assumptions often made about graduate education are appropriate for the 1980s. These questions are raised within the context of student, university, and employment constraints. In "Graduate Education: A View From Industry," G. R. R. Mawer draws attention to the limited mutual appeal of industry and people with postgraduate qualifications, and suggests that their educational experience must be broadened to enable them to cope with work in industrial environments. In "Postgraduate Training: Education or Indoctrination?" W. P. Rogers argues for the broadening of the education of Ph.D. students and advances arguments for altering the process of Ph.D. teaching to include seminars, coursework and broader areas of research involving a variety of methods, supervisors, and disciplines. Studio Design Work in First Year Architectural Education. Advisory Centre Occasional Papers in University Education.  
Adelaide Univ. (Australia).  
Pub Date—79  
Note—32p.

Pub Type—Reports - Descriptive (141) — Guides - Classroom - Teacher (052)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Architectural Education, \*Building Design, Course Evaluation, \*Course Objectives, Creative Thinking, \*Curriculum Design, \*Design Requirements, Higher Education, Learning Processes, Problem Solving, Professional Education, Student Evaluation

A course for first-year architectural students is described. The approach concentrated on developing an understanding of the nature of design activity through exploration of the kind of thinking that may be applied in order to improve the first-year studio work. The course is based on the following premises: (1) it is possible and educationally desirable to separate a thinking process from any product that results from that process; and (2) beginning students bring with them knowledge and experience from their everyday life that provide a useful starting point for investigation of the activity of design, and it is desirable to proceed from this starting point. Studio work consistently differentiated between work relating to learning about the nature of design (process) and work where the end product of the process was the main concern. The pattern of work was: a project in which an intuitive approach towards satisfying certain design conditions was indicated; a series of projects aimed at exploring particular aspects of the process now shown to be a natural way of proceeding towards some desired future state and relating this to architectural needs; and an exercise designed to reach a satisfactory architectural expression meeting the conditions set. Projects included accommodation for architecture library in an existing space, accommodation for medical general practitioners, and an exhibition stand for solar energy hot water units. Implications of the approach for professional education are considered. (SW)

Identifiers—Harvard University MA, Saint Johns College MD

Important trends concerning the role of the liberal arts curriculum in American higher education are discussed in this collection of conference papers.

The "great books" program at St. John's College is examined in a paper by Eva T. H. Brann focusing on why the St. John's plan has endured and changed little since its inception. Authors of the Western tradition and the skills of language and mathematics are emphasized in this program. In the second paper, Gerald Grant discusses the diverse course offerings now characteristic of American institutions of higher education and the resulting lack of coherence in the curriculum. The evolution, purpose, and characteristics of the core curriculum introduced at Harvard University in 1979 is the subject of the third paper. The direction of educational reform as influenced by the core curriculum movement at Harvard is examined by Alston Chase ("Skipping Through College: Reflections of the Decline of Liberal Arts Education"). The decline in the quality of teaching and student preparation for college is discussed. Academic trends throughout the history of American higher education are reviewed and projections about the future of higher education are presented. A summary of the conference discussion and a list of conference participants is included. (SF)

Findings and recommendations are compiled from a conference on student aid policy. Issues addressed in this summary report include: the public commitment to student aid; funding for student aid; the student aid delivery system; and the governance of student aid. It is noted that financial support from public and private student aid programs has made higher education, traditionally one of the major mechanisms for achieving equality, possible for substantial numbers of individuals. It is recommended that there be a comprehensive attempt to achieve a coherent set of public purposes and policies for student aid programs. Three major questions are addressed: (1) What is the optimum rate of participation in postsecondary education? (2) How much financial support from resources external to the family will be required to induce and maintain that level of participation? and (3) What is the optimum mechanism for delivering that financial support? It is suggested that resolution of these issues will aid in the development of a consistent public policy regarding student aid, and in this way the benefits derived from the investment of public money in student aid will be improved and expanded. Identifiers—Anglican Church, \*Ireland

The implications of disestablishment for Catholic objectives in higher education in Ireland, 1869-1879, are discussed, and the interrelationship of the questions of Church, land, and university education in Ireland is examined. Attention is directed to the extent to which the force of Ultramontanism, as expressed in the Catholic hierarchy's interpretation of disestablishment, complicated the settlement of the university education question. It is suggested that the agitation of the Roman Catholic hierarchy in Ireland for educational equality following the disestablishment of the Irish Anglican Church was really renewed activity. Disestablishment is used to refer to the dissolving of the connection between

Church and State, and the severing of the formal legal ties of the Irish Anglican Church from its sister Church in England. Liberals hoped in this way to promote religious equality and civil justice. Catholic claims for separate denominational education, inconsistent with the liberals' desires, seemed only to be strengthened by disestablishment. Disestablishment involved disendowment or the deprivation of the permanent source of income with which the Church was provided. The Church's source of wealth was land. The view is taken that the interest of the Catholic hierarchy in disestablishment was in the eventual interest of higher education reform. The higher education system in Ireland in this era is considered. (SW)

Identifiers—University of Southern California, \*USC Faculty Planning Model

A model for planning regarding college faculty is described. The USC Faculty Planning Model was developed by Robert Linnell and Paul Gray in 1974 at the University of Southern California as an interactive mathematical model to trace characteristics of faculty groups over time. Characteristics listed by the model include: faculty age distribution, number of openings, affirmative action data, number of retirements per year, total and average faculty salaries, and percent of faculty tenured. Faculty planning and modeling is claimed to have three basic advantages over other approaches to policy making: (1) modeling simulates human behavior, (2) modeling is economical in terms of time and money, and (3) modeling permits policies to be tried out so that problems with the policies can be discovered before they would arise via implementation. Advantages and disadvantages of this approach and some examples of its application are considered. Two ways that this computer system planning model can be utilized are explained, and costs are quoted. (SW)

Identifiers—\*Kentucky

The twenty-fourth annual Kentucky college and university enrollment report is presented. Included are enrollment data from Kentucky's state-supported and independent colleges and universities, seminaries, and proprietary business colleges. Graphs include: 1979 enrollment distributions for state-supported and independent institutions, state-supported institutions, University of Kentucky community colleges, independent senior institutions, and independent junior institutions. Reports contain information on areas such as: headcount enrollment by student classifications; full-time enrollment; black student enrollment; residency status by student classification; on-campus credit hour report by student level; off-campus credit hour report by student level; fall enrollment from 1976-1979; headcount of first-time transfer students; enrollment by degree field; and undergraduate and graduate enrollment by degree field. It is shown that Fall 1979 statistics are consistent with previous years, and that black students made up 6.7 percent of the total enrollment. During Fall 1979, total enrollment in the state-supported and independent colleges and universities was 129,167. (LC)

Identifiers—National Labor Relations Act, \*National Labor Relations Board v Yeshiva Univ, Supreme Court, \*Yeshiva University NY

The impact of the Supreme Court Decision, "National Labor Relations Board versus Yeshiva University," on collective bargaining at colleges and universities is considered. The basic thrust of the majority decision is that faculty are not under the umbrella of the National Labor Relations Act and that administration may refuse to negotiate with a union representing faculty if they are "managerial." In simplest terms, the Court has said that the National Labor Relations Board may not certify a union of faculty or require the administration to deal with it if the faculty are endowed with managerial status sufficient to remove them from the coverage of the Act. Among the questions considered are the following: (1) What criteria must be met by a private institution if it is to be relieved of the duty to bargain? (2) When are faculty deemed to be "managerial" and therefore denied the protection of the Act? (3) What alternatives are open to administrations that have been dealing with a union but are now no longer compelled to do so? (4) What recourse still remains available to the unions that are directly affected? (5) Will governance structures undergo change as a result of pressures created by the Yeshiva decision? and (6) How will bargaining in public universities and colleges be altered by the

new development in the private sphere? A chart provides information by state and school on faculty contracts and bargaining agents in private institutions. (SW)

Descriptors—\*Access to Education, Admission (School), Admission Criteria, Affirmative Action, College Admission, College Desegregation, College Students, \*Compliance (Legal), \*Constitutional Law, \*Court Litigation, Desegregation Litigation, Equal Education, Equal Protection, Federal Courts, Federal Legislation, Higher Education, Lawyers, Legal Problems, Medical Schools, Minority Groups, Professional Associations, School Policy, \*Selective Admission, State Courts, Student Placement, Student Rights, Whites

Identifiers—\*Bakke v Regents of University of California, \*Supreme Court

The complete record of the litigation in Alan Bakke v. The Regents of the University of California is contained in these six volumes. Included are all the pleadings, briefs, and arguments reproduced in full text except for minor editing of the oral arguments and data pertaining to the proof of service affidavits of truth. Volume One contains the case in the Yolo County, California, Superior Court and the beginnings of the case in the California State Supreme Court; Volume Two, completion of the Supreme Court of California case and the beginning of the U.S. Supreme Court case. Volumes III through VI continue the case within the U.S. Supreme Court, containing nearly 60 briefs presented by various groups with invested interest in the outcome. Such groups included: NAACP Legal Defense Group; Fair Employment Practice Commission; Bar Association of San Francisco; Black Law Union of Yale University; American Medical Student Association; Young Americans for Freedom; Order Sons of Italy in America; and American Federation of Teachers. The final volume also contains a subject index providing the names of all the attorneys involved, all organizations that participated as amicus curiae, all the substantive issues raised, and a single tabulation of all the tables of authority. The concurring opinion of the judges is

given as well as separate opinions by individual judges and the dissenting opinions of the court justices. An epilogue is provided in the final volume that explains the Supreme Court decision, making clear that the ruling ordering Bakke to be admitted to the medical school at the University of California at Davis was a fragmented one that would have varying effects on such areas as higher education, predominantly black educational institutions, the labor market, and on the Public Works Employment Act of 1977. In conclusion, the concern about the attempts of the parties and interested "amici" to have the Supreme Court decide questions of social policy—a role which rightly belongs to the legislative branch of government—is examined, as are the effects of the court decision on all branches of government. The evolving relationship between cities and urban colleges and universities is traced historically, and the implications of changing roles of the university are considered. The public service role of American higher education institutions has increased for both private and public schools. Attention is directed to the role of faculty, administration, and institutions in relation to the urban educational environment and its changing college student clientele. One development is accommodation to the world of work in the college curriculum. Reluctance of many faculty to engage in this new tendency has set some institutions apart from their urban context, yet, some other institutions have thrived on community service as a major part of institutional mission and development. Changes in the program structure of institutions seem mandatory to serve the diverse dimensions of urban life. The federal commitment to urban institutions is indicated by the Education Amendments of 1980, which altered Title XI of the Higher Education Act of 1965 to read "The Urban Grant University Program." Many professional organizations also assist urban universities and their constituents. Reasons for the community college's ability to act effectively and efficiently in the area of community development are cited, and some model urban programs at community colleges are noted. Support for urban universities was expressed in the "Memorandum of Understanding" (1980), which was generated by several postsecondary education associations in cooperation with the U.S. Department of Housing and Urban Development. Identifiers—Appalachian Educational Satellite Project, Coastline Community College CA, Community Service Network, Dallas County Community College District TX, Miami Dade Community College FL, State University of New York Empire State College, University of California San Diego, University of Mid America NE

The expansion of higher education in the United States has resulted in a variety of outreach programs to bring postsecondary education off the campus and into the community. New systems and programs of nontraditional study have emerged. Issues of current concern in open learning include: quality and effectiveness, outreach and access, research and evaluation, economics (costs, benefits, productivity, and obtaining support), implications of emerging technology, public policy, and cooperation and collaboration. The trend toward lifelong learning brings with it new possibilities for educational technology and the mass media, as well as a challenge to postsecondary educators. It is noted that in the United States citizens get much of their information from the mass media, and that harnessing this potential for learning is the great challenge for education in the near future. The experiences of six individuals with open learning programs are highlighted throughout. A list of references is included. Appended are basic data on seven participating projects (the Appalachian Educational Satellite Program and Community Service Network, Coastline Community College, Dallas County Community College District, Empire State College, Miami-Dade Com-

munity College, Open College, the University of California at San Diego, and the University of Mid-America), a list of factors that help or impede learning projects, and an executive summary of the joint conference on research needs in adult learning in March 1979. (MSE)

Descriptors—"Community Action, Community Education, Energy Conservation, \*Environmental Education, \*Environmental Standards, Federal Aid, Federal Regulation, Government School Relationship, Higher Education, Industry, Professional Continuing Education, Public Officials, Recycling, \*School Community Programs, \*Waste Disposal

The nation's overall efforts in solid waste management are noted, and suggestions and examples are presented concerning activities that can be undertaken by institutions of higher education to assist their communities to achieve safer and cleaner environments. The federal regulatory agency, The Environmental Protection Agency (EPA), is concerned with air and water pollution, solid wastes, and noise, and provides technical assistance to local and state governments. Colleges and universities have devised the following campus activities: campus cleanup, recycling, and energy saving efforts. Additionally, many colleges and universities work directly with communities in solid waste projects. Personnel in this field often need specific information and continuing education courses, seminars, and workshops that the higher education community can provide. Elected officials often require help to become more informed about solid wastes. Citizens groups and environmentally aware groups may need assistance in sponsoring conferences, researching legislation, and other activities. Information is provided on federally sponsored funding programs for which colleges are eligible. A bibliography of information sources and a map of EPA regional offices are included. (SK)

Identifiers—Colorado, Illinois

Four articles on changing governance patterns of state colleges and universities are presented. In "State Control vs. Campus Autonomy: A Struggle for Balance," Donald E. Walters discusses the distribution of power in Illinois' "system of systems" governance structure. In Illinois several multi-campus university systems coexist; each is controlled by a separate governing board and is subject, to a greater or lesser extent, to the jurisdiction of a state-

wide board charged with coordination. In "Minimizing the Loss of Campus Autonomy," Harold Delaney considers factors that influence the magnitude of the loss of freedom or autonomy from state-wide coordination and, at the same time, factors that affect the compensation for that loss. In "Colorado Consortium of State Colleges: Sharing Authority and Responsibility," John A. Marvel discusses a new form of governance premised on a procedure that begins with the involvement of the faculties and administrators of all the colleges. The four institutions of the consortium are described, and outcomes of consortium governance are reviewed. In "Restrictive Aspects of Centralized Governance," Albert N. Whiting discusses centralized governance of higher education in relation to the quality of education provided. Difficulties faced by administrators of colleges (chancellors and/or presidents) operating under centralized governance systems are considered. (SW)

Identifiers—"Act Assessment

The validity of prediction equations based on American College Testing (ACT) Program test scores and high school grades is investigated. Presented are separate results for prediction equations based on ACT scores only, on high school grades only, and on both kinds of prediction jointly. Also included is a discussion of the relationship between equations and the length of time they have been in use. The study is based on data collected from a random sample of 260 colleges participating in the ACT Research Services from 1972-73 to 1976-77. The accuracy of prediction equations based on the two variables was found to be quite stable over time. A similar stability was noted in the accuracy of

grade predictions for males and females separately. Grade predictions based on ACT scores only showed slightly greater stability over time than those based on grades only. It is concluded that despite the changes some colleges experience in student abilities, curricula, and grading practices over time, freshman grade averages can be accurately predicted using equations as old as four years. ACT policy is to update equations at least every three years. Data tables and statistical analyses are briefly discussed, and a brief list of references is included. (Author/MSE)

Identifiers—"Research Universities

At the request of the National Science Foundation (NSF), the Higher Education Panel (a stratified sample of 760 colleges and universities) collected information on the level of institutional expenditures for research equipment, the federal contribution to those expenditures, and the share of funds expended for high-cost items. The data were intended to analyze the impact of federal funding on equipment expenditures and the probable effects of various policy alternatives. It was found that during FY 1978 approximately \$280 million was spent at Ph.D.-granting institutions for the purchase of scientific research equipment. Half of this amount was used in the life sciences, 19 percent in engineering disciplines, and 16 percent in the physical sciences. The federal government financed 65 percent of equipment purchases made from current funds; that proportion was 59 percent at public institutions and 75 percent at private institutions. For all science fields, 9 percent of research equipment expenditures from current funds were for items costing \$50,000 or more. In electrical and computer engineering and in chemistry, that proportion was approximately 27 percent. When comparing FY 1978 equipment expenditures with the average for the previous three years, nearly half of respondents indicated that expenditures from current funds were about the same; one-third indicated they were greater. Expenditures for separately budgeted scientific research equipment from current funds comprised about 6 percent of all research and development expenditures at doctorate-granting institutions in FY 1978. Data tables are included, as are the survey instrument and instructions. A list of disciplines in the various categories used is appended. Also appended are a response analysis and the stratification design. (MSE)

appropriate content and level of educational programs, improving clinical education, building the capability for leadership and innovation, providing or planning and administration without waste, and supplying adequate funding for allied health education. Chapters examine: allied health in the present and future; future direction for allied health education; educational alliances; and scope and diversity of allied health education. Tables and figures offer such information as number of collegiate institutions with allied health programs, occupations within the field, and hospital-based allied programs. Appendices include the methodology used in the study, the American Society of Allied Health Professions glossary, and the Carnegie Classification of Higher Education Institutions. Several recommendations are offered such as increased funding on all government levels in the allied health area, improving continuing education programs, and constant monitoring of present programs for quality control. An index and references are provided. (LC)

Descriptors—Administrative Organization, Administrator Guides, \*Administrator Responsibility, Administrator Selection, \*Board Administrator Relationship, College Faculty, College Planning, College Presidents, College Students, Evaluation Criteria, Fund Raising, \*Governance, \*Governing Boards, \*Higher Education, Institutional Evaluation, Leadership, Legal Responsibility, Money Management, Orientation, Personnel Policy, Policy Formation, Private Colleges, Resource Allocation, Self Evaluation (Groups), Tenure, \*Trustees, Unions

Identifiers—Audits, Bylaws, Conflict of Interest

Information on the full range of trustee responsibilities—from institutional planning, fund raising, resource management, academic program review, tenure and personnel decisions, and faculty bargaining to selection and assessment of administrative leadership—are offered in this comprehensive handbook. Individual chapters are written by J. L. Zwingle, John W. Nason, Robert L. Gale, John J. Corson, Rhoda M. Dorsey, Martin Meyerson, among others. Part One, Significance of Trusteeship, provides background perspectives on an institution unique to the United States with emphasis on recent developments that have changed the role of governing boards. Part Two, Effective Board Management, offers principles of effective board organization such as trustee selection and orientation. Part Three, Effective Institutional Oversight, examines the various issues confronting trustees, including policy-making, institutional planning, overseeing academic programs, and selecting a chief executive. Part Four, Resource Development and Management, offers guidelines for strengthening the board's ability to secure resources and advice on contending with liability risks. Part Five, Performance Assessment, offers evaluation methods that can assess leadership and management. The resources in the last section include: trustee audit; self-study criteria for private college and university boards; bylaws for independent colleges; statement on conflicts of interest; and recommended readings. Provided are references and an index. (LC)

The Organization of a College of Education.

Pub Date—[79]

Note—18p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Administrative Organization, \*College Role, Educational Objectives, Higher Education, Organizational Change, \*Organizational Climate, Power Structure, \*School Organization, \*Schools of Education, Student Teacher Relationship, \*Teacher Education

The organization of a college of education is discussed in terms of the problem of structure, task,

and continuity. Structure is seen as a description of relationships and the behavior that characterizes relationships among people. Relationships exist and develop in organizations only according to the tasks that must be performed in the organization. The important fact is that the tasks of an organization determine the structure. Teacher training programs are concerned with helping the students to give their best performance in the classroom by helping them internalize a personally satisfactory philosophy of education and to translate this in operational terms into appropriate classroom behavior. There is no essential subject knowledge required in this process. If the teacher training function is essentially one of a relationship between a tutor and a group of students, the basic structure is groups of students each with a tutor. The simplest administrative response is to allocate each tutor to a group of students for a minimum period of time in a single location. The more complicated this allocation becomes the more restriction there is on freedom and the greater the amount of control administrators gain. Structure is described as the teacher-student relationship and not in terms of subjects, groups or departments. In order to be functional, structures must be as open to change as possible. Some characteristics of healthy and unhealthy organizations and an example of the allocation of staff time are presented. (SW)

Gray, H. L.

Assessment in Further Professional Training.

Pub Date—[80]

Note—13p.

Pub Type—Opinion Papers (120) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Higher Education, Individual Development, Interpersonal Competence, \*Professional Development, \*Professional Education, Professional Training, \*Student Development, \*Student Educational Objectives, \*Student Evaluation, \*Student Participation, Student Role

The process of assessment of learners in professional training is discussed. In professional training, students are involved in assessment, since the examining process is overtly linked to the learning practice. Distinctions concerning examinations, assessment, and evaluation are offered. Professional training is concerned with competence in nontechnological or nontechnical skills, the skills of personal and interpersonal relationships. Further professional training has as its major objective the evaluation of performance by helping the learner to internalize a certain behavioral value system. Professional skills are ones that derive from the social functioning of the self, the expression of personality in social settings. Professional training and development is essentially an individual matter: the improvement of present skills. It is contended that in further professional training, learners will be helped to internalize their learning if they can help determine and select modes and criteria of assessment, examinations, and evaluation (where relevant). In programs of professional training, criteria in examination, assessment, and evaluation accumulate during the program and in reference to the user's environment. It is essential to have the agreement of the learner about the mode of assessment. Lists of leadership skills, knowledge and skill base for leadership, assessment criteria, and modes of presentation of material or assessment are included. (SW)

Identifiers—\*Franklin College OH

Developments in the late 1830's and early 1840's concerning Franklin College, academic freedom, and slavery are traced. In the small eastern Ohio community of New Athens, there were political,

economic, social, cultural, and religious influences that focused on the question of American slavery. The drama unfolded at the nondenominational but religiously influenced Franklin College, where ministers and laymen from heterogeneous branches of Presbyterianism disputed over gradual versus immediate emancipation of the slaves or clung to a neutral stance. A major repercussion was an onslaught on academic freedom leading to the resignations of two successive presidents, the departure of three professors, the imposition on the college of the principle of immediate emancipation, and a schism leading to the founding of Providence College in New Athens. In the latter institution, academic freedom fell victim to the requirement of accepting the gradualist approach to emancipation. This second site of higher learning soon expired, and the older college, Franklin, continued to spread an all-out effort to immediately solve the slave problem in eastern Ohio. (SW)

Identifiers—Annuities, Bequests, Donors, \*Planned Giving

Deferred giving in higher education is the practice of making a gift to an institution during one's lifetime while continuing to receive income from that donated asset. The history of the practice and the reasons for its value to donors and institutions are outlined. Options for annuity and life income plans are discussed: gift annuity, deferred gift annuity, pooled fund life income plan, and charitable remainder trusts (unitrust, net income unitrust, annuity trust, and term certain annuity trust). The various tax advantages and considerations are described: the charitable deduction, capital gains tax, gift tax liability, and estate tax. The possible forms of gifts listed are: cash, stocks or bonds, tax exempt bonds, tangible personal property, and real estate. Highlighted are the institutional requirements for starting a deferred giving program: consideration for

each type of plan, the importance of staff, institutional commitment, written policies, and authority and responsibility resting with the board of trustees. Suggestions are given for marketing the annuity and life income program. The preliminary considerations are felt to be the quality of the institution's product, maintenance of high ethical standards, and frankness with prospective donors. The processes of finding the donor prospect, cultivation, closing, and acknowledgement and followup are discussed. The role of the business office, bequests, and program evaluation are briefly addressed. (MSE)

Descriptors—Banking, Business, Community Services, Commuting Students, Economic Research, \*Educational Economics, Expenditures, Government School Relationship, Higher Education, Local Government, Local Issues, Mathematical Formulas, Productivity, Questionnaires, Real Estate, \*School Business Relationship, \*School Community Relationship, School Surveys, State Colleges, State Government, Taxes

Identifiers—\*Economic Impact, Tax Exemptions, \*Trenton State College NJ  
Quantitative data on the nature and magnitude of the economic impact of Trenton State College (New Jersey) on the surrounding community are provided in an attempt to reduce conjecture. Data were collected for fiscal year 1977-78. In many cases the data were then applied to a model developed by John Caffrey and Herbert H. Isaacs; in other cases, surrogate models were developed. Positive economic impacts include \$22.5 million in college-related local expenditures, \$22.0 million in the value of business property committed to college-related business, \$7.0 million in expansion of local banks' credit base from college-related deposits, \$2.7 million in college-related revenues received by local government, and 2,010 local jobs attributable to the presence of the college. Negative economic impacts include \$3.8 million in operating costs of local government-provided municipal and public school services, \$7.3 million in the value of local governments' properties allocable to the college-related portion of their services, \$26 thousand in real estate taxes foregone through the tax-exempt status of the college, and \$1.2 million in local business volume unrealized because of the existence of college enterprises. On balance, it is found that the college has a substantial positive impact on the economic health of local business, government, and individuals. Appended are a bibliography, map of the area, faculty and staff questionnaire, commuting student questionnaire, and the mathematical formulas used in the study. (MSE)

Identifiers—Educational Information Centers, Educational Opportunity Centers, \*Higher Education Act Title IV, Special Services for Disadvantaged Students, Talent Search, Upward Bound

Current practices and future directions are examined for the federal student support service programs known as TRIO (Talent Search, Upward Bound, Special Services for Disadvantaged Students, and Educational Opportunity Centers) and the Educational Information Centers program. The TRIO programs identify low income and educationally disadvantaged students, motivate and counsel them in their pursuit of secondary educational alternatives, and provide guidance, tutorial, and other services following college entry. Educational Information Centers have a broader mandate to serve all students who need information, counseling, and referral services. It is felt that these programs are a crucial element of national policy to equalize opportunity, and have been neglected. Trends in college enrollment and populations, in student aid availability, and in adult learning underline the growing importance of these programs. This report assesses issues and options in these Title IV programs: authorization level for the various programs; possible overlap and duplication among the programs; possible need to specify stronger integration or coordination among these or other programs for the disadvantaged; and groups to be served. Recommendations related to these issues are made for each program. Appended are two tables: (1) total program authorization and appropriations from 1965 through 1979; and (2) a history of TRIO allocation levels by program from 1966 through 1979. (MSE)

Identifiers—\*Basic Educational Opportunity

## Grants

The Basic Educational Opportunity Grant program, the largest federal student aid program, is explained. The method by which a student's eligibility is determined is described in detail. In a section on calculation of eligibility for dependent students, two worksheets are provided: that for families with no farm or business assets, and those with some farm or business assets. The steps for using the worksheets are described. Similarly, worksheets and directions are given for students with a family size of one, and for students with a family size greater than one, with and without farm or business assets. Case studies are provided as examples for the use of each worksheet, and appended are brief reference tables for determination of the student eligibility index: family size offsets in dollar amounts, the multiple student calculation rate, employment expense offset, income contribution rates (percentages) for independent students, and the dependent student offset against income (dollar amounts). (MSE)

Higher Education and Government. An Uneasy Alliance.

Pub Date—79

Note—144p.; Papers presented at the Annual Meeting of the American Council on Education (61st, 1978).

Available from—American Council on Education, One Dupont Circle, NW, Washington, DC, 20036

Pub Type—Books (010) — Speeches/Meeting Papers (150)

Document Not Available from EDRS.

Descriptors—Academic Freedom, American Indians, Black Students, College Administration, College Admission, College Faculty, College Presidents, Curriculum Development, Educational Objectives, Federal Aid, Federal Government, Financial Support, Governance, \*Government Role, \*Government School Relationship, \*Higher Education, \*Institutional Autonomy, Policy Formation, Research, Retirement, Sciences, Social Responsibility, State Aid, Teacher Placement

Leaders from government and the higher education community provide a philosophical but pragmatic discussion of such topics as curriculum, admissions, research funding, and financial support. Compiled from papers presented at the 61st annual meeting of the American Council on Education, this volume offers the viewpoints of 22 institutional administrators, college presidents, government officials and other education leaders on the interaction between higher education and government. The papers are grouped into sections on living with change; who shall teach; what shall be taught; who shall study; who decides about research; who decides what to spend; who champions the institution; and agents for social change. Papers and authors include: Freedom with Responsibility (Howard G. Bowen); The Limits of Growth (Alice M. Rivlin); Academic Freedom and Retirement (Marjorie Downing Wagner); Defending the Power to Appoint (John S. Toll); Collegiality in Changing Times (Martha Friedman); Curricular Decision Making (Lawrence K. Pettit); Curriculum Development by Evolution (Alice F. Emerson); Institutional Autonomy and Curricula (Willard L. Boyd); In Support of a Social Ideal (C. Arthur Sandeen); American Federalism and Autonomy (Steven Muller); Students and the Admissions Decision (Alfred L. Moye); Federal Support for Research (Linda S. Wilson); Factors in Research Funding (Frank Press); Science and Government (Cornelius J. Pings); Federal Involvement in Spending (Robert M. Rosenzweig); State Support for Higher Education (James M. Furman); The President Speaks for the University (Jose A. Cabranes); An Uneasy Alliance? (Retha Clark King); Higher Education: Its Own Champion (Stephen Joel Trachtenberg); The Black Experience (Herman B. Smith, Jr.); The Indian Experience (Marian M. Hersud); and Higher Education's Social Role (Charles Frankel). It is suggested that the growing interaction between government and higher education will warrant a skillful blending of higher education's autonomy and government's role in representing the will of the people. A bibliography is provided. (LC)

**How to Assess Quality in Master's Degree Programs—A New and Better Way.**

Pub Date—1 Mar 79

Note—12p.; Paper presented at a conference on assessing quality in master's degree programs (University of Maryland, College Park, MD, March 1, 1979). Best copy available.

Pub Type—Speeches/Meeting Papers (150) — Guides — Non-Classroom (055)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—College Environment, College Faculty, \*Departments, Educational Facilities, \*Educational Quality, \*Evaluation Criteria, Evaluation Methods, Grades (Scholastic), \*Graduate Study, Higher Education, Job Placement, \*Masters Programs, \*Program Evaluation, Reputation, Scholarship, Standardized Tests, Student Characteristics, Student Employment, Student Experience, Student Teacher Relationship, Teacher Effectiveness, Teacher Guidance

Evaluation methods for master's degree programs should be substantially different from those currently used for doctoral degree programs. Three current methods, that of Beverly Hurlbert, that of Jack Gourman, and that using departmental reputations as the major criterion, are insufficient. Elements that should be included in the evaluation are the department itself, ancillary departments that could reasonably be expected to attract a substantial number of students from the department being rated, campus facilities used by the department, and the advantages and disadvantages of the surrounding community for the subject being studied. Department measures include: the faculty's scholarship; amount of time faculty devote to teaching, advising, guiding student research, and student contact; quality of students, measured by Graduate Record Examination scores, undergraduate grades weighted by college quality, and current jobs and cumulative experience; student participation in department and campus life; and graduate placement record. Campus-wide measures include strength and accessibility of related departments, and the quality of facilities a program draws upon most. Although the community environs should be considered, they should not be weighted too heavily. A list of references is included. (MSE)

**A Brief History and Critique of Published Ratings of Graduate School Departments.**

Pub Date—77

Note—25p.; Best copy available.

Pub Type—Reports — Evaluative (142) — Opinion Papers (120)

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Academic Libraries, College Environment, College Faculty, College Students, Comparative Analysis, \*Departments, Doctoral Programs, \*Educational Quality, Educational Resources, Evaluation Criteria, \*Evaluation Methods, Full Time Students, Grades (Scholastic), \*Graduate Study, Intellectual Disciplines, Job Placement, Masters Programs, \*Program Evaluation, Rating Scales, Reading Habits, Student Characteristics, Student Employment, Student Teacher Relationship, Teacher Characteristics

Three commonly used methodologies for ranking undergraduate and graduate colleges and programs are compared and evaluated. The first is that of Jack Gourman. It uses a scoring system similar to that of the College Board Examinations with scores from 200 to 800, assigned in two areas: one for the strength of academic departments, and one for important nondepartmental features of the institution. The second, devised by Beverly Hurlbert, has been used only in anthropology. It uses exchange theory, wherein the relative status of people or groups is measured by their patterns of personal interaction. The third methodology uses the ratings of experts, collated to produce a single final rating. These are called the (Allan) Carter and Roose-Andersen studies. Each methodology is explained and criticized. It is concluded that the best way to evaluate and rank academic departments would be to create a rating system that is at the same time more objective and more subjective than existing methods. Objective ratings would include those of faculty degrees, honors, and publications; student quality as measured by undergraduate school and grades; proportion of students that are enrolled full-time;

faculty-student contact hours; student job placement; library resources and accessibility; and others. Subjective measurements would include number and quality of student interactions; student reading habits in the field of study; field-related campus resources outside the department; and stimulation of the departmental ambience. A bibliography is included. (MSE)

The process for organizing and conducting a conference of finance and budgeting in higher education is described in this manual designed for use by groups interested in developing successful conferences in their regions. The manual is an outgrowth of a series of conferences sponsored by the Committee for the Concerns of Women in New England Colleges and Universities (CONCERN) and the Center for Research on Women in Higher Education and the Professors at Wellesley College. These conferences were directed toward women administrators in higher education and were held in 1974, 1975, and 1976. The conferences were intended to provide an opportunity for women in various administrative roles in academic institutions to share their concerns, to improve their administrative skills, and to develop associations with their counterparts in other colleges and universities. The introduction to the manual provides a preface, objectives of the manual, instructions on how to use the manual, and a sample conference schedule. Part Two, "Lecture Material," provides information on budgeting and fund accounting in colleges and universities. Part Three, "Case Material," describes how to use case materials, the structure of workshops, and fictitious Persons College case materials, such as budget worksheets, department requests, and priorities committee. Part Four offers information on conference planning and evaluation. Appendices include: women's organizations; visual aid materials, such as transparency originals; and handouts including illustrative exhibits, introduction to fund accounting in higher education, a bibliography, a glossary, and a planning calendar. Descriptors—Administrators, \*Business, College Administration, \*Educational Finance, \*Higher Education, Income, \*Investment

Bond valuation is examined to provide college administrators a more thorough understanding of the process to help them in developing their market values, or to help them in moving to a market valuation on bond holdings. Two methods presently used to value bonds, a matrix system and a trader quotation method, are described. An overview of bond markets and a discussion of dealer quote versus matrix pricing are presented. Features important to educational institutions when considering a bond-pricing service are considered. The two services that

are the best-known evaluation of debt issues in the United States are Moody's and S&P's. Salomon Brothers is probably the largest bond trading house in the world, with the most comprehensive organization of bond traders. Additional services described are provided by: Kuhn Loeb, Digital Information Corporation, Interactive Data Services, Inc., Teislat, and Merrill Lynch. (SW)

Identifiers—\*Research Administration, \*Research Universities

A distinction is made between management for research and management of research. The former refers to the provision of a nourishing climate, sound policies supporting services of various kinds, financial systems, and organizational arrangements that will help research to flourish in a university. It exists to support the management of research, a function of primary investigators. General and specific matters of concern in management for research include: (1) the institutional climate (enlightened attitudes of governing bodies, officers, and administrators; research emphasis in appointments, advancements, and faculty workloads; institutional funds; basic versus applied research needs); (2) policies and criteria (external control; relation to the curriculum; student participation and faculty supervision; qualified and committed personnel; dissemination of results; conflicts of interest; disclosure of sponsorship); (3) developing and implementing sponsored research (development and review of proposals; seeking sponsors; proposal submission, negotiation, activation, monitoring, and completion; implementing sponsor requirements; research administration organization); (4) interdisciplinary research; (5) professional personnel other than faculty; (6) patents and copyrights; (7) indirect costs (calculation and negotiation); (8) administrative offices and supporting services and facilities; and (9) organizational structures and considerations. A preferred system of management for research is briefly outlined. (MSE)

Descriptors—Banking, Budgeting, College Administration, Colleges, \*Educational Economics, Educational Finance, \*Financial Policy, Glossaries, \*Higher Education, Income, \*Investment, \*Money Management, Questionnaires, Universities

Effective cash management and short-term investing are discussed in this "how to" guide designed to benefit most institutions of higher education. The following premises are examined: proper compensation for effective cash management is not an expense but an investment; effective cash management and short-term investment pro-

grams do not depend on high market rate of investment return; one's goal can well be to keep 100 percent of available cash resources invested and still maintain adequate compensating balances in bank accounts; a good banker is one of the institution's greatest aids; and if cash accounts are not in a deficit position most of the time, the cash management program is not as effective as it should be. Part One covers daily cash management of college and university working capital dealing with such ideas as accounting principles, bank relations, cash receipts and cash flow projections. Part Two covers short-term investment of working capital discussing items such as certificates of deposit, liquidity, risk, and money market data. Appendices include a questionnaire, tabulation, short-term investment vocabulary, and common short-term investments. A bibliography is also provided. (LC)

Identifiers—\*National Assn of Coll and Univ Business Officers

A revised version of an earlier manual, "A College Planning Cycle" (1975), is presented. The concepts of planning and budgeting in colleges are introduced with emphasis on the importance of various participants in the process. The model of the National Association of College and University Business Officers (NACUBO) is described, and a logical approach to implementing the planning process is outlined. The NACUBO process is further detailed by relating the tasks involved to the planning participants, forms, and calendar. Revenue planning is also integrated with expenditure planning and evaluation is discussed as it relates to the process. Managerial control issues that are vital in translating plans into operational budgets are discussed. These issues include budget control, cash management, student financial aid, debt policy, capital budgets, and deferred maintenance. Four case studies that demonstrate how individual institutions may adapt the NACUBO model to their particular needs are presented. Planning forms for the fictitious Peoples College are referenced with the planning tasks, participants, and calendar dates outlined. In the appendix, a complete set of blank planning forms is included as a possible planning aid. (SW)

Identifiers—Bauhaus, Black Mountain College NC, Ruskin College (England)

It is argued that in an age of decelerated expansion, cultural values must replace consumption; that the local, small, and organic must replace the international, large, and synthetic. One radical college is proposed as a center for this kind of change. Its inspiration is seen in the past: stable primitive communities, classical treatises, monastic foundations,

pioneering institutions of higher learning such as Ruskin College, the Bauhaus, and Black Mountain College. The proposal draws on literature, historical events and institutions, and present-day institutions from around the world. The new college proposed would be democratic, self-managing, small, and residential. Its central aim would be to unify the experience of living and learning, of community and culture, of economy and academy. The institution is described in theory but in little detail. The proposed curriculum is briefly outlined. Appended are a bibliography and list of references. (MSE)

Results of the 1979 Comparative Performance Study of the National Association of College and University Business Officers are presented. The study is designed to aid administrators in evaluating the performance of their investment pools. The report covers comparative performance information and related investment performance statistics and other endowment statistics. Information is presented as of June 30, 1979, on 169 investment pools of 147 institutions. It was found that participating institutions had an average rate of return of 10.8 percent. Taking into consideration investment objectives, the pools whose stated objective was "total rate of return" outperformed those whose stated objective was "balanced." It was found that on average the larger pools (over \$50 million) outperformed the smaller pools during the past year. The performance for the

average investment pool for the one-year, three-year, five-year, and ten-year periods ending June 30, 1979, is presented. Section two of the report includes information concerning endowment gift giving, endowment wealth, endowment principal and income, custodial fees, option writing, etc. In appended material, the theory behind the methodology for the investment pool comparative performance computations is described, and performance calculations are explained in detail. This manual, a revision of the 1976 publication entitled "Management Reports," is intended to assist college business officers in establishing sound accounting systems and in preparing readable and meaningful financial management reports. A detailed description of the accounting system and a new expenditure classification structure have been included. The classification structure is comprehensive and is intended to provide meaningful cost information to use in budget analysis, control, and financial forecasting. Report formats that institutions can adapt to meet their needs are included for the following areas: student recruitment, admissions, and retention; student financial aid; personnel; budget control; auxiliary enterprises development programs; debt service; and cash management. Reports are intended primarily for interim internal reporting, providing management and governing board members with information on a monthly or quarterly basis. A chart of accounts and related coding structure provides the various categories used in classifying the financial transactions of an institution. The coding structure is intended for use with electronic data processing equipment, but it can be used with less sophisticated accounting systems. Sample forms are appended and definitions are provided for the following: funds, functions and subfunctions, specific unit, general ledger classification, assets, liabilities, appropriations, reserves/fund balances, revenues and receipts, expenditures and transfers. Descriptors—\*Adult Students, \*College Environment, \*College Students, Demography, Educational Environment, \*Enrollment Trends, Higher Education, Nontraditional Students, School Orientation, \*Student College Relationship, \*Student Needs, Student Personnel Services, Student Welfare

Trends in the enrollment of adult students in higher education are examined, and some inappropriate policies and procedures presently in effect at colleges and universities that are obstacles to adult learners are discussed. The demographic picture of the adult student population is presented as are projections for the general population and potential student market. Increases in the adult population are charted, and a graph of the age distribution until the year 2000 is included. Ways in which the student

services/student affairs area may adapt its policies, programs, and procedures to better serve adult learners and to avoid creating obstacles to continued adult student enrollment are considered. (SW)

**Verbal Participation and Outcomes in Medical Education: A Study of Third Year Clinical Discussion Groups.**

Pub Date—Apr 80

Note—33p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 1980)

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Academic Ability, Academic Aptitude, Achievement Need, Clinical Experience, \*Cognitive Ability, Critical Thinking, \*Discussion Groups, Educational Research, Higher Education, \*Interaction Process Analysis, Medical School Faculty, \*Medical Students, \*Outcomes of Education, Predictor Variables, \*Questioning Techniques, Student Teacher Relationship

A study of third-year medical school discussion groups was undertaken to determine how much the cognitive level of instructors' questions in small group sessions influenced student responses and whether these responses had any measurable relationship to critical thinking skills, or National Board of Medical Examiner (NBME) scores. The research model was based on concepts of process-outcomes designs, and the emphasis was to relate the verbal participation of the individual student to certain outcomes thought to be important to students in clinical training. The study sample consisted of 110 third-year medical students and 22 medical faculty. Students were assessed using the Medical College Admission Test, NBME preclinical performance appraisal, the Watson Glaser Critical Thinking Appraisal Test A, and three scales of the California Personality Inventory. The observational tool for the process measures was a modified version of the Flanders System of Interaction Analysis. Both teacher questions and student discussion incorporated the cognitive levels of Bloom's taxonomy. Two major study findings were: (1) the cognitive level of the teacher's questions was significantly correlated with the cognitive level of the individual student's response, particularly at the higher cognitive levels of analysis (synthesis and evaluation); and (2) the student's entry characteristics had a far larger effect on outcome measures than did the process of talk variables in the small discussion groups. Identifiers—Wells College NY

Organizational change at Wells College, New York, is traced from 1876-1905 in relation to women's role in higher education. This excerpt of a larger study indicates how women worked within a female college that had male authority figures at a time in which there were strong notions about proper feminine behavior. The college was intended to train women to be wives for college-educated men and to fulfill social prescriptions of the nineteenth century. Gradually by the late nineteenth century women no longer felt fitted only for moral leadership roles in the home but began to enter the new fields of social work, nursing, and library science. Courses such as sociology, economics, government, and anthropology were gradually added. Internal changes at Wells College also occurred,

most important of which was a gradual shift from male to female dominance in the governance of the school. The first woman principal, hired in 1876, employed self-abnegation and passive-aggressive strategies as covert attempts to gain power. Although temporary failures sometimes resulted, Wells College evolved a female subculture whose members involved themselves in the affairs of the school as policy-makers, faculty, and concerned alumnae. Conflicts with the male presidency of the school, whose perceptions of women's roles were restrictive, are considered. (SW)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*College Faculty, College Students, \*Evaluation Criteria, Higher Education, Reliability, Research Problems, \*Student Evaluation of Teacher Performance, \*Teacher Effectiveness, Teacher Improvement, \*Teacher Morale, Validity

The trend of student evaluation of college faculty performance is documented, and implications for humanization of the university are considered. Research in the area of teacher evaluation is cited, and it is proposed that reviews of the literature on student evaluations indicate by and large that student ratings are reliable and valid, even though there is a large body of dissenting opinion. Students have obtained significant influence in evaluation of teaching effectiveness, and administrators are thought to be viewing student evaluation of teacher effectiveness as more reliable and valid than colleague evaluation or informal observation. There still remains the question of how feedback on teacher performance can be used constructively for teacher growth and improvement. Evidence seems to support the notion that teacher morale has declined decidedly on many campuses. It is suggested that if inept methods of evaluation and accountability pressures cause poor morale of faculty members, there is a need for reanalysis of the issues. Clarification of whether evaluation of instructors is to improve teaching effectiveness or to determine who will be promoted or tenured is needed. Student ratings need to be carefully weighed in view of the complexity of the nature of the process. Until further research is accomplished to develop sophisticated and tested evaluation forms, current student evaluation should be kept in perspective. (SW)

**Selected Personality Variables of Students in Single-Sex and Coeducational Residence Halls.**

Pub Date—Apr 80

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 1980)

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Coeducation, \*College Housing, \*College Students, Females, Higher Education, Males, Personality, Self Concept, \*Sex Differences, Sex Role, \*Sex Stereotypes, Social Attitudes, \*Student Attitudes

Selected personality variables of college students who reside under different living arrangements were studied to determine the effect of student's type of housing, gender, and enrollment classification. A sample of students living in residential halls at Maryville College were administered the Attitude Toward Women Scale (ATWS), the Bem Sex Role Inventory (BSRI), and Sex-Role Stereotype Questionnaire in the fall of 1977. In the spring of 1978 the inventories were readministered. Results indicate that differences/similarities on personality variables of students in different residence settings is related to the students' sex, enrollment classification, and type of housing. Females' attitudes toward women as measured by the ATWS were significantly more liberal than males' on both pretest and posttest measures. Men in coed halls had significantly more liberal attitudes toward women than men in single-sex halls. Based on BSRI results, students living in coed halls were fairly equally divided on masculine and feminine sex-role orientation. Men in single-sex dorms were more masculine in their orientation while women in single-sex dorms were more feminine. Sex-Role Stereotype Questionnaire results indicate that the college males and females viewed males and females in traditional roles. Although females showed more liberal attitudes toward women, their own self-report showed them to be traditional in social orientation and to incorporate feminine characteristics in their sex-role orientation. Recommendations for further research are offered. (SW)

Descriptors—Administrator Education, Black Teachers, Budgeting, \*College Administration, \*College Faculty, Educational Finance, \*Faculty Development, Feasibility Studies, Governance, Higher Education, Improvement Programs, Inservice Education, Institutes (Training Programs), Internship Programs, Leadership Qualities, \*Minority Groups, Professional Training, \*Researchers, Teacher Attitudes, Teacher Background, \*Women Teachers

Identifiers—Higher Education Resource Service, United States (Mid Atlantic States)

The status of women and minorities in higher education is discussed, and two intervention strategies are described that were implemented by the Higher Education Resource Service (HERS, Mid-Atlantic) of the University of Pennsylvania to assist in training and advancement. In conjunction with Bryn Mawr College, HERS designed a month-long summer institute to train women in academic governance, finance and budgeting, management and leadership skills, and administrative computing application. It was found that the 1979 summer institute participants were a highly career-oriented group whose self-imposed expectations demand an intensive academic curriculum. Differences were found between participants whose prime responsibility is administration and those who concentrate on teaching. Administrators found the total course and the computing, management, and professional development units more applicable than did the faculty. Faculty wanted more academic content and rigor in the curriculum. HERS also conducted a

junior faculty survey to determine the feasibility of establishing a research training internship for women and minority junior faculty in four-year Mid-Atlantic colleges. A questionnaire asked respondents to provide general information on their personal background, on the home institution, academic field, training, experience and research activity. They were asked to indicate their interest in participating in a possible internship training program and to offer suggestions for such a training program. (SW)

Identifiers—\*Northwestern University IL

Experiences of 60 women over 30 years old who returned to college after being out of school at least four years were studied. Thirty graduates and 30 undergraduate students were interviewed. Institutional barriers women confront include inadequate student services, limitations on financial aid, and admission practices and screening procedures discriminating against older students or women. Student experiences about the following are discussed: faculty/staff attitudes to older re-entry women, nontraditional credits, scheduling and other academic reforms, academic counseling, and special services. Situational barriers include unfamiliarity with the system, financial need, time management and role strain, child care, rusty skills and inadequate preparation. Support of the women's reentry family and friends, commuting, health and fatigue, and problems of guilt and anxiety are considered. Policy recommendations, a list of interview questions, and statistical data concerning respondents are included. (SW)

A literature review of barriers to women who re-enter higher education studies is presented. Several factors are thought to influence the experience of re-entry women: the type of institution she attends, the type of program that she finds there, and her personal and social situation. Re-entry women are discussed in terms of inner city women, low income women, and middle and upper-middle class woman. Ekstrom's (1972) classification of barriers to re-entry (dispositional, situational, and institutional barriers) and Astin's (1976) variables (program-related, time of classes, location, distance, etc. and personal variables) are considered. The following concerns are examined: regulations of colleges, application and admissions, faculty/staff attitudes, nontraditional credit, scheduling and other academic reforms, special services, counseling, un-

familiarity with the system, financial need, time management and role strain, child care, rusty skills and inadequate preparation, support of family and friends, commuting, health and fatigue, attitudes and personality, and guilt and anxiety. A bibliography is included. (SW)

Identifiers—\*Elitism, Northwestern University IL  
Structural conditions and normative expectations of university life that provide barriers and opportunities to re-entry women as they request admission, enter, and undertake graduate and undergraduate studies in a private, midwestern university were examined. Interviews were conducted with administrators, staff, and professors to elicit their views on the situation of the re-entry woman. Based on the perspective of the staff and administration, the process of recruitment and provision of support services are described. The range of understandings among academics about the responsibility of the university to such special groups as minorities, women, re-entry women, the continuing education student, and the part-time student is documented. Additional considerations are views on the best and brightest students (of any category), general normative and institutional structure (the patterns of deference and demeanor), the professors' desires, and speculations about how this institution would have to change to adapt to a larger number of re-entry students than those currently accepted. Selected comments of respondents are included. (SW)

Identifiers—\*Northeastern University MA

A faculty development program instituted in Northeastern University's College of Nursing is described. Operated internally by elected faculty development committee members, the program includes goal setting, evaluation, and related services. Through a series of steps new faculty members plan their professional development and prepare evaluative information. The important features of this process are the yearly planning sessions, the involvement of faculty development committee members, and the general recognition of the need for a career-long faculty development process. After a six-month evaluation, decisions for certain long-range goals and professional development activities are made. Each spring, the faculty member completes a faculty planning form, called a "professional growth plan." At a meeting of the faculty member, faculty development committee member, course coordinator, and dean, the previous year's goals are discussed, based on data derived from evaluation information sources. Progress to-

ward stated goals and plans for specific developmental activities are made. Meetings to determine salary increases, retention, promotion, and tenure are also held. The faculty development committee member also assists in the documentation and reporting of professional competence in the faculty member's dossier. Evaluation instruments are appended. (SW)

**Influence of Course Structure on Student Affect: The Structural Affect Hypothesis.**

Pub Date—Apr 80

Note—31p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 1980)

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Affective Behavior, \*College Instruction, College Students, \*Course Evaluation, \*Course Organization, Higher Education, \*Participant Satisfaction, \*Personality Traits, Student Behavior, \*Student Reaction

Course instruction was manipulated to yield two different levels of structure in an exploratory analysis of the effects of course structure on student satisfaction in 166 introductory educational psychology students. Results suggest that student satisfaction for different degrees of course structure depends on personality attributes. Seven significant interactions were found, five of which suggest a possible pattern. Students who prefer moderate structure to high structure tend to score high on a number of adjective check list scales (i.e., dominance, change, number of favorable adjectives checked, affiliation, and intrapersonal) which collectively identify individuals who are described as dependable, cooperative, resourceful, adaptable, and curious. Methodological and theoretical implications are discussed, and the need for further attribute-treatment interaction research on affective outcomes is suggested. (Author/SW)

**Persistence in College: The Impact of Financial Assistance to Students.**

Pub Date—11 Apr 80

Note—32p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980)

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Academic Persistence, \*College Attendance, \*College Freshmen, Financial Aid Applicants, Higher Education, \*School Holding Power, \*Student Attrition, \*Student Financial Aid

Identifiers—Washington State University

The influences of the receipt of student financial assistance and the amount of assistance received on persistence in college over a four-year period were examined. The sample included all recipients of aid, all nonrecipients who applied for aid but were not eligible, and a representative sample of controls selected from the 1970-71 entering freshmen class at Washington State University. The results indicate that the receipt of student aid had small positive effects on persistence and that the denial of student aid in the freshman year to a group of applicants who were not eligible resulted in small negative effects on persistence. Contrary to expectation, when structural determinants of persistence were controlled, increasing amounts of financial assistance received per semester were negatively related to semesters attended. Descriptors—\*College Desegregation, College Planning, \*Conferences, Desegregation Effects, \*Desegregation Plans, \*Higher Education, Information Dissemination, \*Participant Satisfaction, \*Program Evaluation

An evaluation report from a national conference on desegregation in higher education is presented. The conference was held in Raleigh, North Carolina, July 18-20, 1979, under the auspices of North Carolina Central University. Conference sponsors were the ERIC Clearinghouse on Higher Education, Educational Testing Service, the North Carolina Humanities Committee, the School of Education at The University of North Carolina at Chapel Hill, and the Institute on Desegregation. It was designed to provide opportunities for individuals involved in developing and implementing desegregation policies to participate in and react to general and concurrent sessions dealing with the impact of desegregation policies in higher education on students, staff, faculty, individual institutions, statewide systems of education, and society. The conference was also organized to give researchers an opportunity to share the major findings and implications of their research with those who develop or implement desegregation policies at state and institutional levels. Information is presented on the following: demographic characteristics of conference participants; distribution of and response to evaluation forms; background of respondents, including agency and organization affiliation, residence, sex, and race, and highest level of educational attainment. Information is also presented on participant response concerning conference promotion and publicity, conference dates, conference length, conference program content and quality, and overall reaction of respondents to the conference. Samples of both positive and negative reactions from individual participants are included. Suggestions for future conferences are included. (SW)

Status Identities in Academic Education Units: A Q-Factor Analytic Exploration.

Pub Date—[79]

Note—45p.

Pub Type—Reports - Research (143) - Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Administrator Attitudes, Administrator Characteristics, College Environment, \*College Faculty, Deans, \*Factor Analysis, Higher Education, Interprofessional Relationship, Private Colleges, \*Q Methodology, Research Methodology, Schools of Education, State Colleges, \*Status, \*Teacher Attitudes, Teacher Characteristics

Status identities in schools, colleges, and departments of education were investigated using Q-factor analysis. Ninety-six education professors, deans, and administrators involved in central roles (provosts for instruction or vice-presidents for academic affairs, and academic deans in smaller institutions) were studied. Large, small, public and private four-year schools were included. All subjects were characterized by institutional size, years of experience, institutional type, highest degree held, and whether they worked through the central office or in education programs. The study yielded 72 subjects for data applicable to factoring. Two Q-factor types were generated which, based on analysis of z-score arrays were labelled "The Assured Academic" and "The Threatened Academic." These two types are discussed and item-descriptions with descending z-scores are included for each as well as an array of z-scores which differentiate the types. The factor analytic methodology is explained and comments are included regarding the differences between Q-factoring and the more familiar R-factoring procedure. (Author/SW)

Survey of Provision for Academic Staff Development (United Kingdom and Canada). Survey III.

Manitoba Univ., Winnipeg.

Pub Date—Feb 80

Note—54p.

Available from—The University of Manitoba, Department of Education, Winnipeg, Manitoba, Canada R3T 2N2

Pub Type—Reports - Research (143) - Numerical/Quantitative Data (110) - Reference Materials - Directories/Catalogs (132)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Administrative Organization, \*College Faculty, Curriculum Development, \*Faculty Development, Foreign Countries, Higher Education, \*Inservice Teacher Education, \*Professional Continuing Education, Professional Develop-

ment, Program Descriptions, School Surveys Identifiers—\*Canada, \*United Kingdom

A survey was conducted in 1979-80 to determine which Canadian universities are involved in the provision of teaching services for academic staff (assistance of various forms in such matters as instructional skills, evaluation techniques, courses and curriculum planning). Information is presented on the nature of the assistance being provided, the administrative format, the dates the units or committees were established, and the scope of activities in which the units are involved. Results of a 1977-78 survey in the United Kingdom are also included. The results of the Canadian survey are summarized in a chart categorized as follows: (1) institutions that employ a committee format; (2) institutions employing a unit format; (3) the numbers of full- and or part-time staff associated with the committees or unit; (4) the institutions involved in such activities as staff workshops; (5) the percentage of the institution's teaching staff that is involved in the various activities of the units/committees; and (6) the provision, if any, that is made for graduate assistant training. The United Kingdom chart names the institutions that are indicated as offering some such service, gives the name of the committee and/or unit through which the services are administered, the date of their establishment; and a directory of the people involved in staff development at the various universities. The training courses in the United Kingdom range from induction and orientation sessions for new staff members, to inservice courses for established staff. Over half of the British institutions provide formal inservice training, and there is little discipline-based training. (SW)

Issues of Merit Pay in Higher Education: A Selective Bibliography.

Pub Date—[80]

Note—16p.

Pub Type—Reference Materials - Bibliographies (131)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Administrative Policy, \*College Faculty, Higher Education, \*Incentives, \*Merit Pay, \*Professional Recognition, Teacher Employment, \*Teacher Salaries, Trend Analysis

A selected bibliography designed to characterize the various viewpoints on merit pay in higher education through the decade of the 1970's is presented. Initial research was conducted by surveying the "Education Index," the "Social Sciences Index," the Humanities Index, the "Social Sciences and Humanities Index," and ERIC's "Current Index to Journals in Education." The list of potential items was screened for relevance, reduced in size, evaluated, and verified by direct study of the original documents. Additional items were included from bibliographies of articles. (SW)

Changing Public Priorities: Universities and the Future of Ontario. Brief to the Ontario Council on University Affairs.

Council of Ontario Universities, Toronto. Committee on Operating Grants.

Pub Date—Mar 80

Note—80p.

Available from—Council of Ontario Universities, 130 St. George Street, Suite 8039, Toronto, Ontario M5S 2T4, Canada

Pub Type—Reports - Descriptive (141) - Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—\*Budgeting, Educational Finance, \*Financial Policy, \*Foreign Countries, Futures (of Society), \*Government Role, \*Higher Education, Income, \*Public Policy, School Funds Identifiers—Canada, \*Ontario

A brief presented by the Council of Ontario Universities (COU) addresses financial requirements for 1981-82 for the Ontario university system. The first section of the brief examines the government's announced funding level for 1980-81 and contrasts this with the implications of the advice submitted by COU and the Ontario Council on University Affairs (OCUA) for the previous year. The position of Ontario's universities in relation to others in Canada is examined as is the position of the university sector in relation to other government supported sectors of the Ontario economy. Section Two provides the details of COU's advice to OCUA for 1981-82 and works within the framework of OCUA's system funding model. Section Three examines the operat-

ing and capital requirements of the Ontario government this decade and notes that present fiscal restraint is the result of a government decision to fund all financial requirements, both operating and capital, out of current revenue. An extrapolation of current university funding levels is made through 1983-84. Observations on the meaning of massive underfunding of universities in Ontario are presented. (SW)

Costello, Francis J.

A Study in the Further Development of a Relationship between Precognition and Creativity.

Pub Date—80

Note—22p.; For related document, see ED 165 628 Pub Type—Reports - Research (143) - Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Behavioral Science Research, \*Cognitive Processes, College Students, Correlation, \*Creativity, \*Creativity Tests, Engineering, Higher Education, \*Perception Tests, Predictor Variables

Identifiers—\*Precognition

The relationship between pre-cognition and creativity was investigated in an effort to reaffirm previous findings (Costello 1977) of a correlation between these variables. A sample of 100 engineering freshmen was tested for creativity using the Torrance Test for Creative Thinking and was tested for pre-cognitive ability using the Dean-Mihalasky test. Creativity is measured by the Torrance Test through three activities involving the subject's figural response to various stimuli. The first activity is scored only for originality and elaboration; the second and third activities are scored for fluency, flexibility, originality, and elaboration. Pre-cognition, the ability to forecast future events, is scored by comparing a 100-digit number forecasted by the subject to a 100-digit random number subsequently produced by a computer's random generator. When a digit in the forecasted number corresponds to a digit in the computer's number, a hit is recorded. The pre-cognitive scores were correlated to each of the 18 sets of scores produced by the creativity tests. Results indicate a strong, negative relationship between scores on Activity Two of the Torrance Test and scores on the Dean-Mihalasky pre-cognition test. References and data from the 1977 study are appended. (SW)

Development and Evaluation of Problem-Solving Skills in Microbiology.

Pub Date—Apr 80

Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 1980)

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Academic Achievement, Course Evaluation, Higher Education, \*Laboratory Training, \*Medical Students, \*Microbiology, Predictor Variables, \*Problem Solving

A problem solving, laboratory experience was devised in which first-year medical students were given a case description and then required to make judgments about what microbiology specimens should be collected and to analyze the results of laboratory tests in terms of implications for patient care. Over a four-year period revisions were made in the instruction and evaluation methods of the microbiology course. The three design variables which were included in the study were number of laboratory hours spent on problem solving techniques, class credit awarded for completion of laboratory activities, and exposure to problem solving examination items. Variations in these instructional methods were considered across the four years. Two of the variables were eventually dropped from the statistical analysis because of multicollinearity. A regression equation predicted student achievement on problem solving test items from number of hours spent in problem solving laboratory exercises. It is concluded that hours spent in problem solving laboratories had the strongest relationship with problem solving achievement, although test item exposure and student accountability also had an effect. **Changes Needed in the Tax Laws Governing the Exclusion for Scholarships and Fellowships and the Deduction of Job Related Educational Expenses.** Report by the Comptroller General of the United States.

Comptroller General of the U.S., Washington, D.C. Report NO.—GGD-78-72

Pub Date—31 Oct 78

Note—118p.

Pub Type—Reports - Research (143) — Legal/Legislative/Regulatory Materials (090) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—College Students, Court Litigation, Discriminatory Legislation, Disqualification, Eligibility, Equal Protection, Federal Regulation, \*Fellowships, Financial Aid Applicants, Higher Education, \*Income, \*Justice, \*Laws, Legal Problems, \*Scholarships, \*Taxes

Identifiers—Department of the Treasury, \*Internal Revenue Service

Problems caused by the tax law and Department of the Treasury regulations related to the income exclusion for scholarships and fellowships and the deduction of job-related educational expenses were studied. Legislative changes that may reduce the amount of controversy generated by these two sections of the Internal Revenue Code are recommended. A detailed examination was conducted of 257 randomly selected cases pending review in the Appellate Division of the Internal Revenue Service and 281 court cases already decided. The tax rules and Treasury regulations were found to be confusing and difficult to apply. Determination of the tax status of educational grants and expenses depends upon the naming of precise factual and legal distinctions in fact situations that are essentially comparable. The result is that taxpayers similarly situated are treated in a dissimilar manner. The General Accounting Office suggests a solution designed to: (1) simplify the tax rules applicable to educational grants and deductions, and (2) accord approximately equal tax treatment for persons in similar situations. (SW)

Descriptors—\*Administrators, Annotated Bibliographies, \*Education, Educational Background, \*Educational History, Educational Theories, Foundations of Education, \*Personnel, \*Researchers, \*Teachers

Identifiers—\*Educators

The combined efforts of several hundred American educators to identify and report on 1,665 educators who have been major figures in the development of American education from colonial times to 1976 resulted in this biographical dictionary of American teachers, reformers, theorists, and administrators. The content of each biographical sketch is basically a short description of the subject's education, employment, contributions to education, and participation in professional activities. References for further information are provided at the end of each entry followed by the contributor of the sketch. It is noted that not all publications, activities, or awards are listed for every individual in order to keep the sketches at a reasonable length. Appendices provide convenient divisions of the entries: place of birth, state of major service, field of work, and chronology of birth years. A fifth appendix provides a chronology of American education history. Abbreviations for frequently used references are provided as are an introduction and list of contributors. Entries within the three-volume set are arranged alphabetically. (LC)

Identifiers—\*Illinois College

A professor of Illinois College, the oldest college in the state, presents its history in celebration of its sesquicentennial anniversary. Beginning with its inception in 1829 to 1979, the author deals with its defeats and triumphs impartially, placing them in a philosophic framework. The foreword is written by Donald C. Munding, President of Illinois College and the introduction by William N. Clark, Chairman of the Board of Trustees. The history is divided according to time periods: 1829-1925 and 1925-1979. Several areas are examined: the foundations laid for the colleges, the numerous presidents of the college and their effects upon its growth, the medical school, philosophies that affected the college's development, the literary societies, social realities present during various growth or decline periods for the college, and projections for future growth and direction. Appendices provide resource materials; name of members of faculty, 1925-1979; the trustees of Illinois Colleges, 1925-1979; and the persons who participated in the Illinois College Oral History. Various illustrations include photographs of the college and college buildings. (LC)

Document Not Available from EDRS.

Descriptors—Academic Rank (Professional), Access to Education, \*Career Ladders, Case Studies, \*College Faculty, Comparative Analysis, Competitive Selection, \*Credentials, Doctoral Degrees, Due Process, Educational Trends, Employment Experience, Employment Level, Enrollment Trends, Faculty Promotion, Graduate Students, Higher Education, Political Influences, Professional Recognition, Professional Training, Reduction in Force, Seniority, Sociology, Statistical Analysis, Status Need, \*Teacher Supply and Demand, \*Teaching (Occupation), \*Tenure

The paradoxical state of academic's attempt to crowd individuals into institutions of higher education at a time when jobs for them are evaporating has created a conflict within the academic personnel community for non-tenured faculty struggling to survive. Case studies representing actual experiences of some individuals directly involved in the dilemma are examined. It is suggested that the result of the over-supply of academic personnel is the abuse of graduate students under the conflicting pressures of credentialism, professionalism, and education, the conflicting pressures of teaching and professionalism on the younger staff members, the massive assault on the tenure system, and the pressure to publish or perish. It is concluded that a quasi-closed elite has emerged at the top with a permanent underprivileged stratum of untouchables at the bottom. Six case studies examining tenure, layoffs, professional power politics, and due process are presented in the Introduction. Authors include Arthur S. Wilke, B. Eugene Griessman, Paul Blumberg, Don Martindale, Sil Dong Kim, Lee Krueger, and Harvey R. Cain. In Part One, The Rocky Road to Tenure: Profiles in the Hidden Professoriate, Fran French, Alfredo Miranda, Wilke, and Norman S. Goldner examine the changing rules and abuses within tenure policies. In Part Two, Consequences of the Tenure Crisis, various results of several confrontations with tenure policy are discussed by French, Constance A. Sullivan, Joseph A. Pilgrim, and Barbara Jean Wilke. Tables provide such information as: projected openings for and new supply of Ph.D.'s, 1974-85; birth rate per 1,000 U.S. women,

age 15-44, 1940-73; distribution of persons with Ph.D. and M.A. degrees by primary employment; projected faculty openings; and degrees granted in sociology, 1950-74. An index is provided. (LC)

Pub Date—8 Feb 80

Note—22p.; Paper presented at the Annual Meeting of the Southwest Educational Research Association (San Antonio, TX, February 8, 1980)

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classification, \*College Environment, Higher Education, Information Sources, \*Institutional Characteristics, Organization Size (Groups), Regional Characteristics, \*School Demography, School Location, \*Student Characteristics, Student College Relationship

Ways to study and evaluate different types of college environments are discussed, and sources of practical information about specific types of colleges are presented. Three main types of approaches used to measure college environments concern student behaviors (amount of time spent studying), student perceptions (the college is highly competitive), and student personal characteristics (academic ability). Examples of objective instruments that have been used to study these areas are cited. Other studies use college catalogs, directories, governmental publications, college budgets, statistical abstracts, and books. Various categories of college environments can be conceptualized using regional criteria, size criteria, and other criteria. Nine types of college environments have been suggested by Pace (1963, 1968, 1971). A map of American college communities that demonstrates clustering in various geographical environments is included. A list of categories of environmental dimensions of colleges is appended. (SW)

Descriptors—Administrative Organization, Administrators, \*College Administration, College Faculty, College Programs, \*Comparative Education, Educational Finance, Employment Practices, Faculty College Relationship, \*Foreign Countries, \*Government School Relationship, \*Higher Education, Institutional Autonomy, Personnel Policy, Student Characteristics, Universities

Identifiers—Europe, \*University of Dijon (France), \*University of Munster (Germany)

A study of the administration of two European universities, the University of Dijon in France and the University of Munster in Germany, was undertaken. Objectives were as follows: (1) to study the relationship between the individual university and the national or state authorities for higher education; (2) to acquire a special knowledge of the organization of, and methods used by, the administration of the colleges; and (3) to compare the procedures being adopted during a period of financial stringency with those practiced by the 10 universities served by the North Eastern Universities Organization and Methods Unit. It was found that the university systems in France and Germany are more highly centralized than in the United Kingdom, and the relationship between the state and universities is detailed in law. There are great similarities between the pattern of university administration in the three countries, although the detailed procedures vary considerably. Information is presented on the following aspects of the University of Dijon and the University of Munster: academic matters, pattern of courses, finance, accounting methods, staff and student numbers by field of study, organizational structure, staffing procedures for academic staff and administrative staff, the budget, student characteris-

tics, and other areas. (SW)

Identifiers—\*Federal Insured Student Loan Program

The results of an evaluation study of selected educational institutions and students participating in direct school lending under the Federal Insured Student Loan Program (FISLP) is presented. Proprietary schools, which as a group have had a history of high default rates, and institutions of higher education, which are becoming the primary disburers of direct school loans, are examined. The study includes four objectives: to assess the attitudes and characteristics of current student borrowers who have received FISLP loans; to review administration policies and practices in their role as lenders; to examine the relationship between default on FISLP loans and the characteristics of past student borrowers of these loans; and to develop observations and recommendations on the policies and procedures of the FISLP that can strengthen its effectiveness. On-site visits were made to all eight direct proprietary lenders in the FISLP and 15 of their 39 schools, along with 16 institutions of higher education. Those interviewed were typically such administrators as financial aid officers, bursars, treasurers, vice-presidents for administration and finance, and corporate controllers. Among the concluding observations are: (1) the predominant factor in the students' enrollment decision is either the prospect of obtaining related employment or the school's reputation in their area of interest; (2) about 40 percent of the students felt that the availability of direct FISLP loans was important in their decision to enroll at their school; (3) nearly 70 percent of the students were satisfied with the amount of their loans and loan information; and (4) direct school lending is an important source of financial aid to students. Appendices include the questionnaire used for current in-school borrowers of FISLP, an interview guide used for reviewing the administrative practices of the schools, and the regression model analysis relating borrower characteristics and repayment status. Descriptors—Accounting, Compliance (Legal), Computer Oriented Programs, Consultation Programs, Data Processing, Federal Legislation, Higher Education, \*Loan Repayment, \*Management Information Systems, Models, Organizations (Groups), Professional Services, \*Program Administration, Program Evaluation, Program Implementation, Program Improvement, State Agencies, Student Financial Aid, \*Student Loan Programs, \*Technical Assistance

Technical assistance provided to loan guarantee agencies by Touche Ross and Co. under contract to the U.S. Office of Education (OE) is described. Objectives of the report are: to summarize the work performed and the results of each of the projects that were conducted; to describe certain prototype systems that were developed for the guarantee agencies; and to present recommendations to further improve program performance. Touche Ross and Co.'s services were sought to help OE meet the requirements of Section 421(c) of the 1976 Amendments to the Higher Education Act. Phase One, data collection and analysis at each existing guarantee agency, was conducted in 1977-78. The company accomplished 32 projects for 29 recipients in Phase Two. These recipients included state guarantee agencies, nonprofit corporations, state organizations, and the United Student Aid Funds. Technical assistance included: development of an accounting system; development of EDP systems user requirements and other EDP planning assistance; operations reviews; preparation of the policies and procedures for lender and school compliance programs; assistance in evaluating alternative approaches for nonagency states; and assistance in developing the plans for implementing a guarantee agency. Summaries of major technical assistance projects for 19 states are appended. (SW)

Descriptors—\*College Students, Educational Legislation, \*Federal Aid, Higher Education, \*Middle Class Students, Needs Assessment, Program Evaluation, \*School Surveys, \*Student Financial Aid

Identifiers—\*Middle Income Student Assistance Act

The impact of the Middle Income Student Assist-

ance Act (MISAA) on the distribution of financial aid to middle income students was assessed. A group of 172 colleges and universities that participated in a baseline study prior to the introduction of MISAA plus three additional schools were studied. Only a subset of the original student sample was recontacted. Data collection efforts consisted of a student questionnaire, a record review, and financial aid officer interviews. Study questions included the following: (1) Has the middle income student benefited from MISAA? (2) Has MISAA affected students' applying for financial aid and their resulting access to such assistance? (3) What effect has the retargeting had upon the original beneficiaries of the Basic Grant program (the low income students)? (4) How has MISAA affected the distributional relationships between and among the various federal aid programs and other sources of student support? (5) What effect has MISAA had upon institutional distributive patterns? A description of institutional student sampling procedures and sample data collection instruments and student followup letters are appended. (SW)

Descriptors—College Faculty, \*College Planning, \*College Role, College Students, Educational Finance, Enrollment Trends, Expenditures, \*Futures (of Society), Governance, Higher Education, \*Institutional Characteristics, \*Land Grant Universities, Personnel Policy, Position Papers, \*State Universities, Student Attitudes, Student Characteristics

Identifiers—\*Pennsylvania State University

Plans for the 1980s for Pennsylvania State University are presented. Some of the forces for change—enrollment shifts, threats to faculty vitality, new student interests, and eroding financial resources—are considered. Three main themes of the university are quality, selectivity, and flexibility. The following areas are examined: the university's land-grant heritage; university missions in the areas of instruction, research, and public service; missions of the various campuses; and the need for new emphases in health-related programs, international programs, energy programs, and the role of technology. Enrollment prospects are considered for higher education in general, undergraduates, graduates and medical students, and nondegree credit enrollment at on-campus locations. Additional areas are also considered: professional development and vitality of faculty, affirmative action, academic personnel policies, academic leadership, faculty governance, and responsiveness to demands concerning instruction, research, and public service. Academic concerns and expectations of students, concerns for extracurricular activities, and the diverse student population are covered. Other topics concern expenditure policies for specific areas, internal reallocations, income policies, state appropriations, external contracts and grants, private gifts, student tuition, and capital budget planning. A summary of recommendations is included. (SW)

Identifiers—\*1202 Commissions, Higher Education Act 1965

Purposes of 1202 Commissions and projected new roles with respect to continuing education are discussed. Both the House and Senate versions of the legislation reauthorizing the Higher Education Act of 1965 delete any reference to 1202 Commissions and substitute for it a state agreement provision. What in effect the new legislation does is to carry forward the 1202 functions, to reinforce further the recognition of the federal interest in comprehensive statewide planning, but to leave the matter of structure and means of accomplishing educational objectives to states, their legislatively authorized higher education boards or agencies, and to institutions. One of the changes related to the 1202 Commissions or the 1202 functions of state higher education agencies is an increase in the scope of statewide planning. A second change is the number of states in which responsibility for administration of Title I has been assigned to the principal state agency responsible for coordination or governance of higher education in spite of the fact that the federal legislation does not mandate such consolidation. A third change indicating a concern for continuing, adult education, and lifelong learning has been frequent funding for studies of and planning in this area. The new Title I and policy issues on the state level related to continuing education and social policy are considered. (SW)

Hardisty, Larry  
Use of Multiple Regression to Predict Academic Achievement at a Small Liberal Arts College.  
Pub Date—1 May 80  
Note—32p.  
Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC02 Plus Postage.  
Descriptors—\*Academic Achievement, Achievement Tests, \*Aptitude Tests, Class Rank, \*College Bound Students, \*College Students, Correlation, Grade Point Average, Higher Education, \*Multiple Regression Analysis, \*Predictive Validity, Predictor Variables, Small Colleges  
Identifiers—\*DePauw University IN

The relationship between academic success at DePauw University and such commonly used predictors as tested ability and academic success in high school was examined. The various subtleties of the multiple regression research method were also examined. Subjects were 1758 students who entered DePauw University during the fall semester of 1973, 1974, or 1975. Academic success was determined by the outgoing grade point average (OGPA) at the time the student left the school. Test scores included in the study were the verbal (SATV) and the quantitative (SATQ) sections of the Scholastic

Aptitude Tests. The scores from the battery of the College Entrance Examination Board achievement tests were also considered. Intercorrelations indicate that the scores for this study group are similarly related as they were for groups in previous research studies. High school rank tends to have the highest correlation with OGPA, and it is followed by SATVB. High school rank is relatively independent from the other scores, but the aptitude and achievement test scores are highly intercorrelated. Other correlations are analyzed. It is concluded that the use of the multiple regression did result in a prediction equation that appears to be very useful in a pragmatic sense. Some problems with multiple regression are cited. Descriptors—Case Studies, \*College Students, Eligibility, \*Federal Aid, \*Federal State Relationship, Government Role, Grants, Higher Education, \*Need Analysis (Student Financial Aid), Scholarships, \*State Aid, State Federal Aid, State Programs, \*Student Financial Aid  
Identifiers—Basic Educational Opportunity Grants, \*New York, Tuition Assistance Program NY  
Student grant assistance in New York State and federal-state interaction are considered. The evolution and growth of New York's student grant programs is traced. The state's response, or lack of it, to the federal Basic Grants program is addressed, and ways that other states might coordinate their own assistance programs with Basic Grants are suggested. The current and future role of state and federal grant assistance in promoting educational opportunities in New York is considered. New York's Tuition Assistance Program (TAP) and Regents' awards are available to New York residents attending postsecondary institutions within the state on a full-time basis. TAP is available to both undergraduate and graduate students, while Regents' awards are for undergraduates only. The size of a student's TAP is a function of family income; Regents awards are flat \$250 scholarships based solely on merit. More than half the New York undergraduates now receiving a TAP award are also eligible for Basic Grants. Eligibility determination and the information required on the TAP application form is different from that of the Basic Grant program. The formula for determining the size of a student's TAP award essentially disregards a student's Basic Grant. At this time, New York appears to have little intention of changing its present policy of minimal coordination between TAP and Basic Grant awards. Based on the experience of other states, several alternatives for award coordination are considered. (SW)

Results of Computer Based Training.  
Pub Date—Nov 78  
Note—19p.  
Pub Type—Reports - Evaluative (142) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Aircraft Pilots, Competency Based Education, Computer Managed Instruction, \*Cost Effectiveness, Educational Development, \*Flight Training, Graphs, Nontraditional Education, \*On the Job Training  
Identifiers—PLATO

This report compares the projected savings of using computer based training to conduct training for newly hired pilots to the results of that application. New Hire training, one of a number of programs conducted continuously at the United Airline Flight Operations Training Center, is designed to assure that any newly hired pilot will be able to enter and meet the objectives of any of the regular Transition Training Programs (to qualify pilots when they move from one type of aircraft to another) without modifying the existing program. In view of the wide range of student experience in each class, it was decided that the principles of criterion referenced instruction should be used, and the PLATO Computer Based Training System was selected for the application. The findings of this study indicate that the application of criterion referenced, individualized instruction as administered with the help of a computer based training system having good computer managed instruction capabilities has realized substantial savings over the traditional method of instruction; figures for the newly implemented Pilot Skills Training and Assessment portion of the course—using an average of five hours in a flight simulator over a 3-day period for each student—were not included. (JEG)

Buckingham, Betty Jo  
Selection Bibliography. A Bibliography of Selection Sources for School Library Media Centers.  
4th Edition.

Iowa State Dept. of Public Instruction, Des Moines.  
Pub Date—79  
Note—40p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.  
Descriptors—Annotated Bibliographies, \*Educational Media, Elementary Secondary Education, Instructional Materials, \*Learning Resources Centers, \*Library Acquisition, \*Library Material Selection, Resource Centers, \*Resource Materials, School Libraries

This annotated bibliography of selection and finding sources for both print and nonprint materials is intended for use by the librarian or media specialist. Materials listed are related to many different subject

areas, skill levels, and formats for pre-school through area school students and teachers. Inclusion in the list has been limited, in most cases, to available titles not over five years old, and of at least some possible use to public school media centers, area school learning resource centers, or area education agency media centers. The titles are separately published books, pamphlets, or periodicals rather than articles. For those who wish to explore further, several widely known bibliographies of bibliographies are included. Descriptive and evaluative annotations are provided where possible. (Author)

The Study Centers and Tutorial Services of the British Open University: A Council on Library Resources Project Report.

Spons Agency—Council on Library Resources, Inc., Washington, D.C.

Pub Date—[77]

Note—46p.; Best copy available.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, \*Correspondence Study, \*Delivery Systems, Developed Nations, \*Educational Development, \*Extension Education, Home Study, \*Open Education, Outreach Programs, Program Proposals, \*Rural Areas, Study Centers

Services offered by the British Open University are examined to determine the feasibility of establishing similar programs and study centers for an external degree program at Kauai Community College, Kauai, Hawaii. This report covers the history and origin, organization, courses of study, delivery systems, staff, and students at the Open University, focusing on the management, function, and effectiveness of the study centers. Information-gathering methods include interviews with administrators, staff, and students; observation of tutorials and counseling sessions; visits to typical study centers; observation of TV and radio programs broadcast by the school; and examination of their correspondence texts and kits. The Open University policy of bringing resources to learners is examined through its programs and teaching methods, which include extensive use of mass communication and correspondence learning. Study centers, established to provide contact between students and tutor-counselors, are evaluated in terms of usefulness to students and importance of the counselor. Certain elements of the Open University are then selected as appropriate for application to Kauai Community College, allowing for a smaller population and financial resources. Study centers are seen as providing radio and TV equipment for students to "attend" courses, as well as conducting tutorials and counseling sessions. (SW)

Descriptors—\*Audiovisual Aids, Audiovisual Centers, \*Cataloging, \*Classification, Information Centers, \*Information Systems, Libraries, Library Collections, \*Library Materials, Library Networks, National Programs

Project Media Base reports its conclusions and recommendations for the establishment of bibliographic control of audiovisual resources as a part of an overall objective to plan, develop, and implement a nationwide network of library and information services. The purpose of this project was to test the hypothesis that the essential elements of a national bibliographic system for audiovisual informational resources currently exist, and that therefore there is no apparent impediment to a national system. On the assumption that the hypothesis was correct, the project also sought to define functional specifications for such an integrated system of audiovisual resources. The findings stipulate differences between nonprint and print media and their relative reduction to control; present the state of efforts to achieve standards; note the need for mutual cooperation and coordination of audiovisual resources; describe current barriers to a national network; and indicate the existence of essential network elements. Recommendations include the establishment of international liaison, promotion of established cataloging standards, further development of networking study proposals, the expansion of computerized control of audiovisual resources, the utilization of shared cataloging and vendor supplied descriptions, and the dissemination of information concerning current networking activities, their coverage, services, and use. Critical Comments on the Gatekeeper Concept in Science and Technology.

Royal Inst. of Tech., Stockholm (Sweden). Library.

Report No.—TRITA-LIB-6017

Pub Date—Jan 80

Note—16p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication (Thought Transfer), \*Information Dissemination, \*Organizations

(Groups), \*Sciences, \*Technology

Identifiers—\*Gatekeeper Role, \*Scientific and Technical Information

The criticism of the two-step flow model of information dissemination in mass media research should also apply, this paper argues, to studies of gatekeepers in R & D (research and development) organizations: the 2-step flow model does not tell us with whom the gatekeeper is communicating, what is being discussed, or what effect the gatekeeper has on internal informal dissemination. Using an empirical study of an R & D organization, the thesis is presented that gatekeepers can contribute to an elitist pattern of distribution rather than to a reduction of the information gap. Finally, it is suggested that studies of internal communication in R & D organizations should deal with communication relationships rather than individuals as units of analysis. (Author)

Maximizing the Effectiveness of Online Searching-A Training and Education Model.

Pub Date—79

Note—10p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Data Bases, \*Models, \*Online Systems, \*Search Strategies, \*Training Methods, Worksheets

Three aspects of training and education for online searching of bibliographic and databases are addressed: (1) the present status—what is being taught, (2) a proposed model—what needs to be taught, and (3) the implementation of the model—who should teach what. The first section shows which organizations (library and information schools, information retrieval services vendors, database producers, and other online user groups) are engaging in which education and training activities: question negotiation, search strategy, evaluation of results, information retrieval system mechanics, database-specific information, and database loading characteristics by retrieval system. Basic competencies, search strategy development, and evaluation of results are the three major components of the model presented in the second section. A sample worksheet is included. Finally, who should have the responsibility for teaching different aspects of online searching is briefly considered in the conclusion. (Author/JD)

Descriptors—\*Community Study, Community Surveys, Data Analysis, \*Libraries, Library Personnel, Literature Reviews, \*Needs Assessment, \*Research Methodology

Identifiers—Delphi Technique, \*Illinois

Five methods for determining the needs and aspirations of the total library community (library personnel, library affiliates, and general population) in Illinois are presented in this report, and the use of three of them for a 3-phase study is outlined: (1) survey of the literature (documentary research and secondary data collection and analysis); (2) expert opinion, primarily the Delphi Technique; and (3) survey research, including what is generally called AT & R (action, training, and research). The discussion of the project phases lists the advantages and disadvantages of each of the three methods and

shows the logic that led to the final recommendations. Appended are the final report of the ad hoc committee on long range planning, a list of task force members, a selected bibliography of needs assessment studies, the agenda of the first task force meeting, the interim report submitted to the ILA executive board, results of the ERIC literature search, the survey letter sent to state associations, and a brief discussion of the five major methods used to determine needs. Descriptors—Cataloging, \*Information Networks, \*Information Retrieval, Information Services, Information Systems, Library Networks, \*Online Systems, \*Search Strategies

This report presents an analysis of the search query arguments of several major bibliographic utilities and shows the commonalities and differences of the query structure among the various systems. The report illustrates a symbolic metalanguage that was developed to describe and compare the search arguments. In addition, status and error messages used in conjunction with search queries that should be incorporated in the National Commission on Libraries and Information Science (NCLIS) National Bureau of Standards (NBS) Applications Level Protocol are specified. The report recommends that certain search argument formats be standardized for computer-to-computer communications and that more work be performed in the analysis of bibliographic response formats on the various systems. Data about the following systems are included: the Library of Congress, the National Library of Medicine, OCLC, the University of Chicago, the Washington Library Network, Northwestern University, and the Research Libraries Information Network. This historical review considers the rise of the German Democratic Republic's (GDR) system of libraries since its inception in 1945. Sections detail the following: (1) background; (2) tasks of the state organs in the development of the library network, with attention to legislation, planning, and management of the system; (3) role of the GDR Library Association; (4) structure of the library system, and the types and networks of libraries; (5) socialist cooperation and coordination within the library system; and (6) information and documentation services. Final remarks cover the compliance of the GDR library network with the goals of the National Information System of UNESCO (NATIS) and those stated in the "Charter of the Book." (FM)

Identifiers—\*State Planning, USSR

Following the principle of planned development for all phases of economic and cultural institutions, library planning and the resultant library legislation in socialist countries emanates from the supreme legislative authority of the state. Historically, existing legislation derives from the date of establishment of socialist governments. Library legislation changes in accord with tasks society imposes on libraries and reflects the government's concern for the development of libraries and the raising of their role in society. A regular component of long range planning, such legislation is most frequently developed in the form of five year plans which acquire the validity of law upon implementation. Library laws derive from the specific conditions of a country, its cultural features, and these traits of socialist librarianship: (1) libraries are important ideological and information institutions which promote education in general, communistic education of the working people, dissemination of scientific Marxist-Leninist ideology and the achievements of science and technology; (2) the state system of library service is available to all in a library network evenly distributed throughout the country; (3) the overwhelming majority of libraries are subsidized and centrally directed by the state; and (4) broad sections of the working people are active participants in the establishment and use of libraries. Identifiers—\*Asia (Southeast), International Federation of Library Associations

Many problems in developing biomedical library services for the emerging nations of Southeast Asia remain amenable only to legislation; however, IFLA

seems particularly well situated to assist in these tasks. Of the numerous political and technical problems to be overcome, first and foremost are the difficulties involved in the simple transmission of information in and out of a country due to lack of publishing and distribution networks on one hand, and governmental restriction on the other. Others include absence of a biomedical research communication system, lack of published papers from and about professional meetings, lack of technical book and journal collections, and shortage of trained library staff. IFLA, being voluntary, can act as a bridge in the international community, encouraging national membership in shared informational ventures and applying persuasive pressure on members to gather and allow access to information on a quid pro quo basis. Further assistance might include the preparation and publication of national holdings of biochemical works and journals, reprography, encouragement for interlibrary loan, resolution of customs problems, advice on, and preparation for computer technology, and promotion of incountry library staff training. IFLA should consider the formation of regional and even national subdivisions to promote these and other projects of mutual cooperation and communication. (RAA)

Descriptors—\*Federal Legislation, Library Planning, \*Library Services, \*Local Legislation, National Libraries, \*Public Libraries, \*State Legislation, State Libraries

Integration of local and national legislation is a necessity if libraries and library services for the public are to be well supported and widely available. Dating from the discovery of printing, local and national library legislation have gradually emerged to support libraries financially and to provide free service to the public, often without clear coordination of objectives and support arrangements. A model act that provides local as well as national objectives of library service may be found in Singapore. Some socialist countries have successfully enacted national laws integrating state and local regulations, while larger federated countries often exhibit disparity in integrated legislative systems. Since 1974 UNESCO has provided guidelines for national documentation, library, and archive infrastructure which are now being adopted by many nations. Political and legal influences generally shape library legislation. The fundamental steps involve determination of legislative intent, agreement on the expression of legislative policy, and the formulation of texts setting out agreed policies. Issues to be confronted include country wide standards of service, adequate supervision authority, financial support, and provision for future development and cooperative endeavors. These issues may be used to qualify existing legislation and to seek needed revision. (RAA)

Polish library legislation enacted since World War II is directed to the establishment of a library network, centralized in concepts and goals, but decen-

tralized in administration and operation. Dating from 1774 when the Commission for National Education first issued regulations for schools and libraries, there has been continuous legislative interest in libraries except for the Tsarist repression of 1820-1918. An enabling decree for library legislation in 1946 was followed in 1960 by a library act formulating organizational principles of contemporary library science and establishing a national library network of scientific, professional, school, academic and public libraries. The act fixes organizational responsibilities, avoiding detailed operative procedures, while establishing primary goals for the national network and individual libraries. It allows library administrators and librarians freedom to set local objectives and establish procedures most applicable to local conditions. A State Library Council assists the directive body, The Ministry of Culture and Art; by evaluating library practices and conditions and recommending appropriate library legislation. The Association of Polish Librarians is a professional body which conducts lectures and meetings, as well as publishing scholarly works, periodicals, and journal articles to support the goals of the Library Act. Librarians may most effectively promote library legislation needed to further the goals of libraries and library service through legislative lobbying activities. The legal basis for library legislation exists in the undisputed fact that libraries are agencies of learning and therefore merit the same legislative attention as schools. The most basic form of legislation provides for national libraries and library services. Legislation also establishes planning and policy making commissions, and provides financial support for facilities, materials, and professional training. Professional associations of librarians are ideally situated to promote legislative lobbying activities. In the United States, the American Library Association and the Association of American Library Schools have insured representation of library interests at the White House Conference on Library and Information Services. Legislative lobbying by professional associations in West Germany has resulted in the enactment of model library laws. Effective lobbying efforts have been reported by associations in the Philippines, Yugoslavia, Nigeria and Latin America, while direct cooperation with governmental commissions in Senegal and the Netherlands has also produced favorable actions. On the international level, a primary goal of the International Federation of Library Associations should be assistance to national associations in pursuing legislative objectives. (RAA)

A new classification is needed which would not prejudice the boundaries of art, one that would bring together in one place the literature on every sort of material artefact, tool, and artwork, without distinction. Within this grand class of artefacts, the sub-arrangement would, as far as possible, respect the integrity of individual cultures. Only at the level of the culture or society would artefacts need to be evaluated on an art-tool axis, and it could be left to the individual art library or cooperative acquisitions network to decide how far along that axis it wished to proceed—at what point, that is, a category of artefact ceased to qualify as art. Identifiers—\*International Federation of Library Associations, West Germany

This paper examines the publication of reports of library research progress in the Federal Republic of Germany and proposes problems of research publication that should be considered by the International Federation of Library Associations. Within Germany, four agencies, the German Library Association, the German Research Association, the German Library Institute, and the Association of German Libraries in conjunction with various study groups represent the bridge between research and practice. They publish information on library research through meetings, publication of journals, indexes, thesauri, bibliographies, etc.; however, a special bibliography of library research does not presently exist nor are there current abstracts of ongoing research projects. Reporting in periodicals is sketchy and often loses topical value because of late publication. Greater cooperation between existing agencies and a planned Research and Information Office is expected to help correct this situation. This problem is not unique to Germany and deserves the consideration of IFLA. Aspects for study include the determination of present national publication practices, compilation of a catalog of library research publications, development of regional and international cooperative publication and translation ventures, and the determination of international standards for research publications by subject field. Identifiers—\*Authority Control (Information), Canada, \*Dortmunder Bibliothekssystem

This paper discusses the current resurgence of interest in authority files and describes the automated authority files of the National Library of Canada. Factors contributing to this interest in such files include cooperative programs between libraries, the development of international standards, and the impact of computer technology and telecommunications. An automated authority file can result in great savings in time and money, as well as maintaining file integrity while allowing flexibility for local usage. The National Library of Canada, which has always had manual authority files, currently uses a batch mode authority system. A pilot project online authority system, DOBIS (Dortmunder Bibliothekssystem), is now operating at the National Library and the Canada Institute of Scientific and Technical Information for the production of a union list of serials and for reference activities. Completion of the pilot program is expected in September of 1979 with expanded use of the system planned for the year's end. The DOBIS system has been designed to provide decentralized access to all catalogs and files; it is a fully integrated system incorporating cataloging, catalog search, circulation, acquisition, and information retrieval functions. Descriptors—\*Books, Cataloging, \*Classification, \*History, Libraries, \*Library Collections, \*Library Materials, \*Library Technical Processes

Identifiers—\*Dewey Decimal Classification

The retiring editor of Dewey Decimal Classification recounts the development of the system from the 16th through the 19th editions, i.e., 1956-1980. During this period, the system has undergone major changes to internationalize its character. Special provisions have been incorporated for branches of history, geography, language, literature, the arts, philosophy, and religion that were of little or no concern to American libraries in 1876, and detailed tables of areas, and of racial, ethnic, and national groups have been added. International cooperative and consultative arrangements have been established and maintained in matters of editorial policy.

Modernization has resulted in both substantive and organizational changes. Substantive improvements include the reexamination and reclassification in such areas as women, sex, ethnicity, and religion. Organizational improvements have moved the system from a series of pigeonholes to a rational coherent structure characterized by subject integrity and predictable subject relationships. The paper concludes with a series of anecdotes recalling some of the frustrations and rewards of editorial direction. (RAA)

The Handicapped in Reading and the Public Libraries.

Pub Date—Aug 79

Note—12p.; Paper presented at the Conference of the International Federation of Library Associations and Institutions (45th, Copenhagen, Denmark, August 27-September 1, 1979). Best copy available.

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Audiovisual Aids, \*Disabilities, Foreign Countries, \*Library Services, \*Public Libraries, \*Reading, \*Reading Difficulties, Use Studies

Identifiers—\*Denmark

After acknowledging that a large segment of the population does not use libraries due to difficulties of one kind or another in visiting them, this paper argues that people with reading handicaps constitute an even larger number of non-users. Surveys of the use of Danish libraries are briefly reviewed, and 11 groups of people with "reading difficulties" are identified. Fourteen types of materials that are now available, or should be available, to library users are listed, and methods for adapting the contents of a book to the needs of the reading handicapped, particularly the mentally retarded, are described. Finally, a list of suggestions to help public libraries intensify their efforts in serving people with reading problems is presented. Several bottom-of-the-page sentences have been lost in the process of copying this document. (JD)

Identifiers—\*Nigeria

An aspect of library legislation which is generally ignored is legislation that promotes the utilization of academic libraries to maximize the potential of a nation's resources. From the available literature it would seem that library legislation in developing nations still conforms strictly to the traditional view that library legislation should be restricted to enabling laws and depository obligations. This is certainly true of Latin America and the Caribbean. The defeat of S. R. Ranganathan's proposals for a Union Library in India in 1948 deprived developing nations of a shining example of a model library law. An overview of library legislation in Nigeria makes clear that the nation has followed essentially the enabling and depository law pattern. Academic libraries are depository only, enjoy no privileges established by law, and have few binding legal obligations to the outside community. While a number of universities have recently made some moves towards sharing their resources with their library-poor fellow countrymen, legislation supported by the academic community is needed to expand on the present base of academic libraries and establish a truly effective national library system. Identifiers—\*West Germany

Interlibrary loans in the Federal Republic of Germany are facilitated by applying techniques of data processing and computer output microfilm (COM) to the union catalogs of the national library system. The German library system consists of two national libraries, four central specialized libraries of technology, medicine, agriculture, and economics, and approximately 20 regional libraries operating in decentralized cooperative networks. The national library in Berlin prepares COM union catalogs of the national serials database at 6-month intervals for use by the regional libraries, each of which prepares magnetic tape information on their new accessions for the national library. The COM union catalog processing originated as and still is an offline process; however, the processing and management of bibliographic data to be practical in the future must be developed as an online system. A national program has been devised to provide a computerized online system within the regional networks of libraries in the early 1980s. The library centers thus equipped will fulfill the multiple functions of accelerated technical processing of books and periodicals, production of COM union catalogs and an online interlibrary loan capability, and creation of a national subject information system. Descriptors—\*Exchange Programs, Information Centers, \*Interlibrary Loans, \*International Educational Exchange, Library Acquisition, Library Cooperation, \*Publications, Technology

The exchange of publications and international lending are both international interlibrary activities for bringing to a library works which are not owned by that library or which are owned in insufficient quantity to meet demand. This paper examines the relationships between the two to determine which would in practice be of assistance to the reader. Only in countries where every resource must be employed to save currency in the acquisition of foreign material or where the development of a strong international exchange program is given priority would coordination seem beneficial, and this might be at a sacrifice of the real need of the foreign lender or borrower, unless the alternative is offered without extra delay or cost in the first instance. The exception might be where the resources of a duplicate exchange center may match interlending demand among countries of common culture, and that seems likely to be less useful than well organized international loan arrangements. Some current blanket exchanges of periodicals or dissertations might be unnecessary if interlending could be improved or selective on-demand exchanges developed. The usefulness of duplicate exchange to help build up dedicated loan collections is beyond question; and the extent to which it will mitigate the need for borrowing depends on coincidence of the supply and the loan demand, although long term trends may smooth out disparities. This report of a 10-month study performed at the Institut Danois des Echanges Internationaux de Publications Scientifiques et Littéraires (IDE) on its exchange program for duplicate monographs provides an analysis of the working methods and time spent on the various phases, i.e., acquisition, processing, and distribution. The major function of the Institute is to coordinate and centralize Danish exchanges, and IDE is in charge of the exchange of official publications for all Danish libraries, doctoral theses and other publications issued by the University of Copenhagen, and the periodicals of the Danish National Library and the State and University Library of Aarhus, as well as serving as the national center for the exchange of duplicate books. Descriptors—\*Data Bases, Developed Nations, Development, Online Systems, \*Social Sciences

Identifiers—\*Canada, \*United States

This overview of North American social science databases, including scope and services, identifies five trends: (1) growth in the number of databases, subjects covered, and system availability; (2) increased competition in the retrieval systems marketplace with more databases being offered on multiple systems, improvements being made to the retrieval systems themselves, and more active advertising or "user education" being undertaken by the database and service suppliers; (3) increased ease of access as telecommunications facilities and technology improve and associated service costs go down; (4) continuing appearance of technological changes which affect the nature and use of databases and retrieval systems, such as microcomputers, bubble memories, and videodisks; and (5) the development of Teletext/Videotext systems which, along with other more "user friendly" retrieval systems, will foster increased "end user" access to all forms of databases. An appendix provides a list of examples of North American social science databases that are available online. (Author/JD)

Descriptors—\*Cataloging, Classification, Computers, \*Library Automation, \*Library Catalogs, Library Equipment, Library Technical Processes, \*Online Systems

Identifiers—\*Authority Control (Information), \*Genealogy

This paper describes the development of an automated authority control system for the Genealogical Society of Utah, which has large holdings of microfilm records from many nations, including civil registration, parish registers, local records, and census records. The key function of the library is the identification of people. From the beginning, the task of the library's bibliographic control system has been to efficiently and correctly identify and make accessible the library's holdings. The catalog, now quite old, contains several eras of cataloging and includes subject cataloging, first introduced in the 1960s. Gradually modern cataloging techniques including authority files have been introduced into the control system. In the 1970s, a decision was made to go online with an interactive computer catalog system. Details of the computer's authority control operation and the authority control scheme are presented with numerous illustrations. Special features of the process include a name extraction program and a locality extraction program to allow users simplified entry into the genealogical files. (RAA)

Identifiers—\*Access to Information, \*France

Despite deficiencies in depository administration and circulation, recent legislation concerning government publications in France has increased the

IR 008 332

IR 008 333

IR 008 330

availability of information. In France, in contrast to Great Britain and the United States, the publication of government documents is not centralized but is the province of individual agencies. Circulation of documents is a mixture of sale, free distribution, and deposit in libraries, and is often more beneficial to urban than provincial users. Deposit in libraries, however, is not consistent throughout the government and government publications are not maintained as a unit in libraries but are dispersed throughout the general collection. Bibliographic control of official publications is the responsibility of the Bibliothèque Nationale and official supplements of the national bibliography are published bimonthly. Legislation enacted in 1978 is bringing about substantial changes in increased accessibility for the French citizen by guaranteeing rights to information, while protecting individual privacy, and making such information available on demand. It places statutory limitations on confidentiality and provides for mandatory publication or announcement of government papers. While much remains to be done, the right of every member of the public to see official documents is enshrined in law. (RAA)

Identifiers—\*Washington Library Network

The computer design of the system serving the 53 library systems of the Washington Library Network provides nine online files through its integrated bibliographic and acquisitions subsystems. The bibliographic subsystem provides an authority file of author, title, series, and subject headings; a bibliographic file of MARC records on books, films, and serials; a holding file of 340,000 union holdings statements linked to appropriate bibliographic records, a working file of newly created records, and a waiting file of work requests. The acquisitions subsystem includes an inprocess of payment and order records, a standing order file, a library accounts file, and a directory file. The entire bibliographic database serves as a network-wide union catalog and a computer output microfiche catalog provides many participants with primary search tools at their branch libraries. Database searching is available on the full set of access points. Serials ordering, a circulation subsystem and interlibrary loans, and reference services are all facilitated by the computer. The Washington Library Network is presently integrating the Research Libraries Group of Stanford University and has established a cooperative program with the National Library of Australia. (RAA)

Identifiers—\*Hungary

Associations of special libraries in Hungary are being developed to provide universal availability of published works on a national and international level. While most library legislation recognizes considerations, concerns of document security, copyright, reprography and computerized services are also matters of legislative importance, particularly for special libraries. Hungarian law treats all libraries as a unified system with individual libraries in four administrative networks—public, school, academic, or special. A central library in each network provides professional operational supervision, procedural methodology, and professional training. Libraries within these networks are encouraged to

form associations based on professional disciplinary interest, e.g., chemistry, geology, telecommunications. Each professional association of libraries involves one central library and other cooperating libraries. Among the tasks of the associations are maintenance of statistical information, compilation of library holdings, evaluation against international holdings, interlibrary cooperation, and provisions for reproduction and dissemination of library materials. On the international level, these associations are encouraged to develop bilateral affiliations for exchange of publications and interlibrary loan. (RAA)

Descriptors—\*African Languages, Authors, \*Cataloging, \*Language Role, \*Multilingualism

Identifiers—\*Authority Files, \*Nigeria

Establishing name authority files in such multilingual nations as Nigeria is complicated by the existence of some 400 languages and dialects, although

only about 15 percent of these have been written or used in publications—English is used as the official language and the medium of intercommunication between tribes. Traditionally, Nigerians have been known by their given names derived from four categories: circumstance of birth, religion of the family, clan, profession of the family, and history of previous births. With the influence of the English and other Europeans, elements of Islam and Christianity have been introduced into the naming system. At first, surnames were unknown, but as education developed, family consciousness and cohesion have caused the development of an uneven pattern of surnames; it is a mistake to believe that a name is a surname merely because it appears last, and Hausa names have given particular difficulty in this regard. Nevertheless, the National Library of Nigeria has succeeded in establishing name authority files of Nigerian authors through research and the cooperation of authors and publishers brought together in workshops and seminars. Identifiers—FLOW

The Coach system, a computer simulation of a human tutor, was constructed with the goal of obtaining a better understanding about how a tutor interprets the student's behavior, diagnoses difficulties and gives advice to a student learning a simple computer programming language. Coach is based on a hierarchy of active schemas representing the tutor's general concepts, more specific information represented in a semantic network, and the coordination of data driven and conceptually guided processing which enable it to interpret behavior, recognize errors, and give advice. This paper describes the Coach system as it gives advice to a student learning FLOW, a simple computer programming language. (Author)

Descriptors—Case Studies, \*Computer Assisted Instruction, \*Elementary Education, Elementary School Mathematics, \*Mathematics Instruction, \*Reading Instruction, \*Summative Evaluation

Identifiers—PLATO

This summary report describes the development, implementation, and measured educational outcomes of a demonstration project of beginning reading and mathematics instruction utilizing the PLATO system with groups of elementary school children in Illinois. Extensive descriptions of the experiences and reactions of teachers and students in the classroom as the demonstration developed form the major part of this report. Because of teacher self-selection into the PLATO treatments, this was not a randomized experiment, but rather a naturalistic study in which comparisons could be made; however a multiplicity of plausible explanations could be offered for differences in outcomes between PLATO and non-PLATO groups, and among classes taught by different teachers. Six case studies, based on observation, interviews, and teacher logs, document the problems of implementation, but also capture teachers' assessments of this developing technology. Demonstration year achievement and attitude outcomes for reading and mathematics are also included, as well as major findings. (RAO)

Spons Agency—Corporation for Public Broadcasting, Washington, D.C.

Pub Date—79

Note—76p.

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—Annual Reports, Broadcast Industry, \*Content Analysis, \*Educational Radio, \*National Surveys, \*Programming (Broadcast), Tables (Data)

Identifiers—National Public Radio

Part of a series of statistical reports on public broadcasting, this publication is based on data supplied by public television and CPB-qualified public radio stations in a survey of CPB-qualified public radio programming by category. This report is the first study of its kind on public radio content, and the data represent a sample of an entire year (FY 1978) of public radio programming. Details of the research methodology are presented in the first chapter and in the appendices of the report. Numerous tables and figures display data on public radio in 1978; public radio by part of the day; music and news/public affairs programming; cultural, instructional and special interest programs; and NPR (National Public Radio) and locally distributed programming. Appendices include information on the survey method and operations, computation of standard error, survey instruments and cover letters, Subsidiary Communications Authority broadcasting, and a list of stations and categories. (Author/CMV)

Descriptors—Annual Reports, Broadcast Industry, \*Content Analysis, Educational Television, \*Programming (Broadcast), \*Public Television, Tables (Data), \*Television Surveys

Identifiers—Electric Company, Sesame Street

Part of a series of statistical reports on public broadcasting, this publication is based on data provided by public television stations to the Corporation for Public Broadcasting in a survey of public television programming by category. This is the third report in a new series of analyses which are based on the sample of an entire year. A summary of highlights, definitions, and descriptions of categories provide background for the numerous tables and figures which display data on the PTV system in FY 1978, instructional television services, Sesame Street and The Electric Company, general and news/public affairs programs, special or target audience programs, local programming, and PBS and prime-time programming. Appendices include information on the survey methods and operations, survey instruments and cover letters, computation of standard error, secondary schedules, ITV grade level by subject matter, and calendar year data. Pub Date—Aug 79

Note—57p.; For related documents, see ED 122 018-022.

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (1980-671-143/3)

Pub Type—Reference Materials - Bibliographies (131) — Guides - Non-Classroom (055)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Annotated Bibliographies, \*Computer Assisted Instruction, \*Computer Managed Instruction, \*Instructional Development, Military Training, \*Models, Needs Assessment, \*Systems Approach

## Identifiers—\*Authoring Aids

This annotated bibliography lists instructional development resources relevant to the Interservice Procedures for Instructional Systems Development Model (ISD), a standardized model providing for the assessment of training needs; the design, development, and implementation of instruction; and the assessment of instructional quality. Following a literature search, relevant documents were classified according to the 19 block ISD model, and summaries were written to identify documents on authoring aids, procedures, or techniques. The purpose of each block in this model is defined, and documents are listed alphabetically within blocks. A status section for each block indicates the availability of authoring aids sufficient to guide an individual through all activities specified by the block, as well as the availability of relevant procedures and techniques that could be developed into authoring aids. Directions for future research, based on the lack of authoring aids available, are identified. (RAO)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Computer Assisted Instruction, \*Computers, \*Cost Effectiveness, \*Input Output Devices, \*Military Training, Systems Analysis, \*Technical Education

Identifiers—Computer Software

This study established the feasibility of replacing high performance and relatively expensive computer terminals with less expensive ones adequate for supporting specific tasks of Advanced Instructional System (AIS) at Lowry AFB, Colorado. Surveys of user requirements and available devices were conducted and the results used in a system analysis. The results of the analysis formed the basis for determining the detailed hardware requirements and subsequent hardware selection, procurement, and installation. Additionally, the software modifications necessary to accommodate the new hardware were made and the resultant total system was evaluated in an operational training environment. (Author)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—\*Computer Assisted Instruction, Computer Managed Instruction, Instructional Design, \*Instructional Materials, \*Instructional Systems, Man Machine Systems, \*Material Development, Program Descriptions

Identifiers—\*Authoring Languages, \*Computer Software

This report details the design, development, and implementation of computer software to support the cost-effective production of computer assisted instruction (CAI) within the context of the Advanced Instructional System (AIS) located at Lowry Air Force Base. The report supplements the computer managed Air Force technical training that is currently supported by AIS, giving the Air Force a full function computer based instructional system. In describing the interactive authoring editor, presentation program, data collection, and data print software components of the CAI system, this report indicates that the editor simplifies the authoring

task by (a) eliminating the need for the author to use a computer language, (b) structuring the task, (c) providing computer-aided input, and (d) providing extensive formatting and editing capabilities. The software also provides conditional and unconditional branching that can be specified from the editor. (Author)

Simonson, Michael R. Burch, Georgeann L.  
Media Influence on Affective Learning: A Review of the Literature.

Pub Date—75

Note—44p.

Pub Type—Information Analyses (070) — Reference Materials - Bibliographies (131)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Affective Objectives, Annotated Bibliographies, \*Aptitude Treatment Interaction, Audiovisual Aids, Content Analysis, Educational Media, Literature Reviews, \*Media Research, \*Student Attitudes

A review of the first 23 volumes of "AV Communication Review" identified 68 theoretical and experimental articles on the effects of media on student learning attitudes. Examination of these articles revealed that (1) researchers do not routinely evaluate the impact of mediated instruction on learner affect toward either the medium or the content information; (2) in most studies where attitudes were measured it was generally a post-hoc evaluation of peripheral importance to the main objectives of the study; (3) locally constructed measures of attitude were most often used, and few studies provided validity or reliability information for attitude measures; and (4) attitude change as a result of the use of media has not been a major area of research effort. Within the framework of the above limitations, it was concluded that less abstract forms of media seem to provide the greatest likelihood of positive learner attitude formation; there is insufficient evidence to determine if there is an age-medium-attitude interaction; and achievement seems to be related to attitude. An annotated listing of the articles is provided, and several tables and figures are attached, as well as a list of additional references. (CMV)

Results and Analysis of a Computer Assisted Instructional Program in Basic Skills in a Detention Center.

Pub Date—Feb 79

Note—13p.; Paper presented at the Annual Meeting of the Southwestern Educational Research Association (Houston, TX, February 1979).

Pub Type—Reports - Evaluative (142)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Achievement Gains, \*Attitudes, \*Basic Skills, \*Computer Assisted Instruction, \*Correctional Education, \*Educational Research, Intermode Differences, Prisoners, Program Evaluation, Security Personnel, Skill Development

Identifiers—\*PLATO, Texas (San Antonio)

An evaluation of a computer assisted educational (CAE) program using the PLATO system at a Texas detention center included an examination of attitudes and perceptions from (1) inmates participating and not participating in jail education programs, (2) trustees, (3) educational program staff, (4) chaplaincy staff, (5) guards assigned to the education area, (6) floor guards, (7) guard training supervisor staff, and (8) upper echelon jail and sheriff's department administrators. Also examined were the results of a basic skills curriculum study which compared student scores on vocabulary skills, reading, spelling, arithmetic computation, and arithmetic problem solving from a CAE and a traditional program. Findings indicated that PLATO was generally viewed as an effective and pleasurable teaching device, and that, in general, achievement gains were greater for the CAE program group than those for the traditional program group over an 8-week instructional period. Hailer, Harvey A.

Uses of Individualized Instruction in Training by "High-Technology" Firms in the San Jose, California Area.

Pub Date—30 May 79

Note—108p.; Master's Thesis, San Jose University. Pub Type—Dissertations/Theses - Masters Theses (042) — Information Analyses (070)

**EDRS Price - MF01/PC05 Plus Postage.**

Descriptors—Computer Assisted Instruction, Computer Science, Cost Effectiveness, \*Electronics Industry, \*Individualized Instruction, \*Industrial Training, Interviews, Literature Reviews, Questionnaires, State of the Art Reviews, \*Use Studies Identifiers—\*California (San Jose)

A literature review was conducted to examine the current status, advantages, and cost-effectiveness of individualized instruction in industrial training in over 30 companies and training specialists in 11 electronics and computer-related firms were interviewed to determine the current use of individualized instruction in employee training programs. Media utilization, instructional development methods, general trends, and predictions for future training methods in these companies were also examined and compared. Results indicated that in-house training is growing in importance as a result of a shortage of experienced staff; feedback, evaluation, and revision are the weakest aspects of instructional design schemes used in the electronics industry; training of manufacturing skills will increase rapidly and use individualized instruction extensively; and individualized instruction, which is cost-effective and useful in handling problems created by geographic dispersal of employees, is a medium of high potential growth for training in technical subject matter. Appendices include the interview instrument; a list of firms in the San Jose area involved in electronics, computers, and related equipment with over 500 employees; an interview with a firm's training coordinator; and a list of the firms interviewed. (CMV)

Bridges to the Future: Library Service in Madison County, Iowa.

Central Iowa Regional Library, Des Moines.

Pub Date—Feb 80

Note—260p.

Pub Type—Reports - Descriptive (141)

**EDRS Price - MF01/PC11 Plus Postage.**

Descriptors—\*Community Influence, \*Community Study, County Libraries, Library Collections, Library Planning, \*Library Services, Library Surveys, \*Public Libraries

Identifiers—Community Analysis Research Institute, \*Iowa, \*Library Users

This study of the public libraries in one county in central Iowa examines the workings of the Earlham, Truro, and Winterset libraries, and explores the elements in their respective communities which affect current library services and which have potential implications for future library planning. In addition

to detailed profiles of the three libraries, this report includes analyses of the communities of Madison County and their library users. Census data are provided, as well as a comparison of Madison County to the 1978 Gallup Survey. A review of project goals, a selective bibliography, and maps of the area are appended to the study. The Cultural Role of the Public Library, 1920-1980, and Its Impact on Library Education.

Pub Date—15 Feb 80

Note—16p.; Paper presented at the Association of American Library Schools Conference (Austin, TX, February 15, 1980).

Pub Type—Historical Materials (060) — Opinion Papers (120) — Speeches/Meeting Papers (150)

**EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.**

Descriptors—Adult Education, \*Art, \*Culture, History, Information Dissemination, \*Library Education, \*Library Role, Models, Opinions, \*Public Libraries

This review traces the history of the public library's role in the diffusion of information about American culture, surveys the influence of that role on library education, and describes five models which reflect the range of cultural roles presently being fulfilled in libraries and which identify the knowledge and skills librarians need to support cultural activities. The functions of the five models are stated as follows: (1) to serve the arts information needs of the community, (2) to provide a showcase for the arts in the local community, (3) to facilitate arts program coordination among community organizations, (4) to provide outreach centers for the community's cultural agencies, and (5) to stimulate the consideration of public issues in the light of humanistic values. Identifiers—\*Great Britain

This essay presents an outline of the elements that need to be considered with regard to the question of

## 122 Document Resumes

end-user fees for online information retrieval services in British public libraries. The points are culled from many sources, including the experience of the United States, talks with online workers, and, in particular, discussions in the Working Party of the Bibliographical Information Retrieval Online Service (BIROS) Project. Factors addressed are political influences, the value of information and online services, the legal position of free public libraries, types of costs and charges, and discriminatory charges and implications of charging. Examples of the policy and practice of libraries in the British Library Research and Development Department's projects are given. (FM)

This report analyzes file development efforts of the Resource and Referral Service project to determine the feasibility of computerizing a database of information on educational resource organizations. Background information on the project is presented in the introduction. The report describes present policies, identifies factors affecting computer feasibility, outlines design options, and makes recommendations for major system functions. Chapters address content and organization, selection, acquisition, processing, file maintenance, vocabulary development, search and retrieval, user products and services, recommendations, and implications for future database development. Current and proposed formats for processing organizational information are appended, along with vendor information for search and retrieval systems. (FM)

Descriptors—Developing Nations, Information Dissemination, \*Information Seeking, Information Utilization, \*International Programs, Libraries, Sensitivity Training, \*Training, Training Methods, \*Use Studies

Identifiers—\*Asia, \*Scientific and Technical Information

The introduction to this UNISIST seminar report discusses problems in training present and potential users of scientific and technical information and emphasizes the importance of better recognition and formulation of information needs in order to effectively assess and use available libraries, information systems, and services. Papers presented at the seminar addressed the following topics: (1) Measurement of User Needs and Information Use; (2) User Education in Academic Institutions; (3) User Training in Technical Information Use; (4) User Education in National Documentation Centers; (5) Sensitization of Managers, Planners and Policy Makers; (6) User Training as a Component of National Information Policy; and (7) Means and Methods of Training Users. The recommendations of the seminar stressed the need for Asian members of Unesco, through their national focal points, to establish user education and training programs and recommended evaluation of users, training techniques, and availability of information and facilities; dissemination of the Unesco guide "Education and

Training of Users of Scientific and Technical Information—UNISIST Guide for Teachers"; promotion of user education and training within the UNISIST program for assistance to member states; and the education and sensitization of administrators, planners, and policy makers. (RAA)

 Pub Type—Reference Materials - Bibliographies (131)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Annotated Bibliographies, Awards, \*Book Reviews, \*Books, \*Canadian Literature, \*Childrens Literature, Evaluation, \*Reading Materials

Identifiers—\*National Library of Canada

Evaluative annotations of recent additions to the National Library of Canada's selection of notable Canadian children's literature are presented in two separate supplements, one English, the other French, with translations of the principal text in each version to the language of the other. The English supplement adds seven titles for 1976 and 13 for 1977; while the French supplement adds 15 titles for 1976 and seven for 1977. The annotations provide an evaluative review of each book's contents and describe awards won by the work. Content of the books includes history, poetry, adventure, pictorial essay, nature study, sports, legend, and short stories. The index provides access to the names of all individuals associated with the creation of each work, to the titles, to awards, and to the principal subjects and themes identified in the titles and annotations. **PASCAL Data Base File Description and Indexing Rules in Chemistry, Biology and Medicine.**

Royal Inst. of Tech., Stockholm (Sweden). Library.  
 Report NO.—TRITA-LIB-4066

Pub Date—Jan 80  
 Note—25p.; For related document, see IR 008 299.

Pub Type—Reports - Descriptive (141)  
**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Biology, \*Chemistry, Computers, \*Data Bases, Data Processing, \*Indexing, Information Retrieval, Information Storage, \*Medicine, Online Systems, \*Subject Index Terms

Identifiers—PASCAL Data Base

This report on the multidisciplinary PASCAL database describes the files and the indexing rules for chemistry, biology, and medicine. PASCAL deals with all aspects of chemistry within two subfiles whose combined yearly growth is about 100,000 references. The Biopascal file, organized in the two subfiles of Plant Science and Biology and Medicine, presently contains 1,300,000 references and grows at a rate of 200,000 references annually. The primary sources for these files are the same as those for the whole PASCAL file and include serials, doctoral and master's theses, and patents. Principal languages covered are English, French, German, and Russian, with about 11 percent of the total in other languages. Indexing for chemistry uses two lexicons of controlled terms describing phenomena, processing, properties, methods, equipment, names of chemical reactions, and substructures or families of chemical compounds. A similar set of two vocabularies is used for biology and medicine. The form of the descriptors and the indexing is similar to that used throughout PASCAL in that indexing is accomplished to the most specific term within a hierarchical structure. Specific indexing rules are provided in detail for subdivisions within the three disciplines. (RAA)

Ambach, Gordon M.

**Report of the Commissioner of Education, Gordon M. Ambach, to the New York State Legislature on Library Pilot Projects, December 15, 1978 through August 31, 1979.**

New York State Education Dept., Albany.  
 Pub Date—79

Note—74p.; Best copy available.

Pub Type—Legal/Legislative/Regulatory Materials (090) - Reports - Evaluative (142)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Financial Support, Learning Resources Centers, \*Librarians, \*Library Cooperation, Library Expenditures, Library Materials, Library Networks, \*Library Services, Pilot Projects, Private Schools, Public Schools, School Districts, \*School Libraries, \*State Aid

Identifiers—\*New York

This progress report for the first year of a 3-year pilot project to establish systematic cooperation among public school districts and non-public schools in the provision of library resources and services to students and faculty includes funding recommendations for additional projects and evaluation. This project addresses needs for union catalogs of library materials, reciprocal access to library materials, efficient delivery systems, and the effective use of computer technology. Participants

include seven library systems, eight Boards of Cooperative Educational Services, 135 school districts, and 40 non-public schools. Much of the initial work has centered on needs assessment, organization, governance decisions, and planning. The project sought voluntary cooperation and applications for the project have outrun expectations, resulting in commitment of resources greater than initially envisioned; the department recommends funding for three additional school library system pilot projects, adjustment of existing pilot project appropriations to accommodate increased participation of school library systems, adjustments for inflation, and funding for a comprehensive evaluation of these projects. The report includes individual fact sheets from the cooperating agencies and appendices provide legal and regulatory excerpts, together with directory information on the project participants. (RAA)

Research Report on Analytical Review of Catalog Use Studies.

Ohio Coll. Library Center, Columbus.

Report N0.—OCLC-OPR-RR-80-2

Pub Date—15 Feb 80

Note—61p.

Pub Type—Information Analyses (070) — Opinion

Papers (120) — Reports - Evaluative (142)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Cataloging, Content Analysis, Evaluation, Indexing, Information Utilization, Library Catalogs, Library Surveys, \*Research Methodology, \*Search Strategies, \*Subject Index Terms, \*Use Studies

Identifiers—\*OCLC

This review takes a critical approach in summarizing and evaluating the methodology and scope of catalog use studies, with emphasis on the subject approach to card catalog searching. Subject access is defined in this report; however, the process of subject searching, described repeatedly in library literature, has been based upon common sense understanding rather than systematic observation. The findings of catalog use studies are classified into: (1) generalizations on the physical format of the catalog, information found on the cards, catalog searchers' educational level or area of expertise, and reference assistance; (2) generalizations specific to subject searches, user characteristics, and the physical structure of the catalog; and (3) generalizations specific to known-item searches and nonstandard information, failure at the catalog, and author-title information. The major reviews of catalog use studies and their methods are also covered. A bibliography of catalog use studies and a cited author index are provided. (Author/RAA)

Descriptors—Computers, Computer Science, Equipment Evaluation, \*Evaluation Methods, \*Information Systems, \*Library Automation, Library Equipment, \*Library Networks, Library Technical Processes, \*Online Systems

Identifiers—\*Automated Monitoring, \*OCLC

This report addresses the critical importance of measuring and evaluating information systems functioning within computer network environments. The focus is on the significant benefits associated with using automated monitoring as the primary information system measurement mechanism within such computing architectures. The large scale, network-based, state-of-the-art OCLC online system is utilized as the information system environment in support of these research and development activities. Within this environment an overall structure for a generalized, automated monitor design is proposed. Monitoring specifications are illustrated at the network supervisor level, the applications processor level, and the database processor level within the OCLC system network architecture. The monitoring concepts, techniques, and parameters presented within this report represent a strong foundation for information system measurement, analysis, and evaluation. When com-

bined with complementary measurement facilities such as controlled benchmarks and synthetic programs, simulation models and controlled user interface experiments, a total comprehensive methodology for information system evaluation can be realized. The principles of automated monitoring have proven their extensibility and generalizability across numerous types of information systems. It is concluded that automated monitoring should be viewed as an essential self-measurement capability within all future information system designs. (Author/RAA)

Descriptors—\*Computer Science, \*Data Processing, \*Electronic Equipment, \*Information Dissemination, Information Systems, Libraries, Library Automation, \*Library Role, Library Science, Publications, Publishing Industry, \*Telecommunications

This compilation of papers presented at the sixteenth annual Clinic on Library Applications of Data Processing presents 13 papers on the library within the context of technological developments in publishing and related facets of human communication. Instead of focusing on library automation per se, the contributors have chosen to look at various manifestations of electronic communication in the world around us including electronic publications, computer conferencing, and electronic mail, to consider present and probable future capabilities of electronic processing and, most importantly, to study the implications of these developments for libraries and librarians. The papers have been prepared for the most part by leaders in fields outside of librarianship itself. The presentations were planned to dovetail with, and form an integral part of an ongoing research project funded by the National Science Foundation, which relates to the impact of a "paperless society" on the research library of the future. The papers are intended to stimulate further thought, within the profession and beyond, on the implications for libraries of the evolution from a largely paper-based society to a society whose communications will be largely electronics-based. The collection includes brief biographical sketches of the contributors and an index. (Author/RAA)

Information Computer Communications Policy, 2: The Usage of International Data Networks in Europe.

Organisation for Economic Cooperation and Development, Paris (France).

Pub Date—79

Note—285p.

Available from—OECD Publications, Suite 1207, 1750 Pennsylvania Ave., NW, Washington, DC 20006

Pub Type—Reports - Research (143)

**EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.**

Descriptors—Computer Science, \*Cost Effectiveness, Data Bases, \*Information Dissemination, \*Information Networks, \*Information Systems, \*International Programs, Surveys, Telecommunications

Identifiers—\*Europe

This study of the development of international data networks, a phenomena of the 1970's, and policy issues arising from their use is an in depth investigation of 24 private and six public European networks commissioned from Logica Limited and sponsored by the governments of France, Germany, the Netherlands, Norway, Spain, and Sweden. The report discusses reasons for using international data networks, describes their technological development, investigates transborder applications, presents access control and security problems and their solutions, and analyzes the costs and economics of international networks. The 27 conclusions presented range from the benefits of international data

transmission to the participating companies, the involved nations, and the scientific research community to the developing international implications of mutual interdependence, and to the impact of costs on multinational corporations and smaller local users. Predicting that an European public network will be unavailable for at least five years, the report recommends that private networks receive preferential tariff treatment to meet the existing need of such a network. The appendices include descriptions of the 30 networks investigated, with diagrams, a checklist of information to be sought, the questionnaire used, and a checklist of information in network description. Descriptors—\*Confidentiality, \*Data Collection, \*Methods, Questionnaires, Tables (Data)

This report of research findings describes a confidentiality-preserving data collection method called the Context-Determined, Rule-Generated, Pseudonym (CDRGP) technique, a specifically constructed set of questions based upon personal information known to the respondent (but to few others) which each respondent answers whenever data are gathered; the respondent's answers to the questions generate a probabilistically unique string of letters, or code identifier, that allows the data being collected to be tied to previously collected data. The report describes CDRGP in full, explains the research methodology involved in three separate experiments, and details the findings. References are provided. (FM)

Descriptors—\*Developing Nations, Engineering,

\*Engineering Education, \*Engineers, Global Approach, \*Information Needs, Information Retrieval, \*Information Utilization

Identifiers—\*Scientific and Technical Information

This study has as its main object the formulation of an approach, as global and comprehensive as possible, to the multiple aspects of the engineer's needs for scientific and technical information. The basis of the study is an analysis of the engineer's role, its characteristics, different specialties, levels of training, and categories of functions within the profession, and a typology of information necessary for the engineer is drawn up from this standpoint. This broad evaluation leads to an investigation of methodology. Presently there is a lack of knowledge and consensus in this area which necessitates further study. An analysis of the engineer's information requirements raises three fundamental questions. The first concerns whether in fact the present classification of scientific and technical information is in harmony with the engineer's work, and whether it permits him to obtain the information he needs. The second problem relates to the training of the engineer in the utilization of present and future information means, particularly computers. The third concerns the adaptation of these considerations to third world countries. The study concludes with a synthesis in question form to provide a confrontation of different viewpoints and experiences and allow a choice of possible new studies.

A Study of a Sample of Merritt College Students: Reasons Precipitating Possible Withdrawal, and Attitude Toward Services and Instruction. Research Coll. No. 11.

Merritt Coll., Oakland, Calif.

Spons Agency—Northern California Community Colleges Research Group.

Pub Date—May 79

Note—81p.

Pub Type—Reports - Research (143) - Numerical/Quantitative Data (110) - Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—\*Academic Persistence, Age, American Indians, Asian Americans, Black Students, \*Community Colleges, Dropout Characteristics, Educational Background, Employment, Females, High Risk Students, Hispanic Americans, Males, Participant Satisfaction, \*Potential Dropouts, School Holding Power, School Surveys, Student Attitudes, Student Attrition, \*Student College Relationship, Student Financial Aid, Student Personnel Services, \*Student Problems, Two Year Colleges, \*Two Year College Students, White Students

An in-class survey of a representative sample of 298 students was conducted by Merritt College in March 1979 to determine: (1) the approximate number of students who were considering withdrawal from college; (2) the approximate number who had given withdrawal serious consideration in the past; and (3) the factors which students felt were decisive in keeping them at Merritt. Open-ended questions solicited reasons why a student was considering or had considered dropping out. In addition, checklists were provided against which students could indicate the items that were important in their decision to remain at school in relation to getting into desired courses, instruction, student services, financial aid, and other factors related to their home or school environment. Major findings indicate that only 8.7% of the respondents were considering dropping out; financial difficulty was the most frequently cited reason for this, followed by the need to get a job and personal commitments or problems. Another 47.3% indicated that they had given serious consideration to leaving at one time. Need to get a job, personal commitments, and intention to transfer were the most common reasons. The survey report presents a discussion of the representativeness of the sample and provides 30 tables illustrating responses by age, sex, ethnicity, and educational and occupational background. Continuing Education for Southeastern Community College Librarians.

Pub Date—79

Note—128p.; Ed. D. Dissertation, Nova University  
Pub Type—Reports - Research (143) - Dissertations/Theses - Doctoral Dissertations (041)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Administrator Attitudes, College Libraries, \*Community Colleges, Courses, Degrees (Academic), Educational Background, \*Educational Needs, Higher Education, \*Librarians, \*Library Education, Literature Reviews, Needs Assessment, \*Professional Continuing Education, Program Development, Questionnaires, Scheduling, Surveys, Teaching Methods, Work Experience, Workshops

Identifiers—\*United States (Southeast)

In an effort to provide information for the development and implementation of continuing education programs for community college librarians, a survey was conducted in February 1979 to determine: (1) the educational backgrounds of community college librarians in the southeastern United States, (2) their work experiences, (3) their continuing education needs, (4) the perceptions of community college library directors with regard to the continuing education needs of their librarians, and (5) the formats, subjects, and types of activities that would meet these needs. A total of 262 librarians and 116 library directors were surveyed using two field-tested questionnaires. Major findings, based on responses from 228 librarians and 102 library

directors, indicated that 85% of the librarians held a Master of Library Science degree and that 60% possessed less than 11 years of library experience. Librarians and directors agreed on 36 of the 38 questions related to continuing education needs. Two- or three-day workshops held within a 100-mile radius of their community college were their first choice for continuing education activities. Librarians and directors expected library associations or local universities to sponsor continuing education activities. The survey report provides a review of the literature dealing with continuing education for community college librarians and provides four models for workshops and courses. A bibliography is included. (JP)

Descriptors—Affirmative Action, \*Career Guidance, \*Community Colleges, Counselor Training, Evaluation Methods, \*Faculty Development, \*Females, Inservice Education, Learning Laboratories, \*Mathematics Anxiety, Nontraditional Occupations, Questionnaires, Resource Materials, Seminars, \*Sex Bias, Sex Fairness, Sex Stereotypes, Two Year Colleges, Workshops

The OPTIONS Project was undertaken at Piedmont Virginia Community College (PVCC) to identify and eliminate sex stereotyping in vocational guidance. As part of this effort, a series of workshops was held that resulted in a heightened sensitivity, on the part of counselors, to sex stereotyping and greater awareness of the problem in the college at large. Another component of the project resulted in the evaluation of career resource materials at the career library and the development of a procedure for assessing new materials as they are added to the collection. Additionally, the project sought to investigate the causes of math anxiety and explore ways of eliminating it. Efforts in this area included a one-day workshop and two seminars for counselors and instructional staff that focused on reducing math anxiety, as well as the piloting of an open math lab and the development of support materials. Finally, in order to achieve objectives related to the planning and implementation of programs and the development of materials responding to the needs of PVCC women, visits were made to model programs at other colleges, four seminars on sex bias and stereotyping were conducted for students, and career materials designed for women were purchased. The project report is appended by materials related to project activities, including questionnaires, survey results, descriptive materials, and time-tables. (AYC)

Grade Distribution. Community Colleges, Fall 1978.

Hawaii Univ., Honolulu. Community Coll. System. Report NO.—CC-IRP-120

Pub Date—Feb 79

Note—14p.; Tables IIa-g were deleted due to irreproducibility

Pub Type—Reports - Research (143) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*College Credits, \*Community Colleges, Credit Courses, Credit No Credit Grading, \*Grade Point Average, Grades (Scholastic), Liberal Arts, \*Majors (Students), Persistence, State Surveys, Two Year Colleges, \*Two Year College Students, Vocational Education, Withdrawal (Education)

Identifiers—\*Hawaii

Data on the grade point ratios (GPR's) and the distribution of grades earned were gathered and analyzed for all students enrolled in credit courses at the seven Hawaii community colleges during Fall 1978. These data indicate that the average assigned grade was 2.7, and that the credits-earned rate was 71%. As in previous semesters, the credits-earned

rates were higher for vocational courses (75%) than for general education courses (69%). Rates ranged from 66% in the natural sciences to 85% in hotel and restaurant courses. Of the assigned grades, 3% were credit/no-credit designations; 21% were non-punitive grades (W for withdrawal or N for incomplete); 5% were F's; and 23% were A's. Proportionately fewer A's and B's were given than in previous years, and more F's were assigned at those campuses which give failing grades. The mean GPR of 2.74 had steadily declined since Fall 1975, when it was 2.87. Both liberal arts majors and vocational education majors earned the same average GPR of 2.73. Unclassified students earned the highest GPR's, probably because they carried lighter credit loads. Tables organizing data by campus and program area are provided in the study report. (JP)

Descriptors—Administrator Attitudes, Administrator Characteristics, Administrator Responsibility, Adoption (Ideas), \*Community Colleges, \*Deans, Educational Background, Literature Reviews, Models, National Surveys, Program Evaluation, \*Program Implementation, Questionnaires, Rural Schools, Small Colleges, Student Development, \*Student Personnel Services, \*Student Personnel Workers, Two Year Colleges

Identifiers—\*Tomorrow Higher Education Project

In an examination of efforts towards the implementation of the Tomorrow Higher Education (THE) model for student development, a survey of 204 student personnel administrators at small, public, rural community colleges was conducted to determine: (1) the extent to which practitioners agreed with the basic constructs and underlying assumptions of the THE model; (2) the extent to which practitioners agreed with the process steps of the model; (3) evidence indicating that these steps are being implemented; and (4) the relationships between practitioners' agreement with the THE model and its actual implementation. The survey revealed that each of the process steps of the model was being implemented by the respondents to a lesser extent than reported levels of agreement with each step. The survey report includes background information on the development of the THE model; a review of the literature on the history of student personnel work, the student personnel and student development points of view, graduation preparation programs, proposals for practitioners, and contributions to theory and concept building; a detailed description of the survey methodology and analysis of its findings; recommendations for further research; the survey instrument (The Student Development Process Inventory—Community College Form); and a bibliography. trial Education, Transfer Programs, \*Two Year Colleges, Vocational Education, Vocational Followup

Identifiers—Ohio

Guidelines and accompanying forms are provided in this operations manual designed as a guide for the management and development of the instructional units at the member institutions of Ohio's two-year college system. The manual first presents the mission statement of the two-year colleges, defines the various types of colleges in the system, and presents general recommendations regarding two-year college programs, enrollments, facilities, and services. Course work and requirements are then described for programs leading to the associate degree in each of five instructional areas: arts and sciences, applied business and science, individualized study, technical education, and labor studies. Procedures are then outlined to be used in the proposal of new associate degree programs, technical majors, and one-year programs; relevant forms are also provided. The report then offers a taxonomy of officially approved titles for technical programs in the areas of business, engineering, health, agriculture, natural resources, and public services. Guidelines are then presented for awarding academic credit, program review, off-campus instruction, and vocational follow-up surveys of technical education graduates. Appended to the manual is an inventory of the technical programs offered at each of Ohio's two-year colleges. (JP)

Descriptors—\*Academic Achievement, Academic Persistence, \*Community Benefits, \*Community Colleges, Comparative Analysis, Cost Effectiveness, \*Developmental Studies Programs, \*Educational Finance, Employment Patterns, Expenditures, Geographic Mobility, Grade Point Average, Graduation, High Risk Students, \*Program Effectiveness, Program Evaluation, Remedial Instruction, Two Year Colleges

A retrospective comparative analysis of data collected between 1975 and 1979 was undertaken at Westmoreland County Community College (WCCC) to quantitatively determine the impact of WCCC's developmental education program on: (1) the persistence and academic performance of underprepared students; (2) the college's financial situation; and (3) the community's labor market. The term "underprepared" was used to describe those individuals scoring below the minimum acceptable grade level on English, reading, and mathematics tests that are given to all first-time WCCC students. Major findings indicate that underprepared students who participated in developmental programs held an advantage over those who did not participate by averaging an 18% higher grade point average, a 34% longer enrollment at WCCC, and a 32% better graduation rate. Since mid-1975, the developmental program generated \$387,220 in revenues, while incurring \$241,499 in direct expenses, thus providing a 60.4% net return. Over half of the program participants indicated that they would recommend the program to others (84%) and that the course work would be of benefit outside of the college (60%). Of the WCCC graduates who obtained jobs in fields related to their course work, only 32.1% of the program participants left Westmoreland County, while 48.5% of the underprepared non-participants did so. Brender, Myron

Some Interdisciplinary Facets of Psychology.

Pub Date—Mar 79

Note—27p; Adapted from a paper presented at the Annual Conference of the Eastern Community College Social Science Association (5th, Philadelphia, PA, March 15-17, 1979)

Pub Type—Opinion Papers (120) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Advertising, Elementary Education, \*Etymology, Fiction, Foreign Language Periodicals, Individual Instruction, \*Interdisciplinary Approach, Literary Criticism, Literature, Mass

Media, Motivation, \*Motor Development, \*Psychology, Psychomotor Skills, Second Language Learning, Student Research, Two Year Colleges, Vocabulary Development

Interdisciplinary approaches to the study of psychology can be employed to provide a continuity between the various subjects a student encounters in college. One approach—a total push remediation program—is exemplified by a project involving representatives of the psychology and physical education departments, as well as interested students, in the improvement of awkward motor coordination among pre-adolescents. This involves: (1) diagnosis of the motor skills that need improvement; (2) personalized athletic training incorporating the principles of skill learning and the techniques of response, shaping, and chaining; and (3) peer review to provide mutual encouragement. Another approach, using individual student research, involves a comparative motivational analysis of advertisements in foreign language publications. By requiring the student to write a final report in a foreign language, this approach provides practice in language skills, as well as insights into psychology. A third approach utilizes popular literature, rather than textbooks, in the study of basic psychology concepts in a conventional course format. A final approach, etymological analysis, employs the study of linguistic roots in teaching psychology terminology. The report includes a list of literary selections and the psychological concepts that they illustrate. (JP)

Personal and Family Financial Planning: The Need and the Promise.

American Council of Life Insurance, Washington, D.C. Education and Community Services.

Pub Date—10 May 79

Note—70p; Papers presented at the Teacher Education Annual Meeting (May 10, 1979)

Pub Type—Speeches/Meeting Papers (150) — Collected Works - General (020) — Opinion Papers (120)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adult Development, Adult Education, Community Benefits, \*Community Colleges, \*Consumer Economics, \*Consumer Education, Consumer Protection, Educational Needs, Family Financial Resources, Family Life Education, Federal Regulation, Home Management, Instructional Materials, \*Money Management, Postsecondary Education, \*Self Concept, \*Teacher Education

Identifiers—\*Personal Finance Training

The first of a series on personal and family financial planning (PFFP) education, this publication presents five papers examining the need for educational programs that emphasize the use of financial resources in ways that contribute to family stability. C. Raymond Anderson discusses the inability of many individuals to realistically manage financial resources and describes seven PFFP competencies: (1) analyze goals, (2) assess financial resources, (3) design a family financial plan, (4) effectively execute the plan, (5) effectively buy, borrow, invest, and save, (6) evaluate and change financial plans to meet changing economic conditions, and (7) provide an adequate income base. Next, Mary Beth Minden identifies federal consumer protection laws, considers their costs and benefits, and urges that PFFP programs examine governmental and societal factors that affect family financial planning. Joel L. Burdin suggests that PFFP be fused with teacher education and provides guidelines for the use of instructional materials and other resources in PFFP programs. James L. Wattenbarger examines the vocational, non-credit emphasis of community college curricula and discusses the role of PFFP instruction in providing for diverse community needs. Mervin D. Lynch and Melissa Levi examine the relationship between financial planning and self-concept development at various stages of the life cycle. (JP)

Seven essays are presented that deal with the students, instruction, and administration of Miami-Dade Community College (MDCC). First, John Losak considers the M-DCC student population since 1969, providing data on ethnicity, age of students, male/female enrollments, foreign student enrollments, program diversity, skill level of enrolling students, and full-/part-time enrollments. Robert H. McCabe describes the restructuring of programs and policies and the student flow model developed at M-DCC to meet the challenge of increasing student diversity, declining enrollments and financial and public support, and changing federal goals. J. Terence Kelly and Richard Schinoff examine M-DCC policies concerning the academic diagnosis and placement of entering students, discuss various approaches to student advisement, and describe the academic alert program which is used to periodically inform students about their performance in relation to M-DCC's standards of academic progress. Piedad F. Robertson outlines the components of the Emphasis on Excellence Program for outstanding students. Kamala Anandam describes the Response System with Variable Prescription (RSVP) program used at M-DCC to provide computer-based instruction. In the final two essays, Harold Andrews explores the use of instructional media at M-DCC, and Hattie Daniels assesses the college's commitment to affirmative action in admissions and hiring. (JP)

Descriptors—Age, \*College Role, \*Community Attitudes, \*Community Characteristics, \*Community Colleges, Community Surveys, Courses, Educational Demand, \*Educational Needs, Educational Quality, Ethnic Groups, Females, Income, Information Sources, Institutional Evaluation, Males, Needs Assessment, Questionnaires, Scheduling, School Community Relationship, \*School Responsibility, Two Year Colleges

A telephone survey was conducted in Fall 1979 by Santa Ana College (SAC) to determine its service community's demographic characteristics; familiarity with SAC and its course offerings; perception of the college's mission; satisfaction with and attitudes toward SAC; and educational needs and desires. Telephone interviews were completed with 600 individuals, comprising a representative sample of the school's district. Major findings indicate that while 94% of the respondents had heard of SAC and 40% reported that they or someone in their household had attended SAC, 31% did not know that tuition was free and 38% did not recall having received a class schedule in the mail. SAC was rated as doing a very good job in serving the community's needs by 53% of the respondents, but 26% did not feel familiar enough with the college to rate it. Respondents rated vocational education, transfer education, and personal interest education as the most important community college functions, and rated providing basic skills education and financial aid as "not very important." Over half (58%) said that they or a household member would be interested in taking classes at SAC; arts, crafts, business, and English courses were requested most frequently. Classes which meet once a week for three hours on week days in the mornings or evenings were felt to be most convenient. The 26-item interview guide is included in the survey report. (Author/JF)

The Changing Nature of Institutional Research in the Community College.

Pub Date—[79]

Note—10p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Education, Collective Bargaining, \*College Administration, College Faculty, \*Community Colleges, Educational Change, Educational Finance, \*Educational Trends, Experimenter Characteristics, \*Institutional Research, Job Training, Long Range Planning, \*Research Directors, \*Research Needs, Research Skills, Student Recruitment, \*Two Year Colleges

During the growth period of the 1960's and the early 1970's, community college institutional research focused on conducting surveys, compiling institutional reports on grades and enrollments, analyzing student characteristics, and providing background information for writing grants. The researchers came mostly from the teaching faculty and were relatively untrained in research methodology. However, current fiscal constraints, public dissatisfaction with the overall decline in student academic achievement, the increased enrollment of non-traditional students, and the growing importance of terminal, vocational education have required researchers to take on five management-related tasks: (1) studying institutional cost-effectiveness to meet increasing demands for accountability; (2) establishing marketing strategies for the recruitment of non-traditional students; (3) utilizing program needs assessment techniques to satisfy state reporting requirements and to determine program cost-effectiveness; (4) conducting periodic program evaluations; and (5) analyzing and providing solutions to problems in faculty contract negotiations. These functions will become increasingly important during the 1980's as community colleges face greater state control and more competition from four-year institutions. Thus, the institutional researcher will become closely allied with college management and is likely to need specialized business training. (JP)

Identifiers—Comprehensive Employment and Training Act

In view of the relative absence of Spanish-speaking personnel at area health care delivery sites, Northampton County Area Community College (NCACC), with financial and administrative support from Lehigh Valley Manpower Organization (a Comprehensive Employment and Training Act agency) and input from the Council of Spanish Speaking Organizations of the Lehigh Valley, implemented a bilingual nurse's aide training program designed to impart bilingual Hispanics with the vocabulary and skills of a nurse's aide. The six week course, taught by two bilingual nurses in the summer of 1979, was based on two texts: "The Nurse Assistant" by Donovan, et al., and a specially prepared 40-page syllabus. Major instructional topics included communications and interpersonal relationships; hospital environment and safety; positioning and exercise; surgical asepsis; and observation, recording, and reporting. The students, who met the qualifications of bilingualism, literacy, local residency, extended unemployment, and financial exigency, were instructed Monday through Thursday at the college's nursing laboratory. Clinical experience was provided each Friday at the county convalescent home. Besides access to the usual college services, students were provided with day care and transportation support. Of the 16 students enrolled, 15 completed the program and subsequently took part in an eight-week hospital

practicum. (JP)

Descriptors—Adult Vocational Education, \*Agency Cooperation, \*Career Counseling, Community Development, Cooperative Planning, Employment Problems, Financial Support, Program Descriptions, Program Development, Questionnaires, \*Retraining, School Business Relationship, State Agencies, Technical Institutes, Two Year Colleges, \*Unemployment, Unions

Identifiers—\*Project Care III OH

This three-part report describes the development and operation of Project Care III, an interagency effort involving area colleges, unions, and industry, and state agencies in the retraining of 500 tire builders laid off in August 1978, when the Mansfield Tire and Rubber Company (Mansfield, Ohio) was shut down. Part I outlines the historical factors which led to the establishment of Project Care. Part II details the sequence of events involved in implementing the project, including: (1) the development of a questionnaire to ascertain the training needs of the unemployed workers; (2) the administration of the questionnaire at pre-determined registration centers; (3) the provision of vocational counseling at the registration centers; (4) the establishment of a budget and the solicitation of funds for retraining instruction; and (5) the registration and screening of students for specially developed retraining courses in four technical fields (i.e., heating and air conditioning, business and office work, machine trades, and welding) at North Central Technical College and the Mansfield Campus of Ohio State University. Part III discusses the crisis-intervention orientation of Project Care and calls for the involvement of colleges in preventative strategies designed to identify community economic problems before they reach crisis proportion. Several appendices illustrate various program aspects and the questionnaire is included. (JP)

A Policy Pertaining to the Reception of Visually Handicapped Students by Dawson College.

Dawson Coll., Montreal (Quebec).

Pub Date—Jul 79

Note—28p.; Appendices were deleted due to irreproducibility.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Accessibility (for Disabled), Access to Education, Administrative Policy, Extracurricular Activities, Information Dissemination, Legal Responsibility, Needs Assessment, Policy Formation, School Responsibility, \*Student Adjustment, \*Student College Relationship, Student Personnel Services, Student Problems, Two Year Colleges, Two Year College Students, \*Visual Impairments

The major objective of this study is to produce specific policy recommendations aimed at improving the quality of the educational experience of visually handicapped students at Dawson College. The first section of the report focuses on Bill 9, "An Act to secure the handicapped in the exercise of their rights," in order to establish the nature of Dawson's legal commitment to the visually handicapped. Next, broad guidelines in keeping with the intention of the law are presented, including: (1) Dawson should accept all visually handicapped persons into its program when they meet entrance requirements; (2) Dawson should ensure that, once admitted, the student is not put at a disadvantage by his/her visual handicap vis-a-vis the successful completion of the courses in which the student is enrolled; (3) Dawson should take measures to facilitate the integration of visually handicapped students into the communal life of the college. The next section of the study outlines the problems and needs of visually handicapped students, many of which are common to all Colleges of Education General or Professional stu-

dents. Finally, specific recommendations are proposed to tackle problems in the areas of the physical environment, academic problems in and outside of the classroom, student services, and extra-curricular activities. (AYC)

After a brief summary of the findings of a 1979 study of Personal and Family Financial Planning (PFFP) programs at member institutions of the League for Innovation in the Community College (LICC), this two-part monograph provides information on selected PFFP programs. Part I presents in-depth descriptions of the implementation, subject coverage, and evaluation of seven PFFP programs or courses: (1) a comprehensive financial planning program at Central Piedmont Community College (NC) which includes a 19-module consumer education course; (2) a course in personal finance at Brookdale Community College (NJ) which covers family budgeting, credit, insurance, investment, and estate planning; (3) a radio course in macro-economics which is broadcast in 34, five-minute segments over a 17-week period by Moraine Valley Community College (IL); (4) a telecourse in consumer education offered by Lane Community College (OR); (5) a transfer curriculum in home economics offered by Johnson County Community College (KS); (6) a support program established by Delta College (MI) to teach confidence-building techniques and financial planning to displaced homemakers; and (7) a vocational counseling program at Brookhaven College (TX) which integrates PFFP with career counseling. Part II presents short outlines of other programs and courses. A list of credit and non-credit courses offered by LICC members concludes the monograph. (JP)

This two-part report contains the papers delivered at a national planning workshop conducted by the Community College Humanities Association (CCHA) in October 1979 to analyze the role of the humanities at the community college, as well as the report of the inaugural conference of the CCHA. Part I begins with Donald Schmeltz's presidential address describing the objectives of the CCHA, which is followed by a report outlining the activities and recommendations of the workshop. This section also includes: (1) Theodore Rabb's discussion of CCHA's national responsibilities; (2) Jonathan Daube's examination of the role of the humanities in individual development; (3) Arthur Cohen's review of research on humanities education conducted by the Center for the Study of Community Colleges; (4) Myron Marty's suggestions for vocational curriculum development; (5) Harold Cantor's analysis of trends in humanities curriculum and instruction; (6) Diane Eisenberg's description of humanities-oriented community forums; and (7) Brent Johnson's recommendations for strengthening the humanities through the development of financial support at county, state, and national levels. Part II includes, in addition to the minutes of the inaugural conference itself, further discussions of humanities education by James M. Banner, Jr. and Richard A. Beauchamp and a report of the November 1979 National Assembly of the American Association of Community and Junior Colleges. (JP)

Descriptors—Associate Degrees, \*Community Colleges, \*Criminology, \*Curriculum Development, Curriculum Problems, Educational Needs, Educational Philosophy, General Education, Interviews, \*Law Enforcement, Literature Reviews, \*Police Education, Professional Education, Teacher Attitudes, Teacher Qualifications, Teacher Selection, Two Year Colleges, Vocational Education

Based upon a literature review and interviews with selected criminal justice educators, this critique of criminal justice or police education attempts to explore some of the criticisms being leveled against community college criminal justice education and certain issues and trends related to the field that are becoming evident. To place this discussion in context, some of the problems in criminal justice education and its history are summarized first. Then a review of the literature is presented, which considers the philosophy of curriculum development and points to five basic models of police education, i.e., the general education, the criminal justice education as a liberal art, the criminal justice education as professional education, the fusionist criminal justice education, and the police technology as technical or vocational training models. Next, selected trends in criminal justice education are identified, including: (1) the increasingly academic orientation of criminal justice instructors, who had been primarily retired police officers; (2) the slow withdrawal of vocational training from the college classroom; (3) the increasing emphasis on courses stressing written and oral communications; and (4) the advent of non-traditional approaches using field placement and site visitations. Finally, several successful criminal justice programs are identified, as revealed in interviews with selected criminal justice educators. (AYC)

Identifiers—\*California (South), Proposition 9 (California 1980), Proposition 13 (California 1978)

This four-part report examines the management of retrenchment at six representative Southern California community colleges and two community college districts: Victor Valley College, Mount San Jacinto College, Citrus College, Chaffey College, Mount San Antonio College, Riverside City College, the San Bernardino Community College District, and the Los Angeles Community College District. Part I presents a review of the literature dealing with community college responses to decreased funding in the 1970's and the effects of Proposition 13 (1978) on the California community colleges. Part II, comprised of case studies based upon personal interviews with the presidents of each of the target colleges and districts, describes the management strategies used to meet the challenge of Proposition 13 and the effect of those strategies on the quality of the colleges' educational programs. Part III provides estimates of the probable fiscal impact of Proposition 9 (an income tax reduction initiative) during 1980-81 and describes the planning activities undertaken by the target colleges and districts to meet the funding reductions that would result from the passage of Proposition 9. Part IV presents conclusions concerning the need for community colleges to implement institutional research strategies in the study of retrenchment management. A bibliography is included. (JP)

Descriptors—\*Agency Cooperation, Collective Bargaining, \*College Faculty, \*College Governing Councils, \*Community Colleges, Faculty College Relationship, \*Faculty Organizations, Literature Reviews, Teacher Administrator Relationship, Teacher Participation, Two Year Colleges, \*Unions

Identifiers—\*California Teachers Association

A survey of the presidents of the academic senates and local units of the California Teachers Association (CTA) was conducted at 15 randomly selected California community colleges to determine their respective roles in meeting faculty needs at the college level. An additional purpose was to investigate the working relationships between the academic senates and the CTA locals. Survey findings, based on responses from five colleges, indicated that the CTA's role was confined to the negotiation of terms and conditions of employment, while the academic senates retained influence over scholastic affairs. All respondents reported a cooperative working relationship between the two groups and stressed the importance of dual membership in the two faculty organizations, as well as the necessity of the delineation of responsibilities in written constitutions to the maintenance of this relationship. The survey report presents a review of the literature concerning the scope and content of faculty negotiations as well as relevant collective bargaining legislation. Recommendations for the long-range maintenance of positive relationships between academic senates and faculty bargaining agents are also presented. (JP)

Descriptors—Age, Ancillary School Services, Career Choice, College Choice, \*College Environment, Commuter Colleges, Courses, Employment, Females, Human Relations, Literature Reviews, Majors (Students), Males, Marital Status, \*Participant Satisfaction, Place of Residence, Questionnaires, \*Self Concept, State Universities, Student Adjustment, \*Student Attitudes, Student Characteristics, Student Personnel Services, Student Teacher Relationship, Two Year Colleges, \*Two Year College Students

In an effort to identify the motivational factors contributing to student retention or attrition, 487 students at the Mansfield Campus of Ohio State University (MC-OSU), a two-year, commuter campus, were surveyed to determine their characteristics and reasons for choosing MC-OSU and to assess the variances between their perceptions of the real and desirable campus environment. The questionnaire contained 54 items measuring student perceptions of self-concept, human relations in the college environment, career options, course offerings, and support services. Participants were asked to evaluate the degree to which each item represented the real campus environment and the degree to which it was desirable. The survey revealed several conditions and services which the students found less than ideal, including: (1) their confidence in their ability to solve academic and personal problems and to succeed academically, socially, and in their career; (2) the degree to which they and their opinions were accepted and valued by peers and faculty; (3) their freedom to ask questions and express opinions in class; (4) their certainty about and enthusiasm for their career choice; (5) their concern for their grades and academic ability; (6) their ability to use the library, apply study skills, and prepare adequately for class; (7) the accessibility of instructors; and (8) academic advisement and personal counseling. Identifiers—\*Bilingual Instructional Material

A follow-up study was conducted by Skyline College (SC) to determine the effectiveness of an "economically depressed area" project undertaken by the college in Spring 1979 to promote SC's programs among low income area residents and to provide information to this group on consumer-related issues and community service agencies. During the project, a five-page promotional brochure describing, in Spanish and English, SC's home economics program and a 22-page, bilingual consumer guide were sent to 12,000 homes in northern San Mateo County that were selected using 1970 census tract data. Two months later, a telephone follow-up of 689 randomly selected recipients was conducted by four bilingual interviewers; 437 interviews were actually completed. Follow-up results indicate that 148 of the interviewees acknowledged receipt of the materials and that 67 had read them. While 21 said they kept the materials for further use and 39 said they found the materials useful, only eight respondents indicated that they would like to take courses at SC. Appendixes to the report include the cover letter mailed with the brochures and the telephone interview guide. (JP)

Descriptors—Adult Students, Business, College Programs, \*College Role, Community Attitudes, \*Community Benefits, \*Community Colleges, Community Surveys, Employer Attitudes, High School Students, Information Needs, Information Sources, \*Institutional Evaluation, \*Outcomes of Education, Participant Satisfaction, Program Evaluation, Publicity, School Surveys, Secondary School Teachers, Student Attitudes, Student Personnel Services, Teacher Attitudes, Two Year Colleges, Two Year College Students

A community impact study was conducted by Oakton Community College (OCC) in Fall 1979 to determine how representative samples of six constituent groups learned about OCC; the benefits they perceived in having a community college in the area; their awareness of and satisfaction with OCC programs and services; and ways in which OCC could be improved. Separate survey instruments were designed for each of six groups: area residents, executive officers from area businesses, personnel from the 12 area high schools, high school juniors and seniors, OCC students enrolled in credit courses in Fall 1979, and students taking adult and continuing education courses. Questionnaires were mailed to community residents and business representatives, and all other groups were surveyed in classes. Major findings relevant to the respondents as a whole revealed that: (1) mailings were the primary source of information about OCC; (2) OCC was valued more for its vocational offerings than for its non-credit, continuing education programs; (3) respondents were more aware of OCC's transfer and vocational programs than they were of the availability of counseling and community services; and (4) respondents rated OCC's performance highest with regard to continuing education and vocational programs. There was no consensus on how OCC should be improved. The survey report contains analyses of the responses of each group. (Author/JP)

Management Compensation: A Progress Report.

Association of California Community Coll. Administrators.

Pub Date—[80]

Note—9p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrators, Admissions Officers, Board Administrator Relationship, College Presidents, \*Community Colleges, Comparative Analysis, \*Compensation (Remuneration), Deans, \*Fringe Benefits, Governing Boards, Health Insurance, \*Industry, Leaves of Absence, Multicampus Colleges, \*Research Problems, Retirement Benefits, Salaries, School Business Officials, Two Year Colleges, Unemployment Insurance, Vacations, Workers Compensation

This examination of the current status of compensation for community college management and administrative personnel first summarizes the findings of a study conducted by Howard R. Bowen, which determined that, compared to business executives in comparable jobs within organizations of similar sizes, academic administrators were indeed underpaid. This fact is demonstrated in a table comparing the average salaries of academic and business personnel in nine comparable positions. Next, the benefits that are currently provided to California community college administrators are discussed in comparison to the growth of employee benefits in private industry. This discussion is followed by an outline of seven problems encountered in conducting studies of community college administrator salaries: (1) salaries do not reflect total compensation; (2) administrative positions at single and multiple campuses are difficult to compare; (3) often there is incongruity between a job title and its responsibilities; (4) it is difficult to compare colleges that have dichotomized faculty and management with colleges where faculty have administrative responsibilities; (5) some colleges do not differentiate between certificated and classified managers; (6) administrative salaries are not easily compared with faculty salaries; and (7) available data are frequently outdated. Suggestions for managers to improve their bargaining power with local boards conclude the report. (JP)

Marsee, Stuart E.

The President's Relationship to the Board.

Pub Date—[80]

Note—8p.

Pub Type—Opinion Papers (120) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Role, \*Board Administrator Relationship, \*Board of Education Role, College Administration, \*College Presidents, \*Community Colleges, \*Governing Boards, Interprofessional Relationship, Policy Formation, \*Trustees, Two Year Colleges

While members of a college's board of trustees expect the president to provide them with accurate and timely information, individual trustees also have a responsibility to help the president do an effective job. The board should understand that the president is the one college administrator with an overview of the enterprise as a whole; his/her advice, therefore, should be carefully considered in board matters such as institutional finance, facilities planning, public relations, establishing institutional goals, assessing institutional performance, preserving the institution's autonomy, and settling internal disputes. In addition, board members can take several steps to insure a harmonious board-president relationship, including: (1) develop policies that are workable; (2) realize that the president must make reasonable decisions that may not be universally acceptable; (3) keep politics out of board activities; (4) carefully study board meeting agendas beforehand; (5) refer operational questions to the president; (6) expect communications with college personnel to be channeled through the president; and (7) remain aware of community attitudes toward the college. While the board has responsibility for setting institutional policy, trustees should leave to the president the responsibility for establishing rules and procedures for the implementation of that policy. Identifiers—\*International Trade

After introductory material describing the lack of international studies in American education, this report describes the development, design, and accomplishments of the International Business Education program at Middlesex County College (MCC). The following phases in the development of the program are detailed: (1) a five-member curriculum team, representing the Business, Health Technologies, Science, Engineering, and Liberal Arts divisions of the college, met during the summer of 1978 to consider various approaches to an International Studies program, develop a bibliography for their curriculum areas, and develop suggestions for course units; (2) during the 1978-79 academic year, monthly seminars and workshops were held for faculty to develop ideas about incorporating internationally related content into appropriate curricula; (3) International Business I was developed and taught and four other courses were prepared; (4) several other activities were offered for faculty development; (5) a survey was conducted to determine the educational needs of local industries involved in international commerce with regard to specific training and foreign language requirements; (6) instructional efforts—including conferences for the business community, non-credit and credit certificate programs, and Round Table Seminars—were geared toward meeting these identified needs. Descriptors—Academic Deans, College Credits, \*College Curriculum, \*Community Colleges, \*Courses, Curriculum Research, Hypnosis, Legal Problems, Literature Reviews, \*Relaxation Training, Religious Factors, Scheduling, State Surveys, \*Test Anxiety, Two Year Colleges

Identifiers—\*California, Centering, Meditation, Transcendental Meditation, Yoga

As part of a study of the role of relaxation training in the reduction of student test anxiety, a survey of the deans of instruction at 102 California community colleges was conducted to determine the extent to which the colleges were teaching Centering, Meditation, Transcendental Meditation, Hypnotism, Yoga, and Relaxation. For each of these subjects, the survey instrument solicited information on the course name, the percentage of course content actually devoted to the subject matter, the number of credits offered, and the time of day the course was scheduled. Major findings, based upon responses from 72 deans, revealed that 54% of the responding colleges offered courses in one or more of the subjects being considered. The most frequently offered course was Yoga (offered by 37 colleges), followed by Relaxation (23 colleges), Meditation (19 colleges), Hypnosis (5 colleges), Transcendental Meditation (5 colleges), and Centering (4 colleges). Instructors used these techniques to reduce test anxiety at 19 colleges. In addition to a discussion of the survey results, the report provides: (1) a review of the literature dealing with relaxation training in the school setting, (2) comments from selected respondents, and (3) an examination of the legal problems encountered by public institutions because of the religious orientation of Transcendental Meditation and Yoga. Descriptors—\*Administrator Evaluation, \*Community Colleges, Comparative Analysis, \*Department Heads, \*Departments, Evaluation Criteria, Evaluation Methods, Measurement Objectives, National Surveys, \*Teacher Attitudes, Teacher Participation, Two Year Colleges

A national survey of community college department chairpersons was conducted in 1978 to determine: (1) the purposes, procedures, criteria, and standards used to evaluate their administrative performance; (2) their opinions about the present and the desirable components of chairperson appraisal systems; and (3) how chairpersons from various academic disciplines differed in their views of these systems. A sample of 921 chairpersons from 250 institutions that evaluate their chairpersons were selected to participate in the study; 776 responded and 454 met the pre-determined administrative criteria of the study. Data were subjected to a four-part analysis: frequency and percent determinations for survey items; a weighted comparative analysis of the responses concerning the present evaluation systems and desired ones; a stepwise discriminant analysis of response clusters to determine differences among different academic areas; and a content analysis of written evaluation policies. Results showed that although many appraisal systems had included some of the purposes, procedures, criteria, and standards identified as desirable by the chairpersons, several essential components were not being employed. For example, most chairpersons wanted a results-oriented system developed jointly by faculty, administrators, and themselves; however, a rating scale method designed solely by administrators was most common. Descriptors—Adoption (Ideas), \*Associate Degrees, \*College Role, Community Colleges, \*Degree Requirements, Educational History, Educational Philosophy, \*Educational Trends, Enrollment Trends, Federal Regulation, \*Graduation, Literature Reviews, Open Enrollment, Transfer Programs, Two Year Colleges

Despite some initial hesitancy in the first half of the twentieth century to award associate degrees, since the end of World War II, the associate degree has become as widely accepted by two-year colleges as the baccalaureate degree is by four-year colleges. This is evidenced by the steady increase in the number of associate degrees awarded annually, the eagerness displayed by educators in the various disciplines to have degrees with their specialties attached, and the trend toward making a particular degree the criterion for transferability and occupational competency. The acceptance of the associate degree is also reflected in the various regulations governing the number, purposes, and standards for the degree. Furthermore, when allowances are made for the large number of part-time students attending two-year colleges and the high risk of the open door policy, the number of associate degree graduates is indeed significant. Thus, despite arguments for community-oriented, non-traditional education, the associate degree program remains a significant community college offering. This literature review provides a historical outline of the use of the associate degree since 1900, a discussion of the requirements for the most common associate degrees awarded, and statistical data on the number of degrees awarded between 1970 and 1976. A bibliography is included. (JP)

Older Adult Education.

De Anza Coll., Cupertino, Calif.

Pub Date—29 Apr 80

Note—21p.

Pub Type—Reports - Descriptive (141)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Adapted Physical Education, \*Community Colleges, \*Community Recreation Programs, Course Descriptions, Dance Therapy, Disabilities, Exercise, \*Health Education, Legal Responsibility, Lifetime Sports, Medical Case Histories, Medical Evaluation, Nursing Homes, Nutrition Instruction, \*Older Adults, Outreach Programs, Records (Forms), Teacher Qualifications, Two Year Colleges

Identifiers—Card Games, Holistic Approach, Self Defense

In an effort to improve the quality of life for area senior citizens, De Anza College has established an older adult education program which combines adaptive physical education with holistic health care principles to instruct students in relaxation, nutrition, and physical activity. Classes are held in convalescent hospitals, retirement homes, and selected community centers, and care is taken to assure that instructors know their students' individual case histories. Handicapped students require a medical affidavit signed by a physician which details the student's condition and limitations; non-handicapped seniors must sign a release form indicating that they do not have any of six specified disabilities. All students fill out functional ability assessments which indicate the student's range of motion, ability to walk, and posture. Courses offered in the program include arm chair exercise, holistic physical education, yoga, contract bridge, exercise set to jazz, dance movement, minor sports, self-defense, and holistic health. Instructors are trained to avoid activities which are potentially dangerous and to monitor students for signs of fatigue or overwork. The descriptive report describes each of the courses that are offered, identifies potentially dangerous activities, and provides copies of the forms used to gather information for the student case histories. A Study on Handicapped Services.

Trident Technical Coll., Charleston, S.C.

Pub Date—Jan 80

Note—63p.

Pub Type—Reports - Descriptive (141)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Accessibility (for Disabled), Access to Education, Admissions Counseling, Advisory Committees, Affirmative Action, College Admission, College Libraries, Community Resources, \*Compliance (Legal), \*Disabilities, Educational Counseling, Educational Policy, Federal Legislation, Federal Regulation, Financial Support, Grievance Procedures, Instructional Improvement, Job Placement, Legal Responsibility, School Registration, Self Evaluation (Groups), Student Financial Aid, Student Recruitment, Teacher Effectiveness, \*Technical Institutes, Two Year Colleges, Veterans

Information and recommendations concerning the improvement of Trident Technical College's (TTC's) programs and services are presented in light of federal requirements and institutional obligations. An institutional statement outlining TTC's affirmative position toward educational access for the handicapped is followed by an enumeration of 13 recommendations for the improvement of services to the handicapped. These recommendations include the establishment of procedures and regulations for handicapped services and programs; the creation of a student review board, a handicapped advisory committee, and a handicapped awareness program; and the implementation of an instructional development program to assist faculty in identifying handicapped students and meeting their instructional needs. The report then outlines TTC's legal obligations under Section 504 of the Rehabilitation Act of 1973, and then examines present and suggested services for the handicapped in the areas of admission and registration, academic advisement, student financial aid, veterans' affairs, job placement, and library services. The remainder of the report examines available community resources for handicapped education, handicapped instructional needs, physical barriers, sources of funding, grievance procedures, evaluation of handicapped services, and the role of a proposed Program Ac-

cessibility Committee. (JP)

Descriptors—Academic Achievement, Age, \*Community Colleges, Departments, Educationally Disadvantaged, Females, Grade Point Average, \*High Risk Students, Job Training, Males, Persistence, \*Program Effectiveness, Referral, School Surveys, Self Evaluation (Groups), Student Attitudes, Student Motivation, Supervisors, Teacher Attitudes, \*Tutorial Programs, Tutors, Two Year Colleges, \*Two Year College Students

In order to gather opinions and data about the impact of Los Angeles City College's tutorial program, a two-part study was conducted in Spring 1979. Initially, the academic records of 477 students who had received tutoring in Spring 1979 were examined and compared with overall campus performance averages in the following areas: class(es) for which tutored, week when tutoring began, number of weeks tutoring continued, sex, age, final grade in course for which tutored, Spring 1979 grade point average (GPA), cumulative GPA, and units attempted in Fall 1979. Additionally, faculty members, tutor supervisors, and tutors were asked about their perceptions of the tutorial program. The faculty survey focused on general impressions of the tutorial program campus-wide and by department; number of students receiving tutoring and number that had been advised to seek tutoring; effects on class and academic performance; tutor training; and program administration. The tutor supervisors were asked to rate items related to program effectiveness in relation to student persistence and achievement; assistance of the tutoring office; tutor training, competence, and availability; student awareness of tutoring services; scheduling; and program strengths and weaknesses. Tutors were asked about their motivation for becoming a tutor, frequency of tutoring sessions, student referral, their impressions, and tutee reasons for seeking help. (JP)

In light of recent legislation specifying minimum educational requirements for the renewal of real estate licenses for brokers and salespersons in Kansas, Johnson County Community College conducted a survey of community needs for real estate education. The survey instrument, which was distributed by the Johnson County Board of Realtors to its members, focused on interest in an associate degree (A.A.) in real estate and in specific courses, scheduling preferences, and interest in college credit for courses and/or Kansas Real Estate Commission (KREC) approval. Survey findings, based upon 206 returned questionnaires, include the following: (1) 65.7% of the respondents expressed interest in an A.A.; (2) of the eight courses specified in the questionnaire, courses in Finance, Appraisals, Laws Relating to Real Estate, and Contracts received the greatest interest; (3) respondents were interested in taking an average of 4.5 courses; (4) 68% wanted both college credit and KREC approval for courses; (5) respondents indicated a preference for courses taught from November through February, once a week (not on Friday or Saturday), beginning at 6:00 or 7:00 p.m. The questionnaire and several data tables are included in the study report. Descriptors—Academic Achievement, Admissions Counseling, Aptitude Tests, \*Clerical Occupations, Clerical Workers, \*Court Reporters, Employment Qualifications, Goal Orientation, Job Skills, Language Skills, Longitudinal Studies, Occupational Tests, Personality Assessment, \*Predictive Measurement, Predictive Validity, \*Predictor Variables, Program Development, Reading Tests, Screening Tests, Shorthand, State Licensing Boards, State Standards, \*Success, Testing Programs, Two Year Colleges, Typewriting, Vocabulary Skills

In order to identify a battery of aptitude tests which could adequately predict the success of applicants to its court-reporting program, MacCormac Junior College contracted with Science Research Associates in Fall 1976 to conduct a longitudinal validation study of court-reporting aptitude measures. Eight tests were administered to each court-reporting student enrolled at the beginning of the Fall term, yielding 26 scores for each student. These scores were measured against a numerical scale reflecting the student's eventual status as: (1) withdrew; (2) accepted a stenographic diploma; (3) earned an Associate degree (A.A.), but failed to pass the state Certified Shorthand Reporter (CSR) exam; (4) earned an A.A. and passed the CSR after more than one try; and (5) earned an A.A. and passed the CSR on the first try. Study results indicated that the correlation between the predictive variables and student success was highest on four measures: typing placement test; social studies reading score from the American College Testing examination; the goal orientation subscale of the Survey of Personal Values; and the language subsection of the Short Test of Clerical Ability. If the average composite score for these items had been used as an entrance criterion, 53% of the entering freshmen would have passed the CSR, instead of the 35% who actually did. The study report describes each of the four predictive criteria. (JP)

Based on data from a variety of sources, these 12 fact sheets summarize current enrollment, instructional, and administrative trends at the existing 1,230 public and private two-year colleges. A general profile of the colleges is first presented, focusing on the number and type of institutions, enrollment, student characteristics, number of faculty, tuition, and types of programs offered. This is followed by more specific examinations of: (1) enrollment trends since 1965 and projections into the 1980's; (2) student characteristics, including age, sex, occupational status, income, and ethnicity; (3) patterns of student mobility, college majors, and educational goals; (4) tuition and student financial aid; (5) the respective roles of vocational, transfer, and community education in the two-year college curriculum; (6) characteristics, salaries, and tenure status of full-time and part-time faculty; (7) the anticipated employment outlook for two-year college instructors; (8) the demand for adult, life-long learning; (9) the character-

istics and educational objectives of adult students; (10) the characteristics and roles of administrators and governing boards, and trends in governance; and (11) sources of community college revenue and institutional budget allocations. Each section includes a list of references and sources of information. (JP)

The Career Development Program was implemented at Trident Technical College (TTC) during the 1979-80 academic year. The program's objectives are to: (1) assist TTC students in identifying and modifying personal beliefs and expectations about themselves as related to the world of work; (2) aid students in narrowing career options and provide them with the resources for career exploration; (3) help students reach career decisions based on identified skills and personal values; and (4) equip students with efficient job-seeking skills. Sections of the "Career Development Activity Workbook," which is used by the counseling staff in a career development course, correspond to each of these objectives. Achievement of these goals and other outcomes expected of the program is facilitated by a decentralized organization in which individual counselors are assigned to TTC's instructional departments in an effort to improve student access to counselors, to promote frequent contact between counselors and faculty, and to provide for early prognosis and referral of students with academic or career counseling needs. The program description includes a discussion of the Career Development Centers at each of TTC's two campuses; flow charts illustrating the progress of new students in the Career Counseling Program and the structure of the Career Development Center; and an outline of a career development course, "Reasoning and Career Development." Utilizing the responses of 385 women to a district-wide community needs assessment conducted in March 1980, as well as information gathered from personal interviews with 400 women students, Santa Ana College (SAC) conducted a project to increase the awareness among women of SAC's programs and services and to determine: (1) women's degree of familiarity with SAC, (2) their degree of satisfaction with the college and its services, (3) their educational needs and desires with regard to scheduling and specific courses and programs, and (4) the problems related to class withdrawal. Survey data, augmented by information from student records and the results of a statewide longitudinal study, indicated that women students were more likely to be under 30 years of age, non-white, and

have a lower annual income than community women. While 95% of the community members had heard of SAC, and 77% felt that the college was doing a good job, 71.1% had never taken a class at SAC. SAC students were familiar with most of the college's student services, and 83% also rated SAC as "good." All services, except financial aid, were evaluated favorably by most of those who had used them. With regard to scheduling preferences, community residents favored morning or evening classes in three-hour time blocks. Respondents in both groups, as well as their male counterparts, cited employment conflicts as the greatest obstacle to college attendance. (JP)

Identifiers—\*Virginia

Although junior colleges were originally established to provide the first two years of collegiate instruction, the mission of today's community college includes providing not only transfer education, but also certificate or associate degree vocational programs, adult continuing education, and community services. Therefore, the community college can no longer be evaluated solely on the basis of the number of students who graduate. The inadequacy of this evaluation method is reflected in the growing number of students taking advantage of the community college's service/continuing education component. A full 50% of the 1975-76 enrollment in the Virginia Community College System (VCCS), for example, was in non-curricular areas such as career exploration, job skill improvement, and personal development. In recognition of this fact, the VCCS takes this non-curricular enrollment, as well as the number of graduates, into consideration when evaluating individual college performance. The time has come for other institutions to follow this lead and measure institutional success by the degree to which a student's goals are being achieved, and not by the goal of graduation as set by upper-echelon administrators. Identifiers—Miami Dade Community College FL, \*Progress Reporting

Due to the implementation of new standards for academic progress in Fall 1978 and the resultant suspension of or imposition of credit limitations upon students not meeting these standards, Miami-Dade Community College developed and tested an academic alert program in which computer-generated letters were sent to students at mid-term to provide an assessment of their academic progress and to refer them to appropriate counseling services. A project committee, with representatives from each of the college's four campuses, composed messages for each of 14 unique student groups. These messages were based upon progress reports from faculty and predetermined criteria, including course load, reading level, native language, physical limitations, math scores, and age. Computer programs, incorporated in the college's Response System with Variable Prescription data processing

system, were used to place students in appropriate categories and to generate the letters. The warning system, when used with first-time students in mid-Fall 1978, revealed that 43% needed to improve in at least one course and that there was a close correlation between attendance and performance. The study report provides a literature review, academic alert and advisement statistics, a proposal for program evaluation, and a discussion of the participatory governance system used in developing the alert and advisement system. Based on activities at the Trumbull Campus of Kent State University, this guidebook presents suggestions for the implementation and operation of a series of informational workshops designed as a vehicle for the recruitment and orientation of adults who are considering enrolling in college. The guidebook first gives a rationale for the workshops and then discusses the steps in workshop planning, including choosing a coordinator, engaging the help of currently enrolled students in a peer support group, determining the topics to be discussed, and selecting a meaningful title for the workshop series. This is followed by a description of the four topics covered by Trumbull's own program: (1) the types of degrees available, program and course content, and employment opportunities for each degree program; (2) the types and relative merits of all of the educational institutions in the area serving adults; (3) the availability of financial aid and personal and academic counseling; and (4) the identification of potential personal problems. The guidebook then discusses publicity for the workshop, such as flyers and newspaper advertisements; support services for workshop participants, including child care and refreshments; the utilization of questionnaires to facilitate workshop evaluation and to determine participant characteristics and needs; and workshop follow-up. Survey instruments are appended. (JP)

Descriptors—\*College Faculty, \*Community Colleges, Comparative Analysis, \*Compensation (Remuneration), Contract Salaries, Cost Indexes, Fringe Benefits, \*Full Time Faculty, Institutional Characteristics, National Surveys, Questionnaires, Retirement Benefits, Teacher Employment Benefits, Teacher Salaries, Two Year Colleges

Identifiers—Ohio

A survey of 38 community college districts, including all community colleges in Ohio as well as a representative nationwide sample, was conducted by Cuyahoga Community College (CCC) in December 1979 to solicit information on faculty compensation during 1979 and to determine CCC's relative position among similar institutions with regard to full-time faculty remuneration. Selected survey results, based upon the responses of 26 districts, indicate that the unweighted average compensation for all institutions was \$24,066, of which \$20,893 was salary. While this represents a 7.6% increase over 1978, the average increase registered by the National Consumer Price Index was 12.8%. Average compensation at CCC (\$27,040) was 12.2% higher

than the national norm, and the average salary (\$22,301) was 6.7% higher. The range of contract days reported was from 157 to 195, and the average unweighted compensation amount per full-time contract day was \$140, as compared to \$150 at CCC. The survey report contains several data tables illustrating 1979-80 full-time faculty compensation at respondent institutions, a comparison of 1978 figures with 1979 data, changes in average compensation from 1977 to 1979, a comparison of 1979 average compensation at CCC with other institutions, and a comparison of CCC compensation with changes in the Consumer Price Index since 1971. Descriptors—Auto Body Repairers, \*Auto Mechanics, \*Certification, \*Diesel Engines, Employer Attitudes, Job Skills, \*State Standards, State Surveys, Test Construction, \*Testing Problems, \*Testing Programs, Test Items

Identifiers—Hawaii, \*Trucking Industry

Recommendations for the improvement of the diesel engine and truck components of the Hawaii state certification examination for automobile and truck mechanics were solicited from 14 major private businesses repairing heavy tractor rigs and/or diesel engines on Oahu and a statewide sample of 21 trucking firms and other companies making extensive use of trucks. Personal interviews with managerial personnel at truck service and repair firms focused on: firm employees who had taken the diesel mechanics portion of the exam, its validity, preferences with regard to modification of the testing system, subject areas that should be emphasized in a new exam, willingness to participate in test development, preferences in relation to test administration, requirements for certification, the problem of English language fluency, and the weaknesses of the present testing system. Interviews with trucking firms solicited information on: the number of trucks in the firm's fleet and whether they were diesel or gasoline powered, desirability of mechanic certification, familiarity with the exam, adequacy of the gasoline engine examination and areas that needed improvement, truck frame, chassis, and diesel and gasoline engine suppliers, repair types and costs, complaints about repairs, and testing preferences. The survey report presents analyses of both surveys, recommendations, and the interview guides. (JP)

Descriptors—\*Age Differences, Assertiveness, \*Cooperation, Discourse Analysis, \*Elementary School Students, Group Activities, \*Group Structure, \*Kindergarten Children, Primary Education, \*Sex Differences, Social Behavior, Verbal Communication

Identifiers—\*Dominance Hierarchies

This study examined dominance attempts of grade school children engaged in a cooperative task. Within each of three grade levels (K, 1, 3), eight mixed-sex triads were randomly formed. Utilizing verbal indices of dominance, significant differences were found for cross-sex and same-sex attempts, by grade level and triadic composition. The results for K and grade 1 confirmed previous research which indicated that boys were more dominant than girls and attempted primarily to dominate other boys. However, with age, girls showed increasing verbal assertiveness toward boys as well as toward other

girls, and by grade 3, their overall dominance attempts equalled that of boys. Implications of the findings for research in dominance relations are discussed. (Author/MP)

Training Rehearsal Strategies in Children.

Pub Date—1 Feb 79

Note—14p.; Paper presented at the meeting of the Southwest Educational Research Association (February 1, 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Elementary Education, \*Feedback, \*Memory, \*Recall (Psychology), \*Training Methods, \*Young Children

Identifiers—Metamemory, \*Rehearsal (Memory), Rehearsal Strategies

The effects of a training procedure for modifying children's rehearsal techniques on memory tasks were investigated in this study. Thirty second-grade children were randomly assigned to feedback and no feedback conditions in an experiment conducted in four phases: baseline, training, immediate transfer, and delayed transfer. Four lists of 18 grade-appropriate, high frequency nouns were selected from Thorndike and Lorge (1944). One list was used to collect baseline data and the remaining three lists were used for training, immediate transfer, and delay transfer tasks. Following each study/test trial conducted during training, the feedback group was shown how their performance improved when they used a many-item rehearsal strategy. A brief math test was administered for five minutes immediately following training. Children were then given the immediate transfer task. One week later, they were given the delay transfer task. A repeated measures analysis of variance was performed for group, stage and serial word position variables. Among the results, the analysis indicated an overall significant difference between the two groups in rehearsal and a marginally significant difference between the two groups in recall. (Author/RH)

Identifiers—\*England

Given that in a community, there will be some parents who make use of preschool provision and some who do not, are there any discernible differences or similarities between the two groups of parents? Do the reasons parents offer for use or disuse, however cogent they may be, mask a more fundamental difference between families who do not take part in preschool provision and those who do? These are problems to which this exploratory study seeks answers. The Hillington Borough Council allowed

researchers to monitor its program of establishing playgroups run by Tenants' Associations on some of its housing estates. One such estate, 'Hillcroft', housing a reasonably homogeneous community of working class families, became the focus of this study. Among the major findings, almost one-third of the families did not take up preschool provision which was available and guaranteed for their children. Negative responses were made to preschool provision in general. Results suggest that the degree of awareness and enthusiasm which mothers showed for preschooling was a reflection of the mother's own psychological situation. A large proportion of mothers interviewed had personal problems which precluded other than marginal concern for planned provision for their children. (Author/RH)

Descriptors—Child Development, \*Disadvantaged Youth, Federal Legislation, \*Federal Programs, Health Insurance, History, \*Preventive Medicine, \*Problems, \*Program Design, \*Program Effectiveness, Training

Identifiers—Assessment Instruments, Children's Health Assessment Program, Critical Analysis, \*Early Periodic Screening Diagnosis and Treatment, Recommendations

This paper critically reviews the federally funded Early and Periodic Screening, Diagnosis and Testing (EPSDT) program, and highlights problems in its design and functioning. A prime example of a preventive health program that is commendable in intent but ineffective in actual practice, the EPSDT program's failure was prompted by factors which included: (1) the socio-political climate of the late 1960s; (2) lack of community support for the program; (3) problems in design of the program; and (4) problems in implementation. To prevent the failure of future programs, a comprehensive, strongly preventive approach to physical and mental health care for children is deemed necessary. Implications of national health insurance are discussed. Legislation similar to EPSDT, the Children's Health Assessment Program (CHAP), is evaluated in light of the criticisms and problems of EPSDT, and recommendations for future policy are made. Descriptors—Conventional Instruction, Curriculum Development, Developmental Stages, \*Early Childhood Education, \*Emotional Development, \*Intellectual Development, Peer Relationship, \*Physical Development, Self Concept, \*Social Development, Student Centered Curriculum, Teaching Methods

Identifiers—\*Piagetian Theory

The three papers included in this symposium discuss the relevance of Jean Piaget's theory of cognitive development to the early childhood practitioner. First, an overview of Piaget's theory is presented. This focuses on the particular aspects of the theory most relevant to practitioners in early childhood education. Second, curriculum implementation is examined. Piaget's ideas are applied to the traditional child-centered curriculum through a discussion of six steps which guide what the teacher does with children during the day: (1) anticipation, (2) analysis, (3) arrangement, (4) attention, (5) articulation, and (6) assessment of activities. Third, Piaget's contributions to understanding children's socioemotional development are examined. Ways to determine appropriate goals for socioemotional development and the means for reaching these goals are discussed. (Author/RH)

Pub Type—Reports - Research (143)

Document Not Available from EDRS.

Descriptors—Audiences, \*Commercial Television, Foreign Countries, \*Interests, \*Perception, \*Personnel, \*Programming (Broadcast), Television Surveys, Television Viewing, Values, \*Youth

Identifiers—Canada, France, Norway, Yugoslavia

This collection of studies, conducted in Norway, France, Canada and Yugoslavia, reports on the ideas and images television broadcasters responsible for the production of youth programs have about their audience; how these broadcasters see their own role; aspects of the broadcasting institution; and certain aspects of the values, interests and leisure time behavior patterns of the youth audience. The main point of interest in each of the four studies is the relationship between the broadcasting institutions and broadcasters on the one hand and their target audience (youth) on the other. The match, or lack of it, between the two and the factors that influence both program provision and the reactions of the audience to that provision are of central concern. (Author/SS)

Descriptors—Children, Curriculum Development, \*Disadvantaged, \*Educational Improvement, Foreign Countries, \*Health Services, Inservice Teacher Education, Master Plans, \*Mothers, Preschool Education, Primary Education, Program Descriptions, \*Rural Areas, Rural Development, \*Social Services, Water Resources

Identifiers—\*Afghanistan

This Master Plan of Operation has two parts: The Framework and the Program. Part I (the Framework) sets out the articles of agreement between the Government of Afghanistan and the United Nations Children's Fund (UNICEF) concerning a 1-year program for the improvement of social services for children and mothers regarded as the most disadvantaged groups in rural areas. Part II (the Program) describes each project in the program and specifies the responsibilities of the relevant Government Ministries and Departments for their implementation. The Program consists of six components: (1) integrated rural development, centering on safe drinking water, women's activities and nutrition services; (2) delivery of health services and training of health personnel and village health workers; (3) rural water supply; (4) development of primary school curriculum and preservice and inservice teacher education to prepare teachers to use new textbooks; (5) support activities; and (6) development activities. Descriptors—\*Day Care Centers, \*Educational Policy, \*Educational Quality, \*Federal Regulation, \*Health, \*History, Nutrition, Parent Participation, Physical Environment, Program Content, Safety, Social Services, State Agencies, Student Teacher Ratio, Training

Identifiers—\*Department of Health Education and Welfare

This document analyzes Department of Health, Education and Welfare (DHEW) regulations for day care centers and homes. New DHEW day care

proposals are paraphrased and the content and history of related regulations are summarized. Topics discussed include definitions, applicability, Office of Education waivers, program activities for children, training, nutrition, health and safety, physical environment, social services, parent involvement, group sizes and staff-to-child ratios, monitoring of compliance, State Agency waivers, future review of day care regulations, the State Agency Advisory Council and effective date of compliance. Since state agencies have complied inconsistently with federal regulations, it is recommended that DHEW specify minimal requirements of quality to be met by any adequate program if it is to provide beneficial services. Identifiers—\*Southwest Educational Development

Laboratory

This final report describes the development and field evaluation of teacher training materials (for inservice workshops) and elementary school language arts materials. The basic goal of the training materials, called Teacher Development Packages (TDPs), was to provide teachers with the information and skills needed to utilize games and informal learning activities in multicultural settings. The purpose of the language arts materials were to (1) develop methods of stimulating children's oral language, (2) increase reading and writing skills, and (3) promote multicultural learning through use of traditional children's folk materials for children in Grades 2-5. The Teacher Development Package for Grades 2-3 consists of four 2-hour inservice workshop modules which include skill development and practice through the use of simulation games, film-strip presentations and discussions; selection of activities for enhancing cognitive and affective skills; curriculum planning and scheduling; and roleplay. The TDP for Grades 4-5 consists of two 2-hour modules involving activities similar to those mentioned above. The primary teaching strategy of the language arts units was to elicit from the child "childlore" materials to be used in classroom publications and dramatic production. Evaluation findings for workshops and materials are presented in detail. Project related instruments and materials are appended. (Author/RH)

#### Design Patterns for Children's Environments:

Synopsis of a Two-Year Research and Design Project.

Pub Date—79

Note—15p.

Pub Type—Reports - Descriptive (141) — Guides

- General (050) — Opinion Papers (120)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Architectural Research, Children, Criteria, \*Day Care Centers, \*Design, \*Physical Environment, Planning, \*Playgrounds, \*Policy, \*Research Methodology

The purpose of this project was to research and develop two design guides on environments important to child development: child care facilities and outdoor play areas, and to specify new, research-based criteria for the planning and design of these facilities for military bases around the world. The current paper is a synopsis of parts of this project. The paper summarizes the following: (1) the applied research methods used to generate the data-base for the new planning and design guidelines; (2) key findings in the areas of policy, planning, and architecture for both child care facilities and outdoor play areas; and (3) example design applications of the new patterns and criteria for the design of

prototypical new facilities, renovations of existing facilities, and adaptive reuse of older buildings. The two design guides described in this paper represent a humanistic approach to architecture based on an examination of children's needs and the role of the physical environment in child development and experience. They are based on recent research in child development, environment and behavior, and architecture. The work also incorporates ideas on child care facilities and play settings from around the world. Most of the information in these documents, while generated for specific application in family housing areas on U.S. military installations, is considered generalizable to child care facilities and outdoor play environments for children. Identifiers—Parenting Resources Implementation Model, \*Southwest Educational Development Laboratory

This final report describes activities of a Parent Education Center (PEC) at the Southwest Educational Development Laboratory (SEDL). The PEC was designed to serve the needs of practitioners, professionals and researchers in the field of parent education and to provide them with up-to-date information on parent education materials, programs and resources. PEC objectives focused on (1) providing training and technical assistance; (2) materials revision, placement, monitoring and evaluation of use; (3) identification and cataloging of new materials, disseminating parenting materials information and selling parent education products; (5) conducting workshops, planning for increasing networking among parent education providers, and writing conference reports; (6) conducting a follow-up impact study of training materials on parents' child rearing beliefs and behaviors, formulating policy recommendations and topics for further research; and (7) conducting a publishers' alert and providing materials for publishers. The ethnographic follow-up study produced a number of findings related to an understanding of the following: the impact and implementation of parent education workshops, the role of parenting models and ethnic differences in facilitating changes in parents, and parents who were abused as children. Case examples, coding sheets, a description of the implementation of parent training packages at each site, and range of effects data are appended. (Author/RH)

A Study of Sex Stereotyping in Child-Selected

Play Activities of Preschool Children.

Pub Date—Nov 79

Note—58p.

Pub Type—Reports - Research (143) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Observation, \*Play, \*Preschool Children, \*Sex Differences, \*Sex Stereotypes, \*Social Change

The purpose of this study was to examine child-selected play activities of three-, four-, and five-year-old children to determine whether the choices reflected society's traditionally sex stereotyped labels. Subjects were 50 students enrolled in two nursery school programs at a midwestern university during the autumn of 1979. Three observers recorded the number of different boys or girls that participated in the following activities: art projects, house play, wheeled vehicles, sand or water, blocks, climbing apparatus, books, and table activities. The

data were collected in 30 minute observation periods over six consecutive weeks. Several findings differ from previous studies. While all four traditionally female-oriented play activities (house play, books, art projects, and table activities) were chosen more by girls than by boys, the difference was not statistically significant at the .05 level. Boys chose the traditionally male-oriented play activities: wheeled vehicles and sand/water, more than girls did. Girls chose the traditionally male-oriented climbing apparatus more frequently than boys did. Differences for these three activities were not significant at the .05 level. Block play was the only activity revealing sex differences at the .05 level. Significantly more boys than girls played with blocks. It is suggested that the changing societal attitude and the national movement toward eliminating sexism is reflected in the play activities of young children. (Author/RH)

Grant—90-TW-2026

Note—18p.

Pub Type—Reports - General (140)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adolescents, Adults, \*Children, \*Demography, \*Educational Attainment, Family Characteristics, Infant Mortality, Medical Services, \*Regional Characteristics, \*Welfare Services

Identifiers—\*United States (South)

This brief, preliminary report sets forth in broad strokes a profile of children in the South. Demographic, educational, and program resources data are provided. The report is considered a beginning step in the process of developing baseline data about the unique characteristics of Southern children. Three themes are evident in the report: (1) improvement in health, education and economic conditions has occurred, (2) unique problems requiring continuing action remain, and (3) many questions about how well public policies and resources match the unique needs of Southern children have yet to be answered. Data reported usually represent a 14 state area, including Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia. Descriptors—\*Behavior Patterns, \*Child Caregivers, Data Analysis, Day Care, \*Factor Analysis, National Surveys, \*Preschool Children, Preschool Education

Identifiers—\*Variables

The purpose of this paper is to describe the composite caregiver and child behavior variables used in the analysis of the data collected in the National Day Care Home Study: a three-year survey of day care homes in the United States. First, most frequently occurring behaviors are indicated. Then, the factor analyses of patterns of behaviors which were used to define the analysis variables are presented. The logical structure and empirical support for these variables are discussed. The process of the final selection of analysis variables based upon theory and empirical data is also described. Lists of caregiver and child behavior variables and definitions, as well as tables indicating definitions and factor analytic support for observation variables, are appended. (Author/RH)

Does Active Rehearsal Improve Young Children's Recall?

Pub Date—Apr 80

Note—18p.; Paper presented at the Biennial South-eastern Conference on Human Development (6th, Alexandria, VA, April 17-19, 1980).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adults, Elementary Education, Elementary School Students, \*Influences, \*Memorization, \*Recall (Psychology), \*Young Children

Identifiers—\*Instructional Set, Rehearsal (Memory), \*Rehearsal Strategies

This study investigates different methods of increasing children's use of active rehearsal in recall, and the extent to which this active rehearsal improves their recall. Seven groups of second grade children and one group of adults were asked to memorize a list of everyday words in four study-test trials. Two of the groups of children were given differing amounts of time for rehearsal (5 sec. vs. 10 sec. inter-item intervals) with covered (not visible) items; two other groups were given differing amounts of time for rehearsal with all items visible during rehearsal. One of the groups of children heard a tape of adults actively rehearsing, another of the groups heard a tape of children rehearsing; and one of the groups of children and the group of adults were given spontaneous rehearsal instructions. It was found that all the conditions designed to increase rehearsal activity did so, with the most effective condition consisting of extra time (10 sec. interval) plus visible items. Allowing extra time to rehearse and making the items visible both improved primacy recall. Children asked to rehearse actively with extra time and items visible recalled no differently than adults did under spontaneous rehearsal conditions. Letting children listen to rehearsal generated by others seemed to be ineffective in improving recall. (SS)

Identifiers—\*California

In seeking to clarify the meaning of the terms "child abuse" and "child neglect" it has been assumed that, like other forms of social deviance, they are socially defined phenomena. Interviews were conducted with those professionals (lawyers, pediatricians, police officers, and social workers) who daily handle the problems of abuse and neglect for the County of Los Angeles, and with a representative sample of the general population. In addition, a sample of actual cases of child abuse and neglect drawn from four counties in California were studied. Measures were developed to assess the relative seriousness of the specific incidents of abuse and neg-

lect that had brought the 949 families in the sample under theegis of protective intervention. The relationship between the seriousness of the incident and the way in which the family was handled was analyzed. The book begins with an overview of the problems involved in defining child abuse. This is followed by a historical review of the changing conceptions of the problems over the past 300 years. The surveys of professionals and the general population are reported in Chapters 3 and 4, respectively. Examination of the actual cases is presented in Chapter 5. The book concludes with a discussion of the policy implications derived from the research. Categories of mistreatment and professionals, ratings, an overview of research methods, and additional tables of data are appended. (Author/RH)

Descriptors—\*Age Differences, \*Black Students, Comparative Analysis, \*Conventional Instruction, \*Discovery Learning, Elementary Education, Elementary School Students, \*Influences, Kindergarten Children, Primary Education, \*Recall (Psychology), Teacher Influence

This presentation discusses research on the effects of adult- and self-instruction on the performance of a picture grouping task by black children in primary and elementary school. Kindergarten children and first-, fifth- and sixth-grade students were shown pictures that could be divided into four sets. Within each set the pictures were similar in color, depicted action, and category label. Adult-instructed children were shown the pictures one at a time. The adult named the pictures and the child repeated the name. Pictures were placed in rowed arrays containing common set attributes and the adults explained how items in the set were similar. Self-instructed children were told to "pretend to be a toy store manager" and "put things together that are alike..." Children then studied the groups they had formed. After the pictures were removed each child was given three retrieval cue tests asking for recall of items by color, action and category label. Results indicate that young children who were instructed by an adult did as well as adult-instructed older children, but young children left to devise their own strategy did less well than older children who devised a strategy. Adult-instructed first graders remembered more than self-instructed first graders did. (Author/RH)

Descriptors—\*Adolescents, Adopted Children, \*Adoption, Agencies, \*Experience, Fathers, Grief, Guidelines, \*Mothers, Parent Child Relationship, Parent Responsibility, \*Pregnant Students, Questionnaires, \*Readiness

Identifiers—\*Parent Child Separation

In this book, young women who relinquished their babies for adoption and young women who kept their children share some of their feelings about and attitudes toward adoption. Chapters focus on parenthood by choice, readiness for parenthood, how adoption agencies work, independent adoptions, adoption by relatives, fathers' rights, dealing with grief, communication between adoptive parents and birth mothers, releasing a toddler for adoption, older adoptees, and experiences of adoptive parents. Appended material includes a questionnaire: "Am I Parent Material?"; advice to parents on parent-daughters; and guidelines for working with pregnant teenagers. This book is not a plea for pregnant teenagers to release their babies for adoption, but is a

book dedicated to the principle that parenthood deserves to be chosen and not forced on nor acquiesced to by those who care for children. (Author/RH)

Identifiers—\*Tennessee Technological University

This paper presents a summary description of the Tennessee Technological University Teacher Evaluation Model and of its application to teachers in early childhood education. The model was developed to assess the graduates of teacher education programs at Tennessee Technological University. The evaluation is based on information from four sources: graduates of the teacher education program, their supervisors (principals), their students, and independent observers. Types of data collected include self-ratings of teacher ability, ratings of the level of achievement of objectives of the teacher education program, demographic information, grade averages, courses completed, standardized test scores, measures of personality, ratings of teacher competence by principals and by students, and direct classroom observation. Results are presented for the application of the model to 115 graduates who were teaching in grades K-3 (of these, 85 graduates had completed the B.S. and 30 had completed the M.A. degree). Older individuals with more teaching experience and formal education were more open-minded in their beliefs, were rated higher by their principals and by their students, and were rated higher by independent observers of classroom behavior. This paper presents the philosophy, goals and curriculum of the San Jose University Demonstration Preschool Project and presents preliminary data on the integration of mild to moderately handicapped preschool children into the program. The program, which enrolls 6 handicapped children and 14 non-handicapped children, is based on the developmental theory of Jean Piaget. The specific goals of the program are concerned with active involvement of the child through interaction with peers, manipulation of objects, and movement in space and reflection. The program is conducted in 3 types of settings: program-directed choice, teacher-directed choice and teacher directed. As part of the on-going documentation of the Demonstration Preschool, extensive observations of the children are recorded using the Coping Analysis Schedule for Educational Settings (CASES), which is specifically designed to evaluate the process of socialization. Data collected over a two-and-half-year period indicated that: (1) the dominant coping style of both handicapped and non-handicapped children in the teacher-directed setting was compliant, dependable, conforming behavior; (2) similarly, this was the dominant style of both groups in the teacher-directed choice setting. Also evident was a second style of independent, productive, self-directed behavior. In the program-directed setting both groups were characterized by independent, task-directed behavior, though handicapped children as a group were less socially integrative than their chronological, non-handicapped peers. Descriptors—Age Differences, Attitude Measures, Elementary Education, \*Elementary School Students, \*Elementary School Teachers, \*Instruction, Responsibility, Self Concept, Sex Differences, \*Student Attitudes, \*Student Evaluation of Teacher Performance, \*Teacher Attitudes, Teacher Evaluation, Teaching (Occupation)

Identifiers—\*Student Perceptions of Teacher

This study examines the relationship between several teacher attitudes and students' perceptions of the teaching milieu. To assess these relationships, measures of teachers' attitudes, teachers' perceptions of their own teaching and children's evaluations of the instruction were used. Five instruments were used to measure the attitudes of 42 first, second and third grade teachers: The F-Scale (anti-democratic tendencies), the Attitudes Towards the Freedom of Children Scale, the Teaching Self-Concept Scale, the Affect Towards Teaching Scale, and the Perception of Causation Scale (locus of control). The students sample included 378 first graders, 405 second graders, and 365 third graders. Each student was administered the Student Evaluation of Teaching II (Set II). Full results were obtained from 23 of the 42 teachers. Analysis of these results show the following: (1) teachers' perceptions of causation, their affect towards teaching, their attitude towards the freedom of children and their anti-democratic tendencies (F-Scale scores) were all in a direction consistent with expected scores. That is, the more responsibility teachers assume for the learning of their students, the more they like teaching, the more freedom they feel children should have and the more democratic their values tend to be. (2) All of the above measures were found to be inversely related to the self-concept measure. That is, the more confident teachers (high teaching self-concept) felt less responsibility, liked teaching less, felt more restrictive in regard to children's freedom and tended to be more authoritarian. (3) The grade level at which a teacher teaches (within this narrow range) had little effect upon student's ratings of the teacher. In regard to years of teaching experience, again there is little difference between the groups. (4) Male students consistently rated their teachers more positively than did the female students. Identifiers—Ontario

The purpose of this study was to obtain and analyze information on the characteristics of the child entering school for the first time in junior kindergarten, senior kindergarten and grade one. A sample of 209 children from different areas in Ontario, Canada, including rural, urban, inner city and metropolitan areas, was studied. Information was gathered by means of: (1) questionnaires mailed to parents, teachers and principals, (2) interviews with parents and teachers, (3) classroom observations of children in this program, and (4) direct testing and checking of children's developmental levels and educational attainment by teachers. Among the findings: (1) socio-economic status and educational levels of both parents were significantly related to children's educational progress; (2) the majority of the children were reported by parents as having developmental levels, on motor and social or self-helping skills, which are appropriate to 5-year-olds; (3) only a minority of the children attended day care or nursery classes. Children in day care were from a slightly lower socio-economic level than those who attended nursery schools; (4) teachers' ratings suggested that the majority of children entering junior or senior kindergarten are perceived as healthy, having reasonable attendance and settling easily into school; (5) teachers rated a majority of children as being in the top third of the class in ability, though the actual test scores showed that there was a normal distribution of ability in the sample; and (6) the preferred activities of children were in the gross motor, language and creative areas with much less emphasis on environmental study, science, or problem-solving. Descriptors—\*Antisocial Behavior, Behavior Rating Scales, Elementary Education, \*Elementary School Students, Elementary School Teachers, \*Moral Development, \*Moral Issues, Student Evaluation

Identifiers—\*Kohlberg (Lawrence)

This paper reports findings on relationships between fifth graders' responses to school-specific moral issues and to Kohlbergian moral dilemmas; between their stage of moral reasoning and their moral conduct as rated by teachers; and between teachers' ratings of the children's moral behaviors in several specific areas and teachers' overall rankings of the children's moral conduct. A total of 41 fifth grade children (mean age, 10 years 9 months) were given five of Kohlberg's moral dilemma stories and five school dilemma stories which included issues such as stealing, borrowing, cheating, bullying and telling tales about other children's behavior. Teachers were asked to rate each child's behavior, on each of the issues contained in the children's interviews, as above average, average, or below average in relation to the class. Teachers were also asked to give an overall rating of each child's moral conduct and the reasons for the overall rank. Teachers' overall rankings of students were related to their ratings of

two types of behaviors; they gave lower overall ratings to children whom they had rated as above average in either cheating or telling tales. Further, significant correlations were found between children's responses on the school-specific moral issues and the Kohlbergian moral issues tasks. Children who resolved the dilemmas with stage 2 responses were reported by their teachers as cheating more often than children who resolved the dilemmas with stage 3 reasoning; however, no significant correlations were found between children's stages of moral reasoning and the teachers' overall rankings of children's moral conduct. Descriptors—Age Differences, Body Height, Body Image, Body Weight, Elementary Education, \*Elementary School Students, \*Identification (Psychology), Individual Differences, \*Physical Characteristics, \*Self Esteem, Sex Differences, \*Stereotypes

Using the interactionist framework and semantic differential and discriminant analysis techniques, the study sought to determine (a) the existence of body build stereotypes, (b) the extent of identification with these stereotypes, and (c) the effect of such identification upon the child's self evaluation. The subjects were 388 children in grades four to eight from a midwestern community. All subjects were white and had predominantly middle class backgrounds. Subjects completed the Piers-Harris Children's Self Concept Scale and semantic differential ratings of the Global self concept and the body build concepts of "SKINNY GIRL", "FAT GIRL", "SKINNY BOY", and "FAT BOY". Measures of weight and height were obtained using a standard weighing scale and wall chart. Fat child and skinny child stereotypes were found to be invariant across age and sex groups and did not appear to be gender specific. Actual fitness was found to be generally related to identification with a body build stereotype, but not strongly so. Low self esteem was a concomitant of identification with the fat child stereotype. (Author)

**Identifiers—**\*Conceptual Integration

In this paper the elusive, integrative and common elements that unify the large and diverse field of early childhood education are sought. Present diversity among educators of young children is viewed against the historical background of variety in the

implementation of kindergartens and nursery schools in the United States. The effects of federal legislation in increasing the varied purposes of early childhood programs are discussed. It is determined that kinds of services, clients served, program purposes and underlying educational ideas do not provide a unifying theme for the field of early childhood education. In conclusion, three claims are made: 1) that individual practitioners become familiar with a small area of the field and recognize that their insight contributes to the field as a whole; 2) that future developments will indicate which elements of the present diversity are most beneficial; and 3) that the field is unified because early childhood educators as a group hold and use a common belief system with shared values, definitions, concepts and slogans. **EDRS Price - MF01/PC01 Plus Postage.**

**Descriptors—**\*Behavior Patterns, \*Classification, \*Correlation, Development, Models, \*Statistical Analysis, \*Tables (Data)

**Identifiers—**\*Cross Classification Approaches

The richness of the information available in cross-classification tables, compared to the information conveyed in the typical correlation coefficient, is emphasized in this paper. The kinds of information to be found in cross-classification tables are described, and several examples of the use of cross-classification patterns in research are provided. Model fitting procedures for determining which of several patterns makes the best fit to a set of data are briefly illustrated. It is argued that analyses based on the identification of specific patterns in the distribution of observations in cross-classification tables provide more information about developmental relationships between tasks than analyses based on the computation of simple measures of statistical association. **Descriptors—**\*Birth, \*Human Posture, \*Infant Behavior, Longitudinal Studies, \*Neonates, Sex Differences

**Identifiers—**Fetal Position, Handedness, Head Movements, Lateral Preference

This study investigated the hypotheses that 1) infants delivered from a left occiput anterior or transverse position (LOA/LOT) would exhibit a right

supine head orientation in the neonatal examination and a right hand preference at 19 weeks of age; and 2) infants delivered from a right occiput anterior or transverse position (ROA/ROT) would exhibit a neonatal head-left orientation and a left hand preference at 19 weeks of age. Head position at birth was assessed by the attending physician's recording of the position of the occiput of the fetus during four stages of labor and delivery. In the left occiput anterior and transverse group there were 23 males and 29 females; in the right occiput anterior and transverse group, there were 31 males and 21 females. Neonatal postural preferences were assessed, when the infant was between 12 and 96 hours of age, by observation of position of head, arms, and hands. Results showed that infants delivered LOA/LOT demonstrated a right neonatal head position preference, whereas infants delivered ROA/ROT did not demonstrate the expected left bias. The infants' head positions were evenly divided between right and left. At approximately 19 weeks of age, 76 of the 104 infants were examined on hand preference items selected from infant scales (Bayley, 1969; Lederer 1939), and one original stimulus. Sixty-four percent of these infants preferred the right hand and 32 percent preferred the left hand. In addition, significant relationships were found between the position of the head at birth and handedness at 19 weeks of age, and between neonatal head position preference and hand preference at 19 weeks of age. **Descriptors—**\*Ambiguity, Communication Problems, Comparative Analysis, \*Context Clues, \*Editing, \*Elementary School Students, Error Patterns, Grade 4, \*Language Processing, Language Proficiency, Pronouns, Structural Analysis (Linguistics), \*Writing Skills

**Identifiers—**\*Referents (Linguistics)

This study explores how children indicate that a new character or object is being introduced into a written text and how they tell their readers that a particular word refers to something which has appeared in the text before. In particular, the study focuses on information represented by noun phrases in written narrative texts. To investigate how some children produced referential ambiguities in such texts while others did not, 32 fourth graders, who were rated as either above or below average in writing ability and all of whom read at grade level, wrote two stories and participated in a short ambiguity detection and editing task. Stories were elicited under simple context and complex context conditions. Context effects were observed for the below-average writers. No statistically significant differences between above- and below-average writers were found on the editing task. Additionally, while no differences were found in the distribution of linguistic devices in the two groups, children were found to structure their stories differently. Above-average writers produced more than three times as many references to grouped characters as did below-average writers. Results suggest that skilled and unskilled writers differed in their strategies for constructing narrative texts. (Author/RH)

**Descriptors—**\*Adolescents, \*Adults, Age Differences, \*Children, Communication (Thought Transfer), \*Cooperation, Discourse Analysis, Elementary Secondary Education, Group Discussion, Interaction, \*Language Acquisition, Perspective Taking, Social Development, \*Verbal Communication

**Identifiers—**\*Conversation

This study investigates cooperation in conversation among group members at five educational levels. In groups of six (three males and three females) second-, fifth-, ninth-, and twelfth-graders and college students met for 10 meetings of 20 minutes to an hour's duration. Members decided discussion topics and procedures. These meetings were tape recorded and the eighth meeting was transcribed as the source of data for each group. Each remark of a transcript was coded independently by two coders into one of five categories which served to describe how a remark was related to directly preceding remarks on a particular topic. These categories were: unrelated; tangential; related; factual evaluation/elaboration/question; and perspective-oriented evaluation/elaboration/question. Developmental changes in conversational quality were assessed primarily by developmental trends in the proportion of remarks in each of the five categories of topic relatedness. Unrelated and tangential remarks were frequent only among second graders. Frequency of related remarks was high among elementary school students and lower among high school students. More complex remarks were frequent among ninth graders and increased in frequency among older students. Perspective-oriented statements were noticeably frequent only among twelfth graders and college students. Results are taken as evidence that the conversational quality achieved within small groups changes markedly across the public school age span. (Author/RH)

**A Developmental Study of Memory for Presentation Modality.**

George Mason Univ., Fairfax, Va.

Pub Date—Apr 80

Note—9p; Paper presented at the Biennial South-eastern Conference on Human Development (6th, Alexandria, VA, April 17-19, 1980). Best copy available.

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Age Differences, \*Cognitive Development, \*Cognitive Processes, \*College Students, \*Elementary School Students, \*Identification, \*Learning Modalities, \*Memory, \*Recall (Psychology), \*Word Recognition

In order to determine whether there are developmental differences in the handling of the modality attribute 32 children from each of grades two and six and 32 college students were presented with a video-taped mixed-modality list of 32 first grade words. Subjects were asked to recall the words, to identify the presentation modality of each word on a recognition test, and to indicate on a 3-point rating scale how confident they were that each of their modality identifications (MI) was correct. Results show that there were no overall developmental changes in the identification of modality while children as well as adults demonstrated the ability to judge the accuracy of their modality identifications, adults not only recalled more words than children but also were the only group to organize their recall by representation modality. Findings suggest that information about the input mode of an event is a part of long-term mnemonic code for both adults and young children and that such information may be coded "automatically" in all age groups. Descriptors—Age Differences, \*Children, \*Cognitive Development, \*Cognitive Processes, \*Educational Diagnosis, \*Individual Differences, \*Logical Thinking, \*Problem Solving, \*Research Problems, \*Theories

Identifiers—\*Analogical Reasoning

This paper takes the position that theories about individual differences in childhood and theories about cognitive development both would be enhanced if the two lines of research were integrated. The heuristic value of this position is illustrated in the context of analogical reasoning tasks. A general model of analogy solution and potential sources of variability in performance are outlined. Specifically, for both geometric and verbal analogy solution, individual and developmental differences are shown to be related to differences in task interpretation and understanding, definition of task relevant features and strategies, and the effectiveness and efficiency with which processes are executed. The specific findings as well as the general position are discussed in terms of implications for diagnosis and optimization in instructional settings. (Author/MP)

Identifiers—\*CDA, Child Development Associate

This Child Development Associate (CDA) training module, one of a series of 18, is designed to help the CDA intern provide learning experiences in the social sciences for young children. The module stipulates competency-based objectives and provides essential information, suggestions, examples and learning activities on three topics related to the objectives: teachers' responsibility for social science; teaching social science to young children; and activity development. Also included is a list of reference books, pamphlets and films, and a list of children's books concerned with social science. (SS)

Identifiers—\*CDA, Child Development Associate

This Child Development Associate (CDA) training module, one of a series of 18, provides a guide to establishing a safe and healthy preschool environment and promoting health and safety practices among preschool children. Upon completion of the module, CDA trainees are expected to be able to create a safe learning environment for children, recognize and correct safety hazards, teach and promote safe work and play habits, systematically report safety information to parents, handle emergency situations, and provide emergency treatment for accidents, illness, and injury. Terms are

defined and a self-evaluation procedure is indicated in early sections of the module. Subsequent chapters discuss teachers' responsibility for safety in the preschool, ways of teaching safety habits to young children, first aid, and activity development. The module also provides 14 learning activities, ranging from resource unit development to drills for emergency situations, for the CDA trainee. Supplemental reference books and organizations, pamphlets, films, and filmstrips are listed. (RH)

Identifiers—\*CDA, Child Development Associate

One of a series of 18, this Child Development Associate (CDA) training module provides a guide to promoting acute hearing and sound discrimination in young children through both group and self-selected music activities. Upon completion of this module the trainee is expected to be able to provide daily music experiences; emphasize enjoyment of and participation in music activities; provide a music center; plan, execute, and evaluate at least five learning experiences in music; execute and evaluate a minimum of five incidental learning experiences; utilize music to guide children's behavior and to adjust the noise level of a classroom; utilize music as a resource for teaching skills and concepts in other areas; and provide music activities to develop children's auditory and motor skills. Early sections of the module define terms and suggest a procedure by which trainees can evaluate their strengths and

weaknesses. Subsequent chapters focus on the function of music for the preschool, teaching music in the preschool, and activity development. The module also provides 14 learning activities, ranging from resource unit development to stories for music. Supplemental books and pamphlets are listed. (RH)

Identifiers—\*CDA, Child Development Associate, \*Menu Planning

One of a series of 18, this Child Development Associate (CDA) training module provides a guide to planning and preparing nutritious meals for children. Experiences which promote positive nutrition and mealtime habits are also included. Upon completion of this module the CDA trainee is expected to be able to plan, prepare, and serve balanced meals and snacks, teach children to select foods needed for a balanced diet, teach food, nutrition and mealtime concepts in planned and incidental learning experiences, make records of and reports to parents about children's eating habits, provide a physically and psychologically positive mealtime environment

and alleviate causes of disruptive behavior in individual children. Early sections of the module define terms and suggest a procedure by which trainees can evaluate their strengths and weaknesses. Subsequent chapters discuss basic nutrition, effects of nutrition on young children, menu planning, the mealtime environment, mealtime problems, supplemental foods, foods in the curriculum, and activity development. The module also provides 20 learning activities, ranging from resource unit development to constructing recipe charts, for the CDA trainee. Supplemental books, pamphlets, films, filmstrips and children's books are listed. (RH)

One of a series of 18, this Child Development Associate (CDA) training module provides a guide to the construction of learning centers in preschool settings. Upon completion of the module the CDA trainee is expected to be able to analyze and improve the arrangement of space, materials and equipment; specify and rotate learning centers in the available space; inventory materials and equipment; plan, execute and evaluate learning experiences in each different learning center; evaluate learning center effectiveness; and understand the importance of learning centers for child development. After a statement of rationale, objectives and self-evaluation procedures, the module gives an overview of learning centers and then focuses on specific kinds: art, block, dramatic play, language arts, mathematics, music and science centers. The overview discusses the physical arrangement of learning centers, their value, scheduling and selection, and the teacher's role. Each kind of center is discussed in terms of physical arrangement and selection of materials and equipment. Sample listings of materials and equipment for each center are provided. Also included are lists of supplemental reference books, pamphlets, children's books, films, filmstrips and cassette tapes about early childhood education. (RH)

Identifiers—\*Cultural Contributions, \*Iroquois

(Nation), Tribal Government

Written for classroom teachers grades K-12, this reference guide on the Iroquois Indians provides an overview of history, religion, and culture and points out contributions of the Iroquois people. Concentrating on chronological history, the guide begins with formation of the Iroquois Confederacy (later a League of Six Nations) and continues after arrival of the white man with the role of the Iroquois in the French and Indian War, Revolutionary War, and during the postrevolutionary period. In a section on Iroquois culture, the guide covers traditional religion and kinship and family systems (the clan), and gives a physical description of a typical village. Current locations of Iroquois homelands in the U.S. and Canada are listed, and a brief description on occupations looks at traditional occupations for men and women and job trends today. There are sections on communication (listening, storytelling, learning, wampum, pictographs, Condonance Cane), schools, travel, recreation (Iroquois contribution of Lacrosse), arts and crafts, and music. Assimilation of the Indian is briefly discussed, and a longer section traces the history of government policies regarding Indians, with specific examples of land issues affecting Indians. A final section mentions Indian contributions, particularly those of the Iroquois. The guide has a teacher reference bibliography, Indian interest organizations list, and instructional aids available. (RS)

Descriptors—Agricultural Colleges, \*Agricultural Occupations, \*Career Choice, Computer Programs, Data Collection, Higher Education, \*Home Economics, \*Land Grant Universities, \*Majors (Students), Questionnaires, \*Research Methodology, Sampling, Statistical Analysis, Student Characteristics

Identifiers—Data File, \*United States (South)

The User's Guide to the Regional Study of Higher Education in Agriculture and Home Economics in the South explains the purpose and organization of the study, one of three phases of a larger investigation being conducted by collaborating researchers in several Agricultural Experiment Stations. The guide provides a detailed description of the methodological procedures and data files employed in the study, which involved determining what aspects of social origins, high school and work experience, and college entry influenced the choice of and attitudes toward an agriculturally related major for over 40,000 Agriculture and Home Economics students at 38 land grant colleges (both 1862 and 1890) and other universities. The discussion of methodology includes the development of instruments, sample design, data collection, response rates, data file specifications and usage, and sample weighting and variability. Appendices include the student and institutional questionnaires. The guide has been prepared for and is available to interested researchers. (SB)

Identifiers—Colorado (Colorado Springs), \*Mitchell High School Senior Seminar CO

Mitchell High School's Senior Seminar is a 5-credit interdisciplinary and experiential intensive learning program offered for one semester during a student's senior year. During that time the student takes no other coursework; he focuses on single subjects in learning blocks that may extend from two to four weeks. Program goals center on learning effective means for human interaction, improving self-concepts, developing positive learning attitudes, and mastering methods for self-direction in learning. The Seminar begins with a 3-day retreat which introduces the basic concepts of the program; the second week is devoted to teaching the basic skills and procedures in problem solving to be used in the course. Students select their activities from 16 learning blocks; these include such experiences as working on a farm or ranch, participating in outdoor experiences, and investigating the Colorado criminal justice system. Other learning blocks involve handmade shelters, mining, urban survival, the mass media, and minority groups. Students are required to keep journals for each of the learning blocks. In the "Capstone" at the end of the semester, students show their mastery of the program's basic learning skills as they design and carry out their own learning experiences. This booklet lists the goals and objectives for each of the learning blocks and is designed to assist persons interested in starting similar programs. (DS)

Descriptors—\*Experiential Learning, Field Interviews, High School Seniors, \*Information Seeking, \*Interdisciplinary Approach, Interviews, Investigations, \*Learning Processes, Models, Performance Contracts, \*Problem Solving, \*Program Content, Secondary Education, Student Evaluation, Student Responsibility, Worksheets, Writing Skills

Identifiers—Colorado (Colorado Springs), \*Mitchell High School Senior Seminar CO

Students nearing high school graduation need more than the skills and information given them in the past 12 years; they also need to know "how" to learn. The Senior Seminar, which is a program offering a semester of interdisciplinary experiential learning, teaches students to become independent, self-directed learners by first presenting the tools and guidelines for learning how to learn and then helping students to put their new knowledge into practice. During each of the two to four week learning blocks students are required to keep a journal recording of their thoughts and activities. Prior to each learning block the student writes up a contract that sets forth the specific objectives he hopes to obtain from the unit of study, how he will attain those objectives, and how his success may be gauged. Students are introduced to problem solving techniques as they learn about self-imposed constraints, the generation of alternatives, the process of elimination, selection of an entry point and how to break a problem apart. A model for problem solving is introduced which lists six steps to be followed in the learning process. The arts of investigation and interviewing are also taught. The course also covers communication skills, how people structure time, the use of "strokes" and the three ego states (parent-adult-child) of transactional analysis. This student manual summarizes the rationale, philosophy and curriculum for the Colorado Springs Public Schools Senior Seminar. (DS)

A Social Report for Carroll County: Social Indicators for Rural Development. Sociology Report 134G.

Iowa Agricultural and Home Economics Experiment Station, Ames.; Iowa State Univ. of Science and Technology, Ames. Dept. of Sociology and Anthropology.

Spons Agency—Department of Agriculture, Washington, D.C.

Pub Date—77

Note—541p.; Publication contributes to USDA Project 2142, "Social Indicator Models for Rural Development". May not reproduce well due to small print size.

Pub Type—Numerical/Quantitative Data (110)  
EDRS Price - MF02 Plus Postage. PC Not Available from EDRS.

Descriptors—Agriculture, Communications, \*Decision Making, Economic Factors, Education, Employment, Health, Housing, Human Resources, Income, Industry, Law Enforcement, Leisure Time, \*Local Government, Needs Assessment, Physical Environment, Planning, \*Quality of Life, Recreational Activities, \*Rural Development, Rural Population, Safety, \*Social Indicators, \*Statistical Studies, Tables (Data), Transportation

Identifiers—Iowa (Carroll County), Public Safety

Since the burden of improving quality of life is often squarely placed on the shoulders of public decision makers, this report (one of the products of Project 2142) provides a basis for assisting county-level decision makers in the planning process. Statistics that "indicate" the social well being or quality of life experienced by people in Carroll County, Iowa, in the areas of employment, income, health, education, housing, leisure and recreation, public safety, and physical environment are presented and organized according to the availability and allocation of financial resources, the structure of services, the utilization of available services, and the level of well being. Statistics in the following three areas, usually beyond the control of decision makers, form a resource base. Human resources include the composition, distribution and change of population and living arrangements and family structure. Geographical/physical resources include natural resources, climate conditions, and organization of the land. Economic resources include government, transportation and communication, agriculture, and commerce and industry. Derived from reports published by a variety of governmental and private agencies, most data cover at least two points in time and two geographical units so the reader can analyze social change. All data are presented in one of three alternative table designs, depending on the type of variable under consideration. (NEC)

Identifiers—\*New York (Suffolk County), Outdoor Learning Laboratory NY, Sunken Meadow State Park NY

Since 1971 a fully equipped learning laboratory building and the open fields, woodlands, salt water marshes, and beaches of Sunken Meadow State Park have been available for year round day use by students and educators in New York's Suffolk and Nassau counties. Funded by the New York Office of Parks and Recreation and local Boards of Cooperative Educational Service, the Outdoor Education

Program has been designed as a multidisciplinary approach to utilizing the outdoor environment to supplement, strengthen, and give new dimensions to the existing school curriculum. Participants have found that these environments are not only appropriate for study of the natural sciences, but that art, music, mathematics, Long Island history, and the language arts can be learned more effectively in such surroundings. The handbook contains: teacher procedures for participation in the program; hours of operation; a map and directions for reaching the laboratory; transportation and parking procedures; radio stations to monitor for possible laboratory closing during inclement weather; appropriate dress; fire regulations; safety, first aid, and emergency procedures; instructions for using the mobile radio network while in the field; security measures; conservation practices; a map of the park; and a student registration and health blank. In the original, 28 blank pages are provided for students to maintain a log of their learning experience. (NEC)

A Report to Congress on Migration Submitted by the Appalachian Regional Commission.

Appalachian Regional Commission, Washington, D.C.

Pub Date—Mar 79

Note—164p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Demography, Income, Migrant Employment, \*Migrants, \*Migration Patterns, Mobility, \*Program Effectiveness, Program Evaluation, Racial Differences, Relocation, Rural Urban Differences, Sex Differences, \*Social Services, \*Socioeconomic Status

Identifiers—\*Appalachia, \*Appalachian Regional Commission DC

Congressional mandate in 1975 directed that the Appalachian Regional Commission conduct a study on (1) the status of Appalachian migrants living in the destinations to which they had moved; (2) current migration patterns and implications; and (3) past and potential impact of Commission programs on outmigration and welfare of Appalachian migrants. The study utilized data from the Social Security Administration's continuous work history sample for 1965-70 and 1970-75. A dramatic reversal of migration occurred in the periods examined: between 1965-70 the Appalachian Region had a net loss from migration of 400,000 people; between 1970-75 the region had a net growth of 810,000 people with 300,000 migrating into the area. Outmigration dropped from 1.6 million in 1965-70 to 1.4 million in 1970-75. Apparently economic gains within the region during the second time period made outmigration less desirable. For both periods males had the highest immigration and outmigration ratios. Outmigration seemed to produce favorable results, for most of the migrants made significant income and status gains relative to those who remained in Appalachia, with earnings in the destination regions rising rather quickly to the average of the new area. Evidence indicated that Appalachian migrants have received the health, education, and other services that enable them to compete successfully in their new settings. (DS)

Descriptors—\*Community Characteristics, \*Community Satisfaction, \*Community Services, Demography, Education, \*Evaluation Criteria, \*Expenditures, Law Enforcement, Literature Reviews, Medical Services, Parks, Perception, Public Libraries, \*Socioeconomic Influences, Surveys

Identifiers—\*North Carolina, Service Quality, Service Quantity

Citizen perception of public service quality was examined to determine its relationship to demographic and socioeconomic characteristics of the

community, variations in service expenditures, and quantitative service performance measures. The Bureau of the Census, state agencies, and a mail survey of residents in all 100 North Carolina counties provided data on 5 public services: education, law enforcement, parks, health, and libraries. The qualitative output measure for each service was based upon citizen evaluation of service quality as poor, fair, good, or excellent on a 4-point Likert scale. The quantitative performance measures were dropout rate, crime index, per capita acres in public parks, infant mortality rate, and number of books per capita. The findings indicate that per capita expenditures for the public services studied are not powerful predictors of either quantitative performance or perceived service quality. Quantitative service performance measures have only a modest relationship with service quality measures. Overall, the socio-demographic characteristics of the community seem to be more important than either level of expenditures or quantitative measures of service performance in predicting citizen perception of service quality. (JH)

Teacher Transfers: A Survey of Teachers' Opinions on Factors Influencing Their Period of Stay in Schools with a Low Staff-Retention Rate. Studies in Rural Education No. 2.

Western Australia Education Dept., Perth.

Pub Date—Mar 79

Note—47p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Elementary Secondary Education, Faculty Mobility, Incentives, \*Job Satisfaction, Occupational Mobility, \*Rural Schools, Rural Urban Differences, Surveys, \*Teacher Attitudes, Teacher Motivation, Teachers, \*Teacher Transfer, \*Work Environment

Identifiers—\*Australia (Western Australia), \*Isolation (Geographic)

One of the most powerful deterrents to teacher retention appears to be isolation, the fact of being geographically separated from communities to which they feel akin or from the amenities and services to which they are accustomed. This 1978 study, conducted with the limited objective of ascertaining teachers' opinions of the ways in which aspects of rural service affect the rate of staff retention, focused on questionnaire responses from 335 teachers in 26 elementary and secondary schools in Western Australia and from 79 teachers who had resigned or moved to a different school during the previous 2 years. Data revealed that teachers were disadvantaged by country service in the following ways: the cost of living was often greater; more was spent on automobile and traveling expenses; financial incentives were unfavorable; the standard of housing was poor; there was less professional contact and support; further study, required for promotion, was restricted; social life was often restricted; moves were disruptive to teachers' families; and relocations from some local residents were apathetic. Factors that encouraged teachers to stay included school facilities, staff relationships, the challenging nature of the job, climate, and recreational facilities. Tabular data are presented which compare retention rates for various types of schools and characteristics of teachers and present teachers' attitudes to staff retention rates and factors that would influence their length of stay at a school. tion, \*Place of Residence, \*Rural Urban Differences, Rural Youth, \*Student Characteristics, Urban Youth

Identifiers—\*United States (South)

Contrary to recent national trends, enrollments at colleges of agriculture have increased 181% between 1963 and 1976, with an ever increasing proportion of agricultural students coming from urban backgrounds. During the spring of 1977, mail questionnaire data were collected from 3,175 undergraduate "ag" majors (93.8% White and 6.2% Black) enrolled in colleges of agriculture at land-grant universities in 13 southern states. Findings indicated that about 57% of the students were from urban areas; 41% of the rural students came from farms and the other 52.9% came from rural non-farm areas; males comprised about 75% of the agriculture student body; since their childhood, a majority of the parents had moved to more urban areas while those reared in urban areas had tended to remain there; agriculture students from urban areas both aspired to and expected more education than those from rural areas; 62% of the students were in traditional fields of study; urbanites comprised at least 60% of students enrolled in non-traditional majors (forestry and wildlife, pre-veterinary medicine, landscape architecture, biological science, and food science); 78% of students had some agricultural work experience; students showed a preference for eventually living in areas similar to those in which they currently resided. Findings suggest that the image of farming and agriculture as a whole will continue to change as more and more college educated city-dwellers enter these occupations. (NEC)

Identifiers—\*Navajo (Nation)

A program designed to assist guidance staff in working with Navajo elementary school students, particularly boarding school students, is presented in this booklet with emphasis directed toward meeting both individual and group needs in the areas of home living, student activities, and counseling. The first section gives 14 separate functions of student guidance (develop a positive self-image, promote a safe, pleasant environment, provide career/vocational awareness experience, etc.) and lists the elements inherent in each function. The section on home living discusses such topics as dormitory administration and operation, in-service staff training, personal development of students, and parental and community involvement. Minimum standards for the boarding school are outlined, including those for furniture, equipment, and desirable qualities for sleeping quarters, living rooms, rumpus areas, and kitchens. The section on student activities seeks to develop an understanding of the functions of a student activities program and to indicate ways of concentrating and coordinating efforts. It discusses the operational philosophy of such programs and suggests total school cooperation in such activities as clubs, student government, intra-mural activities, trips, arts and crafts, and social activities. The final sections discuss counseling responsibilities and techniques, exceptional children, student rights and responsibilities, suggested guidance activities, and elements of evaluation. (DS)

Identifiers—\*Minnesota

Prepared for the state legislature, this document is intended to supply practical information to help law makers and educators better understand the planning processes and cooperative efforts that currently exist among the public schools in the 18 counties of southwest and central Minnesota. Parts One and Three describe the planning process that was used by the 88 local districts to prepare 5-year educational plans. Part Two presents geographic, economic, and social characteristics of the region and provides a detailed statement of the existing areas of school cooperation. Parts Four and Five describe the organization and management of schools in the area through 1983 and present alternative methods for the same period; emphasis is on cost effective administrative strategies for small rural schools faced with the problems of inflation and declining enrollments. Part Six summarizes opportunities for further cooperation among area school districts, i.e., administrative and business office sharing, teacher sharing, and programs and material sharing. Part Seven reviews 25 legislative rulings that may be preventing efficient school policies to deal with the recent severe enrollment decline. Comments on each district's 5-year plan are found in Part Eight. Numerous charts and tabular data accompany the text, and a variety of supporting documents are appended. (Author/JH)

Identifiers—Educational Cooperative Service Unit, \*Minnesota

The benefits of regional cooperation among small rural school districts are stressed in this brief description of the Educational Cooperative Service Unit (ECSU) currently serving 63,800 students in 104 member districts. A section on historical background traces the ECSU's forerunners, e.g., an educational media center established in 1965, the Title III educational service centers established in 1967, and the Educational Research Development Council organized in 1973 by school superintendents and funded by member districts. A section on present ECSU programs outlines administrative, instructional, media, and special education services. The administrative services described include assistance with long-range educational planning and shared computer systems; instructional services include in-service staff development programs and implementation of federally funded programs in local districts; media services include distribution of materials and equipment, centralized purchasing of school supplies and materials, and a print shop. ECSU's role as host for four special education cooperative centers is defined. (JH)

Identifiers—Ethnic Heritage Studies Program, \*Lakota (Tribe), Plains Indians (Anthropological Label), Sioux (Tribe)

Educational materials dealing with the culture and history of the Lakota Sioux Indian in Nebraska are presented in this packet prepared for use in ethnic studies courses at the high school and college levels. The packet contains eight components: essays, questions, photographs, drama, games, chronology, maps, and bibliography. A collection of 3 essays examines "lakol wicohan", the Lakota Way or perspective on life; the first essay traces changes in the Lakota culture over the past 100 years, and the second and third essays provide a brief introduction to Lakota literature and music. A six-page pamphlet contains discussion questions related to the essays. "A Gallery" contains 11 black and white photographs of Sioux chiefs and leaders and quotations from their speeches and writings. "A Vision" (Hambelchya) is a libretto in two acts based on a Sioux story and song; a soundsheet accompanies the libretto. A booklet of three maps shows Sioux migration patterns and territorial boundaries from 1660 to the present. A bibliography of 100 annotated entries lists print materials treating Sioux Indian history and culture. Other items in the packet are "Indian Games", describing 5 American Indian games, and a chronology (in English and Lakota) of 40 dates in Sioux history from 1742, when the first white men arrived in the Black Hills, to 1953. Descriptors—\*Adult Farmer Education, Agriculture, Attitudes, \*Change Agents, Extension Agents, Farmers, Farm Management, Farm Visits, \*Land Grant Universities, Nonformal Education, Opinions, \*Paraprofessional Personnel, Rural Areas, \*Rural Extension, \*Surveys

Identifiers—Missouri, \*Small Farm Family Program

Growing concern that the Cooperative Extension Service was failing to adequately reach small farmers with education materials through regular extension channels led to the implementation of Missouri's Small Farm Family Program. In this program, education assistants, many of whom are small farmers themselves, link the educational resources of the land grant university with the small farmer in his own social system. In 1977 questionnaires were given to education assistants to determine the personal qualities that have a bearing on the education assistant's capability as an intermediary, and the methods of operation utilized by the assistant. Of the 34 responding, most approximated the characteristics of their clients in 4 respects: sex, age, occupation and educational level. Satisfaction from helping people ranked as the primary source of job motivation; money ranked next to last. The education assistant's relationship with clients was personal, interactive, and empathetic. Visiting and listening were the activities stressed most highly (82%), followed by making clients aware of the help available from regular extension sources and government agencies. Finding people at home, the personal problems of clients, deficiencies in the

assistant's own knowledge of how to motivate and work well with people, and lack of concern on the part of the client were some of the difficulties listed. Also listed and evaluated were the types of information obtained from the various university sources. (DS)

Identifiers—American Friends Service Committee, \*Elementary Secondary Education Act Title I, Parent Advisory Councils, Southeastern Public Education Program, \*United States (South)

A current project of the Southeastern Public Education Program (SEPEP) of the American Friends Service Committee is strengthening the implementation of parental involvement requirements of Title I of the 1965 Elementary and Secondary Education Act. Toward this end, SEPEP has provided technical assistance to parent advisory council members in Mississippi, Alabama, Georgia and South Carolina. The project has found that, although nearly a decade has elapsed since the mandatory creation of Title I Parent Advisory Councils (PAC's), in most of the rural south such councils are still struggling for legitimacy and role definition. Some schools have created "paper PAC's" which seldom, if ever, function. Other districts have limited the scope of meetings to such activities as open houses, style shows, or classes to train parents to help their children with school work. Many schools appeared unwilling to provide the information and training necessary for parents to serve effectively on the councils. In spite of the generally negative experiences encountered, the SEPEP staff did find school officials and parents whose attitudes contributed to successful implementation of PAC's. Factors contributing to such success were: (1) a clear message from the school of "we want your support," (2) regular monthly meetings devoted to legitimate concerns, (3) efforts to educate parents about the program, and (4) attitudes of state and federal officials charged with enforcing Title I laws. Eleven recommendations for improving PAC implementation conclude this paper. (DS)

Identifiers—\*Experimental Schools Program

During the past two decades federal, state, and local school leaders have attempted to institute major changes in educational programs and organizational arrangements. Recent assessment studies reveal that the great majority of change efforts did not meet intended objectives. As a result, policy formulators have developed serious reservations about the ability of school officials to institute successful reforms. This book is designed to help educational officials become more incisive analysts of the process of organizational change. It presents case studies of five rural small school systems located in different regions of the nation that received funding from the federal Experimental Schools Program from 1972 to 1977 to carry out comprehensive change projects, and analyzes each one in depth and from different perspectives. Part I provides ideas and background information needed to identify and examine factors that facilitate or block educational change efforts. Part II discusses the contexts in which such efforts occur and conditions that can impede or facilitate their development. Part III analyzes the case studies and considers their implications for those who have a major stake in the process and outcomes of change efforts. Part IV examines ways in which the case study findings call for a revision in existing change frameworks and considers their implications for the improvement of change efforts at both the federal and local levels. Background on Non-Formal Education and Suggestions for the Improvement of Non-Formal Education in Developing Countries and the Dominican Republic.

Pub Date—4 Dec 79

Note—12p.

Pub Type—Information Analyses (070) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adult Education, Change Agents, \*Citizen Participation, Community Development, Community Education, \*Developing Nations, Development, Educational Methods, \*Extension Education, Government Role, \*Non-formal Education, Nonschool Educational Programs, \*Rural Development

Identifiers—\*Dominican Republic

Divided into two areas of emphasis, this paper explores the potential of non-formal education in developing countries and non-formal education as it relates to the Dominican Republic. The first section presents background material on non-formal education and discusses types of programs being applied in a number of countries throughout the world. Much of the second section is based upon three years of observation and experience afforded the author while working for the Extension Service of

the Dominican Republic. The first part of this section describes the structure and function of each level of the Extension Service, ranging from the Secretaría de Estado de Agricultura at the highest level down to the Area Agropecuaria, whose sub-agents work directly with participants in the development process. Nine suggestions for non-formal education in the Dominican Republic conclude the paper. For example, it is suggested: (1) that preliminary evaluation be conducted to determine specific community needs; (2) that the community select its own development program, course or project, as well as program leader; (3) that the program be continuously revived by radio, television, written materials, etc. in order to maintain the attention and interest of participants. Descriptors—American Indian Culture, \*American Indian Reservations, American Indians, \*Community Information Services, \*Evaluation Methods, \*Information Needs, Information Services, \*Library Planning, Library Role, Library Services, \*Program Evaluation, Program Improvement, Public Libraries, School Libraries, Self Determination, Tribes, Trust Responsibility (Government)

Identifiers—Bureau of Indian Affairs, \*White House Pre Conf Indian Library Info Services

Preparatory and follow-up activities as well as proceedings are described in this report of a conference that brought representatives of 103 tribes together to discuss and lay the groundwork for comprehensive improvement of library and information services for Indian communities served by the Bureau of Indian Affairs. Chapters I, II, and III outline the history of the conference, the planning process, the goals and objectives, the structure of the task forces, and the planning documents. Chapter IV provides a narrative account of conference meetings and activities and excerpts from speeches by Rick Lavis, Deputy Assistant for Indian Affairs, and by W. Roger Buffalohead, the independent conference evaluator. Chapter V gives the official conference resolutions and a summary of recommendations; concerns include legislation to fund information and library programs for Indian reservation communities and self-determination in the development of the programs. Conference delegates and their biographies are listed in Chapter VI; Chapter VII describes post conference publicity and follow-up activities. Chapter VIII presents a detailed evaluation of the conference, i.e., participant characteristics, participant evaluations of conference effectiveness, and the adequacy of resources and organization. Appendices contain a variety of related documents including a directory of participants by state and by tribe. (JH)

Identifiers—\*Oregon

On-site interviews with administrators and teach-

ers in 35 small, rural secondary schools in Oregon indicated that quality education was being provided to their students, despite the limitations of low budgets and small staff and student bodies. The study found that to provide the curriculum diversity that would meet the special needs of their students, small schools were manipulating a variety of components. These components included required and elective curricula, scheduling, use of independent and individualized learning and special programs for exceptional students, career and vocational programs, activity programs, community resources and flexibility in graduation requirements. The study suggests that the greatest strength of the small school is the provision of an environment that supports and enhances individual relationships between and among all those concerned with the small school educational process. This report examines some of the specific ways in which the small schools were dealing with the problem of meeting individual student needs within the context of a limited program. Because they represent the problem areas most commonly addressed by small secondary schools, seven topics are given particular attention. These topics include: (1) curriculum, (2) scheduling, (3) independent/individualized learning, (4) exceptional students, (5) career/vocational training, (6) school activities, and (7) the school-community relationship. Descriptors—Elementary Education, \*Experiential Learning, \*Interdisciplinary Approach, \*Learning Activities, Mathematics Education, \*Migrant Education, Program Descriptions, Reading Improvement, Reading Instruction, Self Concept, Spanish Speaking, \*Summer Programs, \*Supplementary Education

"Learning City" is the theme of a summer education project that provides a unique teaching atmosphere for migrant children. For 2 summers, 130 students have participated in this program that sustains and enforces reading and math skills, as well as helps develop self-concept. Industries in Learning City are the various branches of study: reading and creative writing, mathematics, science, music, art, and physical education. Teaching of reading correlates with each area. To encourage study and to develop a serious attitude toward learning, each industry pays the worker (student) skill notes on a piece-work basis. These notes in turn may be deposited in the Migrant Savings and No Loan Bank or may be spent immediately on candy, books, toys, etc. at the Mall Gift Shop. Learning City has its own radio station, newspaper, cinema, and book exchange. Students reading 10 books may choose 3 books to keep as their own. The mayor's job changes from day to day as it is awarded to different eligible citizens. Test scores of 42 program participants were compared with those of 42 students of similar backgrounds who did not have the summer experience. Learning City citizens had an average gain of 5.2 months compared to 3.1 months in reading and a math gain of 7.0 months compared to 3.7 months for the non-participants. Thirteen students (31%) achieved gains of 1 year or more in reading, math, or both compared to only 4 (11%) of the non-participants. (DS)

Models, Philosophy  
Identifiers—Chicanos

A person with a synthesized multicultural identity is one that holds positive attitudes toward Chicano and Anglo cultures, functions competently in both cultures, feels accepted by members of both cultures, and possesses a transcendent philosophy of life and world view. Although societal institutions have historically stressed assimilation to the mainstream American middle class, a different philosophy has begun to emerge. Cultural pluralism, or "cultural democracy", permits the individual to retain identification with his own culture as he identifies with other cultures in American society. Individuals comfortable with a number of cultures are particularly needed as leaders today. Research with bicultural Mexican Americans in California and Texas has shown such people to possess flexibility in learning styles, human relational styles and incentive-motivational styles. A study on the leadership behaviors exhibited by monocultural and multicultural college students in mixed ethnic groups under conditions of conflict indicated leaders with high multicultural experience to be particularly effective. Such individuals were less autocratic and more democratic than their low multicultural experience counterparts. They also were more accurate in reporting what had actually transpired in their groups and accepted more readily the responsibility for their group's action. This document also describes the development of the Flexibility, Unity and Expansion Model of Acculturation and an instrument for assessing multiculturalism in Mexican Americans. (DS)

Descriptors—Acculturation, Adult Learning, American Indian Education, \*American Indians, \*Community Centers, \*Community Education, Cultural Activities, Cultural Awareness, Ethnicity, Lifelong Learning, \*Needs, Nonschool Educational Programs, \*Self Help Programs, Social Differences, Social Influences, Social Services, \*Urban American Indians, Urban Areas

Because the circumstances and problems of the urban American Indian are unique and are not being met by public education and service agencies, urban Indians across the nation have joined together within their communities and taken steps to help address their special social, educational, cultural, economic, and political needs. The establishment of Indian centers offering such services as health clinics, drug and alcohol programs, GED courses, birth control clinics, baby clinics, language classes, day care centers, recreation programs, cultural activities, housing and job assistance is one method Indian people have utilized to help themselves. Educational services including tutoring programs, counseling, and textbook review committees have been provided by some community centers to supplement school district programs in an effort to more adequately prepare students for participation in the dominant society while allowing them to maintain their Indian identity. Community centers can also help urban Indians maintain their culture by providing facilities for the display of Indian arts and crafts. Each center is unique, but they all offer Indians, many of whom are new to the urban setting, a place where they can relax, stabilize, and feel the security of meeting other Indian people who have similar problems and needs. These centers may be funded through HEW (Indian monies), philanthropists, community education monies, or any number of sources. (NEC)

Identifiers—\*Firearms

Although written with the classroom teacher in mind, this learning module on firearms safety can be adapted by leaders of camps, 4-H clubs, outdoor educators, scouting organizations or any workers with junior and senior high school youth. The self-contained unit includes information on the subject, lesson plans, activities, class exercises, tests, suggested visual aids, and references, all contributed by experienced instructors who have taught the subject and successfully used the activities. An introductory section presents goals and objectives, ethical concerns of using firearms and facts about and functions of firearms in our society. Principles of firearms safety for field and home use are stressed. A section on history traces the development of gunpowder, early ignition systems, and ammunition. Interesting facts and drawings are provided to encourage discussion. Six lesson plans, which list all equipment and materials needed, teach how to identify and operate various types of rifles, shotguns, and handguns. Included as appendices that can be directly reproduced as student handouts are a history of firearms' actions, a history of firearms crossword puzzle, parts of a firearm, ammunition components, a home firearms check list, and a word game using firearms phrases. A sample written and practical exam is included along with a glossary and bibliography to provide additional teacher information. (NEC)

Identifiers—\*Rural Women

Labor force participation of nonmetropolitan women rose in the 1970's but not in a consistent pattern. Their labor force participation rose 4.5% between 1973 and 1978, when they comprised 41% of the total nonmetropolitan labor force. Although women accounted for 89% of nonmetropolitan employment growth in the 1960's and 58% in the 1970's, their mean earnings declined. A greater percentage than before of nonmetropolitan women entered professional, technical, managerial, clerical, craft, and service sector occupations while fewer entered operative occupations, a former source of great employment gain for the nonmetropolitan female population. Educational level correlated positively with occupational choice and both factors together had implications for job stability. The three main factors which influenced the decisions of rural women to enter the work force are: economic considerations (resulting from inflation); changing family structure and social attitudes (the largest net increase in nonmetropolitan female labor force participation rates occurred for ages 25-34, prime childbearing years); and more job opportunities (resulting from the decentralization of manufacturing to rural areas). Studies show that 9 out of 10 migrant students do not complete their high school education. To identify the factors contributing to this high dropout rate, 350 migrant youths were surveyed to assess what they viewed as "good" programs and why they had dropped out of school. Most respondents noted some sort of sports activity as what they liked best about high school and academic classes as what they liked least. Programs of greatest interest were those offering job/career training. Reasons for dropping out were usually related to the need to work and family concerns. These and other study results are discussed at length in the first section of this document. Interviews with migrant students and excerpts from their letters and articles shed further light on the young people's experiences with secondary education. The second portion of the document describes nine exemplary programs for secondary level migrant students which offer such special services as financial and supportive college assistance, "hands on" work experience, vocational training, learn and earn incentives, and credit exchange between schools. Conclusions from the survey and review of the already existing programs list such needs as transfer of academic credit, stipended work experience, counseling and career education, and financial assistance for college, as well as trade school. Descriptors—Anglo Americans, Class Organization, \*Classroom Environment, Classroom Techniques, \*Educational Environment, Ethnicity, \*Mexican Americans, \*Perception, Secondary Education, \*Student Attitudes, Student Evaluation of Teacher Performance, Students, Student Teacher Relationship, \*Whites

Undertaken to better understand Mexican American and Anglo students' perceptions of their school experience, the study sampled 30 classes in a 462-student junior high school with a 50/46% Hispanic/Anglo racial/ethnic composition and 46 classes in a 696-student high school with a 42/53% Hispanic/Anglo composition. Each student in the sampled classes responded to a questionnaire including 18 dimensions measuring teacher concern, teacher punitiveness, teacher authoritarianism, teacher favoritism, teacher enthusiasm, peer esteem, student decision-making, classroom dissonance, student competitiveness, student cliqueness, teacher clarity, student satisfaction, student compliance, student apathy, classroom physical appearance, knowledge of results, task difficulty, and class organization. Analyses of the data indicated that Mexican Americans seemed to have more positive perceptions of their classes in spite of the fact that as a group they had lower achievement than the Anglos at these two schools. The Anglo subgroup perceived more "teacher favoritism" and more "student cliqueness" in the classes than did the Mexican Americans. While the climate scales were more reflective of characteristics of the class than of characteristics of separate subgroups, salient subgroup difference did affect the extent of congruence among members of the class. However, the differences between the two subgroups did not appear to be of a large enough magnitude to help explain the

difference that the two groups encounter in the public schools. (NEC)

Identifiers—\*Blackfeet (Tribe), Blackfeet Indian Reservation, Ethnic Heritage Studies Program, \*Tribal Law

Based on the Constitution and By-Laws of the Blackfeet Tribe, approved by the U.S. Secretary of the Interior in 1935, the Blackfeet Tribal Council has the authority to make civil and criminal laws and procedures to protect the peace, tranquility, and dignity of all persons residing within the Blackfeet Indian Reservation; to protect the traditions, customs, and Tribal laws; and to protect and preserve the natural and human resources of the Reservation. The laws the Blackfeet must obey and the punishments for breaking these laws are explained in lay terms in this volume. Section I, arranged alphabetically by subject, provides brief information on laws concerning abandoned ice boxes, bigamy, communicable disease, fish and game violations, inhaling toxic vapors, littering, malicious gossip, misbranding, neglecting dogs and other animals, public drunkenness, unauthorized use of property, and firing weapons. Section II describes court procedures for appeals, adoption, divorce, domestic relations, heirship and probate, juvenile code offenses, land exchange, motor vehicles code, parole, and suspension of sentence. This "Handbook of Tribal Law" has not yet been officially recognized by the Blackfeet Tribal Business Council. The contents are not to be considered law on the Blackfeet Indian Reservation, but carry strong reflections in Tribal Court decisions. (NEC)

Identifiers—\*Blackfeet (Tribe), Ethnic Heritage Studies Program, \*Napi

Napi stories have been passed down from generation to generation in the Blackfeet Nation. All Blackfeet people knew of Napi, from the serious side of his creation to the foolish and spiteful deeds he performed. At one time it is said that Napi could talk with all living things—the animals, plants, rocks, everything. He teased, pulled pranks, many times on himself. His actions began a cycle of existence. Each family has their own interpretation of the various Napi stories, but in the final analysis each story has a common moral in the ending. One story might teach a lesson or prove a point; another story may tell of how a certain part of nature came to be. Through the stories compiled in this volume, it is hoped that Blackfeet children and others will begin to obtain an understanding of the Blackfeet people. Titles included are "Dreams," "How to Pick Berries," "Indian Customs and Beliefs of Days Past," "Magic Leggings," "Napi and His Mate," "Napi and the Birds," "Napi and the Elk Dance," "Napi Loses His Eyes," "Napi Punishes the Rock,"

"Napi Teases the Bear," "Napi, the Ground Squirrels, and the Bobcat," and "The Story of Marriage." Full page black and white drawings by Blackfeet artists Barbara Gilham Aubert, Tracy Rutherford, and Kenny Doore illustrate each story. (Author/NEC)

Identifiers—American Indian History, \*Blackfeet (Tribe), Ethnic Heritage Studies Program, \*Many Guns (Tom)

As part of an effort to preserve oral tradition and produce a history about the Blackfeet people, Tom Many Guns relates the story of his life and, in so doing, brings out the rich cultural heritage of the Blackfeet. The recollections were gathered through interviews and translated from Blackfeet to English using every effort to preserve Tom Many Guns' narrative style. Tom's stories reveal a bit of his earlier years while growing up on the Reservation. Born on December 20, 1891, and raised by his grandparents, he heard many stories from them and other elderly Blackfeet. Incidents and activities described include participation in the medicine lodge ceremonies to cure the sick, how his father took a black horse in broad daylight from the enemy Crows, making berry soup with blood of game they had killed, singing around the camp to signal the formation of a war party, fencing of the Blackfeet Reservation by the federal government, building of the Great Northern Railroad across the Reservation, the woman who married the buffalo, and the story of coyote man. Illustrations by Blackfeet artist Wilbur Blackweasel contribute visual impact to many of the stories. (NEC)

Identifiers—\*Blackfeet (Tribe), Blackfeet Indian Reservation, Ethnic Heritage Studies Program, \*Ghost Stories

Ghost stories are universal. They are told and heard in different cultures throughout the world. They generally center around an incident or experience that is true, but that cannot be explained as an everyday occurrence. True but unexplained experiences on the Blackfeet Reservation are told and retold in the winter months. In contemporary Blackfeet life these ghost stories are told primarily for entertainment and to some degree for social control. In an historic setting ghost stories were also told to reinforce Blackfeet religious beliefs, to explain events that were forewarned, and to link the known with the unknown. Those familiar with the traditional Blackfeet way of life and way of perceiving the world and universe will recognize the stories in this collection as remnants of those traditions—a part of Blackfeet culture that is still intact. Selections include "Marias River Ghost," "The Disap-

pearing Paint," and "The Ghost of Big Nose," by Tom Founds; "Berry Eater or Min-I-Yah," by Dave Wells; "Experience At Writing On Stone" by William Big Spring; "The Warrior Left to Die" by Francis Potts; "Blue Gray Blaze," "Ghost of Big Crow," and "The Ghost Ride" by Mike Swims Under; "How Four Children Got Their Names" and "Sun Cal" by Annie Short Robe Running Crane; and "Ghost of Black Butte" by Louie Fish. **Problem: The Use/Abuse of Drugs as an Indicator of the Bilingual/Bicultural Assimilation Difficulties Encountered by Mexican-Americans Coping with the Anglo-American Mainstream—A Literature Review.**

Pub Date—Dec 79

Note—22p.; Best copy available.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Acculturation, Alcoholism, Biculturalism, \*Coping, Culture Conflict, \*Drug Abuse, \*Drug Rehabilitation, Ethnicity, \*Literature Reviews, \*Mexican Americans, Narcotics, Personality Traits, \*School Role, Self Esteem, Values

Identifiers—\*Chicanos

The literature found in current journals, periodicals, theses, books and other media was reviewed to study the use/abuse of drugs as an indicator of the bilingual/bicultural assimilation difficulties of Mexican Americans as they coped with the Anglo-American mainstream. Three areas were emphasized: (1) the general characteristics of the drug user/abuser and his culture, (2) whether the Chicano tended to "fit" the pattern of the typical drug user/abuser, and (3) the possible means of therapy for the Mexican American drug user/abuser and the role of the American educational system. The study indicated that the personality qualities and environmental descriptors that were most likely to produce a drug user included conflict of values, poor self image, ethnicity, passive nature,

and group pressures. Such a profile impacts heavily on those of a bicultural heritage. The Chicano does face a conflict of values as he is caught between the Anglo and Chicano worlds. Because he is neither Anglo nor Mexican, his ethnicity can produce a poor self image. His need to belong to a group will sometimes place him in a situation where his passive nature, impulsiveness and need to belong may lead him into the drug subculture. Effective therapy should be based on solving problems in a family context, maintaining dignity, and especially on grounding program definitions, concepts, practices and language in the Chicano culture and with a Chicano staff. Identifiers—Rural Education Centers, \*Rural Women

Rural women come from many ethnicities, enjoy diverse social economic statuses, different family circumstances, and various levels of educational attainment. Of the 34-35 million rural women, a large percentage are plagued by poverty and lack of opportunity for education, employment, health care, and various social services. Rural people, who constitute one third of this country's people, also make up half of the nation's impoverished. While a greater number of rural women are now employed outside the family, they tend to be employed in low-paying clerical, service, and seasonal positions. For women who are ethnic minorities, aged, single head of households, or displaced housewives, the isolation of rural life adds an additional burden. This paper recognizes the urgent educational needs of rural women; summarizes research and statistical findings on rural women in the areas of education, income, employment, and values orientation; points out some cultural conflicts and dilemmas that may occur as a result of short-sighted, fragmented, and hastily implemented educational programs; presents a global perspective of the education of rural women which calls for social and policy changes and is multidimensional, grassroots based, and oriented to the culture and people of rural America; and delineates the needs for research, for regional rural centers, and for federal support in rural women's education. Descriptors—Altruism, \*American Indian Reservations, Attitudes, Individual Characteristics, \*Job Satisfaction, Life Style, Organizational Climate, Physician Patient Relationship, \*Physicians, \*Recruitment, \*Rural Areas, Social Environment, Socioeconomic Background, \*Work Environment

Identifiers—Indian Health Service, \*Navajo (Na-

tion)

Special difficulties surround the efforts of the Indian Health Service (IHS) to recruit and retain physicians for its extensive health care delivery systems on Indian reservations, particularly those of the Navajo. A comprehensive questionnaire survey obtained data on the background and attitudes of federal physicians practicing in each of the 8 IHS clinical facilities on the Navajo Reservation; 90 (79%) of the 114 questionnaires distributed were returned. Factor analysis of the data indicated that the decision to practice on the reservation was motivated primarily by altruism and the cultural and recreational attractions of the Southwest; subsequent job-related satisfaction centered around relationships with Indian patients and the local community. These findings have significant practical implications for recruitment and retention, e.g., appealing to altruistic feelings, publicizing the leisure and life style opportunities of the Southwest, and emphasizing the attractions of community medicine in unique cultural settings. Since physician background, job-related satisfaction, and location factors in the study accounted for only 34% of the total variance in physician's plans to stay in IHS, much of the unexplained variance may be due to professionalization patterns and bureaucratic policies within the IHS; and future studies should incorporate these factors in their predictive models. Identifiers—Ethnic Heritage Studies Program, \*Haida (Tribe)

One in a series of curriculum materials on Southeast Alaska Natives, this booklet contains seven myths and legends from the Haida oral tradition, each accompanied by discussion questions and suggested learning activities. Intended for use in the intermediate grades, the stories are two to four pages long with many Haida words included in the text and placed in parentheses following the English translation. Titles include "Raven Finds Water," "Eagle Brings Good Luck," and "The Beaver and The Marmot." The numerous discussion questions and activities for students and teachers can be adapted to a variety of student needs, abilities, and interests. Suggested activities in science, art, writing, language arts, and drama range from simple to complex. Activities accompanying "The Great Flood" (in which the raven and the sea otter rebuild their Sumez Island home after its destruction) include depicting the legend in comic strip format, locating Sumez Island on a topographical map, making a model of a Southeast Alaska Island, and researching the geological history of the Alaska islands and mainland. Teacher activities include planning field trips, inviting a Haida elder to tell traditional stories in the classroom, and collecting resource materials for student use. An attached activity folder contains seven word games that develop vocabulary related to the legends. (JH)

 Seasons

Students are introduced to Haida vocabulary in  
 this booklet which briefly describes the seasons and  
 traditional seasonal activities of Southeastern  
 Alaska Natives. The first section lists the months in  
 English and Haida; e.g., January is "Taan Kun-  
 gaay," or "Bear Hunting Month." The second sec-  
 tion contains seasonal names in Haida and English  
 as well as the five Haida food gathering times: Her-  
 ring Egg Time, Black Seaweed, Red Salmon, Berries  
 Ripen, and Dog Salmon Egg Month. The final sec-  
 tion describes the most important natural events  
 and food gathering activities of each month; the text  
 is in English with selected Haida words in paren-  
 theses following the English equivalent. In some  
 cases, the origin of Haida month names is provided;  
 e.g., the Haida word for November, when bears hi-  
 bernate, means "large thing laid down." Line draw-  
 ings illustrate each page. (JH)

Experienced traders in furs, blankets, and other  
 goods, the Haidas of the 1700's had a well-  
 developed decimal system for counting and cal-  
 culating. Their units of linear measure included the  
 foot, yard, and fathom, or six feet. This booklet lists  
 the numbers from 1 to 20 in English and Haida;  
 explains the Haida use of ten, hundred, and thou-  
 sand units; and gives Haida terms for addition, sub-  
 traction, division, and linear measures from 1 to 12  
 feet. This is one in a series of curriculum materials  
 designed to introduce students to the languages of  
 Southeast Alaska Natives. (JH)

 (Tribe)

Students are introduced to the Haida language as  
 well as to traditional Haida foods in this booklet,  
 one in a series of curriculum materials on Southeast  
 Alaska Natives. Ten selections written in simple  
 language describe a Haida barbecue, Indian bread,  
 sea cucumbers, black sea weed, the edible pulp sap  
 of Hemlock, Indian ice cream made from soap ber-  
 ries, catching a ptarmigan, skukum root medicine,  
 and Devil's Club Tonic. Readings include methods  
 of food preparation, recipes, and time and place for  
 gathering each food. Traditional customs associated  
 with the foods are included; e.g., Devil's Club Tonic  
 is made for a member of one phratry (Eagle or  
 Raven) by a member of the opposite phratry and  
 requires a token payment by the recipient. Many  
 Haida words are included in the text and placed in  
 parentheses following the English translation. Line  
 drawings illustrate cooking methods, utensils, and  
 the edible plants and animals. (JH)

 Songs

In the Haida nation, there are two phratries, Eagle  
 and Raven, divided into a number of clans sharing  
 one or more emblems. These emblems, inherited  
 from the mother's line, adorn the button blankets  
 which are the traditional ceremonial robes that  
 serve to identify the family of the wearer. Written  
 instructions and diagrams guide students in con-  
 structing their own Haida button blankets including  
 materials, measuring, sewing, and executing the em-  
 blem pattern. Black and white photographs illus-  
 trate a variety of blanket designs. Related  
 vocabulary words are listed in Haida and English;  
 the texts of eight Haida dance songs are included.

Identifiers—Alaska (Southeast), Ethnic Heritage  
 Studies Program, \*Hunting, Survival Skills

Eleven stories describe traditional practices and  
 true adventures of the Tlingit hunters of Southeast  
 Alaska. The stories are accompanied by learning  
 activities and discussion questions for students and  
 are arranged under the headings of bear, mountain  
 goat and deer, and seal and sea lion. Topics include  
 hunting weapons and strategies, bravery, the train-  
 ing of hunting dogs, behavior of the hunted animals,  
 preparing and preserving game for food, and uses of  
 game for clothing and tools. Suggested activities ask  
 students to collect and record additional true adven-  
 ture stories, study wildlife, dramatize and illustrate  
 the stories, carve an animal from soap or clay, and  
 consider the distinctions between sport and survival  
 hunting. (JH)

The Ketchikan Mural Project was a community  
 supported program funded in part through CETA,  
 Title III, Summer Program for Economically Disad-  
 vantaged Youth. The 120' by 70' mural, located on  
 the Ketchikan Community College campus, is  
 called "Return of the Eagle" or "Return of Super-  
 natural Powers." It was executed by muralist Don  
 Barrie with the help of 25 CETA co-workers se-  
 lected on the basis of financial need and artistic  
 ability. The mural is composed of 6 panels designed  
 and painted by Mr. Barrie and 21 shields designed  
 and painted by the co-workers. The 8-week project  
 was begun in June 1978 with mural assistants to  
 represent legends or events significant in Haida cul-  
 ture. They spent the remaining six weeks preparing  
 the mural wall and executing their shields and car-  
 touches. Designed and compiled for classroom use,  
 this booklet contains photographs of the 21 shields  
 designed by the CETA apprentices. Each photo-  
 graph is accompanied by the designer's narrative  
 account of the events depicted in the shield and by  
 a brief biographical statement including the design-  
 er's name, age, interests, and vocational goals.  
 Related learning activities for students are listed  
 under the headings of writing and reading, art, and  
 drama. (JH)

Students learn Tlingit survival practices and lore in this booklet of stories and learning activities. Five readings discuss fire making methods, edible wild foods, weather conditions, and shelter; information is related to the resources of Southeast Alaska and to typical survival situations; e.g., storms at sea and dense fogs. Narratives relate one legendary and one factual survival story. Suggested activities for students include interviewing friends and relatives to learn additional survival practices and stories of survival; identifying edible foods of Southeast Alaska woods, streams, and beaches; and using primitive methods of fire building. An attached activity folder of 14 worksheets and answer keys provides games to build vocabulary related to the readings, hypothetical survival problems for group and individual solution, and directions for making kites and simulating fog. Does Bilingual Education Work?

Pub Date—3 Feb 79

Note—41p.; Paper presented at the Annual Meeting of the Southwest Educational Research Association (2nd, Houston, TX, February 3, 1979).

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Bilingual Education, Comparative Testing, \*Control Groups, Curriculum, Educational Objectives, English, Ethnicity, \*Evaluation Methods, Hispanic Americans, Language Arts, \*Language Dominance, Mathematics, \*Program Effectiveness, Program Evaluation, Spanish Speaking, Test Results

Identifiers—\*American Institute for Research, \*Individualized Bilingual Instruction Program

Two major evaluations of bilingual education differed significantly in evaluation design and results. The American Institute for Research (AIR) conducted the national impact study for bilingual education and gathered data from many programs. AIR based its study on comparisons of mathematics and language arts achievement of students in bilingual classrooms (with 74% non-English speaking or bilingual children) and control classrooms (with just 17% bilingual or non-English speaking children). The two groups were matched ethnically but not by language dominance. The design of the evaluation of the Individualized Bilingual Instruction (IBI) Program was based on evidence of how the subjects would have performed without the benefit of the program. These data, built up over years, were accumulated from actual pretests of students who enrolled in the program at different ages, thus providing an automatic match for ethnicity, socioeconomic level, age, and language dominance. In general, IBI results indicated significantly higher performance for students in its bilingual program than did AIR for Title VII students as a whole. Appendices include the IBI data base from which the paper's findings were taken and technical information regarding IBI testing, data collection, and analysis procedures. (SB)

Identifiers—\*Educational Cooperative Service Unit, \*Minnesota

School districts in southwest and west central Minnesota have historically led the state in cooperative efforts. The Educational Cooperative Service Unit (ECSU), an intermediary agency that is an extension of the member schools, is responsive to school district needs and is controlled by the member schools themselves. In 1979-80 membership in the southwest and west central ECSU included 99 public schools and 6 non-public schools, representing some 65,000 students. A number of services and programs are offered through the ECSU. Special education efforts include centers offering special education programs and support services, an instructional materials center, and regional consultants for the handicapped, vision impaired, emotionally disturbed and hearing impaired. Instructional services include a teacher center to assist in inservice training, curriculum development, etc.; an information network; an adult "right to read" program; career education; and a nutrition education and training program. Administrative services involve such areas as educational planning and management information systems. The media services include film collections, equipment loans, equipment repair, and a free printing service. This annual report discusses the governance structure, philosophy, goals and membership of the ECSU, summarizes its programs and services, and discusses finance and personnel needs. Appendices include bylaws, ECSU legislation, and a calendar of 1979-80 events. (DS)

Identifiers—\*Latinos, \*South Bend Community Schools IN

Over 2,000 interviews, questionnaires, and observations obtained needs assessment information from students, teachers, school administrators, and community members with the 4 major objectives being to help Latino children and parents articulate their educational needs, to help South Bend Community School Corporation interpret these needs in deliverable terms, to demonstrate to Latino people that their perceptions are valued, and to inform service providers of Latino needs. The assessment led to six general recommendations for meeting Latino needs: (1) improve language skills and school achievement, (2) decrease student dropout rate, (3) address educational problems related to family mobility, (4) increase compatibility between home culture and school experience, (5) alleviate stress generated by personal and family economics, and

(6) coordinate state and local resources to meet student needs. The delivery strategy task force translated these general recommendations into specific actions in the areas of educational policy, curriculum, staffing, extra curricular activities, student services, community involvement, and program evaluation. For each area, recommendations were directed to the local school, community agencies (including churches), and state agencies (including the legislature). (JH)

Zuni Alternative Learning Program.

Pub Date—80

Note—23p.; Prepared and sponsored by the Zuni Cultural Program and the Zuni Tribal Program.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—American Indian Education, American Indian Studies, Cultural Education, Curriculum, Evening Programs, Field Trips, Individualized Instruction, Nontraditional Education, Reading Achievement, Secondary Education, Secondary Schools, Small Schools, Summer Programs, Teacher Attitudes, Teacher Developed Materials

Identifiers—New Mexico, \*Zuni (Pueblo)

Began in August, 1976, the Zuni Alternative Learning Program for junior high school and high school students not attending school anywhere else focuses on reading, writing, verbal and non-verbal expression in a multicultural setting, computational skills, Zuni culture, and practical skills. The program offers courses which meet the minimum standards of the New Mexico State Department of Education in the areas of language arts, reading, social studies, mathematics, science, arts and crafts, practical arts, and physical education. New Mexico-certified teachers provide highly individualized instruction in small classes for the 70-80 students, who enter the program by choice or referral from Zuni High School. Credits earned are accumulated for graduation and students meeting state high school graduation requirements receive the Zuni High School diploma. The program includes field trips, night classes, and a summer program which provides more extended travel and learning opportunities. Appendices include a statement of purpose and philosophy, brief descriptions of 10 programs within the Zuni Division of Education, and a list of Zuni books available to the Zuni community and local schools. Kuhlman, Natalie A.

Writing Level Competencies of Hispanic Students.

Pub Date—Apr 80

Note—14p.; Position paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Evaluative (142) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Bilingual Students, Comparative Analysis, \*Diagnostic Tests, High School Students, \*Hispanic Americans, Junior High School Students, Mexican Americans, Secondary Education, \*Secondary School Students, Spanish Speaking, \*Writing (Composition), \*Writing Skills

Identifiers—\*Monolingual Students

A pilot study was conducted to identify a viable method for analyzing the distinctive characteristics of the English writing of Hispanic students while retaining the consistency of diagnosis of the holistic method. Forty Hispanic students from the eighth and tenth grades were chosen as subjects. Some were fluent in both languages; others were limited in English with strong Spanish skills. A control group of 48 monolingual English speakers at both grade levels was also included. Subjects were asked to write an essay of one to five paragraphs on a choice of four topics. Analysis of the essays was based on two scoring systems: a holistic system which used a 6-point scale, and an itemized or analytic scoring system that was based on a 12-point scale. The itemized system, developed by the researcher, reflected an emphasis on the structure and organization of the essay with points earned or taken away in such areas as introduction, body, conclusion, syntax, devices, format, and fluency. Eighth grade Hispanic students scored an average of 2.45 on the holistic scale, and the English-speaking students scored an average of 4.05. Tenth grade Hispanics averaged 4.15 compared with 4.60 for the control group. Under the itemized scoring system, eighth grade Hispanics

averaged 7.9 compared to the control group's 12.96; tenth grade Hispanics averaged 12.15 compared to the control group's 11.25. Although the holistic scoring system did not provide sufficient information for diagnosing writing skills for Hispanics, it did indicate, however, that the itemized scale had validity in terms of consistency while also providing more specific information for the teacher. Placing Rural Minority Women in Training Situations for Non-Traditional Jobs.

Federation of Southern Cooperatives, Epes, Ala. Spons Agency—Office of Education (DHEW), Washington, D.C. Women's Educational Equity Act Program.

Pub Date—79

Note—40p.

Pub Type—Reports - Descriptive (141) - Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adult Vocational Education, Affirmative Action, Economically Disadvantaged, Equal Opportunities (Jobs), \*Females, Fund Raising, Information Sources, Job Placement, Job Training, \*Minority Groups, \*Nontraditional Occupations, \*Outreach Programs, \*Program Development, Program Evaluation, Program Implementation, Public Relations, \*Rural Population, Sex Discrimination

Identifiers—Rural Women, \*Womens Educational Equity Act

Detailed practical information is provided in this guidebook describing the services and resources needed to increase the participation of rural minority women in training for non-traditional jobs. Designed for use by a variety of organizations (women's clubs, service organizations, government agencies, and vocational/technical schools), the manual covers program development stages from initial planning to evaluation. Chapter I discusses program design, staffing requirements, and the process of locating and equipping an office. Chapter II lists sources of information for determining career trends in the target area, locating job training opportunities for women, and protecting women's job rights. Chapter III identifies services typically needed, i.e., recruitment, counseling, job placement, training program placements, and referrals. Chapter IV describes promotional and fund raising activities and lists specific steps for using the media and personal appearances to gain community support. Techniques for fund raising cover private foundations, charities, government agencies, and a variety of community-based projects. A bibliography of 24 entries lists sources of information about traditional and non-traditional job and educational opportunities for women, with emphasis on rural and minority groups. (JH)

Pub Date—79

Note—46p.

Pub Type—Guides - Classroom - Learner (051) - Guides - Classroom - Teacher (052) - Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Assertiveness, \*Career Guidance, Demonstration Programs, \*Females, Feminism, Goal Orientation, Instructional Materials, Leaders Guides, \*Learning Activities, Program Evaluation, \*Program Implementation, \*Rural Population, Values Clarification, \*Workshops

Identifiers—Rural Women, \*Womens Educational Equity Act

A field tested workshop program to prepare rural women for education and job opportunities is described in this comprehensive manual for workshop leaders. An introductory chapter states program goals and philosophy and covers planning and implementing the workshops; topics include staff selection, publicity and recruiting, materials, workshop size and design, cost, funding sources, and evaluation. The remaining sections provide detailed information on the workshop components:

orientation, values clarification, assertiveness training, information on jobs and education, and evaluation. Twenty workshop activities are described in detail including a statement of the purpose, a description of the group format to be used, a list of materials, and suggestions to the leader for facilitating desired outcomes. Three worksheets provide exercises to help women identify goals and values and formulate plans for achieving goals. The job and education component provides resource materials and activities to help participants identify interests, choose a school or college, get a job, and obtain financial aid. Sample evaluation forms ask participants to evaluate the usefulness of specific workshop activities and identify new knowledge acquired during the sessions. A sample workshop schedule and a bibliography of books and government publications on women and employment are appended. (JH)

Identifiers—\*Micronesia

Social, political, and economic advances in Micronesia during fiscal year 1978 are highlighted in this annual report to the United States Secretary of the Interior. Introductory chapters summarize the year's achievements and present major events in chronological order. Items include creation of a 200-mile fishery zone for Micronesia and provision for the regulation of living resources within the area, the first shipment of copra oil to markets outside the Trust Territory, dedication of the 116-bed Ponape Referral Hospital, acquisition of a \$16.5 million contract for construction of Truk Airport on Moen, accreditation of the Community College of Micronesia, inauguration of the first elected governor and lieutenant governor of Truk District, and the referendum on the constitution for the Federated States of Micronesia. Separate chapters discuss political, economic, social, and educational advancement, providing an overview of each area as well as descriptions of specific programs and achievements. The final section provides 120 pages of statistical data related to demographic characteristics of the population, employment, trade, agriculture, tourism, government finance, vital statistics, public health, school enrollments, and crime. Descriptors—\*Bibliographies, Education, Employment, \*Females, Health, Lesson Plans, Literature, Music, Needs, Poetry, Postsecondary Education, Prose, \*Resource Materials, Role Models, \*Rural Population, Sex Role, Units of Study, Womens Education, \*Womens Studies

Identifiers—\*Appalachia, Rural Women

While Appalachian women share many experiences and circumstances in common with American women in general and with rural American women in particular, the economics, social and political history, and circumstances peculiar to the region have forged life experiences for females in Appalachia which merit independent attention. This learning/teaching guide is designed to provide the necessary information for developing and/or facilitating graduate courses or pursuing independent learning about the Appalachian female experience, sex-role socialization, and women's career development. Each lesson provides an introduction to the literature, learning objectives, directions for the learner, classroom and individual learning activities, a bibliography of related readings, and an appendix including original articles developed specifically for the lesson. Unit I introduces the learner and teacher to the variety of issues and concerns of Appalachian women through their writing—in poetry, music, and prose. Unit II focuses on sex roles in Appalachia from both historical and contemporary viewpoints. Unit III explores psycho-social aspects of the female experience including employment, health, education, and counseling needs. More than 700 major Appalachian writings by and/or about women are listed in a supplementary bibliography. (NEC)

Descriptors—Ability, \*Achievement, \*Cognitive Ability, Cognitive Development, College Science, \*Comprehension, \*Educational Research, Higher Education, Physics, Ratios (Mathematics), \*Science Education

Identifiers—\*Piaget (Jean)

This paper reports on research designed to examine relationships among analogical reasoning, Piagetian level, and physics achievement. A sample of 37 college students enrolled in a physics course participated in a three-day study and were given tasks designed to measure analogical reasoning ability and Piagetian level. Course achievement was indicated by individual scores on the mid-term examination, final examination, and total course score. The study suggests that a change to paragraph form no longer necessitates the use of proportional reasoning, nor is the paragraph form related to Piagetian level as in the A,B;C;x type of analogy. Data indicate that paragraph analogies do not aid comprehension of a concept, and that analogies found in science texts do not enhance achievement. (Author/GA)

Identifiers—\*Energy Education

This paper discusses the results of a research effort in Michigan examining alternative means of encouraging energy conservation in high school youth. The study itself was conducted in Michigan during the 1978-79 school year, and involved a total of 95 high schools. This report describes the methods and procedures used in that study and presents a variety of findings. First, the project demonstrates that it is feasible to carry out this type of large scale research, including the reliable measurement of student attitudes about energy conservation. Second, the results show that both workshops and individual consultations were successful in influencing teachers to include energy conservation instruction in their classes. Finally, the findings concerning impact on student attitudes and self-reported behaviors are mixed but encouraging. These results are presented: preliminary conclusions are drawn; and the necessity for further research is discussed. (Author/RE)

Descriptors—\*Biological Sciences, Biology, \*Comparative Analysis, Educational Research, High Schools, Junior High Schools, \*Rural Urban Differences, Science Education, \*Science Facilities, Science Programs, Science Teachers, Secondary Education, \*Secondary School Science

Identifiers—Alberta

This study provides information about the biology and life science classroom teaching environments in Southern Alberta. Responses (N=53) to questionnaires sent to junior and senior high school teachers in rural and urban settings revealed information regarding school facilities, texts and reference materials, field trips, outdoor education facilities, academic background of the teachers, teacher interest in establishing a regional biology/life science teachers' organization, and interest in working with science education students in field experiences. Results evaluated by tabulation of response frequencies and calculation of means, ranges, and percentages are presented in 82 tables. Generalizations include: (1) urban teachers reported more specialized teaching assignments, larger class enrollments, and more science-related options available than did those in rural settings; and (2) laboratory facilities and the requisite instructional materials were better supplied to senior high school levels than to junior high levels, especially in urban settings. Other urban-rural and junior high-senior high differences are described. Several aspects of the classroom environment were delineated by the survey respondents as needing improvement. (Author/CS)

This is part two of a three-part MSG algebra text for high school students. The principal objective of the text is to help the student develop an understanding and appreciation of some of the algebraic structure as a basis for the techniques of algebra. Chapter topics include addition and multiplication of real numbers, subtraction and division of real numbers, factors, exponents, radicals, and polynomials and rational expressions. (RH)

Presented is the work of the calculus group of SMSG. The Advisory Board expressed a desire for a suitable high school calculus text. The calculus group surveyed available texts and, finding none which met advisory board requirements, outlined a suitable course. This outline was annotated for use by future writers. Some group members felt a more extended discussion of topics, suitable for use by students, was needed. A subgroup drafted this student version and in doing so changed the outline. The group could not reach agreement on these changes and therefore this document contains two reports, the second being the student version of the first four chapters of the calculus text. (MK)

Pub Date—Jul 78

Note—24p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Abstract Reasoning, \*Cognitive Development, \*Concept Formation, \*Developmental Stages, \*Educational Research, \*Elementary Secondary Education, \*Learning Theories, \*Logical Thinking, \*Mathematics Education, \*Rational Numbers, \*Ratios (Mathematics), \*Research

This study examined the development of the rational number concept as a ratio. Preliminary to the description of the study is an introduction discussing constructivism and equilibration. The study itself tests whether equilibration theory holds, and if so, what is the nature of its "phases" and whether these are found at each of the "periods" of development. Findings include: development of the ratio concept occurs in stages which can be both chronologically and structurally differentiated and these stages can be seen as resulting from equilibration processes which can be reorganized into two distinct "periods." A detailed description of the instrument, the orange juice test, is included. (MK)

This report presents a replicable model for developing a magnet school based on the planning of the Dallas Independent School District's Science and Technology Magnet High School. The model is based on Malcolm Provus' process called "Discrepancy Evaluation," designed as a guide for public school programs to describe the discrepancy between expectation and performance. The model contains four levels with each level more detailed than the previous one. At each level there are four components: the network, the input-process-output, the activity schedule, and the flow chart. The remainder of the report presents a description of the history of magnet schools, visitation reports, the educational specifications, consultant reports, and an annotated bibliography. (SA)

This is the final report of the evaluation of Project CAUSE, a three year project to improve the laboratory portions of undergraduate physics courses at North Texas State University. The report is divided into six sections. Included in the overview are goals and purposes, the instructional format, and the evaluation plan. Demographic profiles comprise the second section. Section three includes the cognitive results and trends. A discussion of the affective results is included in the fourth section. Anecdotal observations, based on interactions between the evaluator and the project staff, are discussed in section five. Section six is a summary of conclusions and recommendations. A measurement instrument of the affective domain is given in the appendix. (SA)

A Metric Education Program for Elementary Students.

Pub Date—8 Apr 79

Note—224p.; An Individual Practicum Report submitted in partial fulfillment of the requirements of the National Ed.D. Program for Educational Leaders, Nova University. Contains occasional broken type.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Guides - Classroom - Learner (051) — Reports - Descriptive (141)

**EDRS Price - MF01/PC09 Plus Postage.**

Descriptors—\*Achievement, \*Educational Games, \*Elementary Education, \*Elementary School Mathematics, \*Inservice Teacher Education, \*Mastery Tests, \*Measurement, \*Metric System, \*Objectives, \*Pretests Posttests, \*Research, \*Resource Materials, \*Resource Units

Metric instructional units, including objectives, pretests, posttests, and resource materials, were developed for grades 1 through 5. Metric objectives and a metric test were developed for teachers. Books, charts, games, and kits used as resources in the units were evaluated according to SI guidelines. Five teachers, one from each grade level, attended an in-service program in preparation for teaching the instructional units in their classrooms. Instruction was given to 120 students. An analysis of the test data revealed that at least 60% of the teachers mastered 42% of the objectives. At least 75% of the students mastered 43% of the objectives in grade 1, 89% in grade 2, 77% in grade 3, 45% in grade 4 and 50% in grade 5. (Author/MK)

Identifiers—\*Occupational Safety and Health

This booklet describes academic program offerings

in American colleges and universities in the

area of occupational safety and health. Programs are

divided into five major categories, corresponding to

each of the core disciplines: (1) occupational safety

and health/industrial hygiene, (2) occupational

safety, (3) industrial hygiene, (4) occupational

health nursing, and (5) occupational medicine.

Within each category, the various program descriptions

are arranged alphabetically by the name of the

institution offering the programs. Indexes provide

information regarding geographical distribution of

programs by states, financial support through the

NIOSH grant program, and all programs offered by

the 12 Educational Resource Centers. (CS)

Descriptors—\*Algebra, \*Cognitive Processes,

\*College Mathematics, \*Educational Research,

Error Patterns, Higher Education, Information

Processing, Mathematics Curriculum, \*Mathematics

Instruction, \*Problem Solving, Research

The investigation reported is primarily a description

of how college students solve or fail to solve

algebra equations. Protocols were collected from

two groups of college students; one group was

expected to be good solvers, the other group contained

many poor solvers. The investigators sought to identify

and classify the difficulties students had, and

they tried to guess the mechanism which produced

those difficulties. They compared the work of suc-

cessful and unsuccessful solvers, looking for ideas

that might help make more solvers be successful,

and they tried to identify what must be learned by

the student of equation solving. The discussion of

findings includes: identification of three types of

errors, and sections devoted to kinds of knowledge

in algebra, meaning in algebra, errors and the

psychology of skill, and characteristics of good solvers.

Descriptors—Cognitive Development, \*Cognitive

Processes, \*Educational Research, \*Higher Education,

Intellectual Development, \*Logical Thinking,

Physics, \*Problem Solving, Science Education,

Science Equipment, Undergraduate Students

Reported is an attempt to examine the nature of

the reasoning used by college students who consistently

erred on timer tape problems and a comparison

of their performance with that of students who

made logical responses. The author suggests that the

poor performance of students, classified as intuitive

responders, is a result of their use of an incorrect

solution strategy rather than as a result of cognitive

immaturity or inability to mentally coordinate information

about two dimensions. (Author/SA)

Descriptors—Conservation Education, \*Curriculum Development, Delivery Systems, Educational Administration, Educational Assessment, \*Educational Innovation, \*Educational Planning, \*Educational Supply, Elementary Secondary Education, \*Environmental Education, Interdisciplinary Approach, \*Needs Assessment, Planning, Systems Approach

This guide is intended to facilitate implementation and infusion of environmental education (EE) programs by presenting guidelines for design of a system. The operations leading to the system and its evaluation are discussed. Two components of the design of the system are specifically treated: (1) EE delivery concerns, and (2) levels of planning. This guide answers several questions including: (1) What is a useful approach to the design of an EE delivery system; (2) What are the major instructional goals and learning objectives for an EE curriculum; (3) What are the basic requirements for delivering an EE program; (4) What are some possible constraints and barriers to delivering an EE program; (5) What are some basic strategies and tactics that facilitate EE program delivery; and (6) What are some important considerations in evaluating an EE delivery system? (Author/RE)

The Institutionalization of Environmental Education in the Formal Education Sector: A Generic Model.

Far West Lab. for Educational Research and Development, San Francisco, Calif.

Spons Agency—Office of Education (DHEW), Washington, D.C. Office of Environmental Education.

Pub Date—Sep 79

Grant—G007802598

Note—101p.; Contains occasional marginal legibility in Tables and Figures. For related document, see SE 030 629.

Pub Type—Reports - Descriptive (141) — Guides

- Non-Classroom (055)

## EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Conservation Education, Curriculum Development, \*Educational Assessment, \*Educational Change, \*Educational Innovation, \*Educational Policy, Elementary Secondary Education, \*Environmental Education, Information Dissemination, Models, Planning, \*Public Policy

This generic model is intended to provide a rationale and conceptual basis for thinking about and understanding the institutionalization of environmental education. To achieve this purpose, the document: (1) broadly defines EE; (2) presents a systems view of formalized education; (3) presents a view of EE contextualized in the formal education setting; (4) discusses the process of institutionalized change in education; (5) characterizes a generic model of institutionalized environmental education; and (6) presents basic elements of a system for institutionalizing environmental education. Campbell, Richard L. And Others

The Effect of Information about Famous Black Scientists on the Closed-Mindedness of Preservice Teachers.

Pub Date—Apr 80

Note—11p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

## EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Attitude Change, Beliefs, \*Blacks, College Science, Dogmatism, Educational Research, Higher Education, \*Preservice Teacher Education, Science Education, \*Science Teachers, Scientists, \*Teacher Attitudes

This study provides support for the hypothesis that science process skills instruction and information on Black scientists can alter the belief systems of close-minded individuals. Preservice teachers were assigned to two experimental groups based on their median Rokeach Dogmatism Score, which also served as a pretest. One of the experimental groups was randomly assigned instruction in science process skills, plus information on Black scientists; the other group received instruction in science process skills plus information on various books for elementary children. Upon completion of the experimental instructions, the Rokeach Dogmatism Scale was again administered. Analysis of covariance determined that significant changes occurred in the dogmatism of close-minded subjects after the experimental instructions were completed, with positive difference favoring the group receiving instruction in process skills plus information on famous Black scientists. Analogue Models in the Laboratory Exercise: One Method for Teaching to Think.

Pub Date—Apr 80

Note—18p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

## EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavioral Science Research, Educational Research, Experiential Learning, \*Instructional Development, Learning Processes, \*Learning Theories, \*Philosophy, Science Education, \*Science Instruction, \*Science Laboratories

This paper relates philosophical and psychological concerns in formulating a theory of teaching and learning. The laboratory exercise is shown to be a paradigm case of the theory, and a means by which students can be taught to think. The laboratory exercise is presented as a means to demonstrate a facet of the conceptual nature of science and to teach students that the construction of an experimental design represents a kind of analogy based upon the idea that what happens in the laboratory is an analogue of what occurs in nature. Anecdotal evidence from classroom experience with this teaching strategy is discussed. (Author/CS)

Science Education Newsletter, No. 41.

British Council, London (England). Science Dept.

Pub Date—Jan 80

Note—21p.

Pub Type—Collected Works - Serials (022)

## EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*International Programs, Mathematics Education, Newsletters, Publications, \*Science Activities, \*Science Education, Secondary Education, Secondary School Science

This issue, number 41 in the series, is divided into the sections of: (1) British science activities, and (2) overseas and international activities. Presented in a newsletter format, numerous topics of interest to secondary school science and mathematics educators pertaining to British education are presented. Items concerning the Nuffield-Chelsea Curriculum Trust, Council for Environmental Education Conference, Calculator In-Service Training Kits, and various mathematics conference reports, are included. The second section includes news items from the countries of India, Scandinavia, Nigeria, Nova Scotia, Bhopal, Swaziland, and South Africa as well as various international conference reports. (CS)

Cognitive and Affective Influences on the Development of Sex-Related Differences in Mathematics. Symposium.

Pub Date—Apr 80

Note—111p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

## EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Academic Achievement, Classroom Observation Techniques, \*Cognitive Development, \*Educational Research, Elementary Secondary Education, Interviews, \*Longitudinal Studies, \*Mathematics Education, \*Self Esteem, \*Sex Differences, Sex Role, Sex Stereotypes, Spatial Perception

Identifiers—\*Spatial Visualization

Results from the first year of a three-year longitudinal study (grades 6-8) of sex-related differences are reported. The purposes of the study are: (1) to understand more adequately the impact of one important cognitive influence (Spatial Visualization) on the learning of mathematics, and (2) to identify educational influences on the development of feelings of confidence in the learning of mathematics. Influences on confidence are being studied by observing classroom interactions and by a projective-type interview. Subjects in this portion of the study are above the mean in achievement and either high or low in confidence in learning mathematics. The impact of spatial visualization skills on the learning of mathematics is being studied in a one-to-one interview with subjects who are discrepant in spatial/verbal skills. They are asked to solve pictorial or analytic word and fraction problems. Transcribed interviews are coded for verbal information, picture information, picture use, mental movement, and scores. (Author/MK)

## EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Assessment, Educational Objectives, Educational Research, Elementary School Science, \*Elementary Secondary Education, \*Program Evaluation, Science Course Improvement Projects, \*Science Education, Secondary School Science

This critical, analytical, and interpretive review of three National Science Foundation-supported studies of the state of precollege science education examines the implications that these studies may have for the science community. Areas discussed include student problems, teacher preservice and inservice education, curricular innovations and reforms in elementary and secondary school science, laboratory instruction, teaching resources, national and local perceptions of the educational system, and values problems. One recommendation made among others is that a commission be established to examine in depth the goals and purposes of precollege education. (Author/CS)

Should Hand-Held Calculators Be Used in the  
Elementary School: A Survey.

Pub Date—80

Note—13p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Calculators, \*Educational Research, Elementary Secondary Education, Inservice Education, \*Mathematics Education, \*Mathematics Instruction, Mathematics Materials, Research, \*Surveys, Workshops

Results of a survey, concerned with the use of calculators conducted following a calculator workshop, are reported. Respondents were 400 elementary and secondary teachers and administrators. The report includes recommended uses of calculators by grade level and suggestions for staff development. In general, results indicate teachers and administrators consider the calculator as an instructional aid and see many possibilities for its implementation in the classroom. (MK)

Using Science Achievement to Validate Student Teacher Competencies.

Pub Date—Apr 80

Note—26p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980). Contains light and broken type.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, \*Competency Based Teacher Education, Educational Research, Elementary Education, \*Elementary School Science, \*Preservice Teacher Education,

Science Education, \*Science Instruction, \*Student Teachers, Teacher Effectiveness, Tests

Reported is a study to determine the validity of competencies which are the basis of professional teacher certification. The paper also assesses the importance of generic competencies in science learning at the elementary level. The study itself offers several recommendations regarding teacher training and research in classrooms using instruments similar to the Teacher Performance Assessment Instruments (TPAI). It suggests that management is an important factor in achievement in elementary classrooms where student teachers are involved. (Author/SA)

Kansky, Bob Olson, Melfried

Mathematical Preparation versus Career Aspirations: A Study of Wyoming's 1978 High School Seniors.

Wyoming Univ., Laramie. Science and Mathematics Teaching Center.

Spons Agency—Wyoming State Dept. of Education, Cheyenne.

Pub Date—79

Note—47p.; Research sponsored in part by the Center for Research Services and Publications.

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Career Choice, College Mathematics, Decision Making, \*Educational Research, Elective Courses, Higher Education, Mathematics Curriculum, \*Mathematics Education, Nontraditional Education, \*Occupational Aspiration, Research, Secondary Education, \*Secondary School Mathematics, \*Sex Differences, \*Surveys

This report provides a general description of the mathematical programs pursued by students in Wyoming's public schools, an evaluation of the adequacy of the high school mathematical preparation of college-bound students relative to the occupational aspirations of those students, and a measure of the extent to which students are aware of the adequacy of that preparation. Each set of data was separated according to sex. Data indicate that many discrepancies exist between the mathematics program that students complete and what they actually should complete to insure successful entrance into college programs. Furthermore, they demonstrate that females take fewer mathematics courses, and their poorer preparation severely limits their occupational choices. Also included is an Afterword which suggests sources of information that might be useful in countering the problems revealed in the study. (Author/MK)

White, Arthur L. And Others

A Study of the Research Priorities As Perceived by Elementary and Secondary School Science Personnel.

Pub Date—Apr 80

Note—25p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980). Contains small print in Tables and Appendices.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Educational Research, Elementary School Science, Elementary Secondary Education, \*Research Needs, \*Science Education, \*Science Teachers, Secondary School Science, \*Teacher Attitudes

This report briefly reviews the rationale for and history of a cooperative effort of the National Association for Research in Science Teaching and the National Science Teachers Association to increase the influence of classroom science teachers on science education research and to improve teachers' perception of the relevance of science education research. Processes, initial results, and planned future activities and procedures are reported that relate to obtaining input from teachers to identify relevant research questions related to classroom practice. An analysis of data collected from questionnaires submitted to science teacher personnel (N=45) is presented that summarizes research needs of secondary and of elementary science teaching personnel. (CS)

An Agenda for Action: Recommendations for

School Mathematics of the 1980s.

National Council of Teachers of Mathematics, Inc., Reston, Va.

Pub Date—80

Note—30p.

Available from—National Council of Teachers of Mathematics, 1906 Association Dr., Reston, VA 22091 (\$1.00).

Pub Type—Guides - Non-Classroom (055) — Opinion Papers (120)

Document Not Available from EDRS.

Descriptors—\*Basic Skills, Calculators, Computers, Core Curriculum, \*Educational Technology, Elective Courses, Elementary Secondary Education, Evaluation, \*Mathematics Curriculum, \*Mathematics Education, \*Mathematics Instruction, \*Problem Solving, Public Support, Standards, Teacher Education, Teaching Methods, Testing

Eight recommendations for school mathematics in the 1980s are given. These are based partially on results from mathematical assessments and other studies, and are intended to launch a decade of action in mathematics education. For each of the following recommendations, the document includes a short commentary and a series of recommended actions to be taken: (1) problem solving should be the focus of school mathematics in the 1980s; (2) basic skills in mathematics should be defined to encompass more than computational facility; (3) mathematics programs should take full advantage of the power of calculators and computers at all grade levels; (4) stringent standards of both effectiveness and efficiency should be applied to the teaching of mathematics; (5) the success of mathematics programs and student learning should be evaluated by a wider range of measures than conventional testing; (6) more mathematics should be required for all students and a flexible curriculum with a greater range of options should be designed to accommodate the diverse need of the student population; (7) mathematics teachers should demand of themselves and their colleagues a high level of professionalism; and (8) public support for mathematics instruction should be raised to a level commensurate with the importance of mathematical understanding to individuals and society. **EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Analysis of Variance, Error of Measurement, \*Research, Research Design, Research Problems, Research Utilization, \*Science Education, \*Statistical Analysis, \*Statistical Significance

Knowledge of the magnitude of effect(s) of an experimental study in science education should be of utmost concern to researchers in the field, but is often not reported. This document describes the concept of "explained variance" in analysis of variance designs and then explains how it can be calculated and reported. Reporting the magnitude of effect(s) of an experimental study in science education allows one to assess the practical significance of the research. Three indices for estimating magnitude of effect(s) are eta-squared, epsilon-squared, and omega-squared. In this document, the last index is used in some detail to illustrate techniques for calculating its value in various designs in science education research. (Author/MK)

**An Investigation of the Effects of Selected Variables on the Implementation of a Marine Infusion Curriculum.**

Pub Date—Apr 80

Note—16p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Reports - Evaluative (142) — Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Biology, \*Community Characteristics, \*Curriculum Development, Ecology, \*Educational Research, Elementary Secondary Education, \*Environment, \*Environmental Education, Science Education

This study attempted to identify differences among schools which accepted, rejected, or made exploratory use of a proposed marine education curriculum. The selected variables for this study included: (1) percentage of teachers by age; (2) percentage of teachers by area of academic preparation; (3) pupil teacher ratio; (4) per pupil expenditure; and (5) distance from marine environment. Significant relationships (following ANOVA and T-tests) were detected among acceptance/rejection and teacher academic field of preparation, percentage of white-collar workers in the community, and distance from the marine environment. **Factors Influencing the Use of Suburban School Grounds for Class-Time Secondary Science Instructional Activities.**

Pub Date—Apr 80

Note—34p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Educational Research, Environmental Education, Instructional Materials, \*Outdoor Education, \*School Location, \*Science Activities, Science Education, Science Laboratories, Secondary Education, \*Secondary School Science, \*Surveys

This study assesses factors that influence use of suburban school grounds for class-time secondary science instructional activities. Special emphases of the study are on determining frequency of use, factors influencing use, and critical factors limiting use. Results from a survey of secondary science teachers at a public school system in-service meeting indicate that teachers favor the use of school ground science activities, but in actuality, little use of school grounds takes place. The hypothesis is offered that the disparity between teacher preference and teaching practice is a consequence of student discipline problems and large class size. (Author/SA)

**Relationship Between What Is Remembered and Creative Problem Solving Performance in Science Learning.**

Pub Date—Apr 80

Note—30p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—College Students, \*Content Area Reading, Creativity, \*Educational Research, Higher Education, \*Memory, Photographic Equipment, \*Problem Solving, Psychology, Science Education, \*Science Materials

Reported are results of a study concerning the role of structural properties of scientific prose. Two major types of relations are identified as typically part of the scientific prose: description of relations, and explanation of mechanisms. Results of two experiments isolate one characteristic of scientific prose (explanation of mechanisms) as being strongly related to creative problem solving. The first experiment, in which university psychology students read a passage explaining how a camera works and then took cued recall and problem solving tests, presents evidence that recall of explanations of the mechanisms and creative solution of camera problems are related. A second experiment further explores this relation by manipulating the passage's emphasis on explanation of mechanisms and presents more evidence that organization of technical text around underlying mechanisms has its main measurable effect on creative problem solving. **Validation of Three Instructional Modes With Conservers and Nonconservers of Length Using Linear Metric Measurement.**

Pub Date—Apr 80

Note—19p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Cognitive Processes, \*Educational Research, \*Elementary Education, \*Learning Theories, Mathematics Education, \*Measurement, Metric System, Problem Solving, Science Education, \*Teaching Methods

This study attempted to gather empirical evidence to guide educators in their teaching of linear measurement to primary school children. It attempted to answer the question "What modes of instruction are most effective for teaching linear measurement concepts to conservers and nonconservers of length?" (as defined by Jean Piaget), using a nine-item test designed by the investigators, and various modes of instruction (as defined by Jerome Bruner). The authors report that: (1) primary pupils can learn to measure with non-standard and standard units of length; (2) iterative measurement is a difficult concept for them; (3) the manipulative mode is more effective than the graphic and symbolic modes; and (4) conservation measures and I.Q. measures seem to overlap in their effect on learning. Descriptors—Curriculum Development, Elementary Secondary Education, Higher Education, \*Mathematics Anxiety, \*Mathematics Education, Mathematics Instruction, \*Research, \*Sex Differences, Sex Role, Sex Stereotypes, \*Student Attitudes, Teacher Attitudes, \*Teacher Education, Teacher Education Curriculum, Teaching Methods, Womens Education

Identifiers—\*Mathematics Education Research

The Teacher Education and Mathematics (TEAM) Program has been developed to reduce mathematics anxiety and increase mathematics confidence and competence of teacher education students; to increase their perception of mathematics as female domain; and to develop their skills in identifying sex bias in curriculum materials and classroom practices. The project has aimed to produce a qualitative change in the teaching of mathematics and ultimately in the resulting educational experiences of children in the critical area of mathematics. Five mathematics modules, which include suggestions on both mathematics instruction and attitude development, are: Number Patterns, Approximation and Estimation, Metric Measurement, Choice and Chance, and Space. Additional attitudinal modules are: Demystifying Math, Sex-role Stereotyping in Mathematics, and Women and Mathematics. The summative evaluation data indicate that the program materials effectively reduced mathematics anxiety scores from pre- to posttest for a majority (77%) of students during pilot testing and for a majority (87%) during field testing. Questionnaire and interview data reveal increases in students' awareness of sex-role stereotyping in mathematics. Students indicated that they knew strategies for counteracting sex bias which they could use in their future work as teachers. (Author/MK)

Descriptors—\*Bibliographies, Doctoral Dissertations, \*Educational Research, Elementary Secondary Education, Higher Education, \*Literature Reviews, \*Mathematics Education, \*Research

This categorized listing updates a ten-year collection of research reports at the elementary and secondary levels published in 1974 and a compilation at the college level in 1975. This document is intended as a resource for those who want to explore the research in mathematics education. It consists of four alphabetical listings: reviews, summaries, and listings of research reports; journal-published reports; dissertations included in "Dissertation Abstracts International"; and documents available from the ERIC Document Reproduction Service. No annotations are included; however, a categorized index is included in this compilation. Studies were categorized by pertinent topics, with cross-references. (Author/MK)

Presented is an account of a day-and-a-half seminar which was held for selected mathematics educators from six states. It was sponsored by the Regional Exchange (RX), a National Institute of Education (NIE) dissemination project headquartered at the Southwest Educational Development Laboratory (SEDL). The seminar had two important purposes: (1) to foster an exchange of information and resources between mathematics researchers and mathematics practitioners; and (2) to lend support to the mathematics preservice/inservice activities in the six-state region. Two researchers were on the program. One was a mathematics educator who discussed junior high school mathematics teaching in terms of diagnosis, remediation, mathematics anxiety, and problem solving. The other was a research scientist with the Classroom Organization for Effective Teaching (COET) who discussed classroom management research in the junior high school classroom. A synthesis of each of these discussions is given. Questions and answers which occurred during the discussions have been incorporated into the text and hand-outs given during the discussions are included following the texts. Also included are written questions which the participants presented to the researchers, and the answers and recommended resources with which the researchers responded. (Author/MK)

Identifiers—\*Vectors (Mathematics)

This is the teacher's edition of a text for the first year of a two-year high school geometry course. The course bases plane and solid geometry and trigonometry on the fact that the translations of a Euclidean space constitute a vector space which has an inner product. Volume 1 deals largely with affine geometry, and the notion of dimension is introduced only in the last chapter. The principal geometric topics of this volume are parallelism of lines and planes, and ratios. This makes possible a good deal of the geometry of triangles and quadrilaterals. This commentary contains answers to all problems, sample quizzes, chapter tests, suggestions on teaching the texts, and a great deal of mathematical and logical background material which has proved helpful in orienting teachers. Descriptors—Congruence (Mathematics), Geometric Concepts, \*Geometry, Instructional Materials, \*Mathematics Curriculum, \*Mathematics Instruction, Plane Geometry, Secondary Education, \*Secondary School Mathematics, Solid Geometry, \*Teaching Guides, Tests, Textbooks, Trigonometry

Identifiers—\*Vectors (Mathematics)

This is the teacher's edition of a text for the second year of a two-year high school geometry course. The course bases plane and solid geometry and trigonometry on the fact that the translations of a Euclidean space constitute a vector space which has an inner product. Congruence is a geometric topic reserved for Volume 2. Volume 2 opens with an analysis of basic properties of perpendicularity and distance which leads to the introduction of an inner product of translations and to the development of Euclidean geometry and trigonometry. The basic facts concerning volume-measures of solids are dealt with in an appendix to Volume 2. The commentary contains answers to all exercises and questions raised in the text, sample (or suggested) quizzes, keys to the chapter tests, suggestions to the teacher, and a great deal of mathematical and logical background material which has proved to be helpful in orienting teachers in preparation for teaching the course. Descriptors—Employment Statistics, Engineers, \*Financial Support, \*Industry, \*Research, \*Research and Development Centers, Scientific Research, Scientists, \*Statistical Data, Statistical Surveys, \*Surveys

The National Science Foundation sponsored Survey of Industrial Research and Development for 1977 was conducted by the Bureau of the Census in

January 1978. Approximately 1,500 R&D-performing companies participated in the survey. Remarks attributed to company officials were based on discussions with representatives from leading R&D-performing companies in the major industries. This report contains a detailed report of R&D spending during 1977, as well as historical tables showing trends for key R&D funding variables. Also included is information about industry-employed R&D scientists and engineers. R&D expenditures for U.S. firms are presented in a variety of ways: by source of funds, type of activity, major cost component, geographic area, field of basic research, product area, effort contracted out, amount performed in foreign countries, and by amounts expended on research and development devoted to energy-related and pollution abatement projects. Whenever possible, the data are presented on an individual industry basis, e.g., instruments, machinery, etc. Data presented in this report cover the period 1956-1977 for funding data and January 1957 to January 1978 for R&D scientist and engineer data. This report summarizes the results of the National Assessment of Educational Progress 1977-78 assessment of mathematics. Chapter one provides general information about mathematics assessments and includes discussion of the objectives, samples, exercises, statistics, and background variables of the assessment. Chapter two considers changes in performance between the first mathematics assessment conducted in 1972-73 and the second assessment being considered in this report. The third chapter describes performance for the nation and standard variable groups. Sections in this chapter include: region, sex, race/ethnicity, level of parental education, type of community, community size, and grade in school. Chapter four gives results for nonstandard variable groups. The two appendices discuss the estimation of standard errors and the source questions for special variables. (MK)

The National Assessment of Educational Progress (NAEP) has completed two assessments of mathematics, the first conducted in 1972-73 and the second during 1977-78. Each assessment surveyed the mathematics achievement of American 9-, 13-, and 17-year-olds, using a deeply stratified, multi-stage probability sample design. This report documents procedures used in the 1977-78 mathematics assessment and also describes changes in procedures between the assessments. Described are specific procedures to develop objectives and exercises, draw the assessment sample, prepare materials for the assessment, administer and score the items, and analyze results. Availability of materials providing information about the results of the assessment is summarized in the final chapter. (Author/MK)

The 12 lessons presented in this guide are structured so that they may be integrated into science lessons in 7th, 8th, or 9th-grades. Suggestions are made for extension of study. Lessons are approached through classroom role-playing of outer space visitors who seek to understand energy conversion principles used on Earth. Major emphasis is placed on energy flow-through systems. Energy alternatives for the future are also examined. (Author/RE)

This study investigates factors which may adversely affect the technical education of Hispanic bilinguals. Hispanic bilingual students (N=36) majoring in science or engineering at the University of Massachusetts were given a variety of exams in both English and Spanish aimed at ascertaining the level of certain mathematically related skills. An English version of the exams was also administered to 38 monolingual science and engineering majors. Results indicate that math performance is very dependent upon language proficiency for bilinguals, but not for monolinguals. (Author/CS)

Pub Type—Reports - Research (143) — Speeches - Meeting Papers (150)

**EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.**

Descriptors—\*Academic Achievement, \*College Science, Conference Papers, \*Educational Research, Genetics, Higher Education, Science Education, \*Science Instruction, \*Teacher Behavior

Identifiers—\*Clarity

Reported are results of a study designed to determine the experimental effect of three low-inference teacher clarity variables on student achievement in science. College students (N=41) were randomly assigned to one of two groups defined by the teacher's clarity in the lesson, i.e., high clarity versus low clarity. After a lesson in basic genetics concepts, the subjects completed a test on the contents of the lesson and then rated the lesson presentation. Students in the high clarity group achieved more (although not significantly) than did students in the low clarity group. Students perceived the high clarity lesson as significantly clearer than the low clarity lesson. (Author/CS)

Presented is a compendium of quantitative information portraying science education in the United States. The data, gathered from a wide variety of sources, are assembled into six chapters including resources, participation, attitudes, goals and needs, test data, degree data, and employment in science and engineering. Each entry consists of a chart and sometimes a corresponding table printed on the same page. Many of the observations on the individual entry pairs are assembled as highlights, introducing each chapter in order to provide a convenient overview of the content of the chapter. (Author/SA)

Descriptors—\*Cognitive Processes, Educational Strategies, Elementary Education, Elementary School Mathematics, \*Inservice Teacher Education, Instructional Materials, \*Mathematics Education, \*Mathematics Instruction, Mathematics Materials, Mathematics Teachers, \*Problem Sets, \*Problem Solving

This introductory book of a two-part publication, designed as an in-service tool for teachers of grades K-9, is based on the postulate that a teacher should become a better problem solver in order to teach problem solving more effectively to students. This booklet provides an overview of problem solving as a process used daily by all individuals and as a curriculum goal important to all disciplines. A substantial portion of the booklet is devoted to introducing strategies, methods useful in getting started on problems, and successfully solving them. Though the booklet uses mathematical problems as the medium for problem solving discussions and activities, the techniques have application to virtually any problem area. The booklet is intended for interactive use, it may be studied individually or be used by groups of teachers. It is planned in sections which are preceded by objectives in that section. The major portion uses a strategies approach to problem solving. Sections are organized by clusters of related problem solving strategies. Each strategy of a cluster is discussed and illustrated in the solution of a problem. (Author/MK)

This second booklet of a two-part publication, designed as an in-service tool for teachers of grades K-9, concerns the teaching and curriculum aspects of problem solving. It is a digest of selected topics integral to successful problem-solving instruction. The resource is organized into independent units for individual reference or group in-service use. These units can be employed in a variety of ways. Self-contained topics may be selected as needed by teachers engaging in problem-solving instruction with their classes. Individual units may serve as the topic for in-service meetings conducted by supervisory staff. Particular units can be selected for periodic sustained study throughout the school year as a comprehensive in-service program or course on problem-solving teaching. The individual unit titles are: Introduction to Teaching Problem Solving; Research and Psychological Summaries; Looking Back Strategies; Teaching Considerations; Choosing Different Teaching Modes; Story Problems and Number Sentences; Getting Started; Primary Instruction; Intermediate and Junior High Instruction; Creating a Problem Solving Environment; Organizing the Curriculum; and Calculators in Problem Solving. Identifiers—\*Indiana

This handbook for secondary teachers contains activities, exercises, and strategies designed to make more obvious and concrete the opportunities local communities and states provide for students to learn about and to participate in global affairs. A major objective is to help high school students develop the competencies needed to identify and to assess the significance of the contacts and connections between life in their states and hometowns and life in cities and villages around the world. Each of the 33 activities included in the handbook is self-contained with objectives, materials needed, and suggested procedures for classroom use. Many different kinds of activities are included. For example, in one activity students use a questionnaire to survey local civic, service, or religious organizations to determine ways they are linked to the world. Students organize the data from the questionnaires into charts and tables which they then analyze. In the "Take a Trip Abroad" activity students fill out a passport application, make plans for an imaginary trip, keep a record of their trip, and analyze passport information for their state. Other activities help students assess the impact of foreign students, recent immigrants, and ethnic restaurants on Indiana and its communities. In addition, ethnic ties and language influences are examined. Although the handbook was written for Indiana teachers, teachers from other states can easily use or adapt the activities. (Author/RM)

History: Grades 7-12, Teaching Guidelines. Education Office Bulletin 7.

Nova Scotia Dept. of Education, Halifax.

Pub Date—76

Note—103p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Comparative Education, \*Educational Objectives, Evaluation Methods, Guidelines, \*History Instruction, Junior High Schools, Secondary Education, Skill Development, Social Studies, Teacher Role, Teaching Guides, \*Teaching Methods

Identifiers—Nova Scotia

Guidelines are presented to aid junior high and high school social studies classroom teachers in developing and implementing history programs. Designed primarily for teachers in Nova Scotia, the guidelines can also help teachers in other locations develop basic history programs for grades seven through 12. The document is presented in seven sections. Section I presents a rationale for studying history and explains how history can help reinforce inquiry skills, communication skills, and cultural socialization. Section II enumerates general skills developed in history courses including reading, cooperation, participation, and cultural identification. Section III identifies historiographic skills including prioritizing facts, interpreting data, making value judgments, problem solving, developing hypotheses, and using research techniques. Section IV explores teaching methods (including group discussion, community projects, role playing, field trips, interviews, and learning packages) and evaluation methods (including research essays, document analysis, class participation, and essay and objective tests). Section V examines approaches to content by focusing on topics such as nationalism, power, imperialism, civilization, and historiography. Section VI outlines topics and presents objectives for teaching Canadian history, British history, and the history of western civilization at various grade levels. The final section presents a bibliography of books, audiovisual aids, and multimedia materials. A guide to social studies skills concludes the document. (DB)

Descriptors—Abortions, \*Children, Comparative Analysis, Contraception, Developed Nations, \*Family Planning, Foreign Countries, \*Parent Attitudes, Participant Characteristics, Policy Formation, Population Trends, Public Policy, Research Methodology, Social Science Research, \*Socioeconomic Influences, \*Values

Identifiers—\*Japan

The document, one in a series of seven reports from the Value of Children Project, discusses results of the survey in Japan. Interviews with 360 respondents provided data for the research. The volume is presented in six chapters. Chapters I and II describe the rationale, methodology, and the research sample. Chapters III and IV detail advantages and disadvantages and perceived economic costs and benefits of children. Chapter V focuses on family size preferences; family planning knowledge, attitudes, and practices; and predictions of family size and planning. Chapter VI summarizes findings, methodological problems, research needs, and issues related to population policy. Findings indicate that Japanese parents consider emotional rewards, child-rearing satisfaction, personal development of the parent, and benefits to the family unit as important advantages. Disadvantages include restrictions on alternative activities, financial costs, and emotional strain. Methodology problems included objections to some of the personal questions and translation from the original English language questionnaire. Future research should investigate how values of children would change if Japan were further developed economically and industrially and what substitutes for the pleasures of children could be derived. A conclusion relevant to population issues

is that imposing stringent policies to limit or influence family size would not work. Success could be found only in educating the public about population and environmental conditions and then waiting for individual action. (KC)

Strubbe, Mary A.

Aging in America: Fact, Fiction and Feeling.

Pub Date—79

Note—107p.; Presented at Annual Meeting of the National Council for the Social Studies (Portland, OR, November 20-24, 1979). Not available from EDRS in paper copy due to poor reproducibility of original document.

Pub Type—Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Age Discrimination, Age Groups, \*Aging (Individuals), \*Attitude Change, Attitude Measures, Mass Media, \*Negative Attitudes, \*Older Adults, Quality of Life, Secondary Education, Social Studies, Stereotypes, \*Student Attitudes, Units of Study

Thirteen lessons on aging in America, appropriate for the secondary school level, are presented. Each lesson is designed to take approximately one day and includes the goal, objectives, background information, reproducible student handouts, materials and equipment needed, procedures, and evaluation forms. In the first lesson students examine their feelings and beliefs about aging. Subsequent lessons identify changing demographic and social characteristics of older people in the United States, examine the diversity of the older population, determine criteria for judging "oldness," and analyze growing older in the United States through examining popular song lyrics. Also, students discuss the effects of age-grading (the process of judging certain behaviors as appropriate or inappropriate for certain age groups), the mass media as reinforcers of age stereotypes, and the needs and problems of older people, including their housing needs. Other topics include the role of work in society and its impact on the older population, the validity of pervasive age stereotypes, and methods for improving the quality of life for older Americans. A three-page test of concepts and issues and a list of teacher resources conclude the document. (KC)

Descriptors—Behavioral Science Research, \*Foreign Countries, \*Psychology, \*Research, Research Problems, Social Science Research

Identifiers—USSR

This paper outlines the theoretical foundations of Soviet psychology, analyzes major themes based on these foundations, and identifies relevance of Soviet psychological research for American investigators. Basic social and political factors that influence Soviet research include centralization of all scientific and academic endeavors and orientation of all psychology research toward the ideals of Marx and Engels. Major themes which govern psychological research are: 1) a genetic (developmental) theory which maintains that behavior can only be understood as the history of behavior; 2) a social interaction theory (human nature can be understood by examining human productive activity such as labor); 3) mediation (human psychological systems are mediated by sign systems such as speech and behavior patterns); 4) internalization (transfer of external actions to the plane of reflection); 5) motivation and intent (understood as a link between psychological processing and social action); and 6) goal setting (objectives of various activities at various levels of consciousness). For each of these themes, excerpts from major Soviet research works are presented and analyzed. Implications for western psychology research are related including that western researchers have largely ignored the importance of the regulative functions of speech, historical processes, the relationship of thought to language, and the relationship of cognitive processes to the overall nature of activity. Young Germans Assist the Third World.

Inter Nations, Bonn (West Germany).

Pub Date—79

Note—26p.

Pub Type—Collected Works - Serials (022)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Developed Nations, \*Developing Nations, \*Economic Development, Elementary Secondary Education, Foreign Policy, Higher Education, \*International Programs, Participation, Peace, Poverty, Socioeconomic Influences, \*Technical Assistance, Technological Advancement, World Problems, \*Youth

Identifiers—West Germany

Participation by West German youth in international assistance to developing nations is examined. International assistance is interpreted to include public, private, and religious programs and projects involved in technical advancement, food distribution, agricultural development, health improvement, and natural resource development in other nations. Examples of organizations which have provided many German youth with an opportunity to serve in developing nations include the United Nations, the World Food Programme, the World Bank, the World Health Organization (international); the German Agency for Technical Cooperation, the German Development Society, the German Foundation for International Development, the German Development Service (German government sponsored); Bread for the World, International Christian Peace Service, (religious), the Carl-Duisberg Society, and the German Academic Exchange Service (private). It is estimated that approximately 3,000 Germans, including many young people, participated in developing nations as development aid assistants in 1978. Specific projects in which German youth have participated include technical/handicraft projects in Africa, production cooperatives in Latin America, mechanical/vocational schools and a furniture factory in Kenya, and construction of a dam in Upper Volta. The conclusion is that German youth will be even more willing to participate in international assistance programs if they are educated to understand the interrelationships between developing and developed nations. Descriptors—\*Academic Achievement, \*Adults, Career Choice, Career Development, Comparative Analysis, Educational Benefits, Educational Status Comparison, \*Education Work Relationship, Females, Longitudinal Studies, Males, \*Quality of Life, \*Sex Differences, Sex Role, Social Science Research, Socioeconomic Influences

This paper explores how life course organization influences overall life quality and achievement, with emphasis on achievement differences between men and women. Life course organization refers to the level, timing, sequencing, and continuity of educational, occupational, marital, childbearing, and other commitments made by an individual over a lifespan. Findings from existing research on the educational/occupational attainment process generally indicate that women obtain fewer years of education than men and receive lower pay for similar jobs, even when the amount of education is controlled. Hypotheses are that variations in educational and work histories directly affect subsequent achievement and that the greater variability in life course patterns among women is related to women's lower achievement in adulthood. The sample (2,010 males and 2,025 females) was based on data from a longitudinal study in which over 400,000 men and women who were in high school in 1960 were questioned at ages 19, 23, and 29 regarding their family backgrounds, cognitive skills, knowledge levels, interests, and plans. Findings indicated clear sex dif-

SO 012 456

ferences in continuity of schooling and work between high school and age 29, negative impact on income from work interruptions (mostly by women), and persistence of sex effects on job prestige and income in spite of controls. The conclusion is that the continuity of schooling and work do have some value for explaining differences in subsequent achievement between men and women. (DB)

Descriptors—Case Studies, \*Comparative Education, Conference Papers, Lifelong Learning, \*Nonformal Education, Nontraditional Education, Program Descriptions, Volunteers

Identifiers—Africa, Chile, Ghana, Honduras, Japan, Kenya, Mexico, Poland, Turkey, West Germany

This document contains the papers delivered at the New England Regional Meeting which focused on the theme of International Perspectives on Nonformal Education. The keynote address provides a state of the art of nonformal education and discusses its successes, limitations, and future challenges. The first group of papers presents philosophical and programmatic concerns of nonformal education. One paper discusses the ideological presumptions of nonformal education. The collaborative process in international nonformal education programs is examined in another paper. A third paper discusses the instructional staff for out of school education and a look at voluntarism. The second group of papers examines nonformal education in various countries and presents case studies of specific nonformal education projects. For example, one paper describes the Village Polytechnic in the rural areas of Kenya as a potential solution to the problem of skyrocketing unemployment of thousands of primary school graduates who are unable to continue their formal education. Another paper discusses the Haiku and the tea ceremony of Japan. Other papers look at nonformal education in Turkey, West Germany, Honduras, Chile, Ghana, Poland, Africa, and Mexico. (Author/RM)

Identifiers—Afghanistan, China (Tibet), Hinduism, India

The bibliography lists and annotates 111 multimedia teaching aids for instruction in South Asian Studies at the elementary, secondary, and collegiate levels. The collection listed is housed in the South Asia Media Center at Kansas State University in Manhattan, Kansas. Topics covered include the culture, economics, daily life, politics, religion, important figures, geography, and art of South Asian countries such as India, Afghanistan, Bangladesh, Pakistan, Tibet, and Nepal. Materials are organized according to type of media such as films, videocassettes, sound filmstrips, silent filmstrips, filmloops, slide kits, slides and cassettes, multimedia kits, and realia. Each entry, arranged alphabetically by title, includes running time or number of frames, notation of color, date, producer, appropriate educational level, and daily and weekly rental rates. A brief annotation describes the content of the entry. Full ordering information appears in the introduction to

the document. Alphabetical and country indices are included. (CK)

Descriptors—\*Aesthetic Education, \*Art Education, Curriculum, Educational Needs, \*Educational Philosophy, Educational Research, Educational Sociology, Elementary Secondary Education, Higher Education, \*Museums, Research Methodology, \*Socialization, Student Needs

The document contains two essays on art and aesthetic education. The first examines the ideology of art education from the standpoint of phenomenological sociology. Using this approach, the researcher can adopt an ethnographic, historical, and/or cross-cultural approach to analyze how a phenomenon (for example, an ideology of art education) appears. These approaches reveal that beliefs about art education have been the same for at least 80 years. The overall aim appears to be to shape citizens who are achievement oriented, produce and consume excellence, and contribute to the progress of civilization. These views neglect the fact that art is a mode of giving meaning to one's experience. Also, both student teachers and children are dependent upon the art educator's power to define the structure of the art experience. The implications for art education research are numerous. The second paper reports results of a study of the aesthetic socialization of children during art museum tours. The researcher recorded verbal interchanges between museum personnel who are guides and children in an art museum for a three-month period. Results illustrate that museum guides indicated that art works of high value most often belong to the wealthy and privileged; one is to have feelings about artworks; artworks are to be looked at and enjoyed; and there are many social conceptions about art. Implications are that teachers and children are vulnerable to the guides' interpretations about art and aesthetic knowledge. (KC)

Identifiers—\*Hermeneutics, \*Phenomenology, \*Praxiology

The essay argues that current artistic practices reflect a dated formalistic aesthetic, and that the hermeneutic-phenomenological position, although superior to the formalist approach, is limited. (Hermeneutics is a study of the methodological principles of interpretation; phenomenology is an ethnographic, historical, and/or cross-cultural analysis of a phenomenon.) A new aesthetic direction is proposed. The author identifies three deep anthropological interests which characterize man: the interest in controlling an objectified environmental world; in communication, characterized by the hermeneutic-phenomenological sciences; and in emancipatory self-reflection. An historical overview proves that the development of Western art reflects man's need to control his environment. This "scientific formalistic aesthetic" exists at the expense of the other two interests. Hermeneutics and phenomenology have provided new stimulus for research in art education since the mid 1800s by

recognizing man as an historical, cultural, and valuing creature. However, emphasis is given to the selection, mediation, and interpretation of aesthetic information, minimizing man's most important achievement – the active shaping and modification of himself and the environment. Thus, a new direction, praxiology, is preferred. The approach is characterized by a political and moral commitment which is in a state of constant antagonism with reality. The praxiological artist must be a critical philosopher who creates visual discourse which raises the viewer's sensitivity to the reality of the human environment. (Author/KC)

Descriptors—Citizenship, \*Citizenship Education, \*Competency Based Education, \*Educational Assessment, \*Educational Objectives, \*Measurement Techniques, Minimum Competencies, Performance, Secondary Education, Skill Development, Social Studies, Testing, Test Items

This monograph explains the need for graduating high school seniors to demonstrate minimum competence in citizenship and suggests performance-related assessment tasks to help school authorities determine whether these competency requirements have been met. Minimum citizenship competencies are interpreted to include essential skills and concepts which are necessary for responsible participation in the American political system. Included in the citizenship curriculum should be information on the role of economics, government, and history, and the impact of world affairs on the individual. The document is presented in five major chapters. Chapter I introduces the program and offers background information on competency requirements. Chapter II suggests how to organize a minimum competency program. Basic organizational features are identifying competencies and student performance indicators, determining assessment procedures and performance standards, and deciding on assessment strategies. Chapter III suggests how to develop performance-related and paper-and-pencil testing instruments. Chapter IV lists minimum citizenship competencies including the ability to recognize and/or demonstrate citizenship rights and responsibilities and to demonstrate understanding and/or knowledge of historical information necessary for effective citizenship. Chapter V presents a bibliography of 20 works on competency testing and related topics. The document concludes with an appendix containing sample performance indicators and test items. (DB)

Descriptors—Concept Formation, Conference Proceedings, Curriculum Development, \*Educational Objectives, Elementary Secondary Education, \*Evaluation Criteria, Formative Evaluation, Higher Education, Inservice Education, Instructional Development, \*Multicultural Education, Teacher Developed Materials, Teacher Education

The document presents information on planning, teaching, and evaluating multicultural education programs. Although most of the examples are based on current multicultural projects in New England, the authors believe that the material presented can also be useful to classroom teachers in other regions. The document contains two components. The first component describes a conference at which teachers exchanged ideas on multicultural education,

identified multicultural education resources, and developed ideas for relating multicultural concepts to social studies classroom activities. In addition, evaluation data regarding conference activities and objectives is included. The second component presents materials, conference papers, objectives, and resources to help teachers set up a multicultural education program. Information is presented on approaches to multicultural education, the role of multicultural education in the curriculum, multicultural curriculum dimensions for teacher and inservice education, regional multicultural resources (mostly in New England) and activity ideas for various grade levels including analyzing reading assignments and television programs, participating in field trips, and comparing values held by different ethnic groups. **The Democratization of Anthropology: Anthropology in the Community College.**

Clapham, Stephen Furlow, Richard H.

Note—12p.; Paper presented at Annual Meeting of the American Anthropological Association (Cincinnati, OH, November 1979). Not available from EDRS in paper copy due to light print type.

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Anthropology, Attitude Change, \*Community Colleges, Community Involvement, \*Educational Needs, Educational Objectives, \*Educational Trends, Faculty Development, Higher Education, Intellectual Disciplines, \*Program Development, Two Year Colleges

Trends in anthropology education at the community college level are examined with particular regard to current problems, relationship to the anthropology profession, objectives, anthropology's uncertainty of focus, and predictions of future developments. The objective is to point out to anthropologists and other interested people how community colleges can help disseminate knowledge about anthropology's purposes and activities. Until recently, community college anthropology has been considered a marginal arm of the discipline, community college teachers have had only a tenuous claim to professional status, and the American Anthropological Association has indicated no interest in formal affiliation. Currently, however, community colleges are staffed by teachers (PhDs as well as MAs) who are attempting to defend their role as professionals and alert the discipline to the merits and potential of anthropology in the community colleges. Specific ways in which anthropologists in community colleges can contribute to a better understanding of the discipline include emphasizing teaching the basic tenets of anthropology to a student population which crosscuts all sectors of the local community, articulating broad concepts instead of specific research interests, developing courses to reflect a wide range of student capabilities, stressing anthropology's relevance to contemporary society, stimulating communication with other anthropologists, and participating as observers and/or consultants in local, national, and international affairs. Descriptors—Annotated Bibliographies, Community Resources, Indexes, Library Guides, \*Library Materials, \*Local History, Periodicals, Research Methodology, State History

Identifiers—\*Family History, \*Genealogy, New York  
This booklet is intended to aid persons in using the extensive collections of the New York State Library for genealogical research. The library has assembled special files and reference works to help persons in New York State go through the steps necessary to trace their ancestry. As a first step, researchers should study personal family records. A special card file marked "Surnames" will refer them

to books or parts of books on a particular family. The second step involves consulting the "Index to American Genealogies" to identify genealogies embodied in local history. When a family name or genealogy cannot be found in the genealogies, a knowledge of the localities where ancestors lived is of great value. At this point the researcher should search through local histories which may reveal names and facts. To help the researcher through this process the booklet contains many different kinds of aids and suggestions. For example, a floor plan of the library is included as well as concise descriptions of how books in the local history and genealogical area are shelved. A section of the booklet entitled "Guide to Research Materials in the Local History and Genealogy Area" describes and contains copies of card files which persons would use to trace their ancestry. A large portion of the booklet contains annotated listings along with library call numbers of helpful resources. Included are listings of genealogical indexes, suggested readings on genealogical research, leading genealogical periodicals, aids in the reference section, state records, local records, and church records. **Smaller College Sociologists Participation in Professional Organizations: Obstacles and Opportunities.**

Pub Date—Mar 78

Note—18p.; Paper presented at Annual Meeting of the Southern Sociological Society (New Orleans, LA, March 1978).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*College Faculty, Higher Education, \*Professional Associations, Professional Development, \*Professional Recognition, \*Small Colleges, \*Sociology, Success, Teacher Behavior, \*Teacher Participation

This paper examines the nature and degree of participation by sociologists associated with smaller colleges in the United States in professional sociology organizations. The objective is to encourage these sociologists to become more active in their professional organizations. Professional participation is interpreted to include research production, journal publication, and active membership in state, regional, and national professional groups. Because sociologists from smaller colleges are underrepresented in these ventures, it is often assumed that they are not competent to broaden their role as teachers of sociology to include research and professional participation. Upon examination, however, other reasons for this low-level of participation become evident. These include that sociologists in smaller colleges have allowed their non-participatory role to be defined for them by others, often possess feelings of inferiority which inhibit them from seeking more active participation, may suffer from insufficient professional motivation, and are isolated from professional resources. Four types of isolation are identified—professional, self-imposed, institutional, and organizational. To counteract these obstacles, professional organizations should make serious efforts to increase access to sociologists from smaller colleges. The sociologists, in turn, should utilize every participatory opportunity including giving papers, serving on committees, and interacting personally with association members. (DB)

**Research on International Interchanges: Recommendations from the President's Commission Experience.**

Pub Date—Mar 80

Note—15p.

Pub Type—Opinion Papers (120) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Evaluation Needs, Graduate Study, Higher Education, \*International Educational Exchange, \*Research Needs, Secondary Education, \*Student Exchange Programs, \*Teacher Exchange Programs, Undergraduate Study

This report by the President's Commission reviews literature on educational international exchanges and makes recommendations for further research. International exchanges include exchanges in both directions and at all levels: high school, college undergraduate and graduate studies,

and overseas teaching and research by school, college, and university staff. The commission found that research on international exchange is limited. A survey of the Fulbright Alumni Association, however, created much data for the evaluation of that program. Studies conducted by the General Accounting Office, the Rockefeller Foundation ("Corners of a Foreign Field"), the Ford Foundation ("International Studies Review: A Staff Study") relate mainly to overseas research by American scholars. The lack of new research on undergraduate study reflects the limited amount of federal funds which have gone to this sector. Thus, the President's Commission has recommended research to include data on the extent of international exchange, impact of teacher exchanges on curricula and teaching approaches, and impact of pupil experience on values and foreign language acquisition. At the undergraduate level studies should also include sex, major field, types of programs, students' financial circumstances, impact on choice of major or career, graduate study, and predeparture preparation. Faculty and scholar exchange research needs to focus on the contribution to foreign language and international studies programs. (KC)

The document describes women's studies courses suitable for traditional and nontraditional educational settings. It is intended for adolescent and adult women whose access to education and employment has been limited because of race, sex, or class discrimination. Included are seven course descriptions: 1) "Black Women Writers" which examines poetry and short stories with reference to self-image and images of family, work, and relationships; 2) An introduction to women's history in the United States which examines women's oral history, issues of women's economic and social survival, alternative lifestyles and work, and the lives of women omitted from textbooks; 3) "Reading and Writing About Women" in which students read poetry and present dramatic readings; 4) "Sex Roles and Socialization" which examines images and life stages of women; 5) "Women in Cross-Cultural Perspective" which includes topics on ethnocentrism, matriarchies, women in the family, women and work, and strategies for change; 6) "Women in Prison" which examines myths, what is really "criminal," the daily life of women prisoners, the writings of women in prison, young women and juvenile delinquency, and alternatives to imprisonment; and 7) "Women and Their Working Lives" which explores how the present economic structure and social expectations affect women's relationship to work, and provides practical knowledge for use in pursuing work. Each description provides objectives, teaching methods, a bibliography of resources, and an outline of sessions. (KC)

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120) — Reports - Evaluative (142)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Case Studies, Citizenship Education, Community Involvement, \*Community Leaders, Educational Objectives, Evaluation Criteria, Foreign Policy, Higher Education, \*Leadership Training, Models, Needs Assessment, Philanthropic Foundations, Policy Formation, Private Financial Support, \*Research Needs, \*Research Projects, \*World Affairs

The paper assesses four community based world affairs education projects—Columbus-in-The World (CITW), Kettering-Findlay Experiment (KFE), Community International Education Consultation (CIEC), Overseas Development Council, and Kettering Foundation Transnational Dialogues on Food and Development (TND). The objectives of the paper are to assess the contribution of these projects to the theory and practice of world affairs education at the local level and to develop a knowledge base regarding the relationship of citizenship and leadership skills to the foreign policy process. Data are presented for each of the four projects regarding objectives, planning, components, administration, follow-up community activities, problems, participants, and evaluation. Comparative analysis indicated that the projects had certain similarities (a desire to improve communication between citizens and policy leaders, gain information about the interrelationships of domestic and international affairs, and mobilize constituency leaders for grass roots educational activities) and certain differences (some focused on educational activities, some on community affairs, and some used local workshops extensively whereas others relied on national and international travel study experiences). The conclusion is that educators will develop more effective world affairs programs if they investigate evaluative material regarding strengths and weaknesses of existing programs. (DB)

Descriptors—\*Conflict Resolution, \*Decision Making, Educational Objectives, Higher Education, \*International Relations, School Community Relationship, \*Simulation, Student Participation, \*Teaching Methods, Violence  
 Identifiers—Terrorism

The use of simulation in teaching international relations is examined by evaluating how a simulation approach helped students in three institutions of higher education understand international terror. The project involved 97 students from three colleges and universities, and people with expertise in the community including campus police, the F.B.I., the press, the state patrol, and the federal Department of State. Students were first exposed to international terror in history, social science, and journalism courses. They then participated in an international terror simulation at a two-day conference involving students from the three colleges and the community experts. Participants were directed to respond to incidents of international terror including (unbeknownst to them at the outset) release of six hostages selected from among the participants. Evaluations indicated that students found the simulation exciting and worthwhile and that they were better able to appreciate the complexities of international terror as a result of participating in the simulation. Findings also indicated, however, that students were generally incapable of converting initial surprise into an orderly approach for solving problems and that they did not make very good use of professional expertise. The conclusion is that students will be better able to identify and apply learning gained in simulations to real life situations if teachers provide them with more complete orientation toward the problem upon which the simulation is based. Descriptors—Annotated Bibliographies, Political Affiliation, \*Political Issues, \*Politics, Postsecondary Education, Secondary Education, \*Speeches, \*Tape Recordings

Identifiers—\*Stevenson (Adlai II)

The document introduces and lists tape recordings of Adlai E. Stevenson's speeches from 1952 until his death in 1965. The objective is to supplement the tapes and to aid in their usage by offering background information. The guide is presented in two sections. Section I offers an overview of the political atmosphere in 1952 and 1956 and Stevenson's rise to national prominence. It also discusses the issues of the 1952 campaign, the personalities of the candidates, and three categories of speeches: (1) rally/whistlestop speeches; (2) speeches on major issues; and (3) inspirational speeches. An annotated bibliography lists five books representing a selection of the best sources of analysis of Stevenson's speaking style as well as some of the more interesting and less well known books about him. Section II, the major portion of the document, lists the speeches in chronological order, covering the tape number, date, occasion, and topic. The speeches date from the governor's report on January 2, 1952 to the last interview before his death on July 14, 1965. They include presidential nomination acceptance speeches, campaign speeches, press conferences, television appearances, interviews, ambassadorial speeches, and United Nations speeches. (CK)

Descriptors—Annotated Bibliographies, Anthropology, Bibliographies, Economics, \*Females, Feminism, Filmographies, Foreign Countries, Global Approach, Higher Education, Periodicals, Psychology, \*Social Sciences, Sociology, United States History, \*Womens Studies, World History

This annotated bibliography describes the contents and critically evaluates 654 social science books and collections of journal articles in women's studies. The objective is to assist in research and in the organization of undergraduate or graduate courses on women. The resources are presented in nine sections. Section I covers anthropology, including women in Africa, Asia, the Caribbean, Central and South America, the Middle East and Mediterranean countries, North America, and the Pacific. Section II lists resources in economics, with subtopics such as labor force participation, occupations, professional and managerial women, and working wives and mothers. Section III focuses on United States, international, and economic history. Section IV covers psychology, including sex differences, female personality and sexuality, and psychoanalytic theory. The sociology section presents books on women and society, marriage and motherhood, and sex roles and socialization. Section VI lists books on contemporary feminist thoughts, including the feminist movement. Final sections present bibliographies, related journals, and other reference tools. Each section includes a content overview and a list of general books on the topic, and is organized according to author. Full bibliographic information, except price, is included. The annotations describe the scope, content, and focus or thesis and include evaluative comments and statement of possible use. The majority of the books were published in the 1960s and 1970s, although basic earlier resources are included. Some entries are suitable for high school students. Author and subject indices conclude the book. (CK)

Education, Universities, \*World Affairs,  
World Problems

Relationships between mass-media coverage of  
international affairs and university-based expertise  
in international, language, and area studies are  
investigated. The report is presented in three major  
sections. Section I poses issues for debate: How im-  
portant is media in informing the American public  
about world affairs? Does it really matter if people  
are informed? and How can the autonomy and in-  
tegrity of the media be maintained? Ideas for action  
are also posed and include improving survey data  
about interest in international news, presenting the  
local angle on international news, and encouraging  
media cooperation with world affairs experts in uni-  
versities. Section II explores the connection be-  
tween the media and universities in international  
affairs. Topics discussed include strengthening the  
connection, improving career education in media-  
related fields, and reviewing research on the media  
and on international affairs. Section III relates  
American understanding of world problems to the  
media and to institutions of higher education. The  
conclusion is that area and language studies have  
improved greatly in recent years but that not  
enough attention has been paid to the professional  
information needs of journalists and others in the  
field of mass media. A bibliography concludes the  
report. (DB)

\*Distributive Education, Higher Education, Les-  
son Plans, \*Marketing, News Writing, \*Organiza-  
tional Communication, \*Publicity, \*Public  
Relations, School Business Relationship

The report describes procedures for teaching and  
administering a one-week course in publicity in a  
Principals of Marketing course at the University of  
Wisconsin-Stout. Emphasis is on helping college  
students develop communication skills. A major ob-  
jective is to help students be aware of the public's  
general lack of understanding of the free enterprise  
system and to teach them how to communicate with  
the public. Goals are to generate specific points of  
private businesses' positive social contributions and  
to develop and publish a news release item. Groups  
of six students work with a business firm on a prob-  
lem confronting the business relating to promotion  
or public relations. Two lessons focus on the need to  
communicate and suggestions on how to communi-  
cate. Section I emphasizes student awareness of the  
need to communicate. Activities include a pretest,  
film viewing, and reading. Section II focuses on  
writing and marketing a news release. Activities in-  
clude reading and discussion, and assigning each  
student a mini-project of writing and publishing  
his/her own press release. Each lesson plan includes  
time allotment, objectives, references, learning ac-  
tivities, and all related handouts. Emphasis through-  
out is on student-business involvement and  
cooperation. A short bibliography concludes the  
document. (CK)

Skills, Elementary Education, \*Energy, \*Energy  
Conservation, Fuel Consumption, Fuels, Grade 4,  
Grade 5, Grade 6, Intermediate Grades, Lesson  
Plans, Natural Resources, Plastics, \*Social Stud-  
ies, Teaching Guides, Units of Study

This teacher's guide contains a unit of study for  
teaching about energy in grades four, five, and six.  
The guide is self-contained and includes the fact  
sheets students need to work out the activity prob-  
lems. The unit is organized around the theme of the  
dome athletic stadium. The students begin by sur-  
veying the energy it takes to travel from their homes  
to the stadium and to operate all the machines that  
heat, cool, and light the huge arena. These energy  
users are then related to the sources from which the  
energy is refined or processed. After students dis-  
cover the great variety of direct uses of energy and  
the growth in the demand for more fossil fuel based  
power, they turn to a study of different indirect uses  
of oil for which the plastics industry serves as an  
example. Artificial turf provides the organizer for  
this section as students study the processing steps  
involved in making it. The impact of the gap be-  
tween U.S. consumption and production of oil and  
natural gas is explored in a puzzle-like activity  
which provides students with data and requires that  
they make personal decisions about conserving our  
increasingly limited supplies of oil and natural gas.  
In a concluding unit, students use a set of fact sheets  
on three alternative energy sources for the future  
and are asked to make a decision about using high-  
cost fuel to heat a stadium. Teacher background  
information on energy is also included in the guide.

Descriptors—Class Activities, Decision Making  
Skills, \*Energy, \*Energy Conservation, Fuel Con-  
sumption, Fuels, Grade 7, Grade 8, Grade 9, Jun-  
ior High Schools, Lesson Plans, Natural  
Resources, \*Natural Sciences, Secondary Educa-  
tion, \*Social Studies, Teaching Guides, Units of  
Study

This teacher's guide contains a unit of study for  
teaching about energy in grades seven, eight, and  
nine. The guide is self-contained and includes the  
handouts students need to work out the activity  
problems. The unit is developed around the con-  
cepts of shortage, scarcity, tradeoffs, investment,  
and decision making. Students develop these con-  
cepts by examining data from both the social  
sciences and the natural sciences. By participating  
in several decision-making activities students de-  
velop participatory skills as well as an understand-  
ing of the problems involved in energy decisions. The  
activities in which students are involved are many  
and varied and include using the newspaper head-  
lines to identify effects of a fuel shortage, using  
graphs and cartoons to define scarcity, and studying  
the appeals in advertising slogans to identify some  
of the ways attitudes are formed toward or away  
from conservation. The packet is divided into four  
units each of which contains two or three lessons. It  
is designed to last approximately two weeks. The  
unit can be extended if the teacher chooses some of  
the optional decision-making or research activities.

Teacher background information on energy is also provided in the guide. (Author/RM)

Noncoercive Inducements in International Conflicts.

Pub Date—19 Mar 80

Note—22p.; Paper presented at Annual Meeting of the International Studies Association (Los Angeles, CA, March 19, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Conflict Resolution, \*International Relations, Literature Reviews, Military Science, Peace, \*Policy Formation, Political Science, \*Politics, \*Problem Solving, \*Research Needs, Violence, World Affairs

This paper examines noncoercion in international struggles, reviews instances in which positive inducements were combined with or used instead of coercion, and analyzes conditions affecting the utilization and effectiveness of noncoercive means in conducting international relations. Coercion refers to actual and threatened violent and nonviolent negative sanctions including use of military force, threat of bombings, and economic boycotts. Noncoercion is interpreted to include persuasion (one party's efforts to convince an adversary to accede to its requests) and reward (positive sanctions and/or offers to the adversary of something it values and accepts in anticipation of a reciprocating concession). Examples of noncoercion in international struggles include negotiations between Israel and Egypt following President Sadat's visit to Jerusalem in 1977, the Nuclear Test Ban Agreement in 1963, and withdrawal of the Soviets from Austria in 1958. These instances were all part of larger conflicts beset with escalations, de-escalations, violence, negotiated agreements, and continuing tensions. The conclusion is that noncoercive means will be more effective in solving international struggles if all adversaries act on the assumption that even the most bitter enemies have some common interests, coercive alternatives are too costly, noncoercive inducements must be attractive and realistic, and the motives, interests and perceptions of all negotiators are of paramount importance. (Author/DB)

Jackson, Robert M.

Assessing a Political Skills Curriculum.

Pub Date—Mar 80

Note—31p.; Paper prepared for delivery at Annual Meeting of the International Studies Association (Los Angeles, CA, March 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Basic Skills, \*Citizen Participation, Citizenship Education, Collective Bargaining, Course Descriptions, Course Evaluation, Decision Making Skills, Games, Higher Education, Political Attitudes, Political Influences, Political Issues, Political Power, \*Political Science, Role Playing, Simulation, \*Skill Development, Teaching Methods

This paper describes and evaluates a political skills course for college students. Course objectives include teaching students to do the following: organize and run a meeting; bargain effectively; communicate within and between groups; manage a crisis; organize a political coalition; be aware of personal stress and some of the ways to reduce it; understand the substance of a number of current political issues; and learn about the dynamics of political conflict and cooperation. An attitude survey given to students at the beginning of the course revealed that the students were optimistic and positive about themselves and strongly felt that they would benefit and learn from the course. The major teaching method used in the course was simulations and gaming. Students were involved in many role-playing situations including values clarification and collective-bargaining exercises. In parts of the course students were confronted with a crisis situation, such as a Soviet laser attack of an American missile test flight, and had to make decisions under conditions of stress. On both the standardized and open-ended evaluations, students gave the course a very positive evaluation. On the standardized evaluation, a three item scale designed to measure student perceived learning was ranked consistently at the top or above University-wide norms (25th to

75th percentile range). In the voluntary, open-ended written evaluation, 78% of those who wrote evaluations explicitly made positive comments about the course. (Author/RM)

Descriptors—Abortions, \*Children, Comparative Analysis, Contraception, \*Cross Cultural Studies, Developed Nations, Developing Nations, \*Family Planning, Foreign Countries, \*Parent Attitudes, Participant Characteristics, Policy Formation, Population Trends, Research Methodology, Social Science Research, \*Socioeconomic Influences, Tables (Data), \*Values

Identifiers—Hawaii, Japan, Korea, Philippines, Taiwan, Thailand

The volume, first in a series of seven, discusses the Value of Children Project, a cross-cultural survey designed to analyze reasons for married couples' wanting or not wanting children. The sample includes participants from the Republic of China (Taiwan), Japan, the Republic of Korea, the Philippines, Thailand, and the United States (Hawaii). The document is presented in six chapters. Chapter I discusses theoretical and conceptual aspects of the research, reviews policy issues, and describes procedures in organizing the study. Chapter II deals with the methodology and Chapter III provides descriptive data on the samples in the six countries. These data include demographic characteristics, family size, contraceptive use and timing, and attitudes toward birth control and abortion. Statistics are categorized according to husband/wife perceptions of the advantages and disadvantages of having children, the five most frequently mentioned reasons for wanting children by country, son and daughter preference, and family size values. Chapter IV focuses on the relationship between variables relating to the value of children and culture and socioeconomic status. Chapter V examines background characteristics of participants by analyzing the strength of relationships among sociodemographic variables, economic and social-psychological dimensions of having children, and fertility and family planning indices. Chapter VI discusses findings and makes policy and program recommendations. A copy of the core questionnaire is provided. (KC)

Identifiers—\*Philippines

This volume, second in a series of seven reports of the Value of Children Project, discusses results of the survey in the Philippines. The study identifies major values and disvalues that Filipino parents attach to children. It also examines characteristics of parents that are related to values and disvalues. The document is presented in seven chapters. Chapter I discusses approaches and methods of the survey. Questionnaires were administered to 389 married parents. Items covered motives for having or not having another child, family size, family size characteristics, and family planning practice. Chapter II describes the child values and disvalues enumerated by parents. Chapter III examines questions of value differences between individuals by correlating value

indices and social characteristics of the respondent. Chapter IV deals with economic values associated with children. Chapter V considers to what degree child values and disvalues affect family size desires and Chapter VI considers their effect on several family planning indices. Chapter VII summarizes findings and suggests implications for population policy. Results indicate that values are happiness that children bring to parents, assistance they provide in old age, help with housework, love between parent and child, and the desire to learn about life through having children. The most prominent disvalue is financial burden; others are discipline and anxiety over children's health. Policy implications include further promotion of family planning and a change in the quality of social relations which could reduce family size desires. (Author/KC)

Identifiers—\*Hawaii

The document, one in a series of seven reports from the Value of Children Project, discusses results of the survey in Hawaii. Specifically, the study investigated the social, psychological, and economic costs and benefits associated with having children. The volume is presented in seven chapters. Chapter I describes the background of the study and summarizes findings. Interviews were conducted with 620 male and female respondents equally representative of Caucasian, Japanese, and Filipino groups. The emotional benefit of watching children grow and guiding their development was a predominant value. The major disadvantages included emotional and economic costs and restrictions. Chapter II discusses the sample and methodology of the research. Chapter III details positive and negative values of children including reasons for wanting sons and daughters, general attitudes toward children, and reasons for wanting or not wanting another child. Chapter IV focuses on economic costs and benefits and Chapter V concerns family size and family planning. Chapter VI discusses the value of children within the social context. The final chapter presents population policy recommendations and implications for future research. Recommendations include creating alternatives for some of the emotional satisfactions children provide, augmenting benefits that provide economic security, and eliminating government policies which ease the financial burden of children. Identifiers—\*Thailand

The document, one in a series of seven reports from the Value of Children Project, discusses results of the survey in Thailand. The project conducted interviews with 360 married couples in the vicinity of Bangkok. The volume is presented in seven chapters. Chapters I and II discuss the conceptual model, research methodology, and sample characteristics. Chapter III details responses concerning positive

and negative values of children including reasons for wanting daughters and sons, reasons for wanting a specified number of children, and general attitudes toward children. Chapter IV presents perceptions of economic costs and benefits of children. Chapter V focuses on family size and family planning including attitudes toward contraception and abortion, family planning knowledge and practices, and the relationship of family size and planning to participant background. Chapter VI describes the value of children and fertility within the social context. The final chapter summarizes findings and makes recommendations for population policy. Responses concerning the advantages of children centered around companionship, economic and general help (especially in old age), and continuity of the family name. Disadvantages included financial costs, concern over the child's health, and the responsibilities of parenthood. Policy recommendations include government insurance or pension plans to reduce parents' dependency on children in old age; a collective approach to social activities to reduce the need for many children; and educational efforts to change family size norms by emphasizing the economic and emotional advantages of a small family. Identifiers—\*Taiwan

The document, one in a series of seven reports from the Value of Children Project, discusses results of the survey in Taiwan. A sample of 216 young married couples with at least one child provided data for the survey. The volume is presented in six chapters. Chapters I and II discuss the value of children in Taiwan, the research methodology, and the sample. Chapter III discusses variables relating to the value of children: advantages, disadvantages, reasons for wanting and not wanting children, and economic benefits and costs. Chapter IV focuses on family size and family planning with reference to family size preferences, birth spacing, and birth control. Chapter V describes the value of children and fertility within the social context. The final chapter summarizes findings and makes policy recommendations. Results indicate that continuing the family name was the most important benefit, ranking above the emotional values of happiness and companionship. The most important disadvantage was the financial cost. Noise and disorder caused by children ranked second. A general recommendation is to design population policy by eliminating rewards and increasing costs of high fertility while permitting couples to act within a context of choice. Finding substitutes for personal growth and pleasure associated with children, weakening the value placed on having sons through changes in inheritance laws and religious practices, encouraging industrial modernization to reduce the need for parents to rely on their children for labor, and using television for educating the populace are specific recommendations. (KC)

Descriptors—Abortions, \*Children, Comparative Analysis, Contraception, Developing Nations, \*Family Planning, Foreign Countries, \*Parent Attitudes, Participant Characteristics, Policy Formation, Population Trends, Public Policy, Research Methodology, Social Science Research, \*Socioeconomic Influences, \*Values  
Identifiers—\*Korea

The document, one in a series of seven reports from the Value of Children Project, discusses results of the survey in Korea. The project conducted interviews with 378 married couples. The volume is presented in six chapters. Chapter I discusses the survey methodology and characteristics of the sample. Chapters II and III detail positive and negative values and economic benefits and costs of children. Chapter IV focuses on family size and family planning with reference to child spacing, attitudes toward contraception and abortion, and family planning knowledge and practices. A correlation between family background variables and family size and planning is also provided. Chapter V describes the value of children and fertility within the social context. The final chapter summarizes findings and makes recommendations for population policy. Results indicate that the most positive value of children for Korean parents is the happiness they bring to a family, pleasures derived from watching children's development, and incentives provided by children to succeed in life. Negative values include the emotional burden children place on parents, financial costs, and restriction of activities. Policy recommendations include designing family planning programs for the areas they will serve, fostering ideas of the social acceptability of a childless marriage, and making alternative activities more available and attractive while increasing the extent to which children interface with these activities. Descriptors—Area Studies, Comparative Analysis, Cultural Background, Foreign Countries, Governmental Structure, Human Geography, Learning Activities, North American History, Physical Divisions (Geographic), Physical Geography, Political Divisions (Geographic), Secondary Education, \*Social Studies, Units of Study  
Identifiers—\*Canada

The document presents the first of five units on Canada developed for classroom use in American secondary schools. This unit, an overview of Canada, offers a sequence of information sheets for students and class activity suggestions for teachers which use a comparative approach stressing an understanding of Canada from the viewpoints of both Canadians and Americans. The objective is to help students acquire general knowledge and an understanding of Canada and Canadians and to compare the Canadian experience and situation with that of the United States. Time allotment is one to three weeks. Topics covered are the physical regions, political regions, history, culture, and government of Canada. Activity suggestions, one for each topic, include brainstorming, debating, writing paragraphs, mapping, graphing, discussing, making a time line, and listing and comparing. Each activity lists objectives and materials needed, outlines teaching procedure, and offers teacher background information. Reproducible handout sheets are included. Appendices offer an activity about varying points of view of Canada, a Canadian word puzzle, and 23 multiple-choice test questions with an answer key. (CK)

Change, \*Social Action, Social Change, \*Social

History

The paper traces artists' social movements in the 1960s and 1970s and examines two results: (1) the stimulation of administrative coordination within and among established arts institutions, and (2) the creation of innovative arts institutions run by the artists themselves. Events leading up to these movements included the New Deal arts programs, which set a precedent for federal support, and the postwar economic expansion, which led to growing competitiveness and commodification of art, as a few artists received the most support. By the 1960s, artists mobilized to confront major arts institutions, demanding increased participation in decision making as well as increased representation of minorities and women artists. They also asked the institutions to become involved in major social issues. When no response was made, some artists in the mid-1970s organized and established artists' cooperatives and associations which attempted to meet their own needs by providing channels which allowed artists to reach the public directly and to deal with social issues. As a result, the art world today is divided into two parallel groups consisting of the alternative art world of cooperative galleries, artists' advocacy groups, and artists' publications, and the dominant patron/art/gallery/museum complex. Descriptors—Academic Achievement, Achievement Tests, Affective Measures, Class Activities, \*Educational Games, \*Educational Research, \*North American History, \*Program Effectiveness, \*Simulation, Socialization, Student Participation  
Identifiers—\*Canada

The report describes a study designed to ascertain the effectiveness of 12 board game simulations developed and used in a fifth grade Canadian history program. Questions examined include: 1) Does the use of board game simulations increase group participation and cultural, environmental, and historical awareness? 2) Does use of the games promote students' involvement, interest, interaction, motivation, and content acquisition? 3) Are some games more interesting than others? 4) Do the games and/or student interest have an impact on test scores? and 5) What characteristics of the games are more or less interesting? Twelve games were played relating to the Canadian fur trade, western settlement, Northwest Mounted Police, Canadian Pacific Railroad, and the Gold Rush. Seventy two students took part in the study. After game playing sessions, each student completed the 11-statement Gorman Interest Scale as well as several content questions pertinent to the game played. One week later students completed 18 general Canadian history questions. Results showed a positive and direct correlation between the games best liked and the amount of information retained. The socialization process became more positive as game playing sessions progressed. Conclusions showed that students were more interested in games allowing for many individual players decisions and those

demanding more involvement and cooperation. All games allowed for development of social interaction, leadership, and organizational skills. (CK)

**Between East and West: Instructional Psychology in Western Europe As a Possible Integrating Force.**

Pub Date—Apr 80

Note—12p; Paper presented at Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)—Information Analyses (070)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Behavioral Sciences, Cognitive Processes, \*Comparative Analysis, Comparative Education, Educational Philosophy, Educational Trends, Elementary Secondary Education, Higher Education, \*Intellectual Disciplines, Literature Reviews, \*Psychology, \*Research Needs, State of the Art Reviews

The paper presents an overview of developments within the discipline of psychology from the early 19th century until the 1980s. Emphasis is placed on differences between Soviet and American schools of psychology teaching and research and on the possible role of Western European psychologists in bridging the gap between these divergent approaches. Major differences between America and Soviet approaches to psychology include that American psychologists stress behaviorism (study of behavior instead of mental states) and cognitive psychology (an information processing approach), whereas Soviet psychologists base their work on a Marxist philosophical framework (as in the work of Vygotsky during the 1920s) and on an action-oriented approach (actions are the main objects of study and are viewed in light of their relationship to the pursuit of an individual's goals). Until recently, the American processing approach and the East European action-oriented approach have developed almost entirely independently of each other. It is suggested that because Western European psychologists are familiar with both approaches, they can facilitate a more open exchange of ideas between Soviet and American psychologists and can help American psychologists benefit from the positive aspects of Soviet psychology including use and application of systematic teaching experiments and development of more sophisticated techniques of qualitative diagnosis. **Reading Competence in Social Studies.**

Pub Date—79

Note—29p.

Pub Type—Opinion Papers (120)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Cloze Procedure, \*Content Area Reading, Criterion Referenced Tests, \*Diagnostic Tests, Educational Needs, Elementary Secondary Education, Readability, Reading Comprehension, Reading Difficulties, Reading Skills, \*Social Studies, Standardized Tests, Teaching Methods

Reading instruction is being incorporated as a natural part of the social studies curriculum because of the emphasis which is being placed on basic skills and teacher accountability. In order for long term improvement of reading/social studies skills to occur social studies teachers must develop a systematic and deliberate approach to reading instruction in their classrooms. To determine their students' reading abilities, most teachers are now using standardized tests. The paper argues that the data from tests have little instructional value and often convey a misleading notion about student achievement. The standardized tests should be replaced by criterion-referenced tests. The data which the latter yield are specific enough to permit a teacher to write a lesson or design a learning experience. As a model for classroom testing, the authors suggest that teachers use Larry A. Harris' "inverted pyramid" model. The total group is first tested at the macro level using the CLOZE technique. For those students who demonstrate an acceptable level of mastery, testing is ended. Students not screened out at this level are tested using other diagnostic techniques including CRISS (Content Reading Inventory in Social Studies) which was developed by the authors. Ultimately, the point of the "inverted pyramid" is reached in which individual students are being tested on their knowledge of specific skills and

concepts. The paper concludes by describing additional techniques that teachers can use with students to help them acquire specialized social studies reading skills such as organizing concepts. (Author/RM)

Descriptors—Basic Skills, \*Citizenship, \*Citizenship Education, \*Citizenship Responsibility, Communication Skills, \*Educational Objectives, Elementary Secondary Education, Information Utilization, \*Social Studies, United States History, Values

This publication outlines goals that a consensus of educators and lay persons consider important for K-12 citizenship and social studies education. In the 1981-82 school year, the National Assessment of Educational Progress (NAEP) will conduct a third national survey of the citizenship and social studies achievements of 9-, 13-, and 17-year-olds. In the past the citizenship and social studies assessments were conducted separately. Because there is a high degree of similarity between the goals considered important in both citizenship and social studies education, NAEP has combined the two areas into one comprehensive area for the 1981-82 assessment. This set of objectives is the product of that new combination. Five major citizenship/social studies objectives, each of which is then further broken down, are presented. Objectives I, II, and III focus on skills and understandings that enable people to study and evaluate themselves and their social and physical environment and to act as effective students. Objective I details skills necessary to acquire information. Objective II outlines the intellectual processes necessary to use information effectively. Objective III deals with examining one's own and others' personal beliefs and values and those skills that promote effective personal interactions. Objectives IV and V focus on understanding, appreciating, and participating in both the world community and the United States. Objective IV provides a view of human development, adaptation, and change. Objective V outlines significant aspects in the development of the United States. (Author/RM)

Descriptors—Art Appreciation, \*Art Education, Art History, \*Educational Assessment, \*Educational Objectives, Elementary Secondary Education, Fine Arts, Knowledge Level, Multiple Choice Tests, \*National Surveys

The document presents multiple-choice exercises designed by the National Assessment of Educational Progress (NAEP) to measure the ability of students (ages 9 through 17) to recognize and describe various works of art. The objective is to provide classroom teachers easy access to released and tested art assessment materials. For each exercise, information is presented on objectives, time required, administration, photographic and source information, and age groups for which the exercise is most appropriate. Exercises and documentation are in loose leaf format to facilitate sorting and copying. Most exercises involve photographs of art works. The document is presented in three major sections. Section I reviews assessment procedures upon which the exercises are based and explains docu-

mentation which accompanies the exercises. Section II presents objectives used to develop the exercises (including that students should know about art and perceive and respond to various aspects of art), describes the content range of the exercises, and offers a directory of exercises. The final section, which comprises the bulk of the document, presents approximately 100 multiple-choice exercises. Students are directed to view photographs of art works and answer questions concerning major themes, quality, color intensity, and the importance of art to the human experience. (DB)

Descriptors—Elementary Secondary Education, Foundation Programs, Higher Education, \*International Crimes, \*Jews, Museums, Philanthropic Foundations, Research Opportunities

Identifiers—\*Holocaust, \*Nazism

On November 1, 1978, President Carter established the President's Commission on the Holocaust and charged it with the responsibility of deciding what might constitute an appropriate national memorial to all those who had perished in the Holocaust. This publication is the report of that Commission which consisted of 34 members including survivors, lay and religious leaders of all faiths, historians, scholars, and congressmen. The Holocaust was a crime unique in the annals of human history, different not only in the quantity of violence—the sheer numbers killed—but in its manner and purpose as a mass criminal enterprise organized by the state against defenseless civilian populations. Remembering the Holocaust can instill caution, fortify restraint, and protect against future evil or indifference. The Commission made recommendations for memorials. First, a National Holocaust Memorial Museum which will present the Holocaust through pictorial accounts, films, and other visual exhibits shall be built in Washington D.C. Secondly, an Educational Foundation dedicated to the pursuit of educational work through grants, extension services, joint projects, research, and exploration of issues raised by the Holocaust shall be founded. Thirdly, the Commission recommends that a Committee on Conscience composed of distinguished moral leaders in America be appointed. This Committee would receive reports of genocide anywhere in the world. Additional recommendations included observance of "Days of Remembrance," ratification of the Genocide Convention, prosecution of Nazi war criminals in America, and the maintenance of Jewish cemeteries abroad. Strategies for encouraging positive interaction among adults are suggested. The objective is to help teachers and other adults who work with children to interact in more meaningful ways with other adults including teachers, parents, school volunteers, classroom visitors, and community members. Strategies are presented in five topical areas: 1) introducing interaction techniques, 2) recognizing silent signals, 3) setting aside classroom time for interacting, 4) encouraging interaction among adults involved in educating young children, and 5) improving written communications between teachers and parents regarding children's progress in school. Illustrations for each topic are presented in

the form of cartoons and/or graphics. Adults participating in the interaction activities are directed to analyze various types of interactions, suggest ways in which specific types of interactions could be made more positive, identify non-verbal messages conveyed in a variety of ways including posture and facial expression, develop planning schedules which allot varying amounts of time to interacting activities, explain to parents and volunteers what is expected of them as class helpers during a simulated parent-teacher interview, and write a variety of model letters to parents and other adults who might be encountered in an educational setting. Identifiers—Interdependent Learning Model

This teaching guide is the first of three volumes designed to teach Afro-American children street/folk/musical games in the elementary classroom. It is one of the Interdependent Learning Models (ILM) whose overall objective is for teachers to use the cultures of their students as vehicles for teaching academic skills and content. This volume focuses on ten traditional folk and clapping and chanting games. An introduction offers an historical overview of games, the definition of folk and street games, and a rationale for using games in the classroom which explains the effects on learning, attention, self-concept, and physical development, as well as benefits for teachers and schools. The second chapter defines the games as Transactional Instructional Games (TIGs), lists distinguishing features of TIGs, suggests teaching methods, and offers an implementation checklist. The ten games follow: Frog in the Bucket, Stick Out, Bobbing Needle, See Aunt Dinah, Emma You My Darling, Chicken and a Chicken, Skip to the Barbershop, Johnny Cuckoo, Little Jonny Brown, and Riley. For each game background information, lyrics, directions for action/movements, and learning objectives relating to academic, physical, and social skills are presented. Line drawings illustrate the actions when necessary. All games are for groups, stress singing and clapping in rhythm, and are non-competitive. A tape cassette, available from ILM, records a group of children with a teacher singing and clapping the songs. (CK)

Descriptors—Elementary Secondary Education, \*Geography Instruction, Higher Education, Human Geography, \*Interdisciplinary Approach, \*Music, Music Appreciation, \*Physical Geography, Teaching Methods

This paper provides examples of how music can be

used in geography instruction at the elementary, secondary, or college levels. The occasional use of music can foster imagination and promote greater aesthetic awareness with regard to landscapes and human situations. Many concepts and terms in physical geography can be lined with music. A good example is the Czech "Vltava" from the symphonic cycle "Ma Vlast" composed by Bedrich Smetana in 1874 when he was totally deaf. This composition, used in conjunction with color slides of the landscape which correlate with the music, can be used to show students the course of the river Vltava as it flows through woods and meadows, past villages, through rapids and then as a broad and noble river approaching Prague. Another example is the "1812 Overture" which, with its graphic and melodious representation of events surrounding the Battle of Borodino, can be an exciting catalyst for various interrelated concepts in lessons which range from glacial deposition to the North European plain and Soviet settlement patterns. The paper goes on to list musical selections which can be descriptive of land and sea scapes, climatic conditions, historical events and which may be evocative of the ethos and culture of political areas and national groups. Descriptors—\*Art Education, Childhood Interests, Data Analysis, \*Educational Assessment, Educational Needs, Educational Objectives, Educational Research, Educational Trends, Elementary Education, Program Descriptions, Program Evaluation, School Surveys, \*State of the Art Reviews

The document presents a report on the role and status of arts education in a national sample of 13 elementary schools. It focuses on how conditions of elementary schooling affect arts programs, whether arts education is an important part of the total educational experience, and the degree to which arts education furthers creativity and artistic/aesthetic goals. Data were collected through classroom observations; surveys of students, teachers, parents, and administrators; interviews with students and teachers; and analysis of curriculum materials. Topics investigated included amount of time spent on arts activities, student and teacher interest level, teacher training in art, availability of art specialist help, interactions between students and teachers during art class, principals' attitudes about the importance of arts programs, and school resources devoted to art. Findings indicated that the arts joined science and physical education at the lowest status position in the schools' curricula, students were encouraged to follow directions rather than be creative, and most students rated the arts as interesting, enjoyable, and relatively easy. The conclusion is that arts educators should examine existing arts practices and general schooling conditions before advocating increased support for current programs or recommending changes. This paper describes a computer-assisted instruction program which was used in a senior high school local government course. In the fall of 1978, a contract was worked out between four senior American government students who were also studying fifth year mathematics. In return for writing a computer program on local government, which would count

as 25 percent of the second nine weeks grade in both classes, the students were given some release time from regular classroom activities in both the government and the mathematics classes. Some homework was also suspended for these students. The program was written in basic computer language for a TR-80 Radio Shack Level II computer. The particular data statements were designed to question students on local county government. The computer logic, however, could be used in any other subject area and the teacher would only have to develop different data statements to fit the different subject area. The data for the local government course consisted of 99 questions—33 questions each of multiple choice, true or false, and fill in the blank. The program was used in various ways. For example, individual students used the computer for remedial work. The program has also been used as a pretest of the student's knowledge of local government. The program provides direct feedback since incorrect responses are immediately noted, students are given correct answers, and students are given page numbers in the textbook when they need extra help and information. The program has increased student interest in the course. (Author/RM)

Descriptors—American Indians, Blacks, \*Colonial History (United States), \*Females, Feminism, Learning Activities, Occupations, \*Revolutionary War (United States), Secondary Education, Sex Discrimination, \*Sex Role, Social Studies, United States History, Womens Education, \*Womens Studies

The document, one in a series of four on women in American history, discusses women in the Colonial Era and the Early American Republic (1607-1820). Designed to supplement high school U.S. history textbooks, five chapters are devoted to women who were both famous and those who were not well known. Chapter I focuses on Anne Bradstreet, and religious dissenter Anne Hutchinson are discussed. The plight of female indentured servants and black slaves is portrayed through writings and advertisements from that period. Chapter II covers women, family, and home in colonial times. The lives of black, white, and Native American women are contrasted. Chapter III focuses on colonial occupations of women. Diary excerpts depict lives of female shopkeepers, plantation managers, printers, doctors and midwives, innkeepers, and school mistresses. Chapter IV, "Women in the American Revolution," discusses the Daughters of Liberty groups and the role of women in the war effort. Chapter V is concerned with the rights of women during this era. Letters and diaries portray women who questioned their subordinate role in society, marriage, and education. The chapter concludes, however, that by the 19th century, the passive, ornamental lady set forth in ladies' books and female academies was becoming the ideal of femininity. Questions and suggested activities are provided at the end of each chapter. (KC)

The document, one in a series of four on women in American history, discusses women in the ages of expansion and reform (1820-1860). Designed to supplement U.S. history textbooks, the book is presented in six chapters. Chapter I describes the "true woman," an ideal cultivated by women writers, educators, and magazine editors. The four virtues were piety, purity, submissiveness, and domesticity. Chapter II focuses on women in the economy. The diary of Frances Kemble, mistress of a plantation in Georgia, describes the physical sufferings of her female slaves. The roles of women in the industrial revolution, professions, and organized labor are also discussed. Chapter III, "Women and the Spirit of Reform," depicts the works of Frances Wright and Dorothea Dix in slavery, criminal, and mental health reform. Pioneers in education for women are also portrayed. Chapter IV concerns women in the abolition movement. The chapter contains sections on the activities of white and free black women in the fight against slavery. Chapter V discusses the movement for women's rights in terms of Lucretia Mott, Elizabeth Cady Stanton, Susan B. Anthony, Lucy Stone, and Amelia Bloomer (who popularized the revolutionary and liberating wearing apparel for women). Chapter VI describes female editors and writers such as journalist Anne Royall, Margaret Fuller, "Godey's Lady's Book" editor Sarah Josepha Hale, Harriet Beecher Stowe, and Emily Dickinson. Questions and suggested activities are provided at the end of each chapter. (KC)

Descriptors—\*Civil War (United States), \*Females, Feminism, Learning Activities, Occupations, Organizations (Groups), \*Reconstruction Era, Secondary Education, Sex Discrimination, \*Sex Role, Slavery, Social Action, Social Studies, Teachers, United States History, Womens Education, \*Womens Studies

The document, one in a series of four on women in American history, discusses the role of women during and after the Civil War (1860-1890). Designed to supplement high school U.S. history textbooks, the book is comprised of five chapters. Chapter I describes the work of Union and Confederate women in the Civil War. Topics include the army nursing service, women in the military, and women who assumed the responsibilities of their absent husbands. Chapter II focuses on black and white women educators for the freed slaves during the Reconstruction Era. Excerpts from diaries reveal the experiences of these teachers. Chapter III describes women on the Western frontier. Again, excerpts from letters and diaries depict the Lewis and Clark guide, Sacajawea; pioneer missionaries adjusting to frontier life; and the experiences of women on the Western trail. Employment and equality on the frontier are also discussed. Chapter IV notes the progress of women after the Civil War. Although women were still excluded from political leadership, they began participating more actively in industry, education, and the professions. Topics include women in law, medicine, science, and architecture. Chapter V focuses on women's organizations: labor, the suffrage movement, and social

clubs. Questions and suggested activities are found at the end of each chapter. (KC)

The document, one in a series of four on women in American history, discusses the role of women in the Progressive Era (1890-1920). Designed to supplement high school U.S. history textbooks, the book is comprised of five chapters. Chapter I describes reformers and radicals including Jane Addams and Lillian Wald who began the settlement house movement; Florence Kelley, who fought for labor legislation; and Emma Goldman and Kate Richards O'Hare who became political prisoners for speaking against World War I. Chapter II focuses on women in factory work and the labor movement. Excerpts from diaries reflect the working conditions in factories which led to women's involvement in the AFL and the formation of the National Women's Trade Union League. Mother Jones, the Industrial Workers of the World, and the "Bread and Roses" strike (1912) of 25,000 textile workers in Massachusetts are also described. Chapters III and IV trace how women got the vote through the decades of struggle and argument, the slowing down of the suffrage movement, its revival by a younger generation, the militants and Alice Paul, and the work of Carrie Chapman Catt in ratifying the 19th Amendment. Chapter V is concerned with women in arts and letters during the Industrial Age: Charlotte Perkins Gilman, Ida Tarbell, Sarah Orne Jewett, Mary Wilkins, Mary Wilkins Freeman, Kate Chopin, Edith Wharton, and Willa Cather. Women painters, photographers, composers, and dancers are also noted. (KC)

**A Rationale for the Teaching of Psychology in the High Schools.**

Pub Date—Sep 79

Note—15p.; Paper presented at Annual Meeting of the American Psychological Association (New York, NY, September 1979).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Curriculum, \*Educational Needs, \*Educational Objectives, \*Educational Practices, Literature Reviews, \*Psychology, Secondary Education, Social Sciences, Social Studies, State of the Art Reviews, Student Interests

The author presents a rationale for adding psychology to the high school social studies curriculum. Also, changes within the environment of secondary schools which affect educators' willingness to offer psychology courses are identified. Approximately 750,000 high school students are currently enrolled in some sort of psychology course. In spite of this impressive enrollment figure, however, many educators argue against including psychology in the high school curriculum. Reasons for not including psychology in the curriculum are that teachers are not sufficiently trained in psychology to teach it well; students are too immature to understand psychological concepts before college; and psychology focuses on personal adjustment rather than intellectual concepts. The rationale for including psychology in high school is based on four major premises: that it is already taught successfully in many schools, offers high school students a chance to work with a scientific discipline before college,

prepares students for a service-oriented society, and can help students adjust to society. Factors influencing the increase in psychology courses in high school include a high degree of student interest, recognition that psychology can teach students about relating to a fast-paced world in which facts soon become dated, and belief on the part of teachers and parents that psychology will help adolescents resolve questions concerning personal worth and meaning. Descriptors—Bibliographies, Blacks, Chinese Americans, Class Activities, Elementary Secondary Education, \*Ethnic Groups, \*Ethnic Studies, History, Instructional Materials, Italian Americans, Jews, Polish Americans, Puerto Ricans, Resource Materials, Student Teacher Relationship, Teacher Developed Materials

Identifiers—Ethnic Heritage Studies Program

This ethnic studies resource guide contains background readings and lesson outlines on various ethnic groups which elementary and secondary teachers can use to prepare classroom lessons. The guide was developed by teachers who attended a workshop sponsored by a federally funded ethnic studies project of the New York City Board of Education. The guide consists of two major sections. The first section contains historical and cultural background readings for teachers on the following ethnic groups: Black Americans, Chinese Americans, Greek Americans, Irish Americans, Italian Americans, Jewish Americans, Polish Americans, and Puerto Rican Americans. Also included for each ethnic group are bibliographies of print and nonprint materials for both students and teachers. The second part of the guide contains lesson ideas and activities that teachers can use to teach about the various ethnic groups. Included among the many suggestions for classroom activities are having students read books, view filmstrips, participate in classroom discussion, learn songs, play ethnic games, make picture books, and take field trips. Mainstreaming in the Social Studies. Bulletin 62. National Council for the Social Studies, Washington, D.C.

Pub Date—80

Note—105p.; Photographs throughout document may not reproduce clearly.

Available from—National Council for the Social Studies, 3615 Wisconsin Avenue, N.W., Washington, DC 20016 (\$4.95)

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Educational Legislation, \*Educational Needs, \*Educational Objectives, \*Educational Practices, Elementary Secondary Education, Equal Education, Learning Activities, Learning Disabilities, \*Mainstreaming, \*Social Studies, Teacher Role, Teaching Methods

The bulletin explores various aspects of mainstreaming handicapped youngsters into regular K-12 social studies classrooms. It is intended to give classroom teachers practical advice on dealing with the problems which have resulted from the passage of Public Law 94-142. Major problems include that handicapped youngsters often present an additional burden to already overworked teachers and that mainstreaming is sometimes contradictory to tasks to which teachers give higher priority. The bulletin is presented in 11 chapters. Chapters I and II define mainstreaming and explain the philosophy behind it. Mainstreaming provides the maximum degree of participation and inclusion for handicapped students so that they can profit from a regular classroom environment according to their ability. It was developed to extend civil rights to the handicapped and to make school more reflective of society.

Chapters III, IV, and V discuss various modes of instruction used in mainstreaming classes including individualized instruction, involving resource teachers, developing student-centered activities, and grouping. Chapters VI through X suggest how to organize and present social studies content in a mainstreamed class, review mainstreaming practices currently in use, explain how to involve community organizations and teacher training institutions in the mainstreaming process, and offer a prologue for mainstreaming's future. The final chapter lists sources of additional information regarding mainstreaming. (DB)

Social Science Impact on Legislative Decision Making. A Study of Factors Affecting the Utilization of Social Research and Evaluation in Three State Legislatures. Final Report.

California Univ., Riverside.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Jun 79

Grant—NIE-G-76-0104

Note—386p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC16 Plus Postage.

Descriptors—Behavioral Science Research, Behavior Patterns, \*Decision Making, Information Utilization, \*Legislators, \*Policy Formation, Political Influences, \*Politics, Research Methodology, \*Social Sciences, State Legislation, \*Systems Analysis, Use Studies

This research report describes an analysis of the ways state legislative policy makers in Arizona, California, and Oregon engage in the process of turning political interests and pressures into public policies. The purpose is to provide insights into the overall processes of social science utilization within state legislatures, using a behavioral orientation. The report is presented in six chapters. Chapter I offers background information and an overview of the study. Chapter II explains the variations of decision-making behavior and social science utilization as occurring in four distinct stages. Chapter III examines three approaches to studying how decision making within the system is controlled, and chooses the role-orientation model as most useful for this study. Chapter IV reviews technical issues relating to the design, sampling, and methods of data collection and analysis, as well as an assessment of limitations on validity and reliability. Chapter V presents data analysis and findings in four areas: origins of legislative orientations, linkage between orientation and the stages of workflow, relationship between orientation and workflow involvement, and the impact of social science on the formation of legislative policies. Chapter VI identifies five conclusions and makes recommendations for the improvement of legislative operations, the improvement of social science utilization, and further legislative research. (CK)

Descriptors—Adult Education, \*Citizen Role, \*Citizenship Education, Competence, \*Consumer Economics, \*Consumer Education, Daily Living Skills, Educational Objectives, Educational Principles, Elementary Secondary Education, Fused Curriculum, \*Interdisciplinary Approach, Skill Development

The booklet explores the actual and potential relationship between citizenship education and consumer education. The purpose is to examine key assumptions supporting citizenship and consumer education and to identify basics that cut across these two approaches to social education. It is presented

in four chapters. Chapter I defines both citizenship and consumer education and points out that the approaches have a common goal: that of developing peoples' social competence. It also lists assumptions regarding schooling, particularly that education is an effective way of achieving the goal, and assumptions regarding citizen and consumer roles, including that the two roles are separate. Chapter II discusses the relationship of citizen and consumer roles, which fuse when individuals make decisions that have consequences for all citizens, when economic decisions are made collectively in the political process, or when individuals consume government services. It also points out commonalities in the two roles, including that both are subject to the same historical forces, face common problems, occur in similar settings, and that people exhibit comparable behavior in both roles. Chapter III offers guidelines for linking citizenship and consumer education by listing seven citizenship competencies and suggesting several ways these can be used in consumer education. The conclusion is that the two roles are not separate, and that the linkages between citizenship and consumer education can provide one useful starting point for integrating social education. (CK)

Descriptors—Adjustment (to Environment), Career Change, \*Economic Change, Economics, Federal Legislation, Futures (of Society), Mental Disorders, \*Mental Health, \*Physical Health, \*Psychological Studies, Relationship, Social Mobility, \*Stress Variables, Unemployment

This volume offers a collection of papers which explores the relationships between major economic changes and individual and collective mental and physical well-being, including individual distress, deviant behavior, and other symptoms of underlying pathology. The contributors examine the processes leading from macroeconomic change to social and psychological outcomes from a variety of conceptual approaches. The focus is largely on individual stress related to unemployment and to work transitions. The papers are entitled: "Economic Circumstances and the Entangling Web of Pathologies;" "Health and the National Economy;" "Social Support, Person-Environment Fit;" "Role Adaptation and the Appraisal of Work-Related Stress;" "Economic Deprivation, Social Mobility, and Mental Health;" "Economic Changes and Mental Illness;" "Psychophysiology of Stress;" "Discussion;" "Does Economic Change Provoke or Uncover Behavioral Disorder?" "Social Support and Stress: Some General Issues and Their Application to the Problem of Unemployment;" "Unemployment and Mental Health;" "Federal Legislation in Respect to Employee Ownership of Firms;" and "Strategy and Policy." Descriptors—Adult Education, \*Citizenship, \*Citizenship Education, Citizenship Responsibility, Educational Assessment, \*Educational Improvement, \*Educational Needs, Educational Objectives, Elementary Secondary Education, Learning Activities, Learning Processes, National Programs, Political Influences, Program Descriptions

The publication presents the final report of the U.S. Office of Education citizen education project, focusing on major issues relating to the concepts of citizenship and citizen education. The objective is to contribute to a clear delineation of goals, strategies, and needs. The document is divided into five chapters. Chapter I explains the need for citizen education; how the concept of democratic citizenship evolved; and the history, evolution, and core elements and tensions of citizen education in the United States. Chapter II discusses patterns of political learning among American children, adolescents, and adults focusing on both cognitive development and social learning. Chapter III emphasizes the influence of the family and the peer group on children and adolescents and describes a variety of school-based programs in citizen education. Chapter IV discusses selected citizen education activities of the media, voluntary/community groups, business and labor unions, and all levels of the government. The concluding chapter reaffirms the need for citizen education, lists 15 developments occurring within the past five years, and recommends that there be national leadership in this area sustained by a genuine commitment to major improvement. It also recommends nine goals for leadership activities, including reestablishing citizen education as a basic goal of schooling, designing professional training experiences, coordinating school and community resources, and broadening the constituency served by citizen education. Evaluation in the Development of Instruction in Physical Education (or Can the Cripple Survive?)

Pub Date—[76]

Note—50p.

Pub Type—Reports - Evaluative (142) - Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Cognitive Development, \*Educational Objectives, Evaluation Methods, Individual Development, \*Physical Education, \*Program Evaluation, Psychomotor Objectives, Relevance (Education), \*Self Evaluation (Individuals), Skill Development, Student Attitudes, \*Teacher Evaluation, Teaching Methods

The need for ongoing evaluation of physical education programs in the context of the total school curriculum is discussed, and the following objectives of physical education are identified: 1) development of attitudes toward physical activity based on individual student needs; 2) experience in physical activity; 3) knowledge about physical ability; 4) understanding the role of physical activity in society; and 5) knowledge about the connection between physical activity and learning processes. A model evaluation instrument based on these criteria is presented which integrates teacher evaluation, students' self-evaluation, and peer evaluation. Emphasis is placed on evaluation of students on an individual basis. (JD)

Sex Education Guidelines, Including Reproductive Health and Family Planning.

Michigan State Dept. of Education, Lansing.

Pub Date—78

Note—26p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Contraception, Elementary Secondary Education, \*Family Life Education, Health Education, \*Public Schools, \*Sex Education, Sex Role, Sexuality, \*State Standards, Teacher Characteristics, \*Teacher Qualifications, Venereal Diseases

Legislation permitting the teaching of reproductive health in Michigan schools mandates that the State Board of Education establish approval criteria for those who will be supervising instructional programs in sex education, determine certification requirements for those teaching classes in sex education, and establish guidelines for the review and recommendation of materials to be used in teaching family planning, reproductive health and the recognition, prevention, and treatment of venereal disease. Certified teachers must have preparation in the biological and behavioral sciences, as well as in sex education and health education. Content areas which must be covered by law are reproductive health, sex education, family planning, human sexuality, family life, venereal disease, fetology, marital information, and genetic information. An advisory board should be established by the school district board to periodically review the materials and the methods of instruction used. Appendices to this document include a copy of PA 226 of 1977, school laws relating to health education in Michigan public schools, and a copy of the notice sent to parents regarding the implementation of sex education courses into the school curriculum. Descriptors—Attitudes, Classroom Environment, \*Early Experience, Education Majors, \*Elementary Education, Learning Activities, \*Physical Education, \*Recreation, \*Student Experience, Student Teacher Relationship, Teaching Methods

The elementary school experiences of 418 entering education majors at the University of New Mexico were investigated to determine the extent to which early experience may or may not have influenced the students' choice of physical education as a career. Data was collected concerning the following variables: 1) number of students whose schools had elementary-level physical education specialists, as opposed to those that had a regular classroom teacher doubling as a physical education instructor; 2) the amount of time allotted to physical education activities; 3) teaching methods used by the students' instructors; 4) the equipment and facilities which were available; 5) the types of activities; and 6) the attitudes and perceptions education majors harbored regarding their elementary physical education experiences in general. A summary of research findings is included. (LH)

The activities of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) workshop on the development of a systems approach to teacher in-service education in Asian and Oceanic nations are reported. Eighteen participants from twelve countries are listed. Topics addressed by the workshop include: 1) general problems in the current educational systems of the participating nations; 2) the feasibility of a systems approach to teacher education; 3) the objectives of education, and methods which may be used to identify educational objectives; 4) the role of evaluation in systems analysis; 5) the reports of three syndicate task forces within the main structure of the workshop; and, 6) recommendations for national and regional follow-up plans to implement the conclusions reached by the workshop participants. ### Teacher Performance Assessment Instruments: A Handbook for Interpretation.

Georgia Univ., Athens. Coll. of Education.

Spons Agency—Georgia State Dept. of Education, Atlanta.

Pub Date—79

Note—127p.

Pub Type—Guides - Non-Classroom (055)

**EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.**

Descriptors—\*Evaluation Criteria, \*Evaluation Methods, Performance Factors, Student Evaluation of Teacher Performance, Teacher Effectiveness, \*Teacher Evaluation

This manual is designed for use by data collectors and others during training on the Teacher Performance Assessment Instruments (TPAI) developed by the Georgia Department of Education and the University of Georgia to evaluate minimum competency skills in candidates for teaching certificates and beginning teachers. Contained within are the five instruments which comprise the TPAI, a commentary on three of these instruments, and a summary of procedures for managing the data collected during an assessment. The handbook may also be used as a reference during an actual assessment of teacher performance. (Authors/LH)

Descriptors—Classroom Observation Techniques, Elementary School Teachers, \*Evaluators, \*Guidelines, Measurement Techniques, Secondary School Teachers, Teacher Effectiveness, \*Teacher Evaluation, \*Training Methods

Identifiers—Observation Criteria, \*Training Materials

The plans included in this manual were developed for use in training data collectors to administer the Teacher Performance Assessment Instruments

(TPAI). They were designed by classroom teachers and present data collectors with types of plans which might be encountered while assessing teachers in the field. Each set of plans was developed to serve one of three purposes: 1) to simulate a teacher's portfolio for use in practice-rating teachers on the TPAI; 2) to illustrate teaching plans for videotaped lessons used in practice-rating teachers on the Classroom Procedures and Interpersonal Skills instruments; or 3) to provide illustrative materials for use in practice-conducting a complete assessment using all three instruments. **EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Academic Achievement, \*Educational Objectives, \*Functional Reading, High School Students, \*Mathematics, \*Minimum Competencies, Performance Factors, Performance Tests, Relevance (Education)

Student performance objectives for the North Carolina Senior High Assessment of Reading Performance (SHARP) and the Test of Proficiency in Computation Skills (TOPICS) are given. These minimum competency tests are structured in such a way as to facilitate the transference of school-based learning into everyday life. For example, students taking the math examination are asked to do the computations necessary to rent a car; students taking the reading examination are asked to correctly interpret a "Help Wanted" advertisement, and to make deductions concerning the scheduling of television programs. (LH)

A survey of admission criteria and educational practice and policy at selected preservice teacher education institutions yields data on a variety of subjects pertinent to teacher education in general. Areas of investigation explored by this combination interview/survey include the undergraduate teacher education program entrance and graduation requirements, the National Council on Accreditation for Teacher Education standards adhered to by the institutions surveyed, the work being done by the institutions in the area of teacher education laboratory experiences, the programs' academic advisement and registration policies, and the institutions' extended campus programs. Also explored are recent developments by the investigated colleges and universities in the area of teacher education curriculum design. A copy of the faculty leave proposal and the survey instrument are appended. (LH)

### Professional Assessment and Development.

Pub Date—78

Note—42p.; Paper presented at the Annual Convention of the Association of Teacher Educators (1978).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Attitude Change, Classroom Observation Techniques, Individual Development, Inservice Teacher Education, \*Needs Assessment, \*Professional Development, Program Development, Self Concept, Teacher Attitudes, Teacher Centers, \*Teacher Evaluation, \*Teacher Improvement, Teacher Responsibility

It is proposed that in considering teachers' professional development, emphasis should be placed on teacher assessment as an integral part of the developmental process, encompassing the total career of the teacher. An overview of the history of teacher evaluation is provided, as well as a review of background literature on professional development. Personal growth and maturation are discussed as being fundamental to the process of professional development. A paradigm is proposed for conceptualizing and studying professional development in such a way that it could lead teachers and researchers to greater effectiveness in facilitating teacher improvement. Materials are provided to help teachers effectively acquaint students with the range of career opportunities in physical education, sport, and related areas and to offer insight into the process of weaving career education concepts into programs of physical education. An overview of the goals for career education from elementary school through secondary school is presented. Teaching suggestions for curriculum activities infusing career education into existing physical education and sport programs are outlined. Ideas are offered which have a broad application to the total physical education program, and suggestions are made which represent a unit rather than a class activities approach. A process is given by which students can assess their interest in career options in physical education, and an annotated bibliography containing resources for physical educators and students is included. Conference proceedings from this national symposium on hard scientific research and developments in teaching tennis, squash, racquetball, and badminton are divided into several sections. The first deals with sports medicine and the biomechanics of the racquet sports. The second part discusses the psychological and sociological aspects of competition and participation in these sports, with particular emphasis on the difference between males and females. A third section deals with physiology, as well as with sports medicine and biomechanics, and the fourth considers motor learning and teaching strategies. Other topics treated in the proceedings include the analysis of stroke production through cinematic means, the development of various instructional aids, and a dynamic test for the

comparison of rebound characteristics of three different brands of tennis ball. An evaluation of the symposium by participants is included. (LH)

Within the Concern-Based Adoption Model (CBAM), three key variables serve as tools for focusing on the individual teacher's progressive involvement in an innovative inservice education program. These three dimensions are: the teacher's attitude toward the innovation, changing level of use of the innovation, and perception of the innovation itself. In this report each of these dimensions is described, and illustrative research and implications are presented. A description of a current research activity in which these three diagnostic variables are being used is included. Several principles are listed as guidelines for designing and managing a CBAM inservice teacher education program. (JD)

Descriptors—\*Anxiety, Job Satisfaction, Labor Conditions, Labor Turnover, Locus of Control, Physical Health, \*Stress Variables, Teacher Administrator Relationship, Teacher Attendance, \*Teacher Morale, Teacher Welfare, \*Teaching (Occupation), \*Teaching Conditions

A joint committee of a local teachers' association and the Tacoma Public Schools studied stress conditions for classroom teachers. Teachers estimated the magnitude of stress for forty-four events and noted those which they had actually experienced. "Involuntary transfer" was perceived as the most stressful event; seventeen per cent of the teachers reported having been involuntarily transferred during the year of the study. Seventy-five per cent reported having to "manage disruptive children," an event which ranked fourth in the perceived stress gradings. A moderately high negative correlation (-.51) was found between reported stress-induced exhaustion and days absent; a similar but positive correlation (.46) was found for exhaustion and the number of stressful events experienced by a given teacher. Pub Type—Reports - Descriptive (141) — Opinion Papers (120)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Accountability, \*Competency Based Teacher Education, Educational Theories, \*Management by Objectives, \*Management Systems, \*Skill Development, Teaching Methods, \*Teaching Skills

"Management engineered" teacher education is an instructional method designed to assist teachers in the acquisition, maintenance, and improvement of essential knowledge, skills, attributes, and professional competencies which are necessary to function effectively in varied professional roles. The system aims at improving teachers' performances as instructors, group leaders, behavioral managers, and as management systems designers, implementors, and evaluators. The theory is based on two assumptions: a systems approach to classroom and professional management is essential to positive, accountable education, and the idea that the more systematic the process of developing a management system, the higher the probability of success in implementation of that system. Three considerations form the basis of an ecological theory of teaching: activity structures, student participation styles, and social cognitive development. To explore this theory scholars met in seminars, each bringing the concepts and perspectives of his discipline or area of inquiry. This report contains a synthesis of responses from twelve seminar members. They address the topics of classroom behaviors and participation, social dynamics within the classroom, activity structures and teacher-pupil interactions, and observation and testing of the ecological theory in classroom situations. Two teams, each comprised of teachers, a researcher, and a trainer/developer spent fifteen and a half months implementing the Interactive Research and Development on Teaching (IR&DT) strategy, a specialized educational research methodology stressing interactive rather than linear communication between teachers and researchers. These teams are studied and discussed in this executive summary of the IR&DT Study. The report includes a discussion of the essential features of IR&DT, assumptions underlying the strategy, a description of the Vermont and California sites which participated in the study, evaluation of the IR&DT teams' outcomes, summary of useful information resulting from the research, and recommendations for future study. The relative rigidity of instructional method, the intensity of supervision, and the size of instructional group are the three variables investigated in a study of students' feelings towards their preservice teaching experiences. Approximately 250 education students were queried regarding the kind and amount of supervision they were accorded during their experiences in the field. Results indicate that students receiving less supervision were correspondingly less satisfied with their preservice training. (LH)

Identifiers—\*Macrosystems, Microsystems  
The nature of educational settings and the relationship between educational settings and educational change is discussed. It is suggested that the

standard linear organizational structure within most school settings is detrimental to the implementation and development of creative change strategies. The rigidity of this type of organizational structure promotes the attitude that change cannot be brought about, which, in turn, all but ensures that change will not occur. The notion of the educational environment as a macro- or microsystem is explained, and examples of successful change programs using this notion are given. It is suggested that a new way of thinking about educational change, based on the macrosystem/microsystem hypothesis, is needed. (LH)

This report documents a conference on the conceptual framework underlying the management of Teacher Corps Projects. The conference, designed to provide participants with training in specific skills pertinent to their responsibilities, was attended by school administrators, program development specialists, community coordinators, community council chairpersons, and representatives from ten Texas Teacher Corps projects. This documentation report includes: 1) a description of activities predating the conference which contributed to its final structure and content; 2) an overview of the conference agenda and reports on each activity; 3) a summary of the results gathered through use of a formal conference evaluation instrument; and 4) a synthesis of the formal and informal evaluation data collected at the conference and recommendations for future training activities. This handbook describes an approach and provides guidelines for establishing a school-based inservice education program. The program is based on a single, local school staff that determines its own needs for professional development and uses its strengths and talents to meet those needs. Four basic phases for establishing a school-based program are discussed: 1) cooperative planning on the part of the staff; 2) staff assessment of needs; 3) training sessions and workshops; and, 4) evaluation of the program. This collection of articles offers viewpoints on issues, concerns, and processes related to the teacher education activities of Teacher Corps Projects in the state of Texas. The first section sets forth a definition for inservice education, a perspective of its past, present, and future, and the impact of innovations on teacher and teacher educator inservice programs. The second section explores the theoretical issues for program development as it relates to competency based education, inservice education, and Teacher Corps. The third section deals with the experiences of specific Teacher Corps projects in Texas. The fourth section focuses on multicultural education, learning centers as alternatives for inservice education, and a proposal for a fine arts component in Teacher Corps. (Editors/JD)

 This pacing guide is a detailed outline that provides trainees with a building-block approach to the acquisition of teaching skills. In addition, it provides clarity to the roles and responsibilities of the intern, the cooperating teacher, and the supervisor, and coordinates the classroom experience for the third semester of a four-semester internship. The guide is arranged on a week-by-week basis, with the activities for each week structured into "A", "B", and "C" priority listings. The Teacher Corps generic competency framework—an outline which defines crucial skills and objectives for educational trainees and personnel—and a self-evaluation form are included. (Authors/LH)

The purpose of this document is to explore some strategies which may be helpful to new projects during their planning and implementation years. Each chapter of the document is composed of a separate project description. Topics discussed in this paper include: 1) the adaptation of educational research to improve elementary reading comprehension; 2) the development of a community support program for students involved in a community, industrial, and school system-based career education programs; 3) the research base for precision teaching techniques; 4) the development and implementation of a program combining the resources of local elementary school teachers and the surrounding community in order to meet student needs; and, 5) indepth discussion of the attempts of a rural school to focus on the delivery and improvement of services to its exceptional child population. The authors of the document stress that none of the programs described have been subjected to formal validation. (Authors/LH)

Descriptors—Assignments, Behavior Patterns, \*Class Organization, Classroom Environment, Classroom Techniques, Grade 4, \*Grouping (Instructional Purposes), \*Group Structure, Interaction, \*Peer Influence, Social Structure, Student Teacher Relationship

The ecological theory of teaching views the classroom as a unit within which social and psychological interactions determine the learning patterns that will take place. Three fourth-grade classrooms were observed to test and clarify this theory. A description is given of the characteristics of the pupils in each class, the teacher's instructional style and attitude, and the physical arrangement of the classroom. A comparison of the task structures of the three classes is presented, with emphasis on the grouping of students in large and small groups and the tasks assigned to those groups. An analysis is given of the relationship of the grouping and task assignments of the class to the formation of peer relations and friendships. (JD)

Pub Date—Apr 80

Note—35p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 9, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Administrators' Attitudes, Cooperative Planning, \*Inservice Teacher Education, \*Needs Assessment, \*Program Content, Program Evaluation, \*Teacher Administrator Relationship, \*Teacher Attitudes

A study investigating the discrepancies between teacher and administrator preferences for sixty-one inservice topics indicates that teachers perceived topics associated with motivational-attitudinal considerations to be of greater importance than did administrators and supervisors. Other differences between teachers and administrators appear to be dependent on instructional level, supervisory-administrative position, and subject matter areas. The findings recommend active involvement of teachers in the planning of inservice programs and the adaptation of programs to the various grade levels and particular subject matters. (Author/JD)

Descriptors—\*Academic Achievement, Classroom Environment, Classroom Techniques, Elementary School Teachers, \*Expectation, \*Feedback, High Achievement, Low Achievement, Open Plan Schools, Reinforcement, Self Contained Classrooms, \*Student Teacher Relationship, \*Teacher Attitudes

The relationship between classroom characteristics and student perceptions of differential teacher treatment in elementary classrooms was examined. Teacher treatment was found to be unrelated to openness of classroom structure. In all classrooms, teachers gave more negative feedback, direction, more orientation to work, and rules to low than to high achievers. Teachers showed greater expectations, and presented more opportunities and choices for high achievers. Teachers varied in the amount of perceived differential treatment shown with both high and low achievers. They also varied in both the amount and direction of supportive help given to high and low achievers. (Author/JDD)

Descriptors—\*Attribution Theory, \*Behavior Problems, Classroom Techniques, \*Coping, Discipline, Elementary School Teachers, Interaction, \*Student Behavior, Student Teacher Relationship, \*Teacher Attitudes, Teacher Behavior, Teaching Methods

Teacher responses to problem student behavior was studied. Responses were coded for teachers' attributional inferences, concerning both problem students and their own ability to handle the problems. Attributional inferences differed according to problem ownership. For problems owned primarily by teachers themselves, students were seen as acting intentionally and able to control their behavior. For shared problems, teachers inferred that students were not acting intentionally but could control their behavior if helped. For problems owned mostly by the students, teachers inferred neither controllability nor intentionality, yet expressed greater confidence in their own ability to cope with the problems. (JD)

This manual is divided into six sections. Section one contains procedures for applying for a teaching certificate in the State of Delaware. Section two lists rules which apply to all certification areas and to all who are seeking certification for professional employment in the public schools. In the third section information is found regarding reciprocity among the various states and other agreements whereby applicants may meet Delaware's certification requirements by means other than meeting the "specific requirements." Seven types of credentials are defined in the fourth section. Specific requirements for all certification areas are given in the fifth section. The final section contains requirements for reassignment of personnel. (JD)

Identifiers—\*Title IX Education Amendments

1972

The token gestures towards job equality for women in the fields of physical education and athletics coaching are symptomatic of the more serious problem of sexual equality present in American society. Cultural restrictions on the kind and degree of assertive behavior traditionally associated with the female role have left women ill-equipped to assume positions of leadership which should be awarded to women as well as to men. An example of this problem is clear in the present situation in women's athletics. Added financial support for women's sports has made the field more attractive as a career choice; consequently, men are beginning to assume the higher-paid and more prestigious positions in women's sports. Female physical educators and coaches must be made to realize the gravity of the situation, and must condition themselves to effectively counteract the emerging inequality through self-assertiveness, political awareness, the development of managerial thinking styles, and the establishment of a "good old girls" system similar to the "good old boys" system traditionally closed to female professionals. Descriptors—\*Females, \*Minority Groups, Self Concept, \*Sex Bias, Sex Discrimination, Sex Stereotypes, Social Attitudes, Teacher Education, Teaching Methods, \*Textbook Bias, \*Textbook Content, Textbook Evaluation

The content of current teacher education textbooks was analyzed in regard to the attention paid to contributions of women to society, recognition and discussion of sexism, and sex stereotypes. Also presented are measures teacher educators need to take to rectify potential inaccuracy and imbalance in the textbooks they use. Biased attitudes were present in texts on foundations of education, social studies methods, mathematics and science methods, language arts, and educational psychology. Texts analyzed are identified by author's name. Appended is a section on racial and ethnic minorities and a selected bibliography on sexism in education. (JD)

Identifiers—Teacher Corps

This document reports the activities of the Southeastern Teacher Corps Network's May 1979 conference on the validation of programs and the dissemination of information. Concerns of the meeting were: the establishment of procedures for program validation processes, the increased awareness of naturalistic data-gathering techniques for educational research, the increased familiarization of educational practitioners with programmatic evaluation techniques leading to validation and dissemination, and the use of National Teacher Corps Validation and Dissemination Initiatives. The conference sponsors also sought to establish an awareness of ideas for validation processes consistent with the Joint Dissemination and Review Panel and the National Teacher Corps Validation and Dissemination Initiatives, and to review established processes for validation in the Southeastern Teacher Corps Network with the eventual goal of developing new procedures. Identifiers—\*United States (South)

Section one of this report deals with the supply of teachers in the southern part of the United States and offers projections for the number of beginning teachers in the region in 1985. The demand for teachers from present to 1995 in the region is analyzed in section two. Consideration is given to the number of teachers now employed, pupil-teacher ratios, changing school-age population, and turnover rates of teachers. The third section combines the projected ranges of supply and demand, and highlights the factors that account for ranges in the projections rather than for definitive numbers.

A set of guidelines to be used in planning and evaluating multicultural teacher education programs is provided. These guidelines go beyond the minimum requirements of the National Council for Accreditation of Teacher Education (NCATE) standards for designing exemplary teacher education programs that reflect a commitment to multicultural education and the provision of educational equity. Governance of teacher education programs, curriculum design for preservice programs, faculty and student needs, resources and facilities, and the review and evaluation of multicultural teacher education programs are the concerns spoken to in this report. Descriptors—Community Involvement, Decision Making, Educational Needs, Educational Objectives, Financial Support, \*Inservice Teacher Education, \*Needs Assessment, \*Program Development, Program Implementation, Publicity, Resource Centers, Secondary Education, \*Staff Development, Teacher Administrator Relationship, \*Teacher Centers

An examination is made of two separate programs in neighboring communities in western Massachusetts which have approached the development of a teacher center in essentially different ways. One of the programs has, since its inception, responded to the need for teacher-generated and controlled programs by providing inservice activities, staff development, community education, and material resources for the regional high school district it

serves. The second program originated as a comprehensive study of secondary education, based on the notion that the people most involved in a given community's school system are also the people best suited for establishing the goals, identifying the needs, and planning the ongoing direction of the school. The evolution of this concept into the development of a teacher center program is studied in this report. Information is presented concerning the two programs' procedures for dealing with needs assessment, inservice programming, organization and publicity needs of a teacher center, administration, program development and funding, and dissemination of research information gathered through program activities. Descriptors—Attribution Theory, \*Correlation, Course Organization, Individualized Instruction, \*Individualized Programs, \*Job Satisfaction, \*Organizational Climate, \*Organizational Effectiveness, Program Implementation, \*Teacher Attitudes, Teacher Morale

Identifiers—Individually Guided Education

This document discusses the relationships between organizational features of Individually Guided Education (IGE) as measured in the large sample survey of the IGE evaluation, and teacher job satisfaction. The theoretical model linking organizational features and teacher job satisfaction is tested using causal model analysis. Two findings were drawn from this analysis. First, teachers seem to gain satisfaction from a sense of participation in a larger movement, from having colleagues in other schools, and from sharing information with a broad audience. Second, teachers seem to gain satisfaction from a conviction that their educational program is an effective one. (Author)

Descriptors—Academic Achievement, \*Discussion (Teaching Technique), \*Lecture Method, \*Performance Factors, Program Evaluation, \*Questioning Techniques, \*Teacher Effectiveness, \*Teaching Methods

This document contains two studies. The first investigates naturally-occurring aptitude-treatment interactions (ATI) with three teaching approaches—lecture-recitation, inquiry, and public issues discussion. The second study attempts to replicate these ATI in a short-term project. Teachers taught social studies to ninth-grade students according to one of the three teaching methods. Students completed aptitude measures at the beginning of each study and achievement measures at the end of each study. Results indicate that when an experimenter-constructed test was the outcome, the lecture-recitation approach was superior. However, relative effectiveness of the approaches also depends on students' ability and level of conformance. When the measure of the student performance was based on objectives of the approach, the results indicated an ATI for ability x anxiety that was partially replicated across the studies. (Author)

Descriptors—\*Conventional Instruction, \*Educational Quality, Elementary Education, Elementary School Teachers, \*Field Experience Programs, Followup Studies, Graduate Surveys, \*Participant Satisfaction, \*Preservice Teacher Education, \*Program Evaluation, Relevance (Education), Skill Development, Teaching Skills  
 Three hundred and eighteen education graduates were surveyed in order to investigate the quality of training they had received in field or campus teacher-preparation programs in elementary education at a large southwestern university. Graduates rated on a scale of 1-5 the quality of training they had received for 44 teaching skills listed in the Florida Catalog of Teacher Competencies. Both recent and experienced graduates were queried. Results indicate that for forty-two of the skills, graduates of the field-based program rated their training as significantly higher than did the graduates of the campus program. Experienced graduates rated their training as less adequate than did recent graduates. In general, experienced graduates from the field-based program rated their preservice training as higher than did experienced graduates of the campus program. (Authors/LH)

School people are accustomed to researchers soliciting their participation in studies; and they feel, with some justification, that these studies end up rewarding the researchers and not the subjects. We tackled this problem by designing a study where each teacher was the researcher and the object of study was her own teaching. This approach gave all parties, teachers, researchers, and administrators, what they wanted. Over the past two years, thirty teachers in kindergarten through eighth grade, in

Lexington and Concord, Massachusetts, have been through the process. Both school districts have now invested small sums to support the work and teacher commitment continues to be most encouraging. (Author)

Descriptors—\*Delivery Systems, \*Individual Characteristics, \*Inservice Teacher Education, Personality Assessment, Self Actualization, \*Teacher Characteristics, \*Teaching Methods

Identifiers—Maslow (Abraham), Teacher Corps  
 The effects of training on twenty-one teachers in a Teacher Corps school were examined according to the type of training chosen, the preference exhibited by the teacher for certain types of delivery systems, and the level of transfer to classroom practice which were applicable to the different systems. This four-year study of inservice teacher education involved the correlation of personality measures for each teacher with a frame of reference developed by Abraham Maslow to describe individual needs patterns. Specific patterns emerged in the preference and use of training methods. Nearly all the teachers were able to replicate the training activities in their classrooms, but actual use of the learned strategies was a completely different matter. Those teachers at the self-actualizing end of Maslow's scale were able to implement and incorporate much of the training into their natural styles. Those at the middle level on the scale generally used only those things that helped them to "fine-tune" their current practices. Those at the lower end of the scale showed no consistent pattern of choice but were consistently unable to transfer activities into practice. (Author/LH)

This planning study reviews the literature on teaching effectiveness in women's studies in the context of several integrative studies in research on teaching and research on the evaluation of teaching. The study suggests that changes in the cognitive development of women's studies students are as fully important as changes in sex-role attitudes. An approach to research and evaluation which acknowledges the interaction between students, teachers, and the subject matter, and which seeks to establish relationships between multiple variables involved in an interdisciplinary area such as women's studies, is recommended. A sociolinguistic investigation of pupil interpretations of the functions of questions and responses was applied to 165 pupils in a multiethnic, lower socioeconomic status elementary school. Procedures involved videotaping of language arts lessons and family conversations. Videotapes were played back to pupils, who were then asked to explain "What reasons people had for saying these things." Pupils reported that responses made to questions occurring in family conversation served an informative function, but that the questions asked in a classroom situation served an instructional or routinely interactive function. There were no significant ethnic differences in pupil perceptions of the function of questions; there were, however, significant differences in teachers' use of questions, which appeared to relate to classroom differences in final reading achievement. A sociolinguistic study of pupil interpretations of the functions of teacher praise in lessons involved 165 pupils in six classes in a single multiethnic, lower socioeconomic status, elementary school. Procedures involved videotaping six language arts lessons in each classroom. After playbacks of videotapes, pupils were asked individually, "What did you hear anyone saying in that part of the lesson?" and were presented with a set of teacher praise statements made in the lesson. Pupils perceived teacher praise as occurring primarily because pupils had good ideas. There were significant relationships among pupil perceptions of teacher praise, pupil participation in class discussions, and pupil "success" in school. There were no significant ethnic differences in pupil perceptions of the functions of teacher praise, or in pupil participation in class dis-

cussions, and minimal ethnic differences in pupil success in school. As praise increased in intensity, it decreased in frequency of teacher use, but was reported by pupils in increasing proportions. (Authors)

Cognitive Skills and Processes Involved in the Digit Symbol Test of the WAIS.

Pub Date—Mar 78  
Note—23p; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires (160)

**EDRS Price - MF01/PC01 Plus Postage.**  
Descriptors—Associative Learning, \*Cognitive Processes, Higher Education, \*Intelligence, Intelligence Tests, Memory, \*Nonverbal Tests, Timed Tests, Visual Perception

Identifiers—Wechsler Adult Intelligence Scale

In this study, cognitive processes hypothesized to be relevant to the digit symbol task of the Wechsler Adult Intelligence Scale (WAIS) were examined. Fifty-two undergraduate education students were divided into four groups to receive four different treatments. All the students took the digit symbol test, followed immediately by a test of their memory for the nine symbols. Then they were given a verbal paired associate learning test. After that, one group studied codes to help them remember the digit symbol pairs; the second group practiced a letter symbol test; the third group had repeated practice on the digit symbol test; and the fourth group worked on a social studies reading task. After eight minutes, all the students took the digit symbol test again and then a second test of memory for the nine symbols. All four of the groups obtained somewhat higher mean scores on the second administration of the digit symbol test, but there were no significant differences among the four groups in the amount of gain. Possible reasons for this outcome are discussed, and suggestions are made for further research. (Author/CTM)

Descriptors—Attitude Measures, \*Behavioral Objectives, \*Chronicles, Criterion Referenced Tests, \*Evaluation Methods, Grants, Observation, Participant Satisfaction, Pretests Posttests, \*Program Evaluation, Questionnaires, Self Evaluation (Individuals), \*Social Services, Test Construction, \*Training

Identifiers—\*Social Security Act Title XX, Usage Report

Title XX funds are used at the state level to develop, expand and improve the training of social service workers. Evaluation of programs receiving this funding must provide information on the effectiveness of the program in meeting specifically stated objectives, a complete description of the program for the purpose of replication, and recommendations for program improvement. Two core evaluation procedures are the development and use of behavioral objectives or goal statements and the development of a detailed description or chronicle of all procedures used or events occurring during the course of the grant period. Additional evaluation procedures used either to supplement or validate the core procedures are criterion referenced pre- and post-testing, self reporting of skills, use of attitude change scales, behavioral observation and participants' subjective ratings. Recommendations for the format in summarizing the collected information are given. Questionnaires are appended. (BH)

Descriptors—Achievement Gains, Advisory Committees, Compensatory Education, Elementary Secondary Education, \*Evaluation Methods, \*Mathematical Models, \*Norm Referenced Tests, \*Pretests Posttests, Program Evaluation, Statistical Bias, \*Testing Problems, Test Interpretation, \*Test Norms, Time

Identifiers—Elementary Secondary Education Act Title I, Equipercentile Assumption, Out of Level Testing, Regression Toward the Mean, \*RMC Models, Technical Assistance Centers

This report documents the activities of the technical committee formed to examine issues related to the norm-referenced model (RMC Model A) for evaluation of Elementary and Secondary Education Act Title I programs. Background information is provided on the committee's activities, purpose, and meetings; and the members are listed. The reports of individual subcommittees dealing with specific technical issues are presented: (1) equipercentile assumption; (2) use of norms; (3) interpolation and extrapolation; (4) separation of selection from pretest/regression effect; (5) out-of-level testing; and (6) RMC Model A2, the non-normed testing model. These committee reports comprise almost one-third of the document, and consist mainly of conclusions and recommendations, including lists of unresolved issues. Attachment 1 contains Brent Bridgeman's paper, Extrapolation and Interpolation in Model A1 Title I Evaluation; Robin Baker and Keith McNeil's Technical Committee Recommendations Regarding Testing Times in All Models; and Baker and Tom Williams' Issues Related to Interpolation. Attachment 2 contains Stephen L. Murray's Identifying and Controlling Sources of Regression Bias in Model A; a memo by Gene Glass on the regression effect; Brent Bridgeman's Practical Alternative to Model A; and Henry Scherich's A Case for Instructionally Dated Norms. Assessing Assertion: An Investigation of Construct Validity and Reliability.

Pub Date—80

Note—33p.

Pub Type—Reports - Research (143)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Anxiety, \*Assertiveness, Females, Higher Education, Observation, Predictive Measurement, \*Psychological Testing, Responses, Self Evaluation (Individuals), \*Situational Tests, \*Test Reliability, \*Test Validity

Identifiers—Autonomic Perception Questionnaire, College Self Expression Scale, \*College Womens Assertion Sample, Conflict Resolution Inventory, Fear of Negative Evaluation Scale (Watson Friend), Multitrait Multimethod Techniques, Social Reaction Inventory (Richardson Tasto), S R Inventory of Anxiousness (Endler et al), Timed Behavior Checklist

The reliability and meaning of assertiveness tests were explored using 120 female undergraduates. Several self-report inventories (the College Self-Expression Scale, Conflict Resolution Inventory, and a global rating from one to seven) were administered, as were three anxiety measures (Timed Behavior Checklist, response latency, and response duration) which were collected during administration of the College Womens Assertion Sample (CWAS). The CWAS involved 50 audiotaped interpersonal situations, during which the subjects' role-playing responses were observed. Five self-report measures of anxiety (the Fear of Negative Evaluation Scale, S-R Inventory of Anxiousness, Social Reaction Inventory, Autonomic Perception Questionnaire, and a global rating of anxiousness from one to seven) were then administered. Retesting at one-, four-, or ten-week intervals supported the reliability of the behavioral sampling and the Conflict Resolution Inventory. Convergent validity was evident for all the assertion tests, but only the CWAS showed strong discriminant validity. The global self-ratings were minimally useful, and the behavioral sampling successfully differentiated be-

tween aggressive, assertive, submissive, and aggressive-submissive subjects. The use of multiple measures was recommended. (Author/GDC)

Descriptors—\*Criterion Referenced Tests, Cutting Scores, \*Dental Assistants, \*Dental Hygienists, Higher Education, Multiple Choice Tests, Observation, \*Occupational Tests, Performance Tests, Pretesting, Scoring, \*Test Construction, Test Reliability, Work Sample Tests

Identifiers—Interobserver Reliability

This report describes the development of a criterion-referenced proficiency examination for dental auxiliaries that consists of both written and performance tests in each of five areas: chairside assisting, patient education, diagnostic aids, therapeutics, and laboratory procedures. The content outlines of the tests are presented. The formation of the committees and the processes of test planning and test development are described. Checklists were developed for the observers to use in scoring the performance tests. A preliminary field trial of the test was administered to a small sample of dental auxiliaries, and revisions were made to the test and the scoring checklists. The revised tests were then administered to 115 dental assistants or dental hygienists. The development of the scoring formulas for the performance tests was a three-stage process. Interobserver reliabilities were computed for each subtest, and score distributions were compared for auxiliaries rated adequate with those rated inadequate by the observers. Various methods were used to select recommended pass/fail cutoff scores. Conclusions of the study and recommendations for further development are presented. (Author/CTM)

Individual Differences and Materials Differences Which May Affect Keyword Method Utility.

Pub Date—Apr 79

Note—24p; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, CA, April 8-12, 1979).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Aptitude Treatment Interaction, Cognitive Ability, Higher Education, Imagery, Mnemonics, Research Needs, \*Second Language Learning, Verbal Ability, \*Vocabulary Development

Identifiers—\*Keywords, Spatial Ability

Research on the interaction of keyword treatment with materials or student characteristics in learning foreign languages was reviewed. Most of the studies implied that foreign language vocabulary learning was related to verbal, not visual-spatial ability or elaboration, conditions, and that student-generated keywords were more effective than instructor-generated keywords. There were four suggestions for future research: (1) develop an instrument for predicting performance in visual elaboration conditions not involving picture production; (2) use pretests to explore possible aptitude treatment interaction and to reduce within-cell variability; (3) determine if cognitive ability can be modified to improve performance; and (4) determine if keyword instruction benefits or hinders specific foreign languages. (CP)

Verification of Reliability and Validity of a Behavior Rating Scale.

Pub Date—[Sep 79]

Note—21p.; Paper presented at the Annual Meeting of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires (160)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Behavior Rating Scales, \*Check Lists, \*Parent Child Relationship, \*Test Reliability, Test Validity

A procedure was devised to assess the degree of reliability and validity of a behavior rating scale checklist used to evaluate parents' training skills with handicapped infants. Reliability was tested by independent observers viewing videotapes of training sessions and filling out checklist ratings of the parents' behaviors. Validity was assessed by observers viewing videotapes of training sessions, recording each training behavior exhibited by the parent as correct or incorrect, and then comparing these results to results of checklists ratings for the same training session. The degree of reliability was consistently high for one of two observer pairs, and the degree of validity was high for both pairs, in that the results obtained by the checklist corresponded with the results obtained by the detailed frequency counts. The results indicated that the checklist seemed to be easy to use as well as being an accurate assessment device. (Author/CTM)

An Empirical Study of the Use of Item-Item Curves to Detect Item Bias: Preliminary Report.

Pub Date—21 Sep 79

Note—41p.; Paper presented at the Annual Meeting of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Adults, \*Item Analysis, Latent Trait Theory, Part Time Employment, Questionnaires, Sex Differences, \*Test Bias

Identifiers—\*Item Item Curves, Job Descriptive Index

A Job Descriptive Index was studied for possible bias by examining item-item curves for various pairs of items computed for contrasting samples. The two pairs of contrasting samples were 669 part-time workers versus 1,260 full-time workers and 486 male workers versus 1,146 female workers in a large merchandising company. Item-item curves were computed by obtaining the scores for all the workers on the 18-item, 3-choice scale; then stratifying each sample on the basis of total score into groups of about 50 each; finding the percent of yes responses in each group for each item; and finally plotting percent of yes responses on various pairs of items for the two contrasting samples on the same pair of item axes. In general, the items had closely similar curves for the contrasting samples except for one item that was chosen much more frequently by part-time workers than by full-time workers. (CTM)

Factor Analytic Study of the State-Trait Anxiety Inventory for Children.

Pub Date—Feb 79

Note—21p.; Paper presented at the Annual Meeting of the Southwest Educational Research Association (Houston, TX, February 1979).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Age Differences, \*Anxiety, Black Students, Disadvantaged Youth, Elementary Education, Factor Analysis, \*Factor Structure, Response Style (Tests), Sex Differences, \*Stress Variables

Identifiers—\*State Trait Anxiety Inventory (Spielberger)

Kindergarten, first, second, third and fourth grade disadvantaged Black children were given the A-State and A-Trait scales of Spielberger's State-Trait Anxiety Inventory for Children (STAIC). For the grades K-2 samples, the STAIC A-State scale was administered under two stress conditions: mathematics and communication achievement tests. The A-State scale was administered under one non-stress condition to the grades 3-4 sample. Factor analyses of the data identified three factors: trait anxiety, and two separate state anxiety factors corresponding to the reversed and non-reversed scale items. Similar factor patterns were observed for both males and females at all grade levels. These results were interpreted as providing supporting evidence for the state-trait distinction in anxiety research. (Author/BH)

Test Length and Validity: An Application of Test Theory to a Finite World.

Pub Date—Mar 78

Note—14p.

Pub Type—Opinion Papers (120)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Achievement Tests, Item Analysis, Multiple Choice Tests, \*Test Construction, Testing Problems, \*Test Items, \*Test Reliability, Test Theory, \*Test Validity

Identifiers—\*Test Length

The viewpoint is expressed that adding to test reliability by either selecting a more homogeneous set of items, restricting the range of item difficulty as closely as possible to the most efficient level, or increasing the number of items will not add to test validity and that there is considerable danger that efforts to increase reliability may reduce validity. It is also stated that short tests may have useful validity if the items are well made and carefully selected. More stress should be placed on item quality and less on quantity. It is recommended that occasional well-funded item validity studies be initiated. (BH)

The history, process, and policies of accreditation for colleges of osteopathic medicine are outlined in full with particular emphasis on institutional self-assessment in order to promote significant and substantive educational change and to encourage each college to set its own goals and directions. The basic process is described as institutional self-study followed by an on-site evaluation by a committee of professional peers. The characteristics of an effective institutional self-study are presented and procedures are described. This study is designed to be used by the visiting team which reports to the Committee on Colleges of the American Osteopathic Association with a recommendation regarding accreditation. Procedures are also presented for the provisional accreditation of proposed new colleges of osteopathic medicine. Guidelines are presented

for implementation of the actual standards for colleges of osteopathic medicine. (Author/CTM)

Identifiers—\*Individually Guided Education

The concepts associated with individually guided education (IGE) are described in general. Subsequent chapters discuss IGE from a variety of perspectives, with emphasis on implementing and adopting educational change; organization theory and school structure; leadership; and decision making. Each chapter explains the underlying theoretical model, and discusses the findings of IGE research projects, emphasizing administrative and staff relationships. The concluding chapter, "IGE and the Renewal of Education," surveys the current educational scene and examines the impact of these studies for improving administrative, teaching, and learning processes in future IGE schools. The appendix contains detailed abstracts of twenty research studies on IGE school administration organization which have been published by the Wisconsin Research and Development Center for Individualized Schooling. These abstracts present the study's purpose, hypotheses, methods of data collection, conclusions, and implications. (GDC)

Descriptors—Accountability, Affective Objectives, \*Basic Skills, Cognitive Objectives, \*Curriculum Problems, Educational History, \*Educational Objectives, Educational Policy, Elementary Secondary Education, Functional Literacy, Opinions, \*Public Opinion

Identifiers—\*Back to Basics

Issues related to basic skills education are discussed, beginning with a review of recent trends in American education. The 1960's are characterized as a decade of innovation, while the 1970's are described in terms of interest in accountability and cost effectiveness. Several reasons for current concerns about basic skills are suggested: parents' expectations; industry's interest in the school's role in job training; a general emphasis on measurable quantities; and public reluctance to pay higher taxes. Classroom teachers are said to face a growing array of obstacles which seriously thwart their professional mission; many new policies contribute to the erosion of the individual teacher's autonomy. A variety of quoted sources indicates that there is little agreement on which skills are considered basic; definitions range from the three R's—reading, writing, and arithmetic—to ethics, coping skills, and self concept. Several news items illustrate the fact that literacy data may be misleading. (GDC)

**Identifiers—**Basic Science Comprehensive Test, \*Entrance Examinations, \*Medical College Admission Test, National Board of Medical Examiners, Test Revision

The predictive validity of the new Medical College Admission Test (MCAT) was examined; the validity coefficients were compared to those obtained from previous versions of the MCAT and from performance data gathered early in a first-year basic science program. Data were collected from about 400 medical students, including: (1) MCAT subscores—biology, chemistry, physics, science problems, reading skills analysis, and quantitative skills analysis; (2) undergraduate grade point average; (3) test scores on locally-developed basic science tests, the Level III examinations; (4) scores on the Basic Science Comprehensive examination; and (5) scores on the National Board of Medical Examiners Part I examination, administered after the first year of medical school. The data were gathered between 1976 and 1980. The highest validity coefficients were obtained when total scores from locally developed examinations were used to predict performance on the two certifying examinations, the Basic Science Comprehensive and the National Board. The predictive validity of the new MCAT appeared to be superior to that of its predecessor. Further study investigating the stability of validity coefficients over several classes of students was recommended. (Author/GDC)

**Identifiers—**Texas

The merits and hazards of minimum competency testing for the individual student or for student groups are discussed. Types of groups which lend themselves to group application and some important factors in determining the parameters of a group are discussed. Ten critical issues related to minimum competency testing are identified: (1) scope of curriculum designated as minimum; (2) levels of expected proficiency; (3) determination of mastery; (4) performance criteria expressed as absolute standards or as achievement gains; (5) type of test; (6) test length and testing time; (7) costs of testing program and personnel time; (8) utilization of test results; (9) test security; and (10) protection of student rights. The relative advantages of individual versus group testing, and the option not to employ minimum competency testing at all are examined in terms of utility analysis and of the resultant gains and losses. The merits of criterion-referenced, objective-based, and norm-referenced testing are compared, especially the sampling problems involved. Two cases of application of minimum competency testing to groups are presented: one at the state level (Texas) and one for a multi-county region. (Texas' Region 12). (Author/GDC)

**Identifiers—**Cattell Horn Fluid and Crystallized Ability Theory, \*Construct Validity, Guilford's Structure of Intellect, Spearman's Two Factor Theory, Thurstone's Primary Mental Abilities Schema

An information-processing assessment of the construct validity of aptitude tests is presented. It is stated that aptitude tests have been rather successful because they possess high construct validity, although the constructs in terms of which the tests may be most profitably understood are information-processing rather than psychometric ones. It is suggested that certain inconsistencies in the constructs proposed by alternative psychometric theories of aptitude tend to disappear when these constructs are understood in terms of more basic information-processing constructs. Several theories are discussed: componential theory; Spearman's two-factor theory; Thurstone's primary mental abilities; Cattell and Horn's fluid and crystallized ability; and Guilford's structure of intellect. **Identifiers—**Multitrait Multimethod Techniques

In a study designed to validate oral language proficiency tests, it is planned to administer a series of tests to 100 native Mandarin Chinese-speaking subjects (foreign students and their spouses). The tests will measure communicative competence in speaking (ability to speak, exhibiting control of linguistic, sociolinguistic, and pragmatic rules; and fluency) and communicative competence in reading (ability to react to these rules as manifested in written language, and to react fluently). Three different testing methods will be used, resulting in a multitrait-multimethod design: interviews, translation, and self-rating. The results will verify hypotheses of competence, and the components of the construct, oral proficiency. (Author/GDC)

**A Cost-Benefit Methodology for Summative Evaluation.**

Pub Date—Apr 80

Note—14p; Paper presented at the Annual Meeting of the American Educational Research Association (64th, Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports — Evaluative (142)

**EDRS Price - MF01/PC01 Plus Postage.**

**Descriptors—**\*Cost Effectiveness, Educational Benefits, \*Educational Economics, \*Evaluation Methods, \*Models, \*Program Evaluation, Summative Evaluation

Although there is high interest in determining whether or not an educational program provides good value for its cost, it is difficult to make this determination, since people are not generally conceptualized as products and since educational benefits are not easily translated into financial terms. Economic principles suggest that the cost of obtaining something is the value placed on whatever must be sacrificed to obtain it. This opportunity cost varies among individuals, changes with time, and depends upon the individual's prior learning. The value of learning can be computed by approximating the banker's compound interest formula; the opportunity cost and the number of times the learning is used are considered in this formula. Once the costs are computed, the cost-benefit model should consider the service provided, as well as all those who benefit from it and those who pay for it. Although this procedure has not been empirically validated, it provides a simple and objective method of examining multiple outcomes over time. (Ten steps for carrying out a cost-benefit evaluation are described). (GDC)

**Identifiers—**Australia, \*Carelessness

This study developed a two-parameter linear probabilistic model of criterion referenced measurement, which relates an examinee's observed ability to his true ability through a guessing parameter and a carelessness parameter, both of which are probabilities. This model was applied to a survey of

10- and 14-year-old Australian students to estimate the proportion who had been able to master basic skills in mathematics and literacy. The estimates were derived by using a Bayesian inferential procedure incorporating the developed measurement model within a beta-binomial, decision-theoretic framework based on a two-state conception of mastery and non-mastery. The results of a computer simulation of the model indicate that guessing and carelessness may markedly affect the determination of passing scores, and hence the accuracy of decision about mastery. The computer program for calculating cutting scores, posterior probabilities, and prior and posterior distribution statistics is appended. (Author/CTM)

Descriptors—Achievement Tests, Annotated Bibliographies, Cognitive Objectives, \*Criterion Referenced Tests, Elementary Secondary Education, \*Evaluation Criteria, Resource Materials, \*Test Reviews, \*Test Selection

Identifiers—Test Bibliographies

The bulk of this document consists of reviews of over 60 criterion-referenced tests, most of which are used to test elementary or secondary-level achievement in the basic skills. For each test review, the following information is given: description of test, price, field test data, administration, scoring, and other comments. The tests are rated according to three categories of criteria: (1) conceptual validity—domain descriptions, agreement, and representativeness; (2) field test validity—sensitivity, item uniformity, divergent validity, lack of bias, and consistency of scores; and (3) appropriateness and usability—clarity of instructions, item review, visible characteristics, ease of responding, informativeness, curriculum cross-referencing, flexibility, alternate form availability, administration, scoring, record-keeping, decision rules, and comparative or normative data. Guidelines on aspects of test selection are given: locating tests, comparing tests' technical and practical features, and comparing tests for their curricular relevance. Appendices list resources for developing or purchasing criterion-referenced tests, sources of other test reviews, definitions of terms, and available tests which were not reviewed. A subject index to the reviewed tests, a directory of publishers, and a sample of an exemplary domain description are also included. (GDC)

A rating scale was developed for the evaluation of behaviors and skills required of medical students. From 400 items based on various role-defining studies, 92 were selected. The project staff randomly assigned 46 items to each of two alternate forms. Seven medical schools were identified as sites for pilot testing. Medical students who agreed to participate were asked to rate themselves and to agree to be rated by two or more resident and faculty supervisors. Ratings were distributed across the four response options available (seldom, sometimes, usu-

ally, consistently) on most of the 92 items. Raters were not reluctant to use the more negative responses at times. Very few students used the fifth option (don't know), although physicians used it rather freely. There was a significant inverse relationship between the frequency of use of the don't know option and the number of hours of contact with a student. Interrater reliability ranged from moderate to substantial agreement. The staff had hypothesized that residents would have more extended contact with students than faculty, be more knowledgeable about student performance, and therefore provide more reliable ratings. The data supported the first two hypotheses, but not the third. (Author/GDC)

Descriptors—Communication Skills, Data Analysis, \*Elementary School Teachers, Elementary Secondary Education, \*Measurement Techniques, Questionnaires, \*Secondary School Teachers, Statistics, \*Student Evaluation, Teacher Education, Test Theory

The results of a mailed questionnaire survey are presented showing the opinions of a sample of teachers concerning the importance to them of 41 competencies related to measurement and evaluation. Out of a sample of 100 elementary school teachers, 50 junior high school teachers, and 100 senior high school teachers, 58 percent responded to the questionnaire. Responses were made on a five point scale, ranging from 1 for unnecessary and unused skills to 5 for essential and frequently used skills. The results are presented in two tables. The first table shows the mean and standard deviation for each category of teachers separately for each item. The second table presents the same data for items grouped in eight categories. The category receiving the highest rating by elementary school teachers was labeled "communicating evaluation information—conducting effective conferences." The category receiving the lowest rating was labeled "statistical analysis and interpretation—summarizing and describing evaluation information." Reference is made to surveys which show that only a minority of teachers have had formal training in measurement and evaluation. (CTM)

Identifiers—Entrance Examinations, Medical College Admission Test

Admissions procedures were examined at ten selected medical schools, between 1973 and 1975, with particular interest in comparing the procedures for minority and majority medical school applicants. An affirmative action policy was found to be operational in each of the schools, which took special pains to evaluate minority and disadvantaged students in a manner different from the common procedures for majority applicants. These policies significantly improved minority applicants' chances of admission. Although the schools differed in the weighting of students' credentials for admission, certain characteristics were generally important—

undergraduate achievement in science courses, residence in the state, and undergraduate enrollment in the parent university. Although the science subtest scores on the Medical College Admission Test (MCAT) were important for all applicants, the general quantitative and verbal MCAT scores seemed to be scarcely used in evaluating minority students. Further analysis, using the new edition of the MCAT, is recommended. (Author/GDC)

Descriptors—\*Accreditation (Institutions), College Administration, College Curriculum, College Faculty, College Instruction, Educational Objectives, Educational Resources, Financial Policy, Higher Education, Observation, Outcomes of Education, \*Self Evaluation (Groups), Student Characteristics

Identifiers—\*Middle States Association

Colleges and universities seeking accreditation by the Commission of Higher Education of the Middle States Association must conduct a formal self-study, prior to the evaluation visit by a team from member institutions. Typically a year-long process, the self-study should involve students, faculty, administration, governing board, and community. Although usually comprehensive, this evaluation may emphasize certain personnel, teaching methods, research programs, and so on. After a preliminary visit from a Middle States Representative, the institution should define topics for detailed study, establish a steering committee, establish and monitor progress of work groups, and compile their work into a final report which should be sent to each evaluation team member four to six weeks before their visit. A hypothetical comprehensive self-study is outlined according to recommended topics for detailed study: goals and objectives; outcomes; curriculum; admissions policy and counseling services; faculty; instruction; resources (buildings, equipment, funds); and organization, governance and financial policy. Identifiers—California, Metaevaluation

Data were collected from 15 school districts in northern California to assess three state-mandated evaluation procedures: (1) a comprehensive program planning report; (2) a year-end report on expenditures and attainment of objectives; and (3) a monitor and review visitation whose purpose was to monitor program compliance, observe improvements in instruction and school administration, and assess participation by school staff and parents in educational decision making generally. The participating schools received funds from at least two of the following state or federal programs: Title I of the Elementary and Secondary Education Act, Educationally Disadvantaged Youth, Early Childhood Education, and Bilingual Education. The planning report and the site visit improved participation and awareness among staff and active parents; these

two procedures also influenced instruction and management. The expenditure report, however, had little impact; it was regarded primarily as a requirement for further funding, but not perceived to be as helpful as the other two procedures. The state-mandated evaluation focused school site planning on the total educational program of the school, rather than on individual funding sources. (The site-visit interview form and the detailed questionnaire preceding the visit are appended). (CP)

Identifiers—\*Elementary Secondary Education Act Title IV, Kansas, Piagetian Theory.

Results are reported from 12 on-site visits and from mailed questionnaire returns regarding the continuing effects of the Elementary Secondary Education Act (ESEA) Title IV-C, Innovative Exemplary Program, on education in Kansas. At each district visited, information was obtained, and verified when possible, regarding the changes resulting from the project, the success of the project, the extent of dissemination efforts, the continued use of the project, the funding source, the reasons for its continuation, and the district's awareness of other Title IV-C projects. The projects visited were: Teenage Parents School (TAPS), Arkansas City; Personal and Career Exploration (PACE), Atchison; Piaget in the Classroom (PIC), Buhler; Goal: Language Arts Development (GLAD), Cherokee; Northwest Kansas Educational Cooperative (NKEC), Colby; Project Master, Garden City; Second Time Around for Youth (STAY), Leavenworth; Sequential Planning of Instruction for Career Education (SPICE), Ottawa; Sharing Concern and Opportunities for Relevant Education (SCORE), Russell; Education for the Severely Emotionally Disturbed and Autistic Child (ESED) and Project Product, Shawnee Mission; and Center for Innovative Teaching Experiences (CITE), Wichita. Four hundred of the 1,500 schools in Kansas replied to the questionnaire about their use of these 12 projects. (CTM)

Descriptors—Adults, \*Computer Assisted Instruction, Computer Assisted Testing, Computer Managed Instruction, Cost Effectiveness, Educational Technology, \*Efficiency, Individualized Instruction, Military Personnel, Military Schools, Military Training, Pacing, Programmed Instruction, \*Reliability, Student Attitudes, Technical Education, \*Time Factors (Learning)

Identifiers—Advanced Instructional System (Air Force)

The integrated system test for the Advanced Instructional System (AIS) was designed to provide quantitative information regarding training time reductions resulting from certain computer managed instruction features. The reliabilities of these fea-

tures and of support systems were also investigated. Basic computer managed instruction reduced training time from that required for conventional instruction by 24 to 35 percent. Student progress management and individualized instructional assignment provided further time savings. Reliability and maintainability data collected during the integrated system test indicated that the support functions, the media devices and courseware, and the computer hardware and software met or exceeded requirements. The lessons learned during course development were extrapolated to provide estimates of courseware development times that should be realizable in converting conventional group instruction to computer based instruction. Issues Concerning the Evaluation of Medical Students' Abilities to Formulate Problem Lists.

Pub Date—Apr 80

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (64th, Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Clinical Diagnosis, Comparative Testing, Cues, Higher Education, Medical Students, Multiple Choice Tests, \*Problem Solving, \*Recall (Psychology), \*Recognition (Psychology), \*Test Format

To help determine the role that test instrument formats play in evaluation, two parallel examinations were given to 227 second-year medical students. The tests were based on information presented in a medical case history. One required students to generate their own problem lists (the generate group); the other required the students to select problem lists from a list of alternatives (the select group). All the students had difficulty formulating problem lists as indicated by average overall scores of 42% and 57% correct for the generate and the select groups, respectively. Significant quantitative and qualitative differences were noted between the two groups in that the select group usually picked properly integrated problems while the generate group constructed partially correct answers composed of unintegrated cues. As predicted, the select group scored significantly higher than the group generating their own lists. (The relative utility of generate or select response formats for diagnostic and certifying examinations is discussed). (Author/GDC)

Identifiers—\*Kansas, Kansas Learner Needs Assessment Study

Over 6,000 sixth- and twelfth-grade students from 33 school districts in Kansas were tested in 13 areas of academic and non-academic skills: arts and humanities; communication; mathematics; career preparation; consumer preparation; environmental education; health; nutrition; preparation for a changing society; safety; self concept; science; and values and citizenship. The testing program, mandated by the state of Kansas and the Elementary and Secondary Education Act Title III, was conducted between 1974 and 1978. The study was intended to describe the performance of Kansas' students, compare it to national norms, and indicate areas of strength or weakness which may be useful in educational planning. (For each of the areas tested, a description of the tests used, a summary of test results for different objectives, and a comparison of national and Kansas scores are presented. The final chapter summarizes the entire report). (GDC)

Descriptors—Affective Measures, \*Attitude Measures, \*Educational Attitudes, Elementary Secondary Education, Guidelines, Information Utilization, \*Opinions, Parent Attitudes, \*Participant Satisfaction, Program Attitudes, Questionnaires, Rating Scales, Sampling, Student Attitudes, \*Test Construction

Identifiers—Content Validity

The measurement of opinions helps to indicate students', teachers', and parents' satisfaction with school programs, as well as students' self concept and affective behavior. In choosing a sample, several issues should be considered: sampling error, sample size, selection procedure, and acceptable response rate. Follow-up survey procedures and questionnaire validity are also important concerns. Guidelines for item construction include: (1) word questions so as to elicit the same interpretation from every respondent; (2) use simple, familiar language; (3) avoid offensive questions; (4) avoid questions which suggest the socially desirable response; (5) include only one issue per item; and (6) do not confuse factual or cognitive items with opinion or affective items. Rating scale item formats are useful in measuring attitudes, opinions, and feelings; a variety of response alternatives may be appropriate. Pilot testing is recommended to insure the validity of the questionnaire. The decision of whether to use hand-tabulated or computer-processed analysis of data should be made before the questionnaires are completed. (GDC)

Descriptors—\*Cloze Procedure, Elementary Secondary Education, \*English (Second Language), Foreign Countries, Literature Reviews, Multiple Choice Tests, \*Objective Tests, Reading Comprehension, Reading Processes, \*Reading Tests, Test Construction, Test Reliability, Test Selection, Test Validity

Identifiers—\*Matching Cloze, Micronesia, Micronesian Achievement Test Series

The matching cloze format used in constructing the reading comprehension parts of the Micronesian Achievement Test Series (MATS) is described as a holistic approach which measures skills comparable to those needed by English as a second language students in actual reading situations. Kenneth Goodman's theory about the strategies used by good readers is described as it relates to the construction of matching cloze tests. Matching cloze requires the examinee to re-read and comprehend more of the passage than do multiple-choice cloze tests. Nine studies of the matching cloze procedure, conducted since its introduction in 1975, are summarized. They indicate that matching cloze is a reliable and valid method of testing reading achievement. The MATS reliability is noted to be quite high, from .82 to .96. The matching cloze procedure is also briefly compared with the standard cloze, multiple choice cloze, and traditional multiple choice tests; each method has advantages and disadvantages for different situations and with different samples of students. Tables are presented to summarize the nine published studies; reliability and validity estimates; and characteristics of different test formats. Instructions for test construction, administration, and scoring, as well as sample items, are appended. (GDC)

Descriptors—\*Educational Testing, Elementary Secondary Education, \*Guessing (Tests), Guidelines, Student Attitudes, \*Student Motivation, Teacher Attitudes, Testing Problems, \*Test Wiseness

Identifiers—New Jersey

Because motivational factors and test wiseness can contaminate testing used for needs assessments or evaluation purposes, techniques for increasing student and teacher motivation are discussed. Guidelines concerning guessing are also presented. While guessing is encouraged on program evaluation or screening tests, it is not advocated for diagnostic tests; thus, different scoring formulas may be appropriate for different applications of testing. Instruction designed to increase student motivation and test wiseness is described, and is said to be potentially fruitful when several situations are considered: the student's will to win, feelings of individual powerlessness, withdrawal due to previous failure, purposeless testing, and teachers' negative attitudes. Suggestions to combat these problems include feedback to students and parents. Advice is provided concerning several issues in a test wiseness program: when students should guess; strategies for norm-referenced, criterion-referenced, screening, and diagnostic tests; and scoring formulas. It is concluded that students must be taught to pace their testing time, that item construction cues can be taught, and that practice is useful. (GDC)

Descriptors—\*Achievement Need, Attribution Theory, \*Failure, Higher Education, \*Locus of Control, Multidimensional Scaling, Rating Scales, \*Self Determination, Semantic Differential, Student Responsibility, \*Success

An experiment was performed to obtain judgments of 324 college students about a list of 18 causal explanations for good or poor performance on an examination. These stimulus causes were judged with respect to a description of two hypothetical situations in which a student either did well or did poorly on the examination. Half the sample judged the similarity or difference of the 153 possible pairings of these 18 causes for success or failure. The other half of the sample was asked to rate the stimulus causes on 14 bipolar scales. Multidimensional scaling analysis of the similarities data in the success and failure conditions indicated that the subjects in each condition distinguished the causes on two dimensions: internal versus external and intentional versus unintentional. Analysis of the bipolar scale ratings provided statistical support for the interpretation of these dimensions. The results are discussed in relation to the a priori causal distinctions made in current attribution models of success-failure. (Author/CTM)

An experiment was performed with computer-generated data to investigate some of the operational characteristics of tailored testing as they are related to various provisions of the computer program and item pool. With respect to the computer program, two characteristics were varied: the size of the step of increase or decrease in item difficulty for successive items, and the range in difficulty levels within which items might be considered acceptably close to a specified level. With respect to item pools, the two characteristics were varied: the number of items in the pool, and the shape of the item difficulty distribution. Simulated test data were generated by computer for various values of the four parameters (step size, acceptance range, number of items, and item difficulty distribution) and for various hypothetical ability levels from plus three to minus three. The resulting expected values and standard errors were tabulated and are presented as a guide for those involved in setting up tailored testing procedures. (Author/CTM)

Identifiers—Massachusetts

A program is described for the evaluation of the basic skills policy of the State Board of Education in Massachusetts. The 1978 policy of the Board is to take effect in 1980-81 and will require annual assessment of student skills at three grade levels in all schools in five curriculum areas, but leaves the setting of standards to local option. Various groups have expressed strong positions for and against this policy and have raised a variety of questions about possible intended and unintended effects. Questions about the impact of this policy are grouped under four major headings: (1) what is the impact on student basic skills achievement; (2) what other impact on students does the policy have; (3) what is its impact on school practices; and (4) what is the impact on school/community support for the policy? Questions are raised about what data to collect, how to collect it, and what to do with it. Limits on rational evaluation strategies are discussed, but the usefulness of evaluation for decision making stressed. (Author/CTM)

Identifiers—\*Evaluation Research

Participant evaluation research is described as a

combination of three recent trends: action research conducted by teachers in their own classrooms, social action programs involving parent and community participation, and subjective epistemology which includes perceptions and contextual information within the accepted database. The planning phase of a specific participant evaluation research project is described, in which the distinctive characteristic was the involvement of parents, teachers, and professional evaluation specialists in planning and in decision making. This study was intended to investigate the relationship between educational productivity and home environment, classroom learning environment, and quantity and quality of instruction. Initial planning sessions were held separately with parents in one group and teachers in another. Afterwards, parents and teachers worked together. Various motivational and communications problems arose and are discussed as are a list of cautions concerning problems that are likely to occur in participant evaluation research projects. (CTM)

Identifiers—\*Evaluation Problems, \*Interrater Reliability, Navy

Comparisons were made of three different procedures for rating job performance and the validity of each procedure was estimated. All three procedures were based on observation of videotaped presentations of 12 electrical measurement problems, 8 of which had errors associated with them. The three procedures involved the use of three different evaluation forms: structured, semi-structured, and unstructured. The unstructured and semi-structured forms were modeled after existing Navy forms; but the structured form, requiring the evaluation of a series of explicit procedural steps, was specially designed for this study. Of the 78 raters tested, 42 were considered proficient and 36 were classified as low skill proficient. The percent agreement of raters using the structured rating form with correct job performance was nearly perfect (97 percent), but the agreement for the semi-structured form was only 81 percent and for the unstructured form was 77 percent. The percent of rating errors of omission and commission was also observed as were differences between high skilled and low skilled raters. (CTM)

Descriptors—Achievement Tests, Cognitive Processes, \*Elementary School Students, Grade 3, \*Intelligence Tests, Memory, Multiple Regression Analysis, \*Predictive Validity, Primary Education, \*Reading Achievement, \*Reading Difficulties, Reading Processes, Research Design, Word Recognition

Identifiers—Wechsler Intelligence Scale for Children (Revised), Wide Range Achievement Test. This study examines the usefulness of the Wechsler Intelligence Scale for Children-Revised (WISC-R) in predicting the reading achievement of 74 disabled readers in grade 3 on the word recognition subtest of the Wide Range Achievement Test (WRAT). The WRAT word recognition subtest was used because previous research has demonstrated a high positive correlation between performance in reading isolated words and actual reading achieve-

ment in school. The results of three stepwise multiple regression analyses revealed that the Comprehension, Picture Completion, Similarities, Block Design, and Object Assembly subtests accounted for 36.92 percent of the variance associated with performance on the WRAT subtest. These findings are discussed relative to the identification of disabled readers with individual intelligence tests and their implications for future research in the differential diagnosis of reading disabilities. Descriptors—Academic Achievement, College Admission, \*College Entrance Examinations, Correlation, \*English (Second Language), Foreign Students, \*Grade Point Average, Higher Education, Language Skills, \*Language Tests, \*Predictive Validity, Screening Tests, Standardized Tests, Student Placement, \*Test Validity

Identifiers—Graduate Record Examinations, Michigan Test of English Language Proficiency, Test of English as a Foreign Language

Eighteen studies on the validity of tests of English as a foreign language (EFL) for college admission and placement decisions are briefly summarized. No studies were found on the extent to which these tests reflect language skills, curriculum (content validity), or theory or behavior (construct validity). Instead, all of these studies investigated the predictive validity of test scores relative to some external standard, usually grade point average, but occasionally grades in EFL coursework or indices of decision-making accuracy. Author, affiliation, sample, predictor, criteria, and findings are reported for each study. The Test of English as a Foreign Language, the Graduate Record Examination, the Michigan Test of English Language Proficiency, and other tests were used as predictors, either alone or in various combinations. No predictor explained more than half of the variance in the criterion (grades) and most explained less than one-quarter. This lack of validity may be caused by variability in grading standards, exclusion of test candidates who were not admitted to college, or low content validity of the EFL tests themselves. Two predictors which need investigation are native language achievement and mathematical aptitude. (CP)

Descriptors—Classroom Observation Techniques, \*Elective Courses, Elementary Secondary Education, Longitudinal Studies, \*Mathematics Education, \*Parent Attitudes, Parent Role, Questionnaires, \*Self Concept, \*Sex Differences, Sex Role, \*Student Attitudes, Teacher Attitudes, Teacher Influence

A two year longitudinal cross-sectional project investigated the determinants of students' decisions to enroll in advanced mathematics courses, with particular attention to the determinants of sex-differentiated course participation. This study attempted to: (1) plot developmental shifts on psychological variables related to achievement attitudes; (2) assess the relative importance of these variables for student decision; and (3) identify the developmental origins

of individual differences on these variables. Questionnaires were administered to approximately 600 students in grades 5 through 12, their parents, and their teachers. School record data and observational data were also gathered in the first year of the study. Students' estimates of their mathematical abilities, their estimates of the value of advanced mathematics, and their perceptions of their parents' beliefs about their mathematical ability decreased with age. Students' estimates of the difficulty of mathematics increased with age. Plans to continue in mathematics were facilitated by high expectancies, high self concept of mathematical ability, and low estimates of future course difficulty. Sex differences favoring boys were found on each of these scales. In general, mothers had the greatest influence and fathers had the least influence on students' attitudes regarding mathematics. Teachers' influences were intermediary. (Author/CTM)

Descriptors—Admission Criteria, Class Rank, College Entrance Examinations, \*College Freshmen, \*College Transfer Students, Credits, Grade Point Average, Higher Education, On Campus Students, \*Universities

At the request of the Faculty Council on Academic Standards, a survey of university-wide admissions and graduation standards of 14 public and 6 private American institutions was undertaken. This report summarizes the university-wide admissions standards for freshmen and transfer students. Five specific requirements are dealt with and presented in tabular form: minimum high school grade point average or class rank; minimum high school subject units and distribution; standardized test requirements; minimum transfer grade point average; and restrictions placed on transfers based on the number of transfer credits amassed. For the 14 public universities, entrance requirements for freshmen and transfers are further divided into resident and non-resident requirements. For the 17 institutions having both earlier (late 1960's) and current sets of university-wide admissions standards, there is a summary with differences/changes noted. (Author/GSK)

Descriptors—\*Consultants, Elementary Secondary Education, \*Evaluation Methods, Information Utilization, \*Management Information Systems, Professional Services, Program Evaluation, \*Recordkeeping, \*Technical Assistance

Identifiers—Elementary Secondary Education Act Title I, \*Technical Assistance Centers

The results of the experience of a Technical Assistance Center (TAC) for three months with a system for classifying and recording actual and planned tasks and activities are described and discussed. The area covered by this report includes 15 states in 3 geographic regions. Staff days planned and actually spent and trips planned and spent are reported for each region and for each state. Percent of staff field time actually spent is reported for four foci: assisting in meeting reporting requirements, minimizing error, planning, and use of evaluation results. The number of TAC contacts is listed for 20 categories of providing information and three categories of obtaining information. There is a discussion of ways in which this information might be used to assist in planning and managing the activities in a TAC. Several purposes are listed for which these data may be useful. Descriptors—Career Counseling, Higher Education, High Schools, \*Interest Inventories, Sex Fairness, \*Sex Stereotypes, Test Interpretation, \*Test Validity, \*Vocational Interests

Identifiers—Unisex Act Interest Inventory

Recent research is summarized on interest assessment procedures as it bears on the issue of sex restrictiveness. Studies documenting sex restrictiveness in widely used interest inventories are cited, and alternatives to sex-restrictive interest assessment are suggested. Separate consideration is given to basic interest scales and to occupational scales. For basic interest scales, results are summarized for 15 recent validation studies which support the use of interest scores that are not sex restrictive. Such scores can easily be obtained for traditional scales that assess basic interests. Alternatives to traditional, sex-restrictive occupational scales are reviewed, including the use of cross-sex scales, combined-sex scales, cluster scales, and sex-balanced scales. Normative and correlational data are presented as aids in mitigating sex restrictiveness in existing occupational scales, and the value of placing greater emphasis on basic interest scales is illustrated. For both basic interest scales and occupational scales, primary attention is given to the possibility that interest inventories can consist entirely of items that elicit similar responses from males and females and provide males and females with similar vocational suggestions. Reliability and validity for the Unisex Act Interest Inventory (UNIACT) are summarized. (Author/BW)

Descriptors—\*Ambiguity, Criterion Referenced Tests, Electronics, Higher Education, \*Item Analysis, Learning Processes, Response Style (Tests), \*Student Attitudes, \*Testing Problems, \*Test Items, \*Test Validity

Identifiers—Domain Referenced Tests

Undergraduates responded to an objective test in electronics and classified each item by domain (one of 14 topics covered in their text), and by type of knowledge (definition, fact, principle, or interpretation). These judgments were compared to their instructor's "standard" judgments. From these data, an index of item-domain divergence in perceived item meaning between examinees and the content specialist was computed, in addition to traditional item statistics. This new measure provides a means for detecting ambiguous items not otherwise detectable using biserial correlations. Items deemed ambiguous by this procedure were compared with items indicated as being ambiguous by students in taped interviews. Avenues for future research are discussed. (Author/CP)

Descriptors—Elementary Education, Evaluation Criteria, \*Scoring, Writing (Composition), \*Writing Skills

Identifiers—Analytic Scoring, Holistic Evaluation, Primary Trait Scoring, \*SWRL Scoring System  
Three different scoring systems are described; these systems are widely used for evaluating students' writing samples. A new model for scoring is presented by comparing and contrasting that model with the other systems. A pilot study of the new model for writing-sample items, scoring keys, and scoring guidelines is discussed. The pilot study was conducted in grades 2-6, and results suggest that the new model is appropriate for evaluating writing-samples that are a part of competency tests. Data from large-scale use on competency tests is also presented. (Author)

Descriptors—\*Administrator Attitudes, Community Programs, Consumer Education, Elementary Secondary Education, \*Evaluation Needs, Federal Aid, \*Federal Regulation, Formative Evaluation, Postsecondary Education, \*Problems, \*Program Attitudes, \*Program Evaluation, Program Implementation, Program Improvement  
Directors of 39 projects funded by the federal Consumers' Education Program were interviewed about their attitudes toward federally mandated evaluation. The projects were varied, and included activities such as consumer workshops; development of curriculum, materials or policy; inservice training; consumer advocacy/counseling; and television programming. Funding averaged \$57,410. Most directors felt that federal officials were more concerned with audit data (expenditures, number of people served, attainment of objectives), than with program improvement. Only six directors felt that assessment of objectives was the primary purpose of evaluation; most emphasized program improvement and formative evaluation as the perceived purpose. Furthermore, the type of evaluation directors actually implemented reflected that purpose. Directors had a common problem—an inability to determine whether participants, be they teachers or citizens, used project information. Administrators also shared a need for reports of similar projects and for sample questionnaires written for people with limited research experience. (CP)

Identifiers—Department of Defense, \*Overseas Dependents School System, Rasch Model

This document describes the principles of the basic testing program of the Department of Defense Dependents Schools (DoDDS) and reports results in detail for the year 1978-79. Included are (1) the procedures used in developing the tests, (2) the statistical characteristics of the tests, (3) the methods employed in analyzing the findings, and (4) the curricular implications and recommendations based on these analyses. These documents were prepared for educators in the DoDDS system to serve as a basis for school level curricular review and development. Achievement test results are reported in detail in

terms of educational objectives and subskills. A review of this document and its findings should assist in developing new instructional strategies to strengthen achievement within the basic skills in reading, language, and mathematics. (Author/CTM)

Identifiers—\*Comprehensive Employment and Training Act

To comply with the Comprehensive Employment and Training Act (CETA) and with explicit federal guidelines for equal employment opportunity, local employment and training agencies funded by CETA need to develop client assessment programs. This volume and its companion are designed for this purpose. Five original program descriptions, and findings from large-scale surveys by Mark Battle Associates and A.L. Nellum and Associates are discussed to identify current practices, problems, and possible solutions. Both surveys indicated that the General Aptitude Test Battery was the most widely used instrument. A major problem is the lack of validated instruments for the typically disadvantaged client; the GATB is no exception. To anticipate problems or evaluate existing programs, a conceptual model of assessment and checklist for planning in-house or subcontracted programs are presented. (The appendix describes relevant reference works and information systems). (CP)

Identifiers—Comprehensive Tests of Basic Skills, Elementary Secondary Education Act Title I, \*Out of Level Testing

Test scores for fall and spring administrations for two consecutive years for Elementary and Secondary Education Act (ESEA) Title I students in the Tucson Unified School District are presented and compared. The students were given out-of-level tests: the 138 seventh-grade students and 106 eighth-grade students were given Level 2 of the Comprehensive Tests of Basic Skills (recommended for grades 4.5-6.9) and the 65 ninth-grade students were given Level 3 (recommended for grades 6.5-8.9). Each group took the same test on all four occasions. Data are presented for the total reading score, listing the mean for each group on each occasion in terms of expanded standard scores, normal curve equivalents, and grade equivalents. The appendix also lists means and standard deviations in expanded standard scores for two subscores and the total reading score. The statistical significance of the score changes are presented in terms of Student's t-test. The author discusses the implications of the results with reference to ESEA Title I evaluations. (CTM)

Identifiers—\*National Longitudinal Study High School Class 1972

Data from the National Longitudinal Study of the High School Class of 1972 (NLS) including the 1976 follow-up were used to examine the effects of interrupting or delaying school attendance on the eventual educational attainment of white male students. Background variables include socioeconomic and other family characteristics. Achievement test scores, grade point average, and age-grade retardation were also included in the study. The criterion for the study was projected educational attainment at four and a half years after high school graduation. Path analysis was used to study the relationships among the 18 variables. The best predictors of educational attainment were educational aspiration, ability as indicated by test scores, occupational aspiration, and high school grade point average in that order. In this sample of 3300 students, 76 percent

obtained some post-high school education. Of this group, 16 percent delayed their entry into post high school education, 15 percent interrupted their post high school education, and 16 percent attended other than two or four year colleges. It was concluded that delaying or interrupting post-secondary education did not handicap eventual educational attainment, and neither did delayed high school graduation. (CTM)

Identifiers—\*Frequency of Measurement

The effects of two components of formative evaluation, frequency of measurement and use of data, were compared. Fifty-two learning disabled and educable mentally retarded students in grades 2-6, enrolled in regular class programs and receiving reading instruction in a special education resource room, were randomly assigned to either (1) a pretest non-data-based change group; (2) a daily measurement non-data-based change group; (3) a daily measurement data-based change group; or (4) an untreated control group. Four types of data were used: oral reading rate correct, oral reading rate incorrect, word meaning, and comprehension. The first three measures were derived from the Power Builder Kits (Science Research Associates); the last was taken from the Stanford Diagnostic Reading Test. Group 3 had the highest oral reading correct rate, after the four week program. There were no significant group differences in word meaning or comprehension. Superior achievement occurred when teachers measured oral reading daily relative to daily goals and altered both goals and consequences, based upon student performance. The effectiveness of traditional pretests and posttests for formative evaluation was questioned. (Author/CP)

Identifiers—Georgia Assessment of Teacher Effectiveness, Iowa Tests of Basic Skills

Thirteen of the 41 classroom observation dimensions derived from Medley's review of teacher effectiveness reports were scored on the Georgia Assessment of Teacher Effectiveness. Subjects were 53 fifth and sixth grade teachers in language arts and mathematics. The dimensions were: large group instruction; group size without adult supervision; student seatwork, teacher structuring, student choice; structured academic time; student verbal interaction; correct substantive responses to teacher questions; low cognitive level questions; teacher discusses student response; teacher hostility and rebuking behavior; disruptive student behavior; student time on task; non-substantive teacher-student interaction; and structured student behavior. The contribution of each dimension to spring-term student achievement on the Iowa Tests of Basic Skills (ITBS) was calculated, after eliminating variance

attributed to the fall-term pretest, grade level, and socioeconomic status. All dimensions were significantly related to at least one of five ITBS subtests: vocabulary, reading, spelling, mathematics concepts, or mathematics problems. (CP)

Identifiers—\*Opinionnaire Political Institutions Participation

The Opinionnaire on Political Institutions and Participation (OPIIP) was designed to measure six dimensions of the overall construct of political attitude. Three studies were undertaken to determine the validity and reliability of the instrument, and the OPIIP was found to be a valid and reliable instrument for research and evaluations using multi-subject designs. Validation and cross-validation studies indicated that the instrument was construct valid for measuring political attitudes. Reliability studies indicated that overall test-pretest and internal consistency were moderately high. Studies of the reliability of the six subtests indicated that test-retest and internal consistency ranged from moderate to low. (Author)

Descriptors—Data Analysis, \*Evaluation Methods, Higher Education, Measurement Techniques, Objectives, \*Program Evaluation, Quasiexperimental Design, Research Reports, \*Womens Studies

The purpose of this handbook is to encourage and assist women's studies directors and faculty to perform or obtain evaluations of their programs in order to assist in their decision making needs, and to know how, when, and to what ends program evaluation can be used. Evaluation is defined and described. Five major approaches are listed: professional judgment, measurement, decision-theoretic, goal-free, and the fit between goals and reality. Goals and objectives are defined and possible dilemmas between long- and short-range goals discussed. A quasi-experimental design is described and exemplified for a program with seven objectives. Survey instruments, interviews, and observation techniques are described and compared. The need for planning data analysis in advance of data collection is presented. The final evaluation report is discussed with reference to its audiences (the client and other interested persons) and its format. An example of an executive summary report is appended, together with abstracts of 13 evaluations of women's studies programs, and a list of resource materials. (CTM)

Regression Artifacts in Nonequivalent Control Group Designs: An Empirical Investigation of Bias in ANCOVA and Matching Designs.

Pub Date—Apr 80  
Note—24p.; Paper presented at the Annual Meeting of the American Educational Research Association (64th, Boston, MA, April 7-11, 1980).  
Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**  
Descriptors—\*Analysis of Covariance, Control Groups, Error of Measurement, Experimental Groups, Foreign Countries, \*Matched Groups, Preschool Education, \*Quasiexperimental Design, Regression (Statistics), Research Design, \*Sampling, \*Statistical Bias, Statistical Significance

Identifiers—Mexico (Mexico City)

The presence of artifactual bias in analysis of covariance (ANCOVA) and in matching nonequivalent control group (NECG) designs was empirically investigated. The data set was obtained from a study of the effects of a television program on children from three day care centers in Mexico in which the subjects had been randomly selected within centers. However, differences in the scores of the children between centers were sufficient to provide a more able and a less able group for subsamples in an artificial quasiexperimental study of the same variables. With these subsamples, the same treatment effects were estimated using each NECG design. Unbiased and NECG estimators were then compared for each design, using the one-tailed binomial test to seek the presence of a systematic artifactual bias. A significant bias underlating the group initially lower on the pretest measures was found in both designs. The use of modern multivariate analysis designs was recommended as a better alternative, but experimental studies of these designs were also recommended. The advantage of randomization and true experimental design was pointed out. (Author/CTM)

Descriptors—\*Board of Education Policy, Change Strategies, Educational Policy, Elementary Secondary Education, \*Program Improvement, Research Utilization, \*Social Environment, \*State Boards of Education, \*Systems Approach, Systems Development, \*Urban Education, Urban Schools

Identifiers—\*Connecticut

This paper outlines several policy and program suggestions for improving Connecticut's urban schools which build upon the State's current initiatives and incorporate the current research findings emanating from studies of effective schools. The author first provides a framework for his suggestions by reviewing research to delineate the characteristics of instructionally effective schools. Recommendations for policy and program improvement in Connecticut's schools are based on the following assumptions: (1) individual schools are powerful social systems; (2) norms, beliefs, and values which serve to sustain the social system; and (3) the task of improving urban education is the task of redirecting the social system of individual schools. The author makes recommendations about specific policy issues in the following areas: (1) mission of the schools, (2) efficacy and expectation, (3) instructional leadership, (4) opportunities to learn, and (5) home school support systems. The author points out that because the technology of education is both "soft" and imported from a distance, it is difficult to ensure that intended outcomes actually occur in individual schools. The author concludes, however,

## 190 Document Resumes

that following his recommendations will help bring about improvement of educational achievement levels in urban schools. (MK)

Identifiers—\*Montessori Method, \*Ohio (Cleveland)

The primary goal of the Early Learning Laboratory is to reduce minority group isolation and promote interracial understanding and cooperation in a Montessori-type setting with a language development approach. The 300 students, ages 4-1/2 to 7 years, represent a racially mixed population appropriate to approved criteria. The behavioral competency curriculum reflects a strong Montessori methodology with additional focus on the development of oral and written language. The individualized beginning reading program is designed to take into account the cognitive, affective, and psychomotor domains. Parent and family involvement in the total educational process is seen as a vital component for the success of the school. A major focus of the school is to provide on-going staff inservice training that is targeted to maximize teaching processes for a more effective classroom delivery of curriculum content. Supportive services for students include speech therapy, social services, psychological services and health services. (Author/BE)

**Note on Ethnic Identification and Preference.**

Pub Date—Apr 79

Note—23p.

Pub Type—Information Analyses (070)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Blacks, \*Children, \*Ethnocentrism, Probability, \*Racial Bias, \*Racial Differences, \*Racial Identification, \*Research Methodology, Statistical Analysis, Whites

While research has shown that both black and white children can clearly discriminate (usually through the use of dolls or puppets) with respect to ethnic identification by the age of 3-4 years, findings regarding ethnic preference are more complex. Researcher W.C. Banks has implied that research designs that compare ethnic preferences across groups cannot lead to valid inferences. Alternatively, it is proposed here that such research can be useful if two commonly used measurement approaches, one based on a comparison of preference choices and the other on chance frequencies, are considered as

evaluating two different phenomena. When 21 studies are analyzed, different results are obtained by the use of different statistical approaches, one comparing percentages of own group choices. Most notably, it can be seen that whites consistently make more favorable own group responses than do blacks. This finding raises questions about the validity of white "control" groups for research on ethnic preferences. (Author/GC)

Identifiers—\*Elementary Secondary Education Act Title I, Impact Aid, \*New York (New York)  
In 1977-78, four remediation programs were funded under Title I and three under Impact Aid in New York City's School District 30. Title I programs included: (1) a teacher-paraprofessional reading team program in 12 elementary, intermediate and junior high schools; (2) a teacher-paraprofessional mathematics team program in 10 elementary, intermediate and junior high schools; (3) an optional assignment reading program for pupils who attended three District 30 schools beyond the bounds of their neighborhoods' attendance areas; and (4) a non-public school reading component for students in 3 private schools. Impact Aid programs included two reading and one mathematics component, all employing both teachers and paraprofessionals. The behavioral objective in each Title I and Impact Aid component was for seventy percent of the students to attain progress beyond their computed average rate of reading or math scores. With the exception of the optional assignment reading program, each program met or surpassed the objective. In this report, each program component is more fully described and student achievement data are presented. (Author/GC)

Descriptors—\*Academic Achievement, \*Cultural Differences, \*Educationally Disadvantaged, Foreign Countries, Language Patterns, \*Minority Group Children, Program Descriptions, Social Differences, \*Socioeconomic Background  
Identifiers—Israel

The major concern of the educational system in Israel today is how to advance students who come from low socioeconomic backgrounds and from a cultural background which is different from that of the privileged sectors of the population. In general, the problem of educationally disadvantaged students is related to the problem of social gaps. These gaps are found primarily between those coming from the Afro-Asian countries and those whose origin is in Western Europe or the Americas. Changes in the treatment of the educationally disadvantaged are represented by two main programs: The Reform of Secondary Education Accompanied by Integration, and a comprehensive program for the disadvantaged called The Educational Welfare Program. Other programs include boarding programs, tutoring programs, and programs for dropouts. Much re-

mains to be done, however, as is shown by numerous studies which point to unsatisfactory academic achievement and a continuing education gap. (Author/RLV)

Identifiers—Chicago Urban League, \*Illinois (Chicago)

This report attempts to answer the question "where do blacks currently live in Chicago?" and to clarify some of the housing related needs and desires of the black community and some of the patterns and forces which shape residential choice. The maps included in the report, developed using a "windshield survey," demonstrate that long, established trends of racial segregation and isolation have continued in Chicago. Although patterns of segregation seemed to be less rigid in 1977 than in 1970, racial prejudice remains the dominant force in determining where black Chicagoans will live. Other survey findings are reported under the following headings: (1) general patterns of expansion, (2) resegregation, (3) racial mixing, (4) areas of non-expansion, (5) population trends and rates of expansion, (6) housing demand and racial transition, (7) income levels and racial transition, (8) the current black homeownership market, and (9) the return of the middle class. It seems probable that established trends will continue into the 1980s although they may be altered by further racial mixing and an increase in the suburbanization of middle income blacks. (MK)

Identifiers—\*Louisiana (New Orleans)

Project ASSIST (Action Strategies for Implementing Social Transition) is an attempt to assess the needs, concerns, problems, strengths, and preferences of low income area residents within the city of New Orleans by developing primary based data. This report presents the findings of two major surveys, in which 1,306 households in eight low income neighborhoods were sampled. The areas of concern expressed by community residents include the high cost of living, the high crime rate, and housing needs. Other areas discussed include employment, education, health services, city services, small business opportunities, quality of the media, and the role of government and politics. (Author/RLV)

Thompson, Adell

Accountability, Research, Staff Training: The Role of the Urban University.

Note—12p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Accountability, \*Curriculum Development, Educational Improvement, \*Educational Research, Elementary Secondary Education, Higher Education, Inservice Teacher Education, Preservice Teacher Education, School Community Relationship, \*Staff Development, Teacher Improvement, \*Urban Schools, \*Urban Universities

Despite special programs, new technology, curriculum revisions, and compensatory education programs, there has been little improvement in the quality and results of urban education. Better accountability, research, and staff training, all areas in which the urban university can influence public education, are central to the resolution of urban

educational problems. While economic and political factors have increased demands for accountability, the ultimate goal should be to improve student learning and development. An effective accountability program should include: (1) joint participation of teachers, administrators, university personnel, parents, students, and community organizations; (2) consideration of all factors that influence learning, and concern with cognitive, affective, and psychomotor outcomes; (3) systematic measurement of objectives; (4) built-in mechanisms for experimentation and improvement of instruction; and (5) self criticism and an adequate reporting system. Educational research, another vehicle for the improvement of urban education, should be treated as the accumulation of experimental results. Researchers and curriculum planners must communicate regarding the results of current research and development activities. Urban universities can also contribute to improved urban education through staff development, including preservice and inservice teacher training, adequate supervision of trainees by people with urban school experience, and the integration of relevant psychological and cultural materials into courses taken by future teachers. (Author/GC)

Identifiers—Emergency School Aid Act 1972, \*New York (New York)

This manual describes a project funded through the Emergency School Aid Act (ESAA) and conducted by the Encampment for Citizenship, an organization designed to help young people from different racial, ethnic, social, geographic, and economic backgrounds to understand each other and explore their citizenship responsibilities. The ESAA human relations program was undertaken in nine New York City high schools undergoing desegregation and utilized methods employed in the Encampment's international programs to train high school leaders to have a positive impact on school desegregation. In each of the participating Brooklyn, Queens, and Bronx high schools, six to eight student leaders were recruited and trained to design and carry out activities that would reduce racial conflict in their school. In this manual, problems in the schools' surrounding communities are detailed and student leader and program staff training procedures are outlined. Community outreach activities as well as activities carried out in the schools under the human relations project are described. Program evaluation procedures are also outlined. The success of the program is hailed in terms of its impact in visibly reducing racial/ethnic prejudice. (GC)

Identifiers—Afro Asians, \*Israel (Jerusalem)

The study described in this report was conducted to test the connection between patterns of organization and functioning of individual Afro Asian families in Israel and the achievement of their children in formal educational settings. The 177 working

class families studied were mostly from Morocco, Iraq, and Iran and lived in neighborhoods considered to be disadvantaged. A family score was calculated for each family, consisting of a numerical expression of the overall academic achievement of all its children. The following components of family life were examined and compared to the family score in order to determine their relationship to children's school performance: (1) life style, including religious self definition and family rituals; (2) organization of space within apartments and privacy allotted to various family members; and (3) organization and use of manpower, including the household division of labor. General findings may be summarized as follows: (1) there is a connection between the organization and functioning of individual families and their children's academic achievements; (2) input of family members in activities directly related to schooling (homework, teacher contact, etc.) has less influence on children's achievement than do other activities less directly related to school; and (3) the more organized and efficient the family unit, the higher the children's achievement in school. (Author/GC)

Parent Involvement: Parent Development.

Center for the Study of Parent Involvement, Berkeley, Calif.

Pub Date—Jan 76

Note—18p.

Pub Type—Reports—Research (143)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—Advisory Committees, Community Involvement, Disadvantaged, \*Low Income Groups, Parent Attitudes, \*Parent Participation, Parents, \*Parent School Relationship, \*Policy Formation, Preschool Education, \*Self Concept Identifiers—\*Project Head Start, \*Wisconsin (Dane County)

The results of a study that probed the differential effects of low income parent involvement in the Dane County, Wisconsin, Head Start program are summarized in this paper. Different levels of parental involvement in the educational process of their preschool children were selected for study: enrolling the child in Head Start, receiving home visits, volunteering in the classroom, serving on the policy making committee, being paid employees, taking adult education courses in the community, and serving on community boards/committees. The study's main hypothesis was that involvement at the policy making level of Head Start has an important effect upon the lives of low income adults. Interviews were used to elicit 25 parents' feelings about the process of being involved in Head Start. Information was collected about age, marital status, number of children enrolled in Head Start, and economic and employment status. Respondents were also asked about self perceived changes in their behavior and self concept. Personal changes were reported by nearly every respondent at several involvement levels. The most effective change agents were employment in Head Start and serving on the parent advisory committees. This study shows that the involvement of low income/disadvantaged parents in Head Start programs can result in increased self confidence, control over their own lives, and community participation. Federal Republic of Nigeria National Policy on Education: An Educational Task for a Developing Nation.

Pub Date—[77]

Note—17p.

Pub Type—Opinion Papers (120)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Citizenship Education, \*Educational Philosophy, \*Educational Policy, Elementary Secondary Education, Foreign Countries, Higher Education, Labor Needs, \*Relevance (Education)

Identifiers—\*Nigeria

Nigeria inherited a British system of education with a British philosophy of education. This educational system no longer meets the needs of an independent Nigeria. Since independence eighteen years ago, the demand for a well defined national policy on education has generated much debate. This debate has led to many Federal and State commissions, all of which have made recommendations that would help to eliminate the strong bias toward the traditional literary and academic subjects. In

January, 1977, the Nigerian government issued a policy statement on education which contained the government's views on the philosophy of Nigerian education from preschool through the university levels. The specific national aims and objectives to which the philosophy is linked are: (1) the inculcation of national consciousness and national unity; (2) the inculcation of the right type of values and attitudes for the survival of the individual and the Nigerian society; (3) the training of the mind in the understanding of the world; and (4) the acquisition of appropriate skills, abilities and competencies, both mental and physical, as equipment for the individual to live in and contribute to the development of his society. New Approaches to Curriculum Development in Nigerian Schools.

Pub Date—[77]

Note—22p.

Pub Type—Opinion Papers (120)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Citizenship Education, \*Curriculum Development, Developing Nations, Educational Testing, Elementary Secondary Education, Foreign Countries, History, \*Relevance (Education), \*Social Studies Identifiers—\*Nigeria

The present Universal Primary Education Scheme which was launched in Nigeria in 1976 calls for innovation in curriculum development, classroom teaching techniques, and adequate supervision of instructional programs in the schools. The type of education imported to Nigeria under British control reflected the needs of the colonial government. Quality and relevance are the two features that curriculum development in Nigeria now needs. One impediment to curriculum reform is the system of external examinations around which the curriculum tends to be based. The school should play a leading role in teaching the importance of national unity, and each subject in the curriculum must have a way of inculcating national consciousness in the children. The ultimate goal should be to develop well informed and knowledgeable citizens. (Author/RLV)

Descriptors—\*Certification, \*Competency Based Teacher Education, Cultural Differences, \*Cultural Pluralism, Higher Education, \*Multicultural Education, \*Teacher Education

In an attempt to improve education, and to assist teachers in meeting the students' and the nation's rapidly changing needs, a format for a Multicultural Education License is presented. It is recommended that licensing for a multicultural undergraduate teacher education program be performance based or competency based. Included is a suggested structural design for a competency based multicultural teacher training program. Ten goals are presented and objectives under each goal are explored. (Author/RLV)

Ethnicity in the Suburbs: The Case of the Third Generation Japanese American.

Pub Date—1 Dec 79

Note—14p; Paper presented at the Annual Meeting of the American Anthropological Association (Cincinnati, Ohio, December 1, 1979). Best copy available.

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Ethnicity, Ethnic Relations, Group Unity, \*Identification (Psychology), \*Japanese Americans, Middle Class, \*Social Integration, Social Life, \*Suburbs

Identifiers—\*California (Orange County)

Japanese Americans in suburban Orange County,

California, are widely dispersed geographically and have frequent opportunities to integrate totally into mainstream society. Nevertheless, ethnicity survives and flourishes for many. The mechanisms by which ethnicity is developed and maintained by Japanese Americans residing in predominantly white, upper-middle class suburbs appear to differ in certain ways from the mechanisms operating on Japanese Americans living in more concentrated enclaves. Ethnicity is established in the suburbs through formal organizations which provide opportunities for formal and informal socializing with Japanese Americans from a wide geographic area. Three major kinds of ethnic institutions in Orange County—the Japanese American Buddhist and Christian churches, the Japanese American athletic leagues, and the Japanese American social and service clubs—function to provide a structured, protected, and acceptable setting in which to establish the more personally satisfying informal ethnic relationships. Johnson, Gordon C., II

An Exploratory Survey of the Attitudes of Black Memphians Toward Funeral Homes, the Funeral Ritual and Preparations for Death. Findings and Analysis.

Pub Date—Jun 75

Note—98p.

Pub Type—Reports—Research (143)

**EDRS Price—MF01/PC04 Plus Postage.**

Descriptors—Adults, Age Differences, \*Black Attitudes, \*Blacks, \*Death, Demography, \*Differences, Educational Background, Employment Level, Family Characteristics, Income, Marital Status, Questionnaires, Racial Differences, Religious Differences

Identifiers—Tennessee (Memphis)

Black Americans face a paradox concerning death: although their involvement with death is intense, their knowledge of death, per se, comprehension of death related behaviors, and exposure to available life extending alternatives are minimal. An interview based questionnaire was distributed to 1,010 adults in a predominantly black section of Memphis in order to investigate this paradox. The study was designed to disclose information concerning preferences, special practices, and attitudinal impressions of individuals and families regarding funeral service establishments, employees, and costs; funeral rituals; funeral home advertising practices; and manner and extent of preparation for death. Findings are analyzed in terms of variable respondent characteristics: birthplace and duration of residence, age, sex, race, occupation, education, religion, marital status, family size, size of household, and income. The findings indicate that blacks exhibit a high degree of acceptability toward death preparations yet a low degree of preparedness in understanding of, and commitment to a particular methodology with which plans might be carried out. **The Effect of Academic Status on Race-Related Differences in Reading Achievement and Reading Progress.**

Pub Date—[78]  
 Note—13p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Blacks, Elementary Education, Longitudinal Studies, \*Racial Differences, \*Reading Achievement, \*Student Mobility, Transfer Students, Whites

Race-related differences in reading achievement and reading progress were studied in a public elementary school. Two different groups of students were followed over a five year period. No significant racial differences in reading progress were found for those students who stayed within the school for three to four years. The reading achievement differences found were largely accounted for by the differences between test scores of black and white students who were new to the district at the time they were tested. The need to use a longitudinal approach in studies of differences in achievement is discussed. (Author)

Identifiers—\*Parent Teacher Association

This report summarizes the major results of Phase I of the National PTA's Urban Education Project. The project goal was to identify urban school and community problems, to focus national attention on them, and to develop new approaches to resolving them. Public hearings in six major cities and a national conference were held to accomplish this goal. Critical problems identified were: (1) inadequate public financing of education; (2) lack of parental or community involvement in schools; (3) low academic achievement and poor student performance; (4) inability of schools to meet diverse student needs; (5) general unemployment/youth unemployment; (6) negative public attitudes about public education; (7) financial overburden of urban school districts; (8) general violence in schools and communities; and (9) the tie between discipline and preparation of teachers. In order to resolve these problems the PTA Urban Advisory Task Force sought to facilitate the building of coalitions of local, state, and national organizations. An action plan was formulated to include issues around which coalitions should be built, strategies that involve students and parents as change agents, ways the Urban Advisory Task Force can help, and specific techniques to assist coalitions in meeting their goals. Descriptors—\*Change Strategies, \*Community Involvement, \*Educational Finance, Elementary Secondary Education, \*Parent Participation, Unemployment, \*Urban Education, Urban Problems, \*Youth Employment

Identifiers—\*Parent Teacher Association

The National PTA Urban Task Force chose to focus on three issues facing urban education: inadequate financing of public education, lack of parental or broad-based community participation in schools, and youth unemployment. The Task Force identified coalition building at local and national levels as the best strategy for helping resolve the selected

problems. Three coalition building models are presented. The school finance model emphasizes the development of alternatives to the inequities of a property tax base in order to achieve more uniform and stable financial bases. The parental involvement model stresses increased participation of parents in school, community, and home settings. It encompasses the use of parenting techniques to better enable parents to relate to their children and methods for mobilizing parents to overcome their sense of powerlessness in dealing with home/school factors that affect their children's educational needs. The youth unemployment model focuses on strategies for encouraging elected officials, business and industry leaders, and educators to commit themselves to improving job opportunities for youth. Emphasis is placed on school programs related to resources and training for employment in the community. (Author/MK)

Descriptors—Bilingual Education, \*College Programs, \*Cubans, \*Curriculum Development, Ethnic Relations, \*Ethnic Studies, Folk Culture, Multicultural Education, Postsecondary Education, Program Descriptions, Program Guides, \*Puerto Ricans

Identifiers—Ethnic Heritage Studies Program

Guidelines are presented for the development of a college level ethnic heritage course dealing with Puerto Rican and Cuban Americans. The first chapter discusses the value, focus, format, structure, and financial support of an ethnic studies program. A rationale and program description are provided in the second chapter. Chapter three contains a sample curriculum plan for the course. Chapters four through ten contain sample course outlines on the following topics: (1) Ethnic Studies; Theory and Practice; (2) Practicum in Hispanic and Non-Hispanic Intergroup Relations; (3) Patterns in Assimilation and Acculturation: The Hispanic Community of Greater Boston; (4) The History and Practice of Bilingual/Bicultural Education in America; (5) The Folk Tradition in Puerto Rico; and (6) Curriculum Development in Puerto Rican and Cuban Ethnic Heritage Studies. For each of the courses, the following information is provided: educational objectives; recommendations regarding class size, prerequisites, and audience; a bibliography of books and supplementary readings; topics for study; and suggested activities. Descriptors—\*Ethnic Relations, Foreign Countries, Housing, Police, \*Police Community Relationship, Racial Composition, \*Racial Relations, Social Services, \*Violence

Identifiers—East Indians, \*England (London), West Indians

This inquiry was designed to review the processes and identify some of the factors which were associated with violent confrontations in the East End of London, England and to make appropriate recommendations for action. Interviews were conducted with both indigenous respondents and Bengali and West Indian respondents during August through October, 1978. They made various suggestions for improving race relations in the area, including the recruitment of more Bengalis on the Council of Citizens; the improvement of housing, health, and social service provisions; and better police-community relations. Respondents were unanimous in their condemnation of all types of attacks against Bengalis and other groups and of organized attempts to incite racial violence and hatred. In the minds of the majority of those interviewed, these attacks are clearly associated with the manner in

which the police have responded to the situation. (Author/RLV)

**Classroom Structures and the Socialization of Tolerance.**

Pub Date—Apr 80

Note—20p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April, 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Attitude Change, \*Desegregation Effects, Elementary Secondary Education, Racial Integration, \*School Desegregation, \*Social Attitudes, \*Social Development, Social Integration, \*Social Values

While existing research suggests that schools have only indirect effects on students' racial and political attitudes, the social and demographic characteristics of desegregated classrooms may produce certain normative and behavioral outcomes which encourage children to accept human diversity encountered in concrete situations. This pattern of functional tolerance is a prerequisite for successful participation in the institutions of modern, heterogeneous society, and therefore represents an important aspect of citizenship training in public schools. It can be argued that universalism, achievement, and specificity take an additional significance within the racially and ethnically desegregated classroom. It seems highly probable that the child's prolonged exposure to concrete applications of universalistic standards will have considerable impact on his or her judgments and behaviors in intergroup settings in the school and elsewhere. Children's acceptance of universalistic norms is likely to be of vital importance in their preparation for adulthood. There exists a clear correspondence between those universalistic norms that govern classroom life and the standards which regulate other institutions. The child's experiences in desegregated classrooms may have added value in that they provide exposure to the systematic application of impartial standards across racial lines. (Author/MK)

**Research on the Effectiveness of Compensatory Education Programs: A Reanalysis of Data. Final Report.**

Stanford Research Inst., Menlo Park, Calif. Educational Policy Research Center.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Sep 77

Note—126p; For a version of this report without the eight appendices, see ED 147 386.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—\*Academic Achievement, \*Compensatory Education, Elementary Secondary Education, \*Evaluation Criteria, \*Evaluation Methods, \*Program Effectiveness, \*Program Evaluation, Standardized Tests

This report focuses on the extent to which conclusions about the effectiveness of compensatory education programs are affected by (1) the period of time on which the evaluation is based, and (2) the standard against which the program is judged. Previously collected evaluation data from four compensatory education programs (grades 1-8) are reanalyzed in order to test the effects of these components. Program effectiveness is judged according to the standards of both grade-equivalent and percentile point achievement indices, as measured by standardized tests. The primary finding of these analyses is that conclusions about program effectiveness are greatly influenced by the period of time over which the evaluation is based. Specifically, it is shown that the inclusion of the summer months in the evaluation can reduce estimates of achievement and reverse positive judgments of program effectiveness. Additionally, it is demonstrated that the 10 percentile point achievement standard is more stringent than grade-equivalent score standards, and is thus less likely to be met in a 12-month evaluation. Based on this study's findings, it is recommended that evaluation of compensatory programs be based on a 12-month (fall to fall) period and that students not be promoted on the basis of spring test scores. Descriptors—Academic Achievement, \*College Students, \*Computer Oriented Programs, Dropout Characteristics, \*Dropout Prevention, Educational Attainment, Enrollment, Higher Education, \*Management Information Systems, \*Minority Groups, \*Potential Dropouts, School Holding Power

This paper recommends new strategies in the use of data in monitoring enrollment distribution, retention, and graduation rates of minority students in predominantly white colleges. Surveys of current literature show there are three significant questions: (1) Who drops out? (2) Why do they drop out? and (3) How can the overall dropout rate be reduced? The Data-Driven Minority Student Retention Model addresses these questions by utilizing a comprehensive approach that provides for use of data in improving retention and graduation rates of minority populations. The data collection and formatting component of the model establishes a comprehensive and accurate data retrieval system for determining application, acceptance, and admission rates; academic strategy profiles; classification profiles; longitudinal program profiles; and graduation rates. The Computerized Academic Monitoring System component is the major force behind the early identification of students with academic difficulties during the first third of the term in selected courses. This system provides for the instructors' identification of students with poor marks and a follow-up communication system for contacting and assisting students. The adoption and effective implementation of the Data-Driven Retention Model should significantly improve the retention and graduation rates of minority students in higher education institutions. The Jensen Hypothesis: Social Science Research or Social Science Racism. Center Monograph Series, Monograph 2.

California Univ., Los Angeles. Afro-American Studies Center.

Pub Date—71

Note—72p.; Not available in paper copy due to institution's restriction.

Pub Type—Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Bias, Blacks, Disadvantaged, Educational Researchers, \*Environmental Influences, Experimenter Characteristics, \*Intelligence Differences, \*Intelligence Quotient, \*Nature Nurture Controversy, Public Policy, \*Research Methodology, Whites

Identifiers—Jensen (Arthur R)

In 1969, Arthur Jensen published his controversial article concluding that blacks are less intelligent than whites and that genetic factors explain more of the variance between the two groups than environmental differences. This paper criticizes Jensen's work and discusses its negative implications. Interpretive and methodological weaknesses in Jensen's research are described, including erroneous assumptions regarding environmental effects and gaps and incomplete analysis of variance in Jensen's data. The validity of IQ scores is then examined. It is held that IQ is a culturally biased measurement, subject to environmental influences, and that, furthermore, Jensen's interpretation of IQ scores is different for blacks and disadvantaged children than for whites. Next, political and social misuses of the Jensen hypothesis are discussed. Principal effects of Jensen's work are said to be enhancement of feelings of racial superiority among whites, reinforcement of the myth of individual responsibility for social mobility, the evolution of the "culture of poverty" thesis, and support for the status quo in the American educational system. Finally, Jensen's work is said to

exemplify how a scholar's values, as well as his own background, may lead him to be less objective than he thinks, especially in regard to subjects dealing with race, heredity, and environment. (Author/GC)

Differences Between Men and Women in Their Aspirations for Careers in Educational Administration.

Pub Date—7 Jan 80

Note—32p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Aspiration, Blacks, \*Educational Administration, Females, Males, \*Occupational Aspiration, \*Racial Differences, \*Self Concept, \*Sex Differences, Sex Stereotypes, Whites

This study looked at three areas of women's aspirations for careers in educational administration: the relative distribution of aspiration levels; the relationships to achievement orientation; and the relationship of self-role congruence to educational administration. Significant inequalities were found in the distribution of subjects based on sex, aspiration level, race, present position, educational plans, and expected career levels. There were more black women and white men with high career aspiration levels; fewer women at the level of principal or above; more plans for the doctorate among high career aspirants regardless of sex; and more women than men with low career expectations. Women in general had higher achievement orientation scores than did men; and women with high career aspirations scored higher than men with either high or low aspiration levels. Black men showed greater congruence toward administrative roles than did white men or black or white women. (Author/RLV)

Guidelines for Providing Integrated Education Within School Districts.

Michigan State Dept. of Education, Lansing.

Pub Date—Jun 77

Note—24p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Equal Education, Federal Courts, \*Guidelines, \*Racial Composition, \*School Desegregation, \*School Role, State Action, \*State Boards of Education

Identifiers—Michigan State Board of Education

The Michigan State Board of Education does not believe that Federal court intervention is necessarily the best avenue for achieving integration. It therefore recommends additional State actions to avoid further Federal court involvement in racially isolated school districts. The Board has proposed suggested guidelines for use by local school officials in determining whether any schools in their districts are racially isolated. Four sections are included in the guidelines: (1) racial composition in Michigan public schools; (2) principles of integrated education; (3) criteria for determining the existence of racial isolation within a school district; and (4) procedures for integration. This monograph contains seven papers presented at a 1977 symposium held to reevaluate the 1947 research work, "The People of Puerto Rico." (1) Sidney Mintz discusses the role of Puerto Rico in modern social science. (2) Eric Wolf, one of the authors of the 1947 work, comments retrospectively on some of the conceptual and methodological strengths and shortcomings of the original research. (3) William Roseberry analyzes "The People of Puerto Rico" in the context of the recent convergence of Marxism and anthropology. (4) Rafael L. Ramirez, in "Treinta años de antropología en Puerto Rico" (in Spanish), considers anthropology's position within the general development of social sciences since the 1940s, pointing out the discipline's influence in the island's politics. (5) Rene Velazquez examines Julian Steward's perspective on Puerto Rico and criticizes Steward's emphasis on the importance of material aspects of culture. (6) Ronald J. Duncan discusses the "culturing system" concept and asserts that cultural typologizing sacrifices ethnographic accuracy for theoretical tightness. (7) In "El pueblo de Puerto Rico: Donde está el Pueblo?" Eduardo Seda, one of the 1947 project's researchers, discusses social science research in Puerto Rico in relation to colonialism and imperialism. (GC)

Identifiers—\*Office for Civil Rights

This two part study was designed to determine whether working relationships can be expanded between the Office for Civil Rights (OCR) and various State agencies with similar missions. First, a survey of State laws and enforcement mechanisms identifies those States with current laws or policies similar to those that OCR administers. Results indicate that all but 11 States have specific or probable authority over such areas. The second part of the study explores the resources and capabilities of eight States in the area of civil rights. The scope and activities of each State's human rights commission, education agency, public health department and other human service agencies are described. The following conclusions are drawn: (1) agencies' willingness and capacity to work with OCR varies greatly; (2) many State human rights organizations are sophisticated and efficient; (3) several State education agencies operate strong civil rights programs that could be used to expand OCR's compliance review and monitoring functions; (4) State health departments are generally willing to undertake civil rights compliance or complaint handling activities; and (5) while civil rights programs exist in some other agencies, these are uncommon. A general conclusion is that though relationships with some State agencies could be expanded, attempts to impose uniform procedures are unlikely to succeed. (Author/GC)

Identifiers—\*Elementary Secondary Education Act Title I

The findings of audits and Office of Education program reviews from Title I programs in 20 States were analyzed for the years 1965-1976. The purposes of this study were (1) to determine the extent to which problems in State and local management of Title I have changed since 1965, and (2) to highlight current management problems which need the attention of local officials. This report describes the background of Title I evaluations, the design of the study undertaken, and findings of the study in regard to: (1) student and attendance area eligibility and targeting (including private school populations); (2) program development; (3) funds restrictions to ensure the use of Title I monies for supplemental and categorical services; and (4) State educational agency management functions. Findings are summarized for each of the four areas. Persisting problems in management are identified in the following categories: student selection, private schools, parent involvement, comparability, no-supplanting and general aid, State education agency application review and approval, and State education agency monitoring and auditing. Americans, \*Sex Role, Sex Stereotypes, Sexuality, Social Science Research  
Identifiers—\*Latin America

The purpose of this paper is to present a view of Latin American males and females that describes the situation in Latin America more accurately than the current stereotypical view accepted in the United States. The author discusses the roots of the North American misconception, citing differences between Latin American and North American cultures and between research done by male and female social scientists. Basic themes in Latin American culture are delineated as a background to sex roles. Latin American sex roles are discussed in terms of cultural and linguistic considerations; sexuality, courtship, and marriage; family structures; and women in the world of work. The author concludes that sex roles as defined in Latin America provide for well marked patterns of interactions and the division of labor and that the roles are balanced and complementary. He points out that women are seen as better prepared to discharge the tasks of balancing the spirit and body and raising future generations, while men are charged with the responsibility of providing economic support for the family. The author asserts that for both sexes, the meaning of life is separate from work and specific duties and that life is made meaningful through personal interactions. (MK)

Descriptors—\*Blacks, \*Federal Legislation, Government Role, \*Homeowners, Housing Discrimination, \*Housing Opportunities, Racial Discrimination, \*Suburban Housing

Identifiers—\*Civil Rights Act 1968 Title VIII

The persistence of racial imbalance in metropolitan population distribution is evidence of the tenacity of housing market discrimination as a determinant of the residential location of whites and blacks. That such segregated patterns persist more than a decade after Title VIII of the Civil Rights Act of 1968 suggests the need for renewed policy initiatives. This paper summarizes principal findings from a Rutgers University Center for Urban Policy Research homebuyers survey and suggests new policy directions in the area of fair housing legislation. The scope, assumptions, and remedial approach implicit in Title VIII are discussed, and it is shown that further legislation is required for a comprehensive attack on housing discrimination. Statistical evidence from the "Recent Buyers Survey" is examined in order to develop a framework for understanding the systemic nature of discrimination confronting blacks in a white dominated housing market. Examples of this include (1) the barriers preventing black homebuyers from gaining equal access to information about housing vacancies, and (2) the fact that blacks selling a suburban home confront unequal access to information dissemination channels required to successfully reach an adequate pool of buyers. Finally, it is recommended that the Federal government develop legislation regarding the dissemination of housing vacancy information in order to assure blacks' equal participation in the suburban housing market. **EDRS Price - MF01/PC06 Plus Postage.**

Descriptors—Community Action, \*Community Programs, \*Community Responsibility, Curriculum, Inner City, \*Mental Health Programs, \*Paraprofessional Personnel, Program Descriptions, \*Self Help Programs, \*Social Services  
Identifiers—Illinois (Chicago), \*Woodlawn Organization

A paraprofessional training program designed to provide community controlled mental health services to the Woodlawn community of Chicago, Illinois, is described in this monograph. The neighborhood and The Woodlawn Organization (T.W.O.A.), a self help project formed in early 1960, are described from an historical perspective. Some of the areas discussed in this history include the primarily black community's relationship with the adjacent University of Chicago, urban renewal and model cities, relationships between the community and local businesses, tenants' rights, the public school system, and social services. The goals and founding principles of the Woodlawn mental health program (co-sponsored by the National Institutes of Health and T.W.O.), as well as training activities designed to meet these goals are outlined. The competency based curriculum developed by T.W.O. to train community mental health leaders is presented. The program contains seminar, practicum, and individual study components. Courses are described in the areas of program development and evaluation; services to families, children and youth; services to consumers with special needs; group facilitation; development of human service networks; community action/change agency; and agency management. Adult/Vocational Education and the Asian/Pacific Americans.

Pub Date—Apr 80

Note—48p.; Paper presented at the Annual Conference of the National Association of Asian American and Pacific Education (Washington, DC, April 23-25, 1980). Appendices may be marginally legible due to light, broken print.

Pub Type—Reports - General (140) — Speeches - Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Adult Education, \*Asian Americans, Community Colleges, \*Educational Needs, Job Training, Minority Group Influences, \*Vocational Education, Vocational Schools  
Identifiers—\*Pacific Americans

The history of adult education in the United States and the participation of Asian/Pacific Americans in adult and vocational education are reviewed in this paper. The development of such programs during the past two centuries is briefly described. Numbers of participating adult learners and some demographic characteristics of these learners are discussed as are characteristics of the non profit agencies and proprietary schools which sponsor adult, vocational and continuing education programs. It is emphasized that opportunities for Asian/Pacific Americans in adult education, both as students and as teachers and administrators, should be expanded in order to make it more responsive to minorities. Increased unity among Asian and Pacific Americans and an augmented role for the National Association of Asian American and Pacific Education (NAAAPE) in adult education are recommended. Appended to the paper are bibliographies on adult and continuing education and information on courses offered in the field, State accrediting agencies, resource personnel (both Asian/Pacific American and other), Federal agencies with responsibilities in adult education, and numbers of Asian/Pacific Americans in adult and vocational programs (by State) and language of instruction in these programs. Also attached are descriptions of four training grants for Asian/Pacific American vocational programs. (GC)

**Identifiers**—Emergency School Aid Act 1972, Georgia (Atlanta)

Two Emergency School Aid Act pilot programs were conducted by the Atlanta Public Schools: Cultural Adjustment and Special Mathematics. The purpose of the Cultural Adjustment program was to reduce isolation and educational problems related to non-English speaking pupils and pupils who have first language interference. Program evaluation conclusions reported that: students studying English as a second language increased their proficiency in English usage; pupils studying Spanish as a native language increased their levels of skills in Spanish usage; special services were provided to improve levels of interaction between parents of immigrant students and the school; and the pupils were involved in varied activities designed to promote social adjustment and assist academic functioning. The Special Mathematics program sought to improve mathematics achievement of elementary pupils through a program in which students, parents, and school personnel could work cooperatively. The basic curriculum was the Curriculum Development Associates (CDA) Mathematics Program. Program evaluation concluded that: most pupils showed a loss in age achievement quotient after having used the CDA program; pupils made gains in self concept as learners; and teachers did not feel committed to the program, were not fully implementing it, and half the time used other teaching materials. Learning activities, behavioral objectives, and data tables are included. Cultural Adjustment program materials are appended. (Author/MK)

**Descriptors**—\*Administrator Attitudes, \*Corporal Punishment, \*Court Litigation, Discipline Policy, Elementary Secondary Education, \*Parent Attitudes, Public Schools, Spanish Speaking, State of the Art Reviews, \*Teacher Attitudes

The issue of corporal punishment of students in the elementary and secondary schools is examined in this paper. Included are a brief examination of the legal and cultural history of corporal punishment of children, a review of literature concerning parent and administrator attitudes toward corporal punishment, and a consideration of reasons for and against the practice. It is pointed out that although corporal punishment in schools is prohibited in much of Europe and in the Soviet Union, it is still accepted in all of the States in this country except New Jersey and Massachusetts. A number of studies on corporal punishment are briefly reviewed. Issues raised include the disproportionate application of the practice to poor, weak, or non English speaking children, parent attitudes toward punishment of their children in the schools, and the idea that corporal punishment teaches that the use of force is an acceptable means of solving problems. In addition, it is indicated that many experts feel that creative teachers can find more effective ways of enforcing discipline. The paper concludes with a list of guidelines for the legal administration of corporal punishment, and the observation that though most parents oppose the practice, school officials and teachers do not. **Identifiers**—\*Kent State University OH

A field based teacher education program, conducted through Kent State University and designed to prepare preservice teachers for urban settings, is the subject of this report. The paper is divided into three sections. In the first, the project is described with emphasis given to student teachers' performance, effectiveness, and role perceptions. The second section consists of a cost analysis comparing the field based project to conventional on-campus teacher education programs. Information is provided regarding the projects earnings/losses, student credit hours produced, income to salary ratios, two year costs, and comparisons with other field based courses taught at Kent State. In the paper's third section, the urban preservice teaching project is analyzed with respect to both historical antecedents and current developments in teacher education. The project is examined from the perspective of (1) nine generic models for teacher education funded by the U.S. Office of Education, (2) the guidelines of the Ohio Redesign for Teacher Education, and (3) the Kent State model for teacher education. In addition, the urban project is considered in light of the "process-product" and "time on task" dimensions of research on teacher education. (Author/GC)

**Identifiers**—\*New York (New York)

This report contains the results of a 1978 study of arts programs conducted through the public and private schools community organizations and art institutions that provide art education for New York City public school children. The process of "arts in education" is defined as "any person or persons imparting knowledge through a medium of art about art itself or about another subject." The report is based on 152 questionnaires returned in a survey of nearly 400 nonprofit organizations providing such programs. The objectives and research methodology used in the survey are reviewed. Survey results are analyzed in relation to the following areas: (1) who provides and who receives arts in education services; (2) what services are provided to public schools; and (3) how arts in education programs are evaluated. Characteristics of specific services, including performances, student workshops, lectures and demonstrations, are discussed. Several recommendations in the areas of standardizing program goals, information dissemination, and program funding, staffing and evaluation are offered, as is a tentative agenda for future research. Appended to the report are a roster of the study's advisory committee, a copy of the questionnaire distributed to individual programs, a list of respondents to the questionnaire, and a glossary of the types of organizations providing arts in education services. This manual outlines the procedures necessary for successful implementation of the Project READ-WRITE program. Two components are emphasized: the area of administration, supervision, and coordination; and the area of inservice training. Project READ-WRITE is described as a basic skills program in reading and related language arts designed to use in conjunction with or as a supplement to existing reading programs. The program utilizes a language experience approach, covering reading needs from phonics, structural analysis, and vocabulary development to inferential, critical, creative, and literal comprehension. The manual contains sections on program implementation, personnel and role expectation, student evaluation, inservice training, consultant services, and a reading skills checklist of behavioral objectives. Examples of forms for lesson plans, implementation reports, inservice evaluation, and implementation surveys are appended. (Author/MK)

**Identifiers**—\*Elementary Secondary Education Act Title I, New York (Staten Island)

The Summer Program objectives were to increase pupil competency by providing remedial and corrective instruction in reading and mathematics for children who were likely to be held back, needed strengthening in basic skills, or were one or more years below grade level in reading or math achievement. Eight elementary and junior high schools participated, servicing 624 students in grades one through nine. The elementary reading and math program focused on reteaching basic concepts and skills that children had not mastered. On the junior high level, reading and math instructional tech-

niques were geared toward the development of sequential learning. Communication skills were the foundation of the program. Process evaluation findings indicated that the program operated in an effective manner. Quantitative evaluation, based on criterion referenced tests, was completed separately for each grade level. Findings indicated a high degree of mastery of objectives at each level. Recommendations and test results are included. (MK)

Identifiers—Elementary Secondary Education Act Title I, \*New York (Staten Island)

This program was designed to improve reading skills and to provide intensive remediation for students in grades six through nine. Specialized materials and equipment were provided by Educational Development Laboratories (EDL). The EDL Reading Laboratory utilized the Learning 100 program, a multi-modality developmental and remedial program. Small groups of students received instruction for no less than 40 minutes daily, five days a week. Constant feedback on individual and group progress was provided. Quantitative analysis of the program was based on a pretest/posttest design with the Stanford Diagnostic Reading Test serving as the measuring instrument. In all cases the actual posttest mean surpassed the predicted posttest mean. The primary strengths of the program were seen to be the positive manner of the personnel involved, the high expectation level set for student performance, and the high degree of individualization achieved by program participants. Identifiers—Elementary Secondary Education Act Title I, New York (Staten Island)

Students in need of supplementary reading and mathematics instruction were identified, their specific needs determined, and prescriptive activities formulated. Prescriptive reading and math teachers were responsible for program implementation and coordination with classroom teachers in three elementary schools and one junior high school. Staff training activities were carried out, and a total of 17 objectives were identified for participants in the reading component. Posttest findings using the Prescriptive Reading Inventory as the measuring instrument indicated that all students in the program obtained the goals. Fourteen objectives were identified for participants in the math component. The Diagnostic Mathematics Inventory was used as a posttest instrument and indicated that all but one of the participating students achieved all math goals. (MK)

Title I Summer Program, Evaluation Report. Community School District 6, New York, N.Y. Pub Date—Oct 79

Note—16p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Compensatory Education, Elementary Education, \*English (Second Language), Junior High Schools, \*Mathematics Instruction, Program Evaluation, \*Reading Improvement, \*Remedial Instruction, \*Remedial Programs, \*Summer Programs

Identifiers—Elementary Secondary Education Act Title I, New York (New York)

The Summer Umbrella Program was designed to provide remedial instruction to children with demonstrable needs in reading, mathematics, and English as a second language. Instruction functioned on an individual or small group basis, employing a flexible, eclectic, multi-modality methodology. The instructional design was diagnostic/prescriptive. Pre and posttests of skills achievement and formal evaluative observation by a consultant were employed as evaluative techniques. Observation findings showed that a diagnostic/prescriptive model was implemented according to guidelines. The instructional strengths and expertise that existed among paraprofessionals, teachers, and administrators made for a positive climate. Pupils were observed to be eager to learn, attentive, and responsive to instruction. On the elementary level, 79.5 percent of the students obtained the same or a greater number of instructional objectives identified as the program goals for reading, 80.7 percent for ESL, and 74.6 percent for mathematics. On the junior high level, 81.2 percent obtained the program goals for reading, 80.4 percent for ESL, and 79.8 percent for mathematics. These findings indicate that in general, program guidelines were observed and most program goals were realized. (MK)

Major characteristics of seven Title I and Impact Aid components implemented in New York City School District 29 in 1978-79 are described in this evaluation. The components are: (1) an elementary grade Reading Diagnostic Program; (2) a project to

raise reading achievement in the intermediate schools; (3) an Early Childhood Center for students in grades one and two; (4) an Optional Assignment/Tutoring Reading program for seventh, eighth, and ninth graders; (5) the Special Program for Elementary Children, designed to provide remedial mathematics instruction; (6) a parent advisory component; and (7) an English as a Second Language (ESL) program, for students in grades 1-8. For each component, information regarding objectives, target population, staff and staff training, physical facilities and equipment, activities, parent involvement, and lesson observations is provided. Judgements presented about the programs' effectiveness are based on the results of standardized achievement tests, interviews with participating personnel, and direct observation. Data tables indicating student achievement are also included in the report. (Author/GC)

Identifiers—Elementary Secondary Education Act Title I, \*Impact Aid, New York (Queens)

Through the Title I/Impact Aid programs, special reading and math services were provided for 2,385 students in grades one through nine. Three levels of the Metropolitan Achievement Tests were used as objective pre and post test measures. Pupil activities in reading varied according to diagnosed needs, grade level, and demonstrated task mastery. Cognitive tasks engaged in included perceptual training, auditory discrimination, vocabulary development, word analysis, reading comprehension, study and test taking skills, and leisure reading. Reading program evaluation indicated that third through ninth graders achieved 6-12 month gains in reading achievement grade equivalent scores. First and second grade students demonstrated a mean gain of six months. The Diagnostic Prescriptive Arithmetic program was utilized in math labs in conjunction with the Individualized Math System, teacher made materials, and instructional games. Evaluation of the math component showed mean grade equivalent gains of six months to one year. Data tables are included. (MK)

Identifiers—Elementary Secondary Education Act Title I, New York (Queens)

The Environmental Education/Communication Skills program was designed to improve junior high school students' reading and writing skills. The key idea of the program was to motivate reading and writing improvement through environmental topic learning. Content focus areas were: orienteering, plant life, animal life, environmental problems, and future planning. A problem-solving approach and scientific method of investigation were stressed. Program evaluation focused on program operation and program effect. The program appeared to be fully implemented. The strengths of the program

were seen as content base and focus for language arts activities, positive staff attitudes, staff preparation, basic organization of rotating groups in topic areas, availability and quality of materials and equipment, and supervision and coordination. Students' achievement in reading comprehension was evaluated pre and post by the Literal and Inferential comprehension subtests of the Stanford Diagnostic Reading Test. Fifty-eight percent of participating students reached or exceeded the criterion in literal comprehension, 54% percent reached or exceeded the criterion in inferential comprehension. Ninety percent had acceptable scores on Writing Sample Characteristics Tests. Student and staff attitudes were evaluated using a questionnaire format. The staff felt the program was meeting its goals and should be maintained. Student responses were very positive. (MK)

Identifiers—\*Impact Aid, New York (Brooklyn)

The Federally funded programs discussed in this report were designed to help students with significant problems in either reading or mathematics achievement in the regular classrooms of District 22 in Brooklyn, New York. Both the math and reading programs operated on a "pullout" basis, utilizing a diagnostic teaching approach. The two programs differed primarily in terms of scope and evaluation design. The remedial reading project covered a total of twelve elementary, intermediate and junior high schools and served 1,253 children, while the diagnostic math program served only 432 children in seven schools. In the area of evaluation design, the reading program, which lasted one year, focused on pre and post mean group test scores, while the five month long math program focused on specific objectives for each child. The statistical evidence of success is positive for both projects. This success can be attributed to the combined "pull out," in-class, and resource teacher/consultant approach, to the monthly staff training sessions, and to the skills of teaching and administrative personnel. Both programs should be extended, though slight modifications of goals and objectives and student monitoring procedures, as well as a strengthening of the mathematics program, would make them even more effective. Identifiers—\*Elementary Secondary Education Act Title I, \*Impact Aid, New York (Brooklyn)

The District 21, 1978-79 Title I Reading Program had three basic components: (1) Augmented Reading Services, (2) Optional Assignment, and (3) Non Public Schools. The Augmented Reading Services component operated in six elementary schools, reaching a total of more than 1,300 students defined as below minimum competency and unserved by other programs. This component utilized a diagnostic/prescriptive approach and individual or small group instruction. Its effectiveness is reflected in the high ratios of actual to expected mean gains for program participants at each grade level. The Optional Assignment component served more than 300 educationally disadvantaged students in twelve non-Title I elementary schools. Like the first com-

ponent, Optional Assignment showed greater than expected mean achievement gains at every grade level. A supplementary program, Impact Aid, made it possible for Augmented Reading Services and Optional Assignment to effectively serve an additional 245 students. The final component of the program was one in which paraprofessionals worked together with teachers assigned to three non-public schools located in District 21. Their efforts were helpful in providing individualization of instruction. Overall, the strength of the Title I reading program may be attributed to the small group instruction. Its effectiveness is reflected in the dedication of teachers and paraprofessionals and effective utilization of individualized, diagnostic/prescriptive instruction. (Author/GC)

Identifiers—\*Elementary Secondary Education Act Title I, New York (Brooklyn)

Based on observations of all Title I reading teachers participating in the Program for Optional Assignment in District 20K, Brooklyn, New York, this report summarizes the program's policies, practices, and student achievement results. The program proposal called for assigning special reading teachers to work with second through ninth grade students, with 204 students in four schools ultimately served. The basic purpose of the program was to raise the reading achievement level of these Optional Assignment students by means of individualized and small group instruction. Requirements for student admission included economic disadvantage, residence in a Title I area, and a need for reading remediation. The principal feature of the program was a diagnostic/prescriptive approach to reading instruction based on individual needs. Teachers were well prepared and kept careful records on student progress. Space and equipment used by the program were adequate, though it is recommended that full size classrooms be found for the future, especially at the junior high school level. Measurement instruments utilized included the Stanford Early School Achievement Test (for second graders), the Stanford Reading Test, and a number of other diagnostic tests. Pre and post mean achievement data indicate highly positive gains at all grade levels. (Author/GC)

Identifiers—\*Elementary Secondary Education Act Title I, \*New York (Brooklyn)

A bilingual Title I program conducted for 251 Yiddish speaking students in grades 1-8 is evaluated in this report. The objectives of the program, which operated in six Yeshivas in Brooklyn, New York's District 20, are outlined. Staffing instructional patterns, student eligibility and participation, and student achievement evaluation procedures are described. A statistically significant improvement in language achievement is reported for all eight grades, although greatest gains are shown to have occurred among students in the lower grades. This is attributed to the more frequent instruction (mini-

mum three days per week) provided to these students. Also commented upon in the report are the quality of instructional services provided by the bilingual teachers and paraprofessionals, the provision of inservice staff training, and the public availability of information regarding the Title I bilingual program. Based upon the evaluation, it is recommended that this program be recycled. Also presented is a series of recommendations regarding administrative procedures, evaluation instruments employed, the coordination of the bilingual program with other Title I services, and frequency of instruction. Throughout the 1978-1979 school year, four teachers in District 20 in New York City were utilized for the purpose of developing math skills in selected students in four elementary schools. The target students were removed from class for the additional instruction that their needs required. Each teacher met with five groups of students per school day. The periods ran from forty to forty-five minutes for a total of 200 to 225 minutes of math instruction per week for each group. Teacher-student ratio was approximately 1 to 12. Growth in the mean scores for pre and post tests was noted for all the schools. The Math Success Program as it is conducted in District 20 continues to be an impressive success. (Author/RLV)

Identifiers—\*Elementary Secondary Education Act Title I, \*Impact Aid, New York (Brooklyn)

The Program for Reading Success was designed to improve the reading skills for first through ninth graders identified as being in need of remediation. Funding was supplied by Title I and Impact Aid. The program served 1,320 students and employed 22 teachers. Teachers gave individualized and small group instruction based on an intensive diagnostic program designed to isolate specific reading disabilities. The program was supplementary to regular reading programs. Inservice training sessions were provided for teachers. The Stanford Early School Achievement Test and the Stanford Achievement Test were used as pre and post test measurement tools. Data indicated a mean overall growth in reading grade equivalent scores of 13 months for first through third graders and 13.7 months for second through ninth grade Title I students. Reading Success Impact Aid students gained a mean of 12.3 months in reading achievement. On the basis of these data, it was asserted that the Reading Success Program helped to reduce the gap between Title I students and their non Title I peers. (MK)

Identifiers—\*New York (Brooklyn)

The Teaching English as a Second Language Program was developed as a response to the needs of a multicultural population. It provides services geared to the individual needs of non-English speaking children in elementary and junior high schools. Children were seen for five 40 to 45 minute periods weekly in groups of 10 to 12. An audio-lingual method of instruction was used. Program evaluation was based on observations, interviews, and pre and post test results. The TESL program proved effective in nine out of ten grade levels and met the need for which it was intended. Strengths of the program were found to be the pull-out approach (children were taken from their regular classes for special services) and the small group/individualized instruction using audio-lingual teaching aids. The evaluation showed that the staff was enthusiastic and the administrative organization was capable. (MK)

Identifiers—\*Elementary Secondary Education Act Title I, Impact Aid, \*New York (Bronx)

The following Title I and Impact Aid programs carried out in Bronx, New York's Community School District 10 are evaluated in this report: (1) a reading program providing remedial instruction to students in grades K-9; (2) a non public school component providing remedial reading and mathematics instruction to eligible students in grades 1-8 at private schools located within the district; (3) an Optional Assignment Reading Program for students in grades 7-9. A major goal of all three programs was to significantly increase the achievement of students from educationally disadvantaged backgrounds. Program objectives were achieved in the K-9 reading program and the non public school component, though not in the Optional Assignment Reading Program. Data presented in this evaluation include: program objectives, classroom observation reports, interview data from teachers, educational assistants and parents of participating students, pre and post achievement test results, and the status of objective attainment for each component. Identifiers—\*New York (New York)

The District 6 program for Pupils with Special

Educational Needs (PSEN) was designed to provide (1) supplementary reading instruction to English speakers, and (2) bilingual instruction and reading skills, including English as a Second Language (ESL), to Spanish and Greek speakers. A total of 3,856 kindergarten through third grade children and 227 fourth through eighth graders were served by the program. In the reading component, small group and individualized instruction were provided to children deficient in reading skills, following a sequential diagnostic/prescriptive model. The bilingual component of the PSEN program was designed to improve the Spanish or Greek of participants through reading instruction in the child's native language, as well as to improve the child's English language proficiency. The evaluation design for the District 6 PSEN program specified both process and product evaluation, and focused on the degree to which program objectives were being implemented. Results of the evaluation are presented in this report. Included are reading achievement data, information on staffing and instructional practices, and data acquired through observations and interviews focusing on teacher, paraprofessional, and administrator attitudes toward the program. Recommendations for improving the program are offered regarding bilingual instructional guidelines, diagnostic testing, and the utilization of ESL materials. (Author/GC)

This volume attempts to identify and describe factors that supported the unexpected expansion of Elementary and Secondary Education Act Title I services in thirteen participating local education agencies (LEAs). It also describes changes in program delivery patterns that may not have supported expansion of services but may have accompanied allocation policy change, and describes selected problems and successes faced by the individual districts as they conducted their programs. Increases in services received by students were attributed by the investigators to changes in the total availability of Title I funds, shifting of resources to elementary instruction, shifts in uses of funds within elementary instruction, and changes in the availability of donated resources. On the program delivery level, the investigators found that LEAs focused more on elementary instruction, modified coordination with other compensatory programs, changed staffing patterns, and increased specialist utilization and class size. Experiences of the LEAs in implementing allocation policy are described, with focus on the problems associated with changing from poverty to achievement criteria in the allocation of Title I resources, issues of service delivery, and parent involvement and reaction to allocation policy changes. Identifiers—\*Elementary Secondary Education Act Title I

Between the 1975-76 and 1976-77 school years, Title I school eligibility, student selection, and concentration of funds and services are scheduled to change. This report outlines the plans of the agency which will compare the distribution of instructional and other educational services before and after the policy changes and provide analysis for possible modifications in the Elementary and Secondary Education Act with regard to allocation policy. The study design, data sources, and analytic procedures selected to address the question of what kinds of services reach what kinds of students are described in detail. The study will focus on demonstration projects to be conducted in 16 school districts. Research objectives are identified as follows: (1) estimation and analysis of distribution of services; (2) analysis of community reaction to Title I programs and the demonstration projects; (3) estimation of costs or savings associated with altered allocation and eligibility policies; (4) the gathering of descriptive information on possible achievement outcomes of the demonstrations. Identifiers—\*New York

The proceedings of a conference on Asian Americans held in New York City in May 1978 are summarized in this report. The conference consisted of

workshops on four issues: employment, voter participation, youth, and the elderly. In the workshop on employment, issues discussed included the participation of Asians in the health system and in the public (Federal, State and local) sector. In the workshop on voter participation, discussion centered around problems of voter registration, voter education, and redistricting as they affect Asian Americans in New York City. Also considered were ways that the Voting Rights Act of 1965 can be used to increase the participation of Asian Americans with limited English speaking ability. Principle issues covered in the workshop on youth were the lack of statistics on Asian American young people, language and educational problems, youth programs and employment, and gangs and violence, particularly in New York City's Chinatown. In the workshop on the elderly Asian American population of New York City, the availability of census statistics, language and cultural problems, social isolation, health, limited income, and housing were among the areas discussed. For each workshop, relevant statistical information is presented. Recommendations of the conference participants for eliminating discrimination and inequalities are also given. (GC)

Descriptors—Annotated Bibliographies, Anthologies, \*Asian Americans, Chinese Americans, Cultural Background, \*Drama, \*Fiction, Filipino Americans, Japanese Americans, Korean Americans, Literary History, \*Literature, \*Poetry

Identifiers—Ethnic Heritage Studies Program, \*Hawaii

This annotated bibliography focuses on the drama, prose fiction, and poetry of people of Chinese, Japanese, Korean, and Filipino descent in Hawaii. All works cited were written in English, between the 1920s and 1970, with the exception of poems translated into English by their authors. The bibliography begins with an overview of the cultural and literary history of Asian-American literature in Hawaii. Each section of the bibliography is prefaced by an introduction to the literary form and to the types of materials included. A chronological index to each form indicates the decade in which each author worked. The drama section cites 82 plays and includes synopses of settings and plots. One hundred and ninety-nine novels, short stories, and anthologies are annotated in the fiction section. Plots or descriptions of anthology contents are abstracted. The poetry section cites 463 poems or anthologies. In some cases the subject of the poem is briefly described, and alternate sources are noted where appropriate. A subject index is appended. (MK)

Religious Observance by Muslim Employees: A Framework for Discussion.

Commission for Racial Equality, London (England).

Pub Date—Mar 80

Note—16p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Beliefs, \*Change Strategies, \*Employer Employee Relationship, \*Employment Practices, Employment Problems, Foreign Countries, \*Islamic Culture, Minority Groups, \*Religious Conflict, Religious Cultural Groups, \*Religious Discrimination, \*Religious Factors, Work Environment

Identifiers—Great Britain, \*Muslims

This paper discusses the relationship between the religious practices of Muslim employees and the requirements of the workplace. It is designed to provide information on the norms of Islam and the difficulties involved in its workplace practice, and to propose suggestions for resolving these difficulties that can form the basis for discussion and im-

plementation in particular cases. The religious requirements of Islam as well as the timing of religious practice are discussed. The authors propose that the main causes of difficulty for Muslim employees appear to be the following: (1) employers' and employees' misunderstandings of the content of Islam, (2) employees' fears that production will be jeopardized by allowing a part of the workforce to take time off to follow religious practices, (3) the absence of joint discussion and agreement on company policies regarding the performance of religious duties, (4) fears of Muslim employees that their rights are not adequately respected, and (5) fears of non-Muslim employees that catering to the religious needs of Muslims results in favoritism. The authors suggest that employers provide facilities which would allow Muslim employees to fulfill religious requirements with as little interference with work as possible. It is also suggested that employers reach agreements to provide time off for compulsory prayer during Id Al Adha. (MK)

Interviews and questionnaires were administered to black students and black and white faculty and administrators at seven universities to identify the principal problems related to the retention of black undergraduate students in higher educational institutions and to propose program alternatives and strategies for their retention and graduation from college. Poor academic preparation in secondary schools appears to be the main barrier to access to higher education at the universities studied. Once admitted, students tend to attribute academic failure to cultural/racial adjustment, financial problems, loneliness and alienation, hostility from white faculty and students, lack of counseling help, scarcity of black faculty models, and poor communication with black faculty. Recommendations are made regarding the responsibilities of predominantly white institutions in assuring access and graduation opportunities to black students in the following areas: admissions policies, recruitment, pre-college programs, orientation, counseling, cultural adjustment, white faculty/administrators, black faculty/administrators, contact with faculty, financial assistance, topics for further study, and data availability. This book provides a guide for teaching and learning about the experiences of Black females in America, and particularly about psychosocial issues in Black female development. The guide is divided into topic units. "Black Women in History" contains lessons of Black women in slavery, in the twentieth century, and historical and contemporary role models. Learning activities on Black feminism and new roads to survival for Black women are presented in "Black Women: Maintaining Personal Power." "Relationships, Roles, and the Family Life of Black Women" are addressed in sections on Black sex roles, patriarchy, the Black male, and the strengths of the Black family. "Being Black and Female: Toward Healthy Development" focuses on physical and psychological health issues, counseling concerns, depression and suicide, hypertension and cancer, and research priorities for the study of Black women. Each section of the guide contains a lesson plan which includes an introduction, objectives, facilitator preparation, suggested learning activities, and a bibliography. Some sections are appended by readings, worksheets and additional learning activities. Suggested media resources are appended. (MK)

Identifiers—\*Upward Bound

This report presents findings from the third of a series of studies of the Upward Bound (UB) program. The study was conducted between April, 1978, and September, 1979, to investigate long-term educational outcomes of UB program participation. The Upward Bound program was designed for low income high school students with potential for successfully completing a postsecondary program but who do not meet the conventional criteria for admission to such programs. Data were collected through a mail survey questionnaire, telephone interviews, and student transcripts. The UB program was found to have an impact on educational aspirations, postsecondary education (PSE) progress, and persistence. Impact appears to be related to participation patterns of former participants: those with typical participation patterns generally exhibited more positive outcomes than those with atypical patterns. A comparison of the patterns of educational progress for typical UB participants and nonparticipants indicates that the greater overall progress of participants is attributable to their greater rates of entry to PSE and to their propensity to attend four year institutions. The progress rates of UB participants and nonparticipants in two year institutions were not significantly different with the exception of graduation rates. It can be concluded that the UB program is effectively meeting its mandated objective to provide participants with the skills and motivation necessary for entry and success in education beyond high school. Summaries of previous evaluative studies and data collection and analysis techniques are appended. (Author/MK)

Miller, Stephen K. Crano, William D.

Raising Low-Income/Minority Achievement by Reducing Student Sense of Academic Futility: The Underlying Theoretical Commonalities of Suggested Strategies.

Pub Date—Apr 80

Note—41p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

Descriptors—\*Academic Achievement, Attribution Theory, Change Strategies, \*Classroom Environment, Elementary Secondary Education, Institutional Characteristics, \*Locus of Control, \*Low Income Groups, \*Minority Group Children, \*Motivation Techniques, Racial Bias, Reinforcement, Student Motivation, Student School Relationship

The author argues that despite the conventional wisdom that schools cannot overcome the effects of socioeconomic status and race on academic achievement, there is a growing body of literature indicating that school climate and students' sense of control of their environment are strongly correlated with achievement. Five school-specific strategies have been suggested for changing the school climate by concentrating on the students' sense of futility: (1) use of academic team games; (2) effective reinforcement techniques; (3) improved test taking skills; (4) confronting low academic performance by convincing the student to take personal responsibility for achievement outcomes; and (5) confronting racism by focusing on individual responsibility for success. The author uses attribution theory as a framework to identify the underlying commonalities of these five strategies and integrate them into a theoretical framework. He suggests that motivation is a highly alterable, situation-specific learning variable, and that an understanding of the problem of achievement and motivation requires analysis at both the level of social system and at the individual level. (Author/MK)

## Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors*, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

## Subject Index

### College Bound Students

Evaluation Study of the Upward Bound Program: A Second Follow-Up. Final Report.

ED 186 574

Rich or Poor, A College Scholarship Is Possible: A Guide to Scholarships without Financial Need.

ED 185 490

Use of Multiple Regression to Predict Academic Achievement at a Small Liberal Arts College.

ED 185 960

The Validity Over Time of College Freshman Grade Prediction Equations.

ED 185 896

### College Credits

Grade Distribution. Community Colleges, Fall 1978.

ED 186 050

### College Curriculum

All Above-Board: A Comparativist Looks at the Advanced Level French Syllabuses of the Nine GCE Boards.

ED 185 803

The Extent to Which Relaxation Techniques Are Taught at Community Colleges in California.

ED 186 074

Operating Manual for Two-Year Campus Programs.

ED 186 052

Proposal for a New College.

ED 185 923//

Toward the Restoration of the Liberal Arts Curriculum.

ED 185 877

### College Desegregation

The National Conference on Desegregation in Higher Education: An Evaluation Report.

ED 185 940

### College English

The Business of Business is "English"!

ED 185 596

### College Entrance Examinations

A Comparison of the Predictive Validity of the New and Old Medical College Admission Test with the Predictive Validity of Programmatic Variables Collected During the First Two Months of the Basic Medical Science Program.

ED 186 451

The Predictive Ability of Standardized Tests of English as a Foreign Language.

ED 186 476

The Validity Over Time of College Freshman Grade Prediction Equations.

ED 185 896

### College Environment

College Environmental Study.

ED 185 951

College Students' Perceptions of the Real and Desirable Environmental Variables on a Two-Year Commuter Campus.

ED 186 067

Old Myths and New Realities: Restructuring Student Services for Adult Learners.

ED 185 927

Welcome and Neglect: The Ambiguous Reception of Re-entry Women at a Private, Elite University.

ED 185 936

### College Faculty

Administrative and Research Development Programs for Women and Minorities: The Need and Response.

ED 185 933

Faculty Compensation 1979-1980: Management Report.

ED 186 088

Fulbright Awards Abroad, 1981-82. University Teaching, Advanced Research.

ED 185 909

The Hidden Professoriate. Credentialism, Professionalism, and the Tenure Crisis. Contributions in Sociology, Number 29.

ED 185 950//

Humanism Begins at Home.

ED 185 931

Instructional Development Activities in a Faculty Development Program.

ED 185 937

## College Second Language Programs

217

Issues of Merit Pay in Higher Education: A Selective Bibliography.

ED 185 943

Smaller College Sociologists Participation in Professional Organizations: Obstacles and Opportunities.

ED 186 304

Status Identities in Academic Education Units: A Q-Factor Analytic Exploration.

ED 185 941

A Study of the Role and Responsibilities of the Academic Senate and the California Teachers Association Bargaining Unit in Educational Matters.

ED 186 066

Survey of Provision for Academic Staff Development (United Kingdom and Canada). Survey III.

ED 185 942

Tenure, Alternatives-to-Tenure, and the Courts.

ED 185 696

The USC Faculty Planning Model: A History and Description.

ED 185 882

The Yeshiva Case: Special Analysis. The Impact of the Supreme Court Decision. Newsletter, National Center for the Study of Collective Bargaining in Higher Education, Vol. 8, No. 1, Jan.-Feb., 1980.

ED 185 887

### College Freshmen

Persistence in College: The Impact of Financial Assistance to Students.

ED 185 939

Summarization of University-wide Admissions Standards for 20 Comparison Institutions.

ED 186 478

The Tests of General Educational Development in Differential Prediction of Two-Year College Academic Performance.

ED 185 491

The Validity Over Time of College Freshman Grade Prediction Equations.

ED 185 896

### College Governing Councils

A Study of the Role and Responsibilities of the Academic Senate and the California Teachers Association Bargaining Unit in Educational Matters.

ED 186 066

### College Graduates

Teacher Evaluation in Early Childhood Education: Application of a Model.

ED 186 110

### College Housing

An Analysis of the Residence Hall Environment at Indiana University Using an Ecosystem Model.

ED 185 445

Selected Personality Variables of Students in Single-Sex and Coeducational Residence Halls.

ED 185 932

### College Instruction

Influence of Course Structure on Student Affect: The Structural Affect Hypothesis.

ED 185 938

### College Mathematics

Psychology of Equation Solving: An Information Processing Study. Final Technical Report.

ED 186 243

Report on the Continuous Sequence in Basic Mathematics: A College Remedial Math Program. A Seven Year Study at Central Michigan University.

ED 186 259

### College Planning

Annual Report of the South Carolina Commission on Higher Education.

ED 185 958

An Investigation of Strategies of Operation under Conditions of Reduced Funding in Selected Community Colleges.

ED 186 065

A Perspective on the '80s: Agenda for Action for the Pennsylvania State University.

ED 185 957

A Planning Manual for Colleges.

ED 185 922

The USC Faculty Planning Model: A History and Description.

ED 185 882

### College Preparation

Evaluation Study of the Upward Bound Program: A Second Follow-Up. Final Report.

ED 186 574

### College Presidents

The President's Relationship to the Board.

ED 186 072

### College Programs

An Experiential Learning Model for Students with Disabilities: Internships and Career Development.

ED 185 790

Guidelines for the Development of a Program in Puerto Rican and Cuban Ethnic Heritage Studies at the Post-Secondary Level.

ED 186 521

Internships and Effective Career Development for Disabled Students.

ED 185 791

[Two-Year Colleges: Information, Facts, and Figures, 1980].

#### Computer Assisted Instruction

An Annotated Bibliography for Instructional Systems Development.

ED 186 023

Computer-Assisted Instruction in the Context of the Advanced Instructional System: Authoring Support Software. Final Report.

ED 186 025

## Subject Index

A Computer-Based Approach to Functional Literacy Training for Recruits: Performance-Related Enabling Skills Training (PREST).

ED 185 505

Conference Report: Wyoming Invitational Conference on Instructional Applications of Computers.

ED 186 262

ICCE Newsletter. Volume 9, Number 1.

ED 185 316

Instructional Design for MPLSM Operators' Training on the Automated Instructional Development System (AIDS).

ED 186 016

Integrated System Test of the Advanced Instructional System (AIS). Final Report.

ED 186 464

Low-Cost Computer-Aided Instruction/Computer-Managed Instruction (CAI/CMI) System: Feasibility Study. Final Report.

ED 186 017

The PLATO Elementary Demonstration Educational Outcome Evaluation. Final Report: Summary and Conclusions.

ED 186 020

The PLATO Elementary Demonstration Educational Outcome Evaluation. Final Report: Volumes I and II. Revised.

ED 186 019

Results and Analysis of a Computer Assisted Instructional Program in Basic Skills in a Detention Center.

ED 186 027

The Use of Computers in Broadcast Education.

ED 185 616

The Use of the Portable Computer in Classroom Instruction.

ED 186 339

Vibrations and Waves: Using Computer Assisted Learning.

ED 186 234

### Computer Assisted Testing

Operational Characteristics of a One-Parameter Tailored Testing Procedure. Research Report 79-2.

ED 186 471

### Computer Managed Instruction

An Annotated Bibliography for Instructional Systems Development.

ED 186 023

COACH: A Schema-Based Tutor.

ED 186 015

Low-Cost Computer-Aided Instruction/Computer-Managed Instruction (CAI/CMI) System: Feasibility Study. Final Report.

ED 186 017

### Computer Oriented Programs

COACH: A Schema-Based Tutor.

ED 186 015

COED Transactions, Vol. XI, No. 12, December 1979. Some Alternate Applications of Microprocessor Trainers in Support of Undergraduate Laboratories.

ED 186 248//

Conference Report: Wyoming Invitational Conference on Instructional Applications of Computers.

ED 186 262

Developing a Data-Driven Retention Model for Improving Minority Student Persistence in Predominantly White and Historically Black Colleges.

ED 186 525

Development of an Academic Alert and Advisement System Using a Participational Governance Structure.

ED 186 086

The Development of the Washington Library Network.

ED 186 003

A Feasibility Study on Computerizing the Resource and Referral Service Database.

ED 186 034

The USC Faculty Planning Model: A History and Description.

ED 185 882

The Use of Computers in Broadcast Education.

ED 185 616

### Computer Output Microfilm

Interlibrary Lending with Computerized Union Catalogues.

ED 185 995

### Computer Science

The Role of the Library in an Electronic Society.

ED 186 043

### Computer Science Education

Proposed Plan for Magnet Schools-Cleveland Public Schools. Section II, Business Careers Center.

ED 186 500

### Computer Software

Computer-Assisted Instruction in the Context of the Advanced Instructional System: Authoring Support Software. Final Report.

ED 186 025

### Computers

COED Transactions, Vol. XI, No. 12, December 1979. Some Alternate Applications of Microprocessor Trainers in Support of Undergraduate Laboratories.

ED 186 248//

Conference Report: Wyoming Invitational Conference on Instructional Applications of Computers.

ED 186 262

Low-Cost Terminal Alternative for Learning Center Managers. Final Report.

ED 186 024

Research Report on an Overview of a Proposed Monitoring Facility for the Large-Scale, Network-Based OCLC On-Line System.

ED 186 042

### Concept Formation

The Acquisition of More and Less: A Critical Review Kansas Working Papers in Linguistics, Vol. 4, No. 2.

ED 185 831

Art As Language for the Handicapped.

ED 185 774

Career as a Developmental Concept.

ED 185 453

Comparison of Static Form and Dynamic Action As the Basis of Children's Early Word Extensions. Kansas Working Papers in Linguistics, Vol. 4, No. 2.

ED 185 829

Constructivism as a Model for Cognitive Development and (Eventually) Learning (Orange Juice Experiment): The Development of Proportional Reasoning in the Child and Adolescent.

ED 186 236

### Concept Teaching

Art As Language for the Handicapped.

ED 185 774

### Conceptual Integration

Early Childhood Education: A Synoptic View.

ED 186 124

### Conferences

Conference for Women Administrators: Financial Management of Colleges and Universities.

ED 185 918

Documentation and Evaluation Study of the Texas Teacher Corps Network Program '78 Community Council Developmental Training Conference.

ED 186 396

Follow-up Conference Assessments Impact Study.

ED 186 417

The National Conference on Desegregation in Higher Education: An Evaluation Report.

ED 185 940

Report of the Annual Conference for Facilitators of Organization Development in Education (2nd, Eugene, Oregon, February 1-3, 1979).

ED 185 701

Report of the Annual Conference for Facilitators of Organization Development in Education (3rd, Eugene, Oregon, January 31-February 2, 1980).

ED 185 702

### Confidential Records

Acceptable Practices in Maintaining Personnel Files.

ED 185 698

## Consumer Education

221

### Confidentiality

Collecting Sensitive Data Anonymously: Further Findings on the CDRGP Technique.

ED 186 045

### Conflict Resolution

Noncoercive Inducements in International Conflicts.

### Health Personnel

The Area Resource File: ARF. A Manpower Planning and Research Tool.

ED 186 029

Continuing Medical Education for National Health Service Corps Personnel. A Manual for Providers.

ED 185 400

Initiation of Student-Paced Learning Modules in Graduate Training Programs in Health Administration/Planning. The Comprehensive Final Report, October 1, 1978 through December 31, 1979.

ED 185 310

### Health Services

Area Health Education Centers: The Pioneering Years, 1972-1978.

ED 185 878

Community Mental Health: Issues for Social Work Practice and Education.

ED 185 872

Healthy People. The Surgeon General's Report on Health Promotion and Disease Prevention.

ED 186 357

Life Events, Mental Health Functioning and the Use of Health Care Services by the Elderly.

ED 185 443

Master Plan of Operation for Preparing a Programme of Inter-Related Services for Children in Afghanistan, 1977-1978. Part I: The Framework; Part II: The Programme.

ED 186 097

Special Report on Dental Care for Handicapped People.

ED 185 723

### Health Systems Agencies

Issues Related to Review Criteria and Standards for Mental Health Projects.

ED 185 483

### Hearings

Scripts for Preparing for a Hearing, Conducting a Hearing, Writing a Decision.

ED 185 742

### Heart Rate

Cardioenergetics. An Essential Part of the Physical Education Instructional Program.

ED 186 383

### Hermeneutics

Towards a New Aesthetic. Occasional Paper No. 12. Curriculum, Media & Instruction.

ED 186 299

### High Interest Low Vocabulary Books

Readability Levels of Second Grade Hi-Lo Reading Materials.

ED 185 535

### High Risk Students

Evaluation Study of the Upward Bound Program: A Second Follow-Up. Final Report.

ED 186 574

The LACC Tutoring Program: An Evaluation. Research Study #80-4.

ED 186 079

### High School Equivalency Programs

Program Design for External High School Diploma Program.

ED 185 422

Youth Chance. A Program of the San Francisco Mayor's Office of Employment and Training.

ED 185 359

### High School Freshmen

Development and Implementation of an Articulation Model for Identified Entering Freshmen with School Adjustment Problems.

ED 185 476

### High School Graduates

Is the Die Cast? Educational Achievements and Work Destinations of Ontario Youth. A Six-Year Follow-Up of the Critical Juncture High School Students.

ED 185 412

### High School Seniors

Drugs and the Class of '78: Behaviors, Attitudes, and Recent National Trends.

ED 185 649

Highlights from Drugs and the Class of '78: Behaviors, Attitudes, and Recent National Trends.

ED 185 458

### High School Students

An Intervention Model to Improve School Attendance and Achievement.

ED 185 655

Vocational Preference, Anxiety and Educational Self-Theory of High School Students.

ED 185 328

Who's Who among American High School Students: Tenth National Opinion Survey.

ED 185 434

### High Schools

Continuation of Pilot Program for Training Placement Personnel.

ED 185 411

### Higher Education

Accountability: Restoring the Quality of Partnership.

ED 185 902

Annual Report of the South Carolina Commission on Higher Education.

## Subject Index

### Local Legislation

- Public Library Legislation at the Local and State Level. ED 185 981

### Locus of Control

- Multidimensional Scaling of the Causes for Success and Failure. ED 186 470  
Raising Low-Income/Minority Achievement by Reducing Student Sense of Academic Futility: The Underlying Theoretical Commonalities of Suggested Strategies. ED 186 575

### Logical Thinking

- Intuitive and Logical Reasoning Approaches to Multi-Dimensional Problems. ED 186 244  
Reasoning Ability of Mildly Retarded Learners. What Research and Experience Say to the Teacher of Exceptional Children. ED 185 794  
Understanding the Development of Analogical Reasoning Ability. ED 186 132

### Long Range Planning

- Long Range Educational Planning with Emphasis on Staff Development. ED 185 664  
The Next Ten Years in Education. ED 185 433  
Toward the Growth of an Integrated Set of Management Information Systems, with Special Emphasis on Short-Range Planning, Long-Range Planning, and Program Evaluation. ED 185 732

### Longitudinal Studies

- Cognitive and Affective Influences on the Developments of Sex-Related Differences in Mathematics. Symposium. ED 186 255

### Louisiana (Baton Rouge)

- Stop Rape Crisis Center: An Exemplary Project. ED 185 447

### Louisiana (New Orleans)

- Project ASSIST: Action Strategies for Implementing Social Transition. ED 186 507

### Low Achievement

- An Intervention Model to Improve School Attendance and Achievement. ED 185 655  
Speaking and Writing: The Semantic Connection. ED 185 561

### Low Income Groups

- El Conocimiento Ocupacional y del Yo para los Grupos Especiales. Monografías sobre el Conocimiento Ocupacional y del Yo. ED 185 407  
Outreach Program in the Arts for the Low-Income Elderly: Analysis of Pilot Program for the Low-Income Elderly. ED 185 467  
Parent Involvement: Parent Development. ED 186 511  
Project ASSIST: Action Strategies for Implementing Social Transition. ED 186 507  
Raising Low-Income/Minority Achievement by Reducing Student Sense of Academic Futility: The Underlying Theoretical Commonalities of Suggested Strategies. ED 186 575

### Lower Class

- Parental Response to Pre-School Provision: A Study of 77 Families, Focussing on the Characteristics of Those Who Chose Not to Use a New Community Playgroup. ED 186 093

### Lubricants

- Fuels, Lubricants, and Coolants. FOS: Fundamentals of Service. ED 185 333

### Luria (Alexander)

- Functional Systems and Culturally-Determined Cognitive Differences. ED 185 634

### Machine Tools

- Shop Tools. FOS: Fundamentals of Service. ED 185 429

### Magnet Schools

- Magnet School Planning Project: Science and Technology Magnet School. ED 186 237  
Proposed Plan for Magnet Schools-Cleveland Public Schools. Section II, Business Careers Center. ED 186 500  
Proposed Plan for Magnet Schools-Cleveland Public Schools. Section II, Center for Individualized Learning. ED 186 498  
Proposed Plan for Magnet Schools-Cleveland Public Schools. Section II, Cleveland Center for Fundamental Education. ED 186 497  
Proposed Plan for Magnet Schools-Cleveland Public Schools. Section II, Early Learning Laboratory, Cleveland Public Schools. ED 186 499  
Proposed Plan for Magnet Schools-Cleveland Public Schools. Section II, Health Careers Center. ED 186 501  
Proposed Plan for Magnet Schools-Cleveland Public Schools. Section I: Overview of Magnet Program. ED 186 496

### Mainstreaming

- Administrative Interventions to Provide Educational Services for Declassified Students. ED 185 710  
A Common Body of Practice for Teachers: The Challenge of Public Law 94-142 to Teacher Education. ED 186 399  
The Community Imperative: A Refutation of All Arguments in Support of Institutionalizing Anybody because of Mental Retardation. ED 185 787  
FAPE [Free Appropriate Public Education]. University of Vermont Summer Institute (Burlington, Vermont, July 18-22, 1978). ED 186 432  
Mainstreaming in the Social Studies. Bulletin 62. ED 186 346  
Mainstreaming of the Special Education Pupil into Regular Physical Education. ED 185 725  
Measuring Pupil Progress Toward the Least Restrictive Environment. ED 185 767  
A Piagetian Approach to a Mainstreamed Preschool. ED 186 113  
The Relationship of Individualized Instruction to the Placement of Exceptional Children: A Geographically Comparative Study. ED 185 780  
Vocational Administrator's Guidebook: Mainstreaming Special Needs Students in Vocational Education. ED 185 375

### Mainstreaming the Disadvantaged

- Exemplary Programs for the Disadvantaged: A Report of a National Study. ED 185 297

### Majors (Students)

- Degrees and Other Formal Awards Conferred by Nebraska Institutions of Postsecondary Education, 1974-75 through 1977-78. A Mini-Series Report, No. 6. ED 185 888  
Degrees and Other Formal Awards Conferred by New Jersey Colleges and Universities, by Major Field of Study, FY 1979. Executive Summary. Research Note 80-1. ED 185 899  
Grade Distribution. Community Colleges, Fall 1978. ED 186 050  
Methodology and Data for a Study of Higher Education in Agriculture and Home Economics in the South: A User's Guide. Volume 1. ED 186 152

## Maryland

ED 185 646

An Investigation of Strategies of Operation under Conditions of Reduced Funding in Selected Community Colleges.

ED 186 065

### Revision (Written Composition)

Rhetorically-Oriented Revision: The Transformation of Prose.

ED 185 565

### Revolutionary War (United States)

Women in American History: A Series. Book One, Women in the Colonial Era and The Early American Republic 1607-1820.

ED 186 340

### Rhetoric

Inventive Theory and Writing in the Content Areas in Freshman English.

ED 185 570

Justificatory Rhetoric and Institutional Legitimation: A Case Study.

ED 185 604

The Theory and Practice of Genre Criticism: Genre Criticism: The Analysis of Form, Part I; Genre Criticism: Judgment Argument and Evidence, Part II; [and] Genre Criticism: A Topical Bibliography, Part III.

ED 185 607

### Rhetorical Criticism

The Theory and Practice of Genre Criticism: Genre Criticism: The Analysis of Form, Part I; Genre Criticism: Judgment Argument and Evidence, Part II; [and] Genre Criticism: A Topical Bibliography, Part III.

ED 185 607

### Right to Read

Evaluating the Effectiveness of Training and Planning Programs.

ED 185 530

Right-to-Read Program, District of Columbia. Evaluation Report, 1978-1979.

ED 185 529

### RMC Models

Report of the Committee to Examine Issues Related to the Use of the Norm Referenced Model for Title I Evaluation.

ED 186 438

### Role Conflict

Superwoman: Ms. or Myth. A Study of Role Overload. A Report to the National Institute of Education.

ED 185 432

### Role Perception

Educating Teachers for Urban Settings.

ED 186 539

### Runaways

Runaway Children Twelve Years Later: A Follow-Up.

ED 185 489

### Rural Areas

Continuing Medical Education for National Health Service Corps Personnel. A Manual for Program Directors.

ED 185 402

Continuing Medical Education for National Health Service Corps Personnel. A Manual for Providers.

ED 185 400

Continuing Medical Education for National Health Service Corps Personnel. A Manual for Regional Clinical Coordinators.

ED 185 401

Implementation of Title I Parent Advisory Councils in the Rural South.

ED 186 166

Master Plan of Operation for Preparing a Programme of Inter-Related Services for Children in Afghanistan, 1977-1978. Part I: The Framework; Part II: The Programme.

ED 186 097

The Origins of Local News in the U. S. Country Press, 1840s-1970s. Journalism Monographs Number 65.

ED 185 546

Recruitment and Retention of Federally Employed Physicians on the Navajo Indian Reservation.

ED 186 186

The Study Centers and Tutorial Services of the British Open University: A Council on Library Resources Project Report.

ED 185 966

### Rural Connection

You and the Rural Connection: Answers to Your Questions on Rural Career Guidance.

ED 186 183

### Rural Development

Background on Non-Formal Education and Suggestions for the Improvement of Non-Formal Education in Developing Countries and the Dominican Republic.

ED 186 169

Impressions of the Republic of Cuba. A Report by a Delegation of the American Association of State Colleges and Universities to the Republic of Cuba, December 2-10, 1978.

ED 185 895

A Social Report for Carroll County: Social Indicators for Rural Development. Sociology Report 134G.

ED 186 155

### Rural Economics

The Changing Role of Women in the Rural Economy.

ED 186 176

### Rural Education

The Dynamics of Planned Educational Change: Case Studies and Analyses.

ED 186 168

PEECH Outreach Project (A Program for Early Education of Children with Handicaps). 1978-79 Final Report.

ED 185 783

Readi-Reference Packet: Rural Education.

ED 186 167

### Rural Extension

Linking Roles of Education Assistants in the Missouri Small Farm Family Program at the University Resource Subsystem Client Social System Interface.

ED 186 165

### Rural Population

Appalachian Women: A Learning/Teaching Guide.

ED 186 206

Education for Rural Women: A Global Perspective.

ED 186 185

New Directions for Rural Women: A Workshop Leader's Manual.

ED 186 204

Placing Rural Minority Women in Training Situations for Non-Traditional Jobs.

ED 186 203

### Rural Schools

Education...the Name of the Game is ...Cooperation. Area-Wide Plan for 1979-1983.

ED 186 162

The Small Secondary Schools: Mechanisms for Making Less Do More.

ED 186 171

## Schedule of Recent Events

283

The SW & WC ECSU Past and Present.

ED 186 163

Teacher Transfers: A Survey of Teachers' Opinions on Factors Influencing Their Period of Stay in Schools with a Low Staff-Retention Rate. Studies in Rural Education No. 2.

ED 186 159

You and the Rural Connection: Answers to Your Questions on Rural Career Guidance.

ED 186 183

### Rural Urban Differences

Biology and Life Science Classroom Teaching Environment in Southern Alberta.

ED 186 210

Southern Urban Aggies: A Preliminary Look.

ED 186 160

### Rural Women

The Changing Role of Women in the Rural Economy.

ED 186 176

Education for Rural Women: A Global Perspective

ED 186 185

### Safety

Community Living Skills Guide: Additional Activities for Nutrition, Cooking, Homemaking, and Family Living.

ED 185 268

ERIC First Analysis: 1980-81 National High School Debate Resolutions (How Can the Interests of United States Consumers Best Be Served?).

ED 185 635

National Recreational Boating for the Physically Handicapped. Strategy Paper & Annotated Bibliography.

ED 186 409

Sample Safety Test Items. Safety Supplement Number 4.

ED 186 493

### Safety Education

Child Development Associate. Safety for Young Children.

ED 186 136

Directory of Academic Programs in Occupational Safety and Health.

ED 186 241

Firearms Safety: Instructor Manual. Shooting Skills Series.

ED 186 175

Sample Safety Test Items. Safety Supplement Number 4.

ED 186 493

### Salaries

The Desirability of Applying Cost of Education Indices Given the Current State-of-the-Art.

ED 185 673

Salary Report # 1: Principals and Assistant Principals. Administrative Information Report.

ED 185 637

### Salary Wage Differentials

Equal Opportunities for Women.

ED 185 242

### Sampling

Regression Artifacts in Nonequivalent Control Group Designs: An Empirical Investigation of Bias in ANCOVA and Matching Designs.

ED 186 494

### San Jose State Demonstration Preschool Project

A Piagetian Approach to a Mainstreamed Preschool.

ED 186 113

### Scandinavia

Scandia Plan: Collecting Cooperation in the Nordic Countries.

ED 185 985

Social Science Data Bases and Data Banks in the Nordic Countries.

ED 186 000

### Schedule of Recent Events

Life Events, Mental Health Functioning and the Use of Health Care Services by the Elderly.

ED 185 443

**Schemata**

Signaling in Text and Its Interaction with Reader Strategies.

ED 185 511

**Scholarly Journals**

The Economics of Structured Continuing Education in Selected Professional Journals.

- ED 185 566  
Using Science Achievement to Validate Student Teacher Competencies.
- ED 186 261

## Scoring

285

- Science Laboratories
- Analogue Models in the Laboratory Exercise: One Method for Teaching to Think.
- ED 186 253  
A Three Year Project to Improve the Instruction of Physics. Final Evaluation, Project CAUSE, 1976-1979.
- ED 186 238  
Science Materials
- Relationship Between What Is Remembered and Creative Problem Solving Performance in Science Learning.
- ED 186 270  
Science Teachers
- The Effect of Information about Famous Black Scientists on the Closed-Mindedness of Preservice Teachers.
- ED 186 252  
A Study of the Research Priorities As Perceived by Elementary and Secondary School Science Personnel.
- ED 186 264  
Sciences
- Critical Comments on the Gatekeeper Concept in Science and Technology.
- ED 185 969  
Handy Key to Your "National Geographic": Subject and Picture Locator. 14th Edition, 1915-1979.
- ED 186 037  
The Impact of Legislation upon Management.
- ED 186 004  
PASCAL Data Base: File Description and On Line Access on ESA/IRS.
- ED 185 974  
Scientific and Technical Information
- BSO—Broad System of Ordering.
- ED 186 005  
Critical Comments on the Gatekeeper Concept in Science and Technology.
- ED 185 969  
Engineer's Needs for Scientific and Technical Information.
- ED 186 046  
PASCAL Data Base: File Description and On Line Access on ESA/IRS.
- ED 185 974  
UNISIST Seminar on the Education and Training of Users of Scientific and Technological Information (Rome, Italy, October 18-21, 1976). Final Report.
- ED 186 035  
UNISIST Seminar on the Training of Users of Scientific and Technical Information: Analysis and Evaluation of UNISIST Guidelines (Bangkok, Thailand, October 14-15, 1976). Final Report.
- ED 186 036  
Universal Availability of Publications—A Basis of NPLST Activity.
- ED 186 008  
Scientific Concepts
- No Gene Is an Island: Analogical Relations between Science and Literature.
- ED 185 566  
Scientific Research
- Accountability: Restoring the Quality of Partnership.
- ED 185 902  
Expenditures for Scientific Research Equipment at Ph.D. Granting Institutions, FY 1978.
- ED 185 897  
Management for Research in U.S. Universities.
- ED 185 920  
SCILSE Program
- Services in Counseling/Intervention and Life Skills Education (S.C.I.L.S.E.).
- ED 185 781  
Scores
- Kansas Learner Needs Assessment Study. Grades Six and Twelve. Final Report, 1972-1978.
- ED 186 466  
Scoring
- Assessing Writing Proficiencies with Writing Samples in Grades 2-6.
- ED 186 482

**Screening Tests**

Early Identification: End of Year One Follow-Up. Research Report 79-14.

ED 185 779

Early Identification System: Preliminary Report. Research Report 79-04.

ED 185 777

Who Is Gifted? Oregon Series on Talented and Gifted Education.

ED 185 720

**Seals (Mechanics)**

Bearings and Seals. FOS: Fundamentals of Service.

## Subject Index

### Teaching Skills

- The Bilingual Teacher Aide: Competencies and Training. ED 185 824  
Development of a Teacher Preparation Program for Teachers of Visually Handicapped/Severely Handicapped Persons. Final Report. ED 185 782  
Management Engineered Teacher Education. ED 186 381

### Teamwork

- Editorial Groups: A Writing Process. ED 185 562

### Technical Assistance

- Final Report of Technical Assistance Provided to Guarantee Agencies with Recommendations for Further Improving Program Performance. ED 185 955  
Strengthening Technical Assistance to the National Diffusion Network. ED 186 414  
A System for Evaluating the Performance of ESEA Title I Technical Assistance Centers. ED 186 479  
Young Germans Assist the Third World. ED 186 294

### Technical Assistance Centers

- A System for Evaluating the Performance of ESEA Title I Technical Assistance Centers. ED 186 479

### Technical Education

- Impressions of the Republic of Cuba. A Report by a Delegation of the American Association of State Colleges and Universities to the Republic of Cuba, December 2-10, 1978. ED 185 895  
Low-Cost Terminal Alternative for Learning Center Managers. Final Report. ED 186 024

### Technical Institutes

- A Career Counseling Program for a Two Year Technical College. ED 186 083  
A Study on Handicapped Services. ED 186 078

### Technical Occupations

- Directory of Academic Programs in Occupational Safety and Health. ED 186 241

### Technical Writing

- Focus on Technical Writing. ED 185 600  
Importance of...and Methods for...Writing Board Minutes. ED 185 579  
Recycling, Rethinking, and Retraining. ED 185 571  
Who Is Qualified to Teach Business Writing and Technical Writing? ED 185 590

### Technological Advancement

- Energy Systems - Present, Future: Extra Terrestrials, Grades 7, 8, 9, Science. ED 186 282  
Technology: Our Tireless Servant. A Series of Booklets. ED 186 018

### Technology

- Critical Comments on the Gatekeeper Concept in Science and Technology. ED 185 969  
Industrial Arts Test Development, Book III. Resource Items for Graphics Technology, Power Technology, Production Technology. ED 186 442  
Science Education Databook. ED 186 286  
Technology: Our Tireless Servant. A Series of Booklets. ED 186 018

### Telecommunications

- The Role of the Library in an Electronic Society. ED 186 043

### Telephone Instruction

- ICCE Newsletter. Volume 9, Number 1. ED 185 316

### Television

- Empirical Studies on Television Composition. ED 185 615  
The Eye of the Storm. The Seventh Alfred I. duPont-Columbia University Survey of Broadcast Journalism. ED 185 556//

### Television Research

- Empirical Studies on Television Composition. ED 185 615  
Television Viewing and Cultural Indicators: Some Notes on Theory and Measurement. ED 185 608

### Television Surveys

- Public Television Programming Content by Category. Fiscal Year 1978. ED 186 022

### Television Teachers

- Some Influences on Teachers and Teaching in 2030: Projections, Predictions, and a Scenario. ED 185 609

### Television Viewing

- Television Viewing and Cultural Indicators: Some Notes on Theory and Measurement. ED 185 608  
Why College Students Watch Soap Operas. ED 185 627

### Tennessee Technological University

- Teacher Evaluation in Early Childhood Education: Application of a Model. ED 186 110

### Tennis

- Proceedings of a National Symposium on the Racquet Sports. An Exploration of Research Implications and Teaching Strategies (Urbana, Illinois, June 13-16, 1979). ED 186 373

### Tenure

- The Hidden Professoriate. Credentialism, Professionalism, and the Tenure Crisis. Contributions in Sociology, Number 29. ED 185 950//  
Tenure, Alternatives-to-Tenure, and the Courts. ED 185 696

### Test Anxiety

- The Extent to Which Relaxation Techniques Are Taught at Community Colleges in California. ED 186 074

## Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author ——— Norberg, Kenneth D.

Title ——— Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writing and Research Findings, Final Report.

ED 013 371 ——— Accession Number

National Bibliography.

ED 186 011

## Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

**Institution** ————— **Sacramento State College, Calif.**

**Title** ————— **Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writings and Research Findings, Final Report.**

**ED 013 371** ————— **Accession Number**

### Wyoming State Dept. of Education, Cheyenne.

Languages for the World of Work. Final Report.  
ED 185 801

Mathematical Preparation versus Career Aspirations: A Study of Wyoming's 1978 High School Seniors.  
ED 186 263

### Wyoming Univ., Laramie. Science and Mathematics Teaching Center.

Conference Report: Wyoming Invitational Conference on Instructional Applications of Computers.  
ED 186 262

Mathematical Preparation versus Career Aspirations: A Study of Wyoming's 1978 High School Seniors.  
ED 186 263

### Yale Univ., New Haven, Conn. Dept. of Psychology.

The Construct Validity of Aptitude Tests: An Information-Processing Assessment. Technical Report No. 20, (July 1, 1979 through September 30, 1979).

ED 186 453

Zellerbach Family Fund, San Francisco, Calif.

Youth Chance. A Program of the San Francisco Mayor's Office of Employment and Training.

ED 185 359

## Publication Type Index

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Category Code	(040) Dissertations/Theses	Category Name
Title	Iconic Signs and Symbols in Audiovisual Communication, an Analytical Survey of Selected Writings and Research Findings.	Accession Number
		ED 013 371

Problems in Bibliographic Access to Non-Print Materials. Project Media Base: Final Report.

ED 185 968

## Publication Type Index

Project: Informal Learning Program (ILP). Final Report for November 1, 1977 to May 31, 1978.

ED 186 099

Project: Metric Education Today - Henderson County Schools, Henderson, Kentucky. Final Evaluation Report.

ED 186 233

Project STAR Final Evaluation Report (State Technical Assistance Resources Project). Volume I.

ED 185 507

The PTA in the Urban Context: Phase II; An Action Plan.

ED 186 520

Quality Assurance in Mental Health Centers.

ED 185 481

The Relationship between Moral Responses of Elementary School Children and Teachers' Ratings of Moral Conduct.

ED 186 118

Report of the Commissioner of Education, Gordon M. Ambach, to the New York State Legislature on Library Pilot Projects, December 15, 1978 through August 31, 1979.

ED 186 040

A Report to Congress on Migration Submitted by the Appalachian Regional Commission.

ED 186 157

A Research Perspective on World Affairs Education.

ED 186 307

Research Report on Analytical Review of Catalog Use Studies.

ED 186 041

Research Report on an Overview of a Proposed Monitoring Facility for the Large-Scale, Network-Based OCLC On-Line System.

ED 186 042

Results and Analysis of a Computer Assisted Instructional Program in Basic Skills in a Detention Center.

ED 186 027

Results of Computer Based Training.

ED 185 964

Right-to-Read Program, District of Columbia. Evaluation Report, 1978-1979.

ED 185 529

Scripts for Individualized Assessment in Special Education [and] Mental Health and You, or... Organizing Data for the IEP Report.

ED 185 743

The Second Assessment of Art, 1978-79. Released Exercise Set.

ED 186 331

Sourcebook on Research Utilization.

ED 185 874

Special Needs TESL Program, 1978-79, Final Report.

ED 186 559

Standardized Intervention Programs: Preliminary Data on Descriptive Characteristics, Methods of Dissemination and Problems of Implementation.

ED 185 789

Student Grant Assistance in New York State: A Case Study of Federal-State Interaction.

ED 185 961

Study of Selected Educational Institutions and Students Participating in Direct School Lending Under the Federal Insured Student Loan Program: Final Report.

ED 185 953

A System for Evaluating the Performance of ESEA Title I Technical Assistance Centers.

ED 186 479

Teacher Evaluation in Early Childhood Education: Application of a Model.

ED 186 110

Technical Assessment Curriculum Development (TACD). An Assessment Report, Volume I.

ED 185 639

Technical Assessment Curriculum Development (TACD). An Assessment Report, Volume II. (Technical Supplement).

ED 185 640

A Three Year Project to Improve the Instruction of Physics. Final Evaluation, Project CAUSE, 1976-1979.

ED 186 238

Title I.E.S.E.A. Umbrella Program and Impact Aid for District 29. Academic Year 1978-1979. Final Evaluation Report.

ED 186 548

Title I Summer Program, Evaluation Report.

ED 186 546

Toward the Growth of an Integrated Set of Management Information Systems, with Special Emphasis on Short-Range Planning, Long-Range Planning, and Program Evaluation.

ED 185 732

Toward the Restoration of the Liberal Arts Curriculum.

ED 185 877

Trends in Management of ESEA Title I: A Perspective from Compliance Reviews.

ED 186 532

UNISIST Seminar on the Education and Training of Users of Scientific and Technological Information (Rome, Italy, October 18-21, 1976). Final Report.

ED 186 035

UNISIST Seminar on the Training of Users of Scientific and Technical Information: Analysis and Evaluation of UNISIST Guidelines (Bangkok, Thailand, October 14-15, 1976). Final Report.

ED 186 036

Use of Information Systems for Monitoring Mental Health Programs.

ED 185 480

Vocational Evaluation with Adolescents: Description and Evaluation of a Program for Reluctant Learners.

ED 185 392

Westmoreland County Community College Developmental Program Evaluation.

ED 186 053

Writing Level Competencies of Hispanic Students.

ED 186 202

Youth Chance. A Program of the San Francisco Mayor's Office of Employment and Training.

ED 185 359

1979 Evaluation Report-Title I.

ED 186 552

## (143) Reports - Research

Academia's Garbage: Campus/Community Solid Waste Projects.

ED 185 893

Acceptable Practices in Maintaining Personnel Files.

ED 185 698

The Acquisition of More and Less: A Critical Review Kansas Working Papers in Linguistics, Vol. 4, No. 2.

ED 185 831

Adaptation and Evaluation of Minicourses in West Germany.

ED 186 384

Administrative and Research Development Programs for Women and Minorities: The Need and Response.

ED 185 933

Administrative and Staff Relationships in Education: Research and Practice in IGE Schools. Wisconsin Research and Development Center for Individualized Schooling Monograph Series.

ED 186 448

Admissions and Retention Problems of Black Students at Seven Predominantly White Universities.

ED 186 572

Alternatives to Sex-Restrictive Vocational Interest Assessment.

ED 186 480

Analogy and Physics Achievement.

ED 186 207

Analysis of "Babar Loses His Crown." Technical Report No. 169.

ED 185 514

An Analysis of Major Determinants of Teacher Salaries and Their Implications for Educational Expenditures.

ED 185 680

An Analysis of Sex-Role Stereotyping and Sex Bias in Secondary Vocational Education in Kentucky. Final Report.

ED 185 396

An Analysis of Staff Development and Its Effects on Classroom Practice. The South Bay Project.

ED 186 431

An Analysis of the Disturbingness and Acceptability of Behaviors As a Function of Diagnostic Label.

ED 185 748

## (143) Reports - Research

377

An Analysis of the Nature and Difficulty of Reading Tasks Associated with Beginning Office Workers Jobs in the Columbus, Ohio Metropolitan Area.

ED 185 516

An Analysis of the Residence Hall Environment at Indiana University Using an Ecosystem Model.

ED 185 445

Analysis of "The Wonderful Desert." Technical Report No. 170.

ED 185 515

Anaphora: A Cross Disciplinary Approach to Research and Theory.

ED 185 540

An Aptitude-Test Battery for Court-Reporter Training: Initial Results of a Longitudinal Validation Study.

Educational Goals: The Foreign Language Teacher's Response.

ED 185 836//

## Publication Type Index

The Effectiveness of Special Education Classes: A Follow Up Study in a Community Mental Health Center.

ED 185 730

The Effect of Academic Status on Race-Related Differences in Reading Achievement and Reading Progress.

ED 186 518

Effect of Feedback and Training on Utility Usage among Adolescent Delinquents.

ED 185 463

The Effect of Information about Famous Black Scientists on the Closed-Mindedness of Preservice Teachers.

ED 186 252

The Effect of Perceived Similarity/Dissimilarity on Confirmation/Disconfirmation Behaviors: Reciprocity or Compensation?

ED 185 624

Effect of Teacher Clarity on Student Achievement in Science.

ED 186 285

Effect of Teacher Structure, Teacher Affect, Cognitive Level of Questions, Group Size and Student Social Status on Reading Achievement.

ED 185 517

The Effects of Selected Variations in the Components of Formative Evaluation to Improved Academic Performance.

ED 186 489

Elements de correction phonétique du français (Elements of Phonetic Correction of French). Publication B-53.

ED 185 815

Empirical Evidence on Occupational Mobility. Interim Report. Information Series No. 193.

ED 185 347

An Empirical Study of the Use of Item-Item Curves to Detect Item Bias: Preliminary Report.

ED 186 444

Employability and Multi-Cultural Teacher Preparation.

ED 186 405

Energy and the Cultural Community. A Report to the National Endowment for the Arts.

ED 185 670

Engineer's Needs for Scientific and Technical Information.

ED 186 046

Error Analysis As an Aid to Second Language Acquisition.

ED 185 866

ESEA Title I Allocation Policy: Demonstration Study. Results of First Year Implementation, Part 2.

ED 186 564

Estimating the Costs of Educating Handicapped Children: A Resource-Cost Model Approach. Final Report.

ED 185 706

Etude morphosyntaxique du parler acadien de la Baie Sainte-Marie, Nouvelle-Ecosse, Canada (A Morphosyntactic Study of the Acadian Dialect of Baie Sainte-Marie, Nova Scotia, Canada). Publication B.

ED 185 814

Evaluation Competencies of the Classroom Teacher.

ED 186 459

An Evaluation of Textbook Costs, Usage, and Needs.

ED 185 648

"Everyone's Smart in Our Class": Relationships between Classroom Characteristics and Perceived Differential Teacher Treatment.

ED 186 404

Executive Summary of the Analysis Plan for Research on the Effects of Demonstration Title I Compensatory Education Projects.

ED 186 565

Expanding the Comparison Operation in Models of Language Comprehension. Acts of the Colloquium of the Swiss Interuniversity Commission for Applied Linguistics. CILA Bulletin, Number 30.

ED 185 871

Expenditures for Scientific Research Equipment at Ph.D. Granting Institutions, FY 1978.

ED 185 897

An Exploratory Study of Changes in Economic Conditions and Teacher Salaries in Metropolitan Areas.

ED 185 665

An Exploratory Survey of the Attitudes of Black Memphians Toward Funeral Homes, the Funeral Ritual and Preparations for Death. Findings and Analysis.

ED 186 516

The Extent to Which Relaxation Techniques Are Taught at Community Colleges in California.

ED 186 074

Factor Analytic Study of the State-Trait Anxiety Inventory for Children.

ED 186 445

Factors Affecting Medical School Admission Decisions for Minority and Majority Applicants: A Comparative Study of Ten Schools.

ED 186 460

Factors Influencing the Use of Suburban School Grounds for Class-Time Secondary Science Instructional Activities.

ED 186 269

Faculty Compensation 1979-1980: Management Report.

ED 186 088

Family Functioning and Children's Achievements in School.

ED 186 510

Final Report on Minimum Work Expectations of Recent [Nursing] Graduates.

ED 185 367

Findings and Implications of the Thirteen School Study.

ED 185 662

A Five-Year Followup Comparison of Recent and Experienced Graduates from Campus- and Field-Based Teacher Education Programs.

ED 186 429

Focus on Learners' English: A Case Study of Hindi-Speaking First Year Students' Performance.

ED 185 867

Follow-up Conference Assessments Impact Study.

ED 186 417

Formative Evaluation in the Classroom: An Approach to Improving Instruction.

ED 185 754

The Future Labor Force Participation of Older Workers and the Employment Environment.

ED 185 454

Grade Distribution. Community Colleges, Fall 1978.

ED 186 050

Great Art Leads to Joyful Writing.

The Whole Person Book: Toward Self-Discovery & Life Options

ED 185 357

Women's Needs Assessment.

ED 186 084

## Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education* (RIE). Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to its ED number and hence to its location in RIE.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index:

<b>AA</b> —ERIC Processing and Reference Facility	<b>JC</b> —Junior Colleges
<b>CE</b> —Adult, Career, and Vocational Education	<b>PS</b> —Elementary and Early Childhood Education
<b>CG</b> —Counseling and Personnel Services	<b>RC</b> —Rural Education and Small Schools
<b>CS</b> —Reading and Communication Skills	<b>SE</b> —Science, Mathematics, and Environmental Education
<b>EA</b> —Educational Management	<b>SO</b> —Social Studies/Social Science Education
<b>EC</b> —Handicapped and Gifted Children	<b>SP</b> —Teacher Education
<b>FL</b> —Languages and Linguistics	<b>TM</b> —Tests, Measurement, and Evaluation
<b>HE</b> —Higher Education	<b>UD</b> —Urban Education
<b>IR</b> —Information Resources

## NEW THESAURUS TERMS

ERIC has recently issued a completely revised *Thesaurus of ERIC Descriptors*, upon which ERIC's subject indexing is now based.

Nearly 500 new terms not previously listed in this "New Thesaurus Terms" section are included in the revised *Thesaurus*. Additionally, over 1,000 terms listed in earlier editions have been deleted. Postings of most of the deleted terms have been transferred to other terms. These deleted terms are, therefore, carried as UFs in the revised *Thesaurus*. Also, approximately 1,400 new or modified Scope Notes to older terms have been added.

An annotated list of the new terms and other changes to the revised *Thesaurus* would fill many pages, and cannot be included here. They can be consulted in the front matter and various displays of the revised *Thesaurus*.

### ORDERING INFORMATION FOR THE ERIC THESAURUS

Title: *Thesaurus of ERIC Descriptors*  
(Completely Revised 1980)

Order from: Oryx Press  
2214 North Central Avenue at Encanto  
Phoenix, Arizona 85004

Price: \$13.20 (U.S.)  
\$14.40 (Foreign)

The completely revised 1980 *Thesaurus* reflects all changes and additions through Spring 1980. All new terms and other changes to the *Thesaurus* subsequent to the 1980 edition will continue to be listed in this "New Thesaurus Terms" section.

P.O. Box 190 ARLINGTON, VIRGINIA 22210 • (703) 841-1212

## GENERAL INFORMATION

### 1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

### 2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

### 3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

### 4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortages, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

### 5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

### 6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

### 7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

### 8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

### 9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

### 10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

### 11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

### 12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

### 13. PAPER COPY (PC)

A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

### 14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

## OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

### STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$150.00 per month.

### BACK COLLECTIONS (Postage extra)

## ANNOUNCES . . .

A MINI-FILE COLLECTION of the most recent INFORMATION ANALYSIS PRODUCTS 1975-1977 on MICROFICHE . . .

The MINI-FILE contains all of the DOCUMENTS available from EDRS in MICROFICHE FORMAT . . . together with a paper copy of the BIBLIOGRAPHY that lists DOCUMENTS in accession number order, with ED accessions (from RIE). Three indexes are provided: SUBJECT, PERSONAL AUTHOR, and INSTITUTION.

The MINI-FILE covers 574 INFORMATION ANALYSIS PRODUCTS (IAPs) developed by the sixteen (16) ERIC CLEARINGHOUSES. The information is synthesized into research reviews, bibliographies, state of the art studies, interpretive studies on topics of high current interest, and similar documents designed to meet the information needs of users.

### INCLUDED ARE TYPICAL TITLES OF CURRENT INTEREST:

- Recent Trends in Bilingual Education
- Cheating: An Annotated Bibliography
- Women's Athletics
- Teaching Local History
- Assertiveness Training
- Children and Television
- Translation as a Career Option for Foreign Language Majors
- Intercultural Communication
- Energy Investigation for the Classroom
- Alternative Tuition Systems
- Strengthening the Small Rural School
- Adult Learning: Issues and Innovation
- Alternatives to Suspension

## “ORDER ERIC”

### NOW AVAILABLE ON THE ORBIT SYSTEM ..... “ORDER ERIC”

Order your needed ERIC documents “at the terminal” (ORBIT users only). They will be stored during the work day and electronically transmitted to and received by EDRS at the end of the day. Each order is computer processed and quickly filled to meet your timely requirements.

Expedite your demand orders for microfiche or papercopy! This service permits ORBIT users to order “at the terminal” documents from the *Resources in Education* (RIE) portion of the ERIC Data Base that are available\* from the ERIC Document Reproduction Service.

\*Note: EDRS prices for microfiche and hardcopy must be quoted, otherwise the document is not available through this service. Documents that are available can be identified by their ED (not EJ) accession number, and from the PR field.

### RUSH SERVICE

An order placed through the ORBIT system today will be rushed on its way to you within 48 hours.

### LOW COST

A service charge of only 50¢ per document ordered will be added to the current list price, plus applicable shipping charges.

### TIMELY INFORMATION

Demand order requests from EDRS often times are valuable only if the information is received quickly. Now you can count on fast electronic input of your order. Save on lengthy mailing time—your order is speedily transmitted to EDRS, and your requested information is sent rapidly to you.

### HERE ARE SOME IMPORTANT DETAILS CONCERNING “ORDER ERIC” . . .

- |                          |  |
|--------------------------|--|
| <b>Supplier:</b>         | ERIC Document Reproduction Service (EDRS)<br>P.O. Box 190<br>Arlington, VA 22210   |
| <b>Document Forms:</b>   | Microfiche (MF) Papercopy (PC)   |
| <b>Deposit Accounts:</b> | Deposit accounts are not required, but preferred—you should establish one with a minimum of \$200. Contact EDRS directly to set up your account. |
| <b>Rates:</b>            | A service charge of 50¢ per document ordered will be added to the current price of the document plus expedited shipping charges.                 |

EDRS requires that users carefully follow the instructions given below to ensure correct interpretation and processing of terminal orders:

- Be sure a microfiche (MF) or papercopy (PC) price is quoted in the document resume. Resumes without a quoted EDRS price means that the document is not available from EDRS and cannot be ordered through “ORDER ERIC”.
- EDRS does not supply documents with EJ numbers. These are citations from Current Index to Journals in Education (CIJE).
- Enter your name or company name on one line after BILL TO. Enter your address on separate lines just as it should appear on the shipping label. You may enter up to 5 lines. Make sure you enter your city, state, and zip code on the last line.
- If you want your order shipped to a different address than given in the BILL TO section, enter that address in SHIP TO. Be sure to include the city, state, and zip code.
- Documents ordered in microfiche (MF) will automatically be shipped via airmail, unless otherwise specified. Documents ordered in papercopy (PC) will be shipped via United Parcel Service, unless otherwise specified. If you have special shipping instructions, enter SHIP VIA: and the information on one line. For example, SHIP VIA: UPS BLUE LABEL. All documents included on one invoice will be shipped the same way.
- If you have a deposit account, enter CHARGE DEPOSIT ACCOUNT: and the number.
- If you want a purchase order number to appear on the invoice and shipping label, enter MY P.O. NUMBER IS: and the number(s) for each purchase order you wish to include.
- For each item you wish to order, enter on one line: the ED number, the document form (MF or PC), number of copies you are ordering (a number and the word COPY or COPIES). Each line must begin with the letters ED and there must not be any blanks or commas in the ED number.

(See Sample Entry on reverse side)

# ERICTAPES ERICTOOLS

## HAVE A COMPUTER?

### LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) data base is available on magnetic tape in a variety of options from ORI, Inc. Under special authorization from the National Institute of Education, U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CJIE*, so that the files may be kept current.

The basic files are available in the ERIC (IBM 360 OS) Format. These files include the complete resume, (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including

Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high-quality, 9-track tapes (600-1200, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as \$50.

## NO COMPUTER?

### LOOK AT ERICTOOLS!

For organizations without access to a computer.\* ERICTOOLS provide manual multi-viewpoint access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as \$10 for some individual documents.

\*Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: **ERICTAPES/ERICTOOLS (301) 656-9723**  
ORI, Inc. 4833 Rugby Avenue, Suite 303, Bethesda, Maryland 20014

## ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education (RIE)*. They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for *RIE*; these information analysis products are also announced in *Resources in Education*.
